For measuring land—in the place of acre—the **centar** which is one square meter, equivalent to 1,550 square inches; the **ar** which is 100 square meters, equivalent to 1196.1 square yards; the **hectar** which is 10,000 square meters, equivalent to 2.471 acres are used.

**For Cubic Measure** the cube of long measure is used; **ster** is used as a measure of wood in place of cord.

The mill, cent, dime, dollar and eagle of U. S. money exactly illustrate the decimal system of the metric measures,—the mill, cent, dime, corresponding with the milli, centi, deci of the metric system.

**Abbreviations.**—For meter, liter and gram, the small initial letter is used, viz: m. l. g.; each division deci, centi, milli, also is abbreviated by using the small initial letters d. c. m.; but each multiple, deka, hekto, kilo, myria, is abbreviated by using the capital initial letter D. H. K. M.

**Equivalents.**—1 inch equals .0254 meter, or about 2 1-2 centimeters; 1 foot equals .3048 meter, or about 30 centimeters; 1 yard equals .9144 meter, or ab. 10-11 of a meter; 1 mile 1609. meters, or ab. 1.6 kilometers.

1 U. S. liquid quart equals .946 liter, or a little less than 1 liter; 1 U. S. dry quart equals 1.101 liters; 1 U. S. gallon equals 3.785 liters, or about 3.8 liters; 1 U. S. bushel equals 35.24 liters, or about 4-11 of a hektoliter.

1 avoirdupois ounce equals .02835 kilogram, or a little less than 30 grams; 1 Troy and apothecaries ounce equals . 03110 kilogram, or a little more than 30 grams; 1 avoirdupois pound equals .45359 kilogram, or about 5-11 of a kilogram; 1 long ton—2240 pounds—equals 1016.05 kilograms, or about 1 metric ton.

**Basis of the system.**—1. The unit of length, the meter, is the ten millionth part of a quadrant of the meridian of Paris, being 39.37 inches, nearly. 2. The unit of surface, the ar, is the square of ten meters, or a hundred square meters. 3. The unit of capacity, the liter, is a cube whose edge is a tenth of a meter. 4. The unit of weight, the gram, is the weight of a cube of rain-water, whose edge is an hundredth of a meter. From these four primary units all others are derived according to the decimal scale.

**Where used.**—The system is adopted by the following countries: in exclusive use in France, Germany, Austria, Belgium, Holland, Italy, Spain, Portugal, Norway, Switzerland, Roumania, Brazil; in partial use in Denmark, Greece, Argentine Confederation, Venezuela; legalized, but not in general use in the United States, Great Britian, Russia, Norway, Sweden, Turkey, Mexico, Chili, Costa Rica, Equador, Peru, U. S. of Columbia, Uraguay. In Sweden compulsory law will take effect in 1889.

# STREET DIRECTORY.

The Street Directory gives the location of each street, and shows what other streets or places run from it or across it, with the number at which they intersect.

From this list the location of any number on a street can be easily ascertained. As, for instance, wishing to know at what part of State street No. 265 comes, look at State street and you find that Brown street runs from 255 left side, and Jay street from 293, showing that No. 265 comes on the left side of State street between Brown and Jay. As many of the streets are not numbered, dashes, have been used in the place of the missing numbers, to indicate whether the street runs from the right, left, or crosses.

# THE ART OF LEARNING FRENCH

WITH CONVERSATIONAL FLUENCY.

## ORAL SYSTEM—NO GRAMMAR.

BY PROF. ETIENNE LAMBERT,

**Room 128 Powers' Building.**

THE Oral System, as perfected by PROF. LAMBERT, is based on the immutable laws of NATURE. Every one is aware of the amazing facility with which a child, thrown among foreigners, learns their language, though relying entirely on its own untutored intelligence. The same NATURAL PROCESS is here presented *to adults*, but immensely simplified and improved, since art, selecting judiciously its own material, takes the place of that confusion which at first besets the unguided learner. By this system EVERY LESSON TELLS, and the pupil is initiated in the mysteries of the spoken language at the outset, without being impeded by that multitude of abstract rules and exemptions on the very threshold. Those who have been studying French for years through grammars and the old routine, know how little available their hard earned lessons are for the understanding of the spoken language. Yet all confess that the knowledge of French is perfectly useless in society unless one can speak it and understand it when addressed.

The ORAL SYSTEM familiarizes the pupil with pronunciation and the leading idioms from the very start, whilst the mechanism of the whole language is gradually revealed by ANALOGY, and proceeding from the known to the unknown, from practice to theory, the grammar is deduced from previously acquired constructions and is therefore based upon FACTS and practically learned. No efforts have been

spared by Prof. L. to facilitate the attainment of a language, which in these days of progress, no one advancing the smallest pretension to a liberal education should remain ignorant of.

Another invaluable feature of this new system is, that all the lessons are learned and practiced *with* the Professor, thereby avoiding all the difficulties and fatal mistakes of pronunciation so apt to mislead the beginner. All that the Professor asks of his pupils is, *not to forget* what they have *already* learned, and to practice *that* constantly.

A series of DRAMATIC FRENCH READINGS, with idiomatic version, will be given in connection with the course in order to enlarge the pupils' vocabulary in the easiest and shortest way, by

*Cultivation of the Ear,*

so as to enable them to attain such a command of the language as to *understand it when spoken*, and daily add to their stock while conversing and reading.

TERMS:

$10 per quarter of Twenty Lessons, in class, $10 for course of twenty Dramatic French Readings, with English version; or, $35 for course of 100 Lessons and Readings.

(*No preliminary knowledge of French needed to master it by this system*).

**The Rochester Gas Light Co. supplies all the Gas used on the WEST side of the Genesee River.**

**PRICE, $2.75 per thousand feet, or if paid before the 10th of the month, $2.50.**

### TO CONSUMERS.

The following explanations will enable any person to understand the process of ascertaining the Registry of the Gas Meter, and by making observations every day, or at short intervals, to satisfy himself that the meter registers with uniform accuracy the amount of gas that passes through it. The following diagrams show the "Indexes" seen on the front of every meter.

EXPLANATION OF INDEX.

The figure or division on the different faces of the index indicates as follows, viz: On the Right Hand Face, *Hundreds*, as 100, 200, 300 cubic feet, &c.; on the Middle Face, *Thousands*, as 1,000, 2,000, 3,000 cubic feet, &c.; on the Left Hand Face, *Tens of Thousands*, as 10,000, 20,000, &c., and in this way multiplying by 10 for every additional face.

TO TELL THE STATE OF THE METER.—Look at the *left hand* face of the Index and set down the figure of *least* value next the hand, which on the diagram is **1**. Next look at the *middle* face, and as before set down the figure of the *least* value next the hand, which on the diagram is **3**. Next upon the *right hand* face, take the same relative figure, which is **5**, and you have the figures 1, 3, 5, to which last figure add two ciphers to represent hundreds, and the sum 13,500, is shown to be the present state of the meter. If a previous observation has been taken, subtract the state of the meter at *that* time from the *present* state, and you have the amount consumed in the interval.

☞ *In case of the failure of the gas from any cause, immediate notice of the fact should be left at the Company's Office.*

With patent Double Bearing Agraffe, that secures absolute firmness, power and purity of tone, and keeps the piano in tune, warranted, longer than any other piano. Also, concave form of name-board, which gives the front an elegant appearance, and preserves it from being scratched with the finger nails.

See them! Hear them! The GEO. WOODS & CO.'S ORGANS, which for purity of tone, brilliant musical effects and elegant designs are unequalled. We invite the musical public to call and examine these three remarkable instruments, acknowledged by the most eminent musicians (including such artists as Thalberg, Gottschalk, Vieuxtemps, Maretzek, Strakosch, Rubenstein, Pease, Madame Lucca and Kellogg), to be the most perfect, the most reliable and the most durable made. The difference between our low and high-priced instruments is in the workmanship of the case alone; the quality of the interior mechanism being the same in all. We buy only for cash, and at special low rates, and are thus enabled to sell at prices exceedingly low, when the quality is considered, and on very accommodating terms.

We are manufacturing a pipe that is indestructible from the action of all the elements, impervious to the action of acids, gases and steam, all of which are found in corporation sewers. These pipes are made from a combination of superior clays, which by powerful machinery are rendered uniform throughout—pressed from a steam press, under a pressure of *sixty-three tons* upon each pipe, it is made very compact; and burned in close kilns at a very intense heat, it becomes a thoroughly vitrified and iron-like body. All prominent architects, builders, and all those who have investigated the subject of sewerage, have become convinced that properly burned clay pipe is the only material suitable for underground drainage, and that the sewer and drain pipe manufactured from cement, carbonated stone, and other similar materials, are liable to and do *decay*, *disintegrate* and become *worthless*, as has been many times proved by the officials in many cities.

These vitrified pipe are suitable for well tubing; are *better* than *stone* or *brick*, because cheaper, more durable, and can be made perfectly tight.

☞ We deliver our Pipe within the city limits free of charge, and in good condition.

# Steam Damper Regulator.

**The Only Reliable Pressure Governor in the World.**

(Patented May 1, 1877.)

**Patented in United States, Canada, Great Britain, Prussia, Russia, Belgium, France, Austria.**

*This Regulator is especially adapted for Low Pressure Heating and Cooking Apparatus.*

## LAFLIN MANUFACTURING COMPANY,

SOLE OWNERS AND MANUFACTURERS,

*WESTFIELD, - - MASS.*

The advantages derived by having a reliable Damper Regulator attached are too well understood by people using Steam Boilers to be reiterated; but in presenting this to the public, we know we are introducing an instrument that combines *all* the good qualities of the others, with none of their faults; in fact, a perfect Steam Damper Regulator, and one that *cannot be excelled*—it being frictionless, having no working joints—and the simplest, therefore the best. All using it acknowledge its superiority.

The Regulator is so made as to weigh the pressure, and is so sensitive that the slightest variation in pressure works upon it. The Damper can be attached to either end of the Regulator, or the Damper in flue attached at one end, and the Draft door to the other.

The pressure of steam on the boiler is regulated to a fraction, by moving the Poise out or in on the Beam; it being more sensitive than the most delicate Steam Gauge.

It is the only reliable, and the most accurate Damper Regulator ever used,—working on an entirely new principle, and it can never get out of order.

Great saving in fuel.
Needs no oil or attention.
It is worked entirely by weight, and not by pressure.
No Diaphragms to wear out or burst.
No interruption in working from rust.
A great preventive of Boiler explosions.
None ever used without giving perfect satisfaction.
The Cheapest Steam Damper Regulator ever introduced.

# The Johnston Harvester Company,

## *OF BROCKPORT, N. Y.*

THIS COMPANY have for many years built and put upon the markets of the world their peculiar MACHINES FOR CUTTING GRASS and HARVESTING GRAIN which have from the beginning taken the FIRST place among all those manufactured for that purpose.

They have been tested by scientific Machinists, by casual observers, and by practical Farmers, and always with one and the same result, namely,

**The First Award for Excellence of Workmanship and Quality of Work Done in the Field. At the Centennial Exhibition at Philadelphia in 1876, they were awarded the Highest Honors.**

They stand AT THE HEAD of the whole family of Harvesting Machines, and although attempts have been made to copy them by many other manufacturers, still the ***Original*** stands superior to all and cannot be displaced.

In 1874, they took ***TWENTY GOLD MEDALS,*** and nearly as many MEDALS OF HONOR from fields in foreign countries alone, and the FIRST AWARD, being a Gold Medal, at the Cincinnati Exposition.

In 1875, they were equally successful in bringing home Gold Medals, besides the far better encomiums of the ROYAL AGRICULTURAL SOCIETY OF FRANCE, which ordered one of them tested through the ***whole season*** instead of for a short trial of a few days, and then examined by expert machinists, who pronounced it the BEST MADE, MOST DURABLE and MOST EFFICIENT MACHINE IN THE FIELD.

In 1876, they won TWENTY-FOUR Gold Medals as First Prizes at actual trials in the field. In 1877 they swept the field on prizes, and obtained the most flattering testimonials wherever tried.

## FARMERS AND DEALERS

who wish to obtain the BEST will certainly examine the Machines of ***The Johnston Harvester Company,*** before purchasing elsewhere.

Their Machines consist as follows:

**The Wrought Iron Harvester,** for Reaping.

**The No. 1 Combined Machine,** a most superb and complete Machine, for either Mowing or Reaping, built in the most substantial manner and having two cutter-bars; one for reaping and one for mowing.

**The No. 2 Combined Machine,** a smaller Machine, having only one bar, which is used for both reaping and mowing, and is of very light draft.

**The Wrought Iron Mower,** which is pronounced by those who have used it, the best Mower in the market.

**The Continental,** which weighs only about 550 pounds and is yet sufficient for any work, being very light, but of great strength—a very valuable Machine for small farmers.

Every pains taken to please our customers, and all our Machines WARRANTED.

# TYPE-METAL RELIEF PLATES.

# A SUPERIOR SUBSTITUTE FOR WOOD-CUTS

## AT MUCH LOWER PRICES.

**These Relief Plates** are engraved by photo-chemical means; are mounted on blocks type-high ready for use on any ordinary press, and will wear longer than the common stereotype plates.

They have a perfectly smooth printing surface, and the lines are *as deep*, as even, and as sharp as they could possibly be cut by hand.

**Electrotypes** may be made from them in the same manner as from wood-cuts.

**Copy.**—The engraving is done either from prints or pen-drawings. Almost all kinds of prints can be re-engraved directly from the copy, provided they be in *clear, black lines* or stipple, and on *white*, or only slightly tinted paper.

**Of all Photographs,** pencil-sketches, and designs in pale lines, drawings must be made with thoroughly *black* ink on *smooth, white* paper before they can be engraved. The drawings should usually be made twice the length and twice the width of the plates desired. We keep a corps of artists to do this work in the best manner. Photographs or tintypes taken in the usual way, and of any convenient size, are suitable for our use.

**Change of Size.**—Wood-cut prints of the coarser kind may often be reduced to half their lineal dimensions, while others will admit of very little reduction, and some of none at all.

Most lithographic and steel-plate prints will admit of no reduction.

Very fine prints of any kind may be *enlarged* moderately without detriment.

Any prints which cannot be satisfactorily reduced or enlarged, may be *redrawn* and thus brought to any desired size.

In all cases of reduction or enlargement, the relative proportions remain unchanged.

**Proofs.**—Whenever desired, we will furnish tintype proofs of drawings made by us, for approval or correction, before engraving. A printed proof is furnished with each plate.

**Time.**—We cannot usually engage to fill an order for a single plate in less than from three to six days; larger orders will require longer time.

**Prices.**—Size alone seldom determines the price of a plate; hence we cannot furnish a scale of prices by the square inch for miscellaneous engraving. But to publishers whose orders are regularly given, and with considerable uniformity as to the kind of work, we can give an average inch rate.

**Estimates** will be promptly furnished when desired. That these may be definite and correct, the copy to be used—whether print, photograph, sketch, or drawing—should always be submitted for our examination, together with a distinct statement of the size of plate wanted, and of any other details to be observed.

## We Employ no Agents or Canvassers.

**Terms.**—To insure attention, all orders must be accompanied by an advance of half the price charged, the balance to be paid on delivery.

## Plates sent by Express will be C. O. D.

Other arrangements can be made only by parties of known responsibility, or when satisfactory New-York references are given.

Small plates will be sent by mail upon receipt of price and postage.

Remittances must be made either BY DRAFTS ON NEW-YORK or by postal money orders—payable to the order of Photo-Engraving Company—or by registered letters.

Parties sending us *checks on local banks* will be charged with the cost of collection.

**Electrotyping and Printing.**—We have recently added to our establishment excellent facilities for making electrotypes, and also two power presses specially fitted for printing the larger class of plates in the finest manner.

**Artificial Light.**—We have just introduced this most important facility, which enables us to prosecute our work *in cloudy weather*, and to push forward hurried orders *in the night*.

**References.**—Our plates are now used by the principal publishers in this city, and by most of the leading houses in every state in the Union.

# Merchant's Gargling Oil!

## A Liniment for Man and Beast.

"Whether for use on man or beast, Merchant's Gargling Oil will be found an invaluable Liniment, and worthy of use by every resident in the land. We know of no proprietary medicine or article now used in the United States which shares the good will of the people to a greater degree than this. Yellow wrapper for animal and white for human flesh."—*N. Y. Independent.*

Extract from a letter from G. H. Simmonds, Unionville, Ia., July 24, 1873.—"I am selling more Gargling Oil than all the liniments put together, and I am keeping twelve different kinds. I think it is the best remedy for horseflesh in existence, and can say it without fear of successful contradiction."

Extract from a letter from Shoemaker & Co., Bloomington, Ind., Sept, 17th, 1873.—"It is the popular horse liniment in this country."

Extract from a letter from Geo. A. Snell, Braman's Corners, N. Y., Aug. 9th, 1873.—"I sell more of your Gargling Oil than of all other liniments combined, and have seen it used on horses and cattle with good effect when others have failed."

Extract from a letter from Pattee & Co., Derry, N. H., Aug. 26th, 1873.—"We think your Gargling Oil one of the best articles for what it is recommended that we have ever used or sold."

Extract from a letter from Snowdon & Gibbs, Concordia, Kan., July 28th, 1873.—"We sell more of your Gargling Oil than of any liniment we keep."

## Merchant's Gargling Oil as a Family Liniment.

We are now, and have been for some years, preparing the Oil free from stain, to be used as a common liniment for human flesh, extracting the coloring ingredient which has heretofore rendered it objectionable. This Oil possesses all the medicinal properties of that prepared with the dark tinge for horses and cattle, and will be found one of the best remedies for all purposes where a liniment is required that has ever been manufactured.

From J. K. Fisher, Uniontown, Pa., Jan. 31, 1857.—"Your Gargling Oil is doing much better here than formerly, since its virtues have become known; and the bottles put up for family use, without stain, are much sought for."

☞ The Gargling Oil called "Family Oil," although prepared intentionally for human flesh, answers as well for beasts; *vice versa*, the dark Oil answers as well for human flesh, only it will stain and discolor the skin, but not permanently. Yellow wrapper for animal and white for human flesh.

## Merchant's Gargling Oil as an Internal Remedy.

Merchant's Gargling Oil is a diffusible stimulant and carminative. It can be taken internally when such a remedy is indicated, and is a good substitute for pain killers, cordials and anodynes. For Cramps or Spasms of the Stomach, Colic, Asthma, or Internal Pain, the dose may be from fifteen to twenty drops, on sugar, or mixed with syrup in any convenient form, and repeated at intervals of three to six hours. Yellow wrapper for animal and white for human flesh.

**MERCHANT'S GARGLING OIL** is the Standard Liniment of the United States. Established 1833. Large size, $1; medium, 50c.; small, 25c.; small size for family use, 25c. Manufactured at Lockport, N. Y., by M. G. O. Co., and sold by all druggists.
