EXPLANATORY NOTE.

In the House Directory residences and places of business, designated by their street numbers, are arranged in numerical order upon their respective streets, those upon the right side of a street appearing first, followed by those upon the left side. The streets are arranged in alphabetical order.

On streets that are not numbered ciphers have been substituted in place of a street number.

Names of all adult members of a family are stated against their proper street number, other members than the head of the family being designated by the letter b at the end of the line. When there are several families in one house, the families on the lower floor are given first with the boarders, if any, followed in regular order by the families upon the floors above, the respective floors being designated by the italic figures *1*, *2*, *3*, *4*, etc., and the basement by an italic *0*.

Business places are denoted by the street number printed in heavy faced figures.

When a person's place of business and residence are at the same place, it is indicated by the use both of heavy faced figures for the street number and of the abbreviation h. at the end of the line.
