AN ESTIMATE OF POPULATION.

THE large increase of names in the directory for the past two years, together with the unusual activity in building in every part of the city, lead to considerable inquiry as to the amount of present population. The canvass for the directory is conducted on the same system and is made largely by the same canvassers each year, and undoubtedly presents one of the best means of estimating the population of the city from year to year. The proprietors of the directory from a careful and conservative computation, think it is safe to say that the present population of the city approximates very closely to 101,600 souls.

For Square Measure the square of long measure is used. For measuring land—in the place of acre—the **centar** which is one square meter, equivalent to 1,550 square inches; the **hectar** which is 100 square meters, equivalent to 119.6 square yards; the **hectar** which is 10,000 square meters, equivalent to 2,471.4 acres, are used.

For Cubic Measure the cube of long measure is used; **ster** is used as a measure of wood in place of cord. The mill, cent, dime, dollar, and eagle of U. S. money exactly illustrate the decimal system of the metric measures,—the mill, cent, dime corresponding with the mill, centi, deci of the metric system.

Abbreviations.—For meter, liter, and gram, the small initial letter is used, viz: m, l, g; each division deci, centi, milli, also is abbreviated by using the small initial letters d, c, m.; but each multiple, deka, hekto, kilo, myria, is abbreviated by using the capital initial letter D, H, K, M.

Equivalents.—1 inch equals .0254 meter, or about 2 1-2 centimeters; 1 foot equals .3048 meter, or about 30 centimeters; 1 yard equals .9144 meter, or ab. 10-11 of a meter; 1 mile 1609 meters, or ab. 1.6 kilometers.

1 U. S. liquid quart equals .946 liter, or a little less than 1 liter; 1 U. S. dry quart equals 1.101 liters; 1 U. S. gallon equals 3.785 liters, or about 3.8 liters; 1 U. S. bushel equals 35.24 liters, or about 4-11 of a hektoliter.

1 avoirdupois ounce equals .02835 kilogram, or a little less than 30 grams; 1 Troy and apothecaries ounce equals .03110 kilogram, or a little more than 30 grams; 1 avoirdupois pound equals .45359 kilogram, or about 5-11 of a kilogram; 1 long ton—2240 pounds—equals 1016.05 kilograms, or about 1 metric ton.

Basils of the system.—1. The unit of length, the meter, is the ten millionth part of a quadrant of the meridian of Paris, being 39.37 inches, nearly. 2. The unit of surface, the ar, is the square of ten meters, or a hundred square meters. 3. The unit of capacity, the liter, is a cube whose edge is a tenth of a meter. 4. The unit of weight, the gram, is the weight of a cube of rain-water, whose edge is an hundredth of a meter. From these four primary units all others are derived according to the decimal scale.

Where used.—The system is adopted by the following countries: in exclusive use in France, Germany, Austria, Belgium, Holland, Italy, Spain, Portugal, Norway, Switzerland, Roumania, Brazil; in partial use in Denmark, Greece, Argentine Confederation, Venezuela; legalized, but not in general use, in the United States, Great Britain, Russia, Norway, Sweden, Turkey, Mexico, Chili, Costa Rica, Equador, Peru, U. POSTAL RATES AND REGULATIONS.

Mail matter is divided into four classes: *First*, Written matter; *Second*, Periodical publications; *Third*, Miscellaneous printed matter; *Fourth*, Merchandise.

FIRST-CLASS MATTER embraces letters, postal cards, and all matter wholly or partly in writing and all matter sealed or closed against inspection.

FORWARDING LETTERS FREE.

Prepaid and free letters are forwarded from one Post Office to another, at the request of the persons addressed, without additional postage. A letter which has been once delivered at its address can be remailed from the same office to which it was originally addressed to a new address without the prepayment of additional postage if it has not been opened. Drop-letters, when forwarded by mail to another Post Office, must be prepaid at three cents per half ounce. No mail matter, except letters or postal cards, can be forwarded to a new address except on prepayment of postage by stamps at regular rates.

SECOND-CLASS MATTER.

Regular publications.—This class includes all newspapers, periodicals, or matter exclusively in print, and regularly issued at stated periods from a known office of publication or news-agency, except regular publications designed primarily for advertising purposes, or for free circulation, or for circulation at nominal rates. Second-class matter can only be mailed by publishers or news-dealers. Postage two cents a pound or fraction thereof. Weight of packages not limited.

REGISTRATION.

Mail matter of all kinds can be registered to any part of the United States and Territories and to foreign countries, on payment of a registration fee of 10 cents. All registration fees must be paid by stamps, and the postage on all registered matter must also be prepaid by stamps. The public are desired by the Post Office never to send money or valuable articles in unregistered letters. Postmasters at all Post Offices are obliged to register letters and packages when requested to do so.

THE ROCHESTER DIRECTORY OFFICE IS AT NO. 114 POWERS' BUILDINGS.

THIRD-CLASS MATTER.

Mail matter of the third class embraces books (printed and blank), transient newspapers and periodicals, circulars and other matter wholly in print, proof-sheets and corrected proof sheets and manuscript copy accompanying the same, hand-bills, posters, chromo-lithographs, engravings, envelopes with printing thereon, heliotypes, lithographic and stereoscopic views, with title written thereon, printed blanks, printed cards, and reproductions from circulars or other matter produced by the electric pen, papyrograph, metallograph, hectograph, chirograph, or copygraph processes; and postage shall be paid thereon at the rate of one cent for each two ounces or fractional part thereof.

Upon matter of the third class, or upon the wrapper inclosing the same, the sender may write his own name or address with the word "from" above and preceding the same, and in either case may make simple marks intended to designate a word or passage of the text to which it is desired to call attention. There may be placed upon the cover or blank leaves of any book or of any printed matter of the third class a simple manuscript dedication or inscription that does not partake of the nature of a personal correspondence.

The "nature of a personal correspondence" referred to in the preceding section cannot be ascribed to the following, viz.: 1st. To the signature of the sender or to the designation of his name, of his profession, of his rank, or the place of origin, and of the date of dispatch. 2d. To a dedication or mark of respect offered by the sender. 3d. To the figures or signs merely intended to mark the passage or a text in order to call attention to them. 4th. To instructions or requests to postmasters to notify the sender in case of the nondelivery of matter, so that he may send postage for its return. Lastly, to annotations or corrections made upon proofs of printing or musical compositions, and relating to the text or to the execution of the work.

All packages of matter of the third class must be so wrapped, with open sides or ends that their contents may be readily examined by postmasters.

The limit of weight of packages is four pounds, except in cases of single volumes of books in excess of said weight, and books and documents published or circulated by order of Congress, or official matter emanating from any of the departments of the government, or from the Smithsonian Institution.

FOURTH-CLASS MATTER.

Mailable matter of the fourth class embraces blank cards, card-board and other flexible material, flexible patterns, letter envelopes and letter-paper without printing thereon, merchandise, models, ornamented paper, sample cards, samples of ores, metals, minerals, seeds, cuttings, bulbs, roots, scions, drawings, plans, designs, original paintings in oil or water colors, and any other matter not included in the first, second, or third classes, and which is not in its form or nature liable to destroy, deface or otherwise damage the contents of the mail bag, or harm the person of any one engaged in the postal service. Postage thereon, one cent for each ounce or fractional part thereof.

Other articles of the fourth class which, unless properly secured, might destroy, deface, or otherwise damage the contents of the mail bag, or harm the person of any one engaged in the postal service, may be transmitted in the mails when they conform to the following conditions: 1st. They must be placed in a bag, box or removable envelope made of paper, cloth or parchment. 2d. Such bag, box or envelope must again be placed in a box or tube made of metal or some hard wood, with sliding clasp, or screw lid. 3d. In case of articles liable to break, the inside box, bag or envelope, must be surrounded by sawdust, cotton, or spongy substance. 4th. In case of sharp-pointed instruments, the points must be capped or encased, so that they may not by any means be liable to cut through their inclosure; and where they have blades, such blades must be bound with wire, so that they shall remain firmly attached to each other. 5. The whole must be capable of easy inspection. Seeds or other articles not prohibited, which are liable, from their form or nature, to loss or damage, unless specially protected, may be put up in sealed envelopes, provided such envelopes are made of material sufficiently transparent to show the contents clearly, without opening.

Upon any package of matter of the fourth class the sender may write or print his own name and address, preceded by the word "from," and there may also be written or printed the number and names of the articles inclosed; and the sender thereof may write or print upon, or attach to any such articles, by tag or label, a mark, number, name, or letter, for purpose of identification.

The limit of weight of packages is four pounds.

The Rochester Gas Light Co. supplies all the Coal Gas used on the WEST side of the Genesee River.

PRICE, \$1.10 per thousand feet; or if paid before the 10th of the month, \$1.00.

TO CONSUMERS.

The following explanations will enable any person to understand the process of ascertaining the Registry of the Gas Meter, and by making observations every day or at short intervals, to satisfy himself that the meter registers with uniform accuracy the amount of gas that passes through it. The following diagrams show the "Indexes" seen on the front of every meter.

EXPLANATION OF INDEX.

The figure or division on the different faces of the index indicates as follows, viz: On the Right Hand Face, *Hundreds*, as 100, 200, 300 cubic feet, &c.; on the Middle face, *Thousands*, as 1,000, 2,000, 3,000 cubic feet, &c.; on the Left Hand Face, *Tens of Thousands*, as 10,000, 20,000, &c., and in this way multiplying by 10 for every additional face.

TO TELL THE STATE OF THE METER.—Look at the *left hand* face of the Index and set down the figure of *least* value next the hand, which on the diagram is 1. Next look at the *middle* face, and as before set down the figure of the *least* value next the hand, which on the diagram is 3. Next upon the *right hand* face, take the same relative figure, which is 5, and you have the figures 1, 3, 5, to which last figure add two ciphers to represent hundreds, and the sum 13,500 is shown to be the present state of the meter. If a previous observation has been taken subtract the state of the meter at *that* time from the *present* state, and you have the amount consumed in the interval.

 In case of the failure of the gas from any cause, immediate notice of the fact should be left at the Company's office.
