(A) Date of Rochester's incorporation as a city. The city charter occupying eighty-seven pages was included in this number.

(B) Decrease.

(C) In 1867 and 1868 there was a very imperfect canvass made.

(D) In 1877-78 the freight yards and division headquarters of the N. Y. C. & H. R. R. were removed to Syracuse, which caused several thousand of the employees of the road and their families to change their residence to that city. Except for this, there would probably have been a slight increase in names in those years notwithstanding the extreme business depression of the time.

(E) Of this increase, 1,249 represented deaths and removals, which were this year given for the first time, leaving the net increase 692.

(F) Enlarged to octavo size, and printed in double columns for the first time.

PREFACE.

THE thirty-fifth volume of the Rochester Directory is placed before the public at a somewhat later date than usual. It was the latter part of June before the last of the street numbering was finished, since which time every effort has been made to push the work forward to completion at the earliest possible date.

Every one in Rochester is well aware that the streets of the city have been very generally renumbered the present season, nearly every street in the old wards (1 to 14) having received new numbers, and a few in the fifteenth and sixteenth wards, the latter being for the most part the thoroughfares running out from the centre of the city. The changes in numbers necessitated, by this really beneficent work, have been the cause, and for a time must continue to be the cause of considerable trouble and annoyance. It will take time as in all changes for things to become adjusted to the new order, but it is a great satisfaction to know that the work has been intelligently done, and that few cities now have a better system of street numbers than has Rochester. The publishers of the Directory are especially pleased in the matter, as it will not only greatly enhance the value of the information which has usually been included in the Directory, but will enable them at an early day to further serve their customers and the public, by adding important improvements to the book, which they have long had in view, but which the wretched condition of the street numbers has rendered impracticable. The large amount of extra labor which has been involved in making the present book can readily be surmised, and it is not necessary to speak of it further here. In changing so many numbers to which people had not yet become habituated,—often not being sure of their own house number—and from the frequent mixing of the old and new numbers, there has been an unusual opportunity for errors to creep in, and though great care has been taken to avoid such, it can hardly be hoped but that some will have occurred.

The last of the renumbering (except for the north side of Clifford street and the west side of Childs street, which were numbered in July after the Directory went to press), was done on the 27th of June, and every name in the Directory is given with its new number, excepting those belonging on the two streets above mentioned, and all on them except names beginning with A, B, C, or D.

On several streets the numbers were again changed after having been put upon the houses, owing to changes made in the plans for renumbering, and on such streets the canvass has been made a second time to secure the latest numbers.

Probably never in the history of the city have there been indications of such great and at the same time solid and permanent growth as appear at the present time on every hand, and it can but be of the liveliest interest to every public spirited citizen to observe how rapidly Rochester is marching forward to the position of a first class city.

The growth of the Directory is so closely connected with that of the city that it may be of interest in this semi-centennial year to notice the changes that have occurred in the book during the past fifty years. On the opposite page is printed a list of the several volumes of the Directory from the beginning of its publication in 1827, with date, pages, number of names, &c., of each, and it is interesting to note the changes from one issue to another, and especially to see how greatly of late years the increase of names has been accelerated. Since the present publishers have made it, a period of sixteen years, the book has trebled in size, having grown from a volume of 240 pages in 1868, to one of 920 pages the present year, the number of names increasing from 14,671 in 1868 to 43,221 the present year.

POPULATION OF UNITED STATES.

U. S. CENSUS OF 1870 AND 1880.

The thirteen original states are given first, in the order of their ratification of the Federal Constitution Then follow the twenty-five remaining states, in the order of their admission into the Union. The territories are in the order of their organization. Indian Territory and Alaska are unorganized territories.

Capitals follow their states.

THE METRIC SYSTEM.

LEGALIZED BY ACT OF CONGRESS, JULY 27, 1866.

MEASURE OF LENGTH.

Metric denomination and value.		Equivalent in denominations in use.
Millimeter	1-1000 of a meter.	.0394 inch.
Centimeter	1-100 of a meter.	.3937 inch.
Decimeter	1-10 of a meter.	3.937 inches.
Meter	1 meter.	39.37 inches.
Dekameter	10 meters.	393.7 inches.
Hektometer	100 meters.	328 feet 1 inch.
Kilometer	1,000 meters.	.62137 mile, or 3,280 feet 10 inches.
Myriameter	10,000 meters.	6.2137 miles.

MEASURE OF CAPACITY.

Metric denomination and value.			Equivalent in denominations in use.	
Name.	Number of Liters.	Equivalent in Cubic measure.	Dry measure.	Liquid or Wine Measure.
Milliliter	1-1000	1 cubic centimeter.	.061 cubic inch.	.27 fluid dram.
Centiliter	1-100	10 cubic centimeters.	1.6102 cubic inch.	.338 fluid ounce.
Deciliter	1-10	1-10 of a cubic decimet'r	6.1022 cubic inches.	.845 gill.
Liter (Leeter)	1	1 cubic decimeter.	.908 quart.	1.0567 quarts.
Dekaliter	10	10 cubic decimeters.	9.08 quarts.	2.6417 gallons.
Hektoliter	100	1-10 of a cubic meter.	2 bushels and 3.35 pecks.	26.417 gallons.
Kiloliter	1,000	1 cubic meter.	1.308 cubic yards.	264.17 gallons.

WEIGHT.

Metric denomination and value.			Equivalent in denominations in use.
Name.	Number of Grams.	Weight of what quantity of water at maximum density.	Avoirdupois weight.
Milligram	1-1000	1 cubic millimeter.	.0154 grain.
Centigram	1-100	10 cubic millimeters.	.1543 grain.
Decigram	1-10	1-10 of a cubic centimeter.	1.5432 grains
Gram	1	1 cubic centimeter or 1 milliliter.	15.432 grains.
Dekagram	10	10 cubic centimeters or 1 centiliter.	.3527 ounce.
Hektogram	100	1 deciliter.	3.5274 ounces.
Kilogram	1,000	1 liter.	2.2046 pounds.
Myriagram	10,000	10 liters.	22.046 pounds.
Quintal	100,000	1 hektoliter.	220.46 pounds.
Metric ton	1,000,000	1 cubic meter or 1 kiloliter.	2204.6 pounds.

For Square Measure the square of long measure is used. For measuring land—in the place of acre—the **centar** which is one square meter, equivalent to 1,550 square inches; the **ar** which is 100 square meters, equivalent to 119.6 square yards; the **hectar** which is 10,000 square meters, equivalent to 2.47114 acres, are used.

For Cubic Measure the cube of long measure is used; **ster** is used as a measure of wood in place of cord.

The mill, cent, dime, dollar, and eagle of U. S. money exactly illustrate the decimal system of the metric measures, —the mill, cent, dime, corresponding with the milli, centi, deci of the metric system.

Abbreviations.—For meter, liter, and gram, the small initial letter is used, viz: m. l. g.; each division deci, centi, milli, also is abbreviated by using the small initial letters d. c. m.; but each multiple, deka, hekto, kilo, myria, is abbreviated by using the capital initial letter D. H. K. M.

Equivalents.—1 inch equals .0254 meter, or about 2 1-2 centimeters; 1 foot equals .3048 meter, or about 30 centimeters; 1 yard equals .9144 meter, or ab. 10-11 of a meter; 1 mile 1609 meters, or ab. 1.6 kilometers.

1 U. S. liquid quart equals .946 liter, or a little less than 1 liter; 1 U. S. dry quart equals 1.101 liters; 1 U. S. gallon equals 3.785 liters, or about 3.8 liters; 1 U. S. bushel equals 35.24 liters, or about 4-11 of a hektoliter.

1 avoirdupois ounce equals .02835 kilogram, or a little less than 30 grams; 1 Troy and apothecaries ounce equals .03110 kilogram, or a little more than 30 grams; 1 avoirdupois pound equals .45359 kilogram, or about 5-11 of a kilogram; 1 long ton—2240 pounds—equals 1016.05 kilograms, or about 1 metric ton.

Basis of the system.—1. The unit of length, the meter, is the ten millionth part of a quadrant of the meridian of Paris, being 39.37 inches, nearly. 2. The unit of surface, the ar, is the square of ten meters, or a hundred square meters. 3. The unit of capacity, the liter, is a cube whose edge is a tenth of a meter. 4. The unit of weight, the gram, is the weight of a cube of rain-water, whose edge is an hundredth of a meter. From these four primary units all others are derived according to the decimal scale.

Where used.—The system is adopted by the following countries: in exclusive use in France, Germany, Austria, Belgium, Holland, Italy, Spain, Portugal, Norway, Switzerland, Roumania, Brazil; in partial use in Denmark, Greece, Argentine Confederation, Venezuela; legalized, but not in general use, in the United States, Great Britian, Russia, Norway, Sweden, Turkey, Mexico, Chili, Costa Rica, Equador, Peru, U. S. of Columbia, Uruguay. In Sweden compulsory law will take effect in 1889.

STREET DIRECTORY.

The streets of the city have been renumbered the present year, nearly all of the former numbers being changed. By the system adopted, **even numbers** are invariably upon the north or east side of streets, and **odd numbers** upon the south or west side.

Streets on the east side of the river which run east and west are usually numbered from the **west toward the east**; those on the west side from the **east toward the west.**

Streets north of Main street which run north and south are usually numbered from the **south toward the north**; those south of Main street from the **north toward the south.** In a general way, it may be said that in Rochester, as in all cities, streets usually begin to number from the end of the street nearest the centre of the city.

The Street Directory gives the location of each street, and shows what other streets or places run from it or across it, with the number at which they intersect.

From this list the location of any number on a street can be easily ascertained. As, for instance, wishing to know at what part of State street No. 425 comes: look at State street and you find that Brown street runs from 391 left side, and Jay street from 473, showing that No. 425 comes on the left side of State street between Brown and Jay. When streets are not numbered, dashes are used to indicate whether the street runs from the right, left, or crosses.

ABBREVIATIONS.—Av. avenue; ct. court; e. east; fr. from; n. north; pl. place; pk. park; s. south; sq. square; w. west; wd. ward.

INDEX OF STREET NUMBERS.

FROM NEW TO OLD, OR OLD TO NEW.

NEW NUMBER FIRST IN ROMAN; OLD NUMBER FOLLOWS IN ITALIC.

The streets of the City were officially renumbered in April and May of the present year and the following is an index from the new numbers to the old, and also from the old to the new, of all streets in the city as they appear upon the plans in the office of the City Surveyor.

The new number is in all cases given first, and the old number follows it in italic figures. When two roman numbers precede an italic number, the two have been given to the building in place of the one former number. This occurs where there are several entrances to a building, all of which formerly went by one number, but which now have a number given to each entrance, and notably in cases of stairways to blocks which formerly were never numbered but now invariably have a number.

In a few instances two or more new numbers, which have been officially assigned to a lot have been given, although only one of them has actually been placed upon the building.

All old numbers will be found given upon each street, but there were many buildings that formerly were not numbered, and the new numbers to such will not be found in these lists.

After the name of a street, the word street is omitted.

Achilles—12,*1*; 14,*3*.

Ackerman—This street has not been renumbered.
