(A) Date of Rochester's incorporation as a city. The city charter occupying eighty-seven pages was included in this number.

(B) Decrease.

(C) In 1867 and 1868 there was a very imperfect canvass made.

(D) In 1877-78 the freight yards and division headquarters of the N. Y. C. & H. R. R. were removed to Syracuse, which caused several thousand of the employees of the road and their families to change their residence to that city. Except for this, there would probably have been a slight increase in names in those years notwithstanding the extreme business depression of the time.

(E) Of this increase, 1,249 represented deaths and removals, which were this year given for the first time, leaving the net increase 692.

(F) Enlarged to octavo size, and printed in double columns for the first time

For measuring land—in the place of acre—the **centar** which is one square meter, equivalent to 1,550 square inches; the **ar** which is 100 square meters, equivalent to 119.6 square yards; the **hectar** which is 10,000 square meters, equivalent to 2.47114 acres, are used.

For Cubic Measure the cube of long measure is used; **ster** is used as a measure of wood in place of cord.

The mill, cent, dime, dollar, and eagle of U. S. money exactly illustrate the decimal system of the metric measures, — the mill, cent, dime, corresponding with the milli, centi, deci of the metric system.

Abbreviations.—For meter, liter, and gram, the small initial letter is used, viz: m. l. g.; each division deci, centi, milli, also is abbreviated by using the small initial letters d. c. m.; but each multiple, deka, hekto, kilo, myria, is abbreviated by using the capital initial letter D. H. K. M.

Equivalents.—1 inch equals .0254 meter, or about 2 1-2 centimeters; 1 foot equals .3048 meter, or about 30 centimeters; 1 yard equals .9144 meter, or ab. 10-11 of a meter; 1 mile 1609 meters, or ab. 1.6 kilometers.

1 U. S. liquid quart equals .946 liter, or a little less than 1 liter; 1 U. S. dry quart equals 1.101 liters; 1 U. S. gallon equals 3.785 liters, or about 3.8 liters; 1 U. S. bushel equals 35.24 liters, or about 4-11 of a hektoliter.

1 avoirdupois ounce equals .02835 kilogram, or a little less than 30 grams; 1 Troy and apothecaries ounce equals .03110 kilogram, or a little more than 30 grams; 1 avoirdupois pound equals .45359 kilogram, or about 5-11 of a kilogram; 1 long ton—2240 pounds—equals 1016.05 kilograms, or about 1 metric ton.

Basis of the system.—1. The unit of length, the meter, is the ten millionth part of a quadrant of the meridian of Paris, being 39.37 inches, nearly. 2. The unit of surface, the ar, is the square of ten meters, or a hundred square meters. 3. The unit of capacity, the liter, is a cube whose edge is a tenth of a meter. 4. The unit of weight, the gram, is the weight of a cube of rain-water, whose edge is an hundredth of a meter. From these four primary units all others are derived according to the decimal scale.

Where used.—The system is adopted by the following countries: in exclusive use in France, Germany, Austria, Belgium, Holland, Italy, Spain, Portugal, Norway, Switzerland, Roumania, Brazil; in partial use in Denmark, Greece, Argentine Confederation, Venezuela; legalized, but not in general use, in the United States, Great Britian, Russia, Norway, Sweden, Turkey, Mexico, Chili, Costa Rica, Equador, Peru, U. S. of Columbia, Uruguay. In Sweden compulsory law will take effect in 1889.

STREET DIRECTORY.

The Street Directory gives the location of each street, and shows what other streets or places run from it or across it, with the number at which they intersect.

From this list the location of any number on a street can be easily ascertained. As, for instance, wishing to know at what part of State street No. 425 comes: look at State street and you find that Brown street runs from 391 left side, and Jay street from 473, showing that No. 425 comes on the left side of State street between Brown and Jay.

Or, going up West avenue, suppose you wish to take a cross street so as to call at 312 Troup street; on examination, (see Troup) you find that 306 Troup is at the corner of Reynolds street; hence, by passing from West avenue through Reynolds street to Troup, you are near the desired number 312. When streets are not numbered, dashes are used to indicate whether the street runs from the right, the left, or crosses.

Even numbers are invariably upon the north or east side of streets, and **odd numbers** upon the south or west side.

Streets on the east side of the river which run east and west are usually numbered from the **west toward the east**; those on the west side from the **east toward the west.**

Streets north of Main street which run north and south are usually numbered from the **south toward the north**; those south of Main street from the **north toward the south.** In Rochester, as in all cities, street numbers usually begin at the end of the street nearest the centre of the city.

Number of miles of streets in city, 220¼ miles; alleys, 16¼ miles.

THE CIVIL SERVICE.

For State Board of Commissioners, see page 773.

By enactment of the legislature, all positions in the public service of Rochester (excepting those filled by public election, the heads of departments, and positions under the city treasurer, or the Board of Education) must be filled from applicants who have successfully passed an examination by a board of civil service examiners.

The boards, consisting of three members, are appointed by the mayor, and not more than two members can be of the same political party.

Whenever a position is to be filled the examining board will notify the applicants on record, or such number of them as can be conveniently examined, to appear for examination, and appointments must be made by the appointing power from the three soldiers or sailors serving in the late war, who shall have the highest standing in such examination. If an insufficient number of soldiers or sailors pass the examination, others are then eligible. The civil service does not affect removals from office. The civil service is classified as follows:

Schedule B, Part 1. Includes all officers and members of the Police and Fire Departments.

Schedule B, Part 2. Includes subordinate officers, clerks, and assistants not included in Part 1.

Laborers and day workmen are not subject to examination.

EXMAMINING BOARDS.

Schedule B, Part 1. Darrell D. Sully, *Chairman;* Henry W. Mathews, Jonas P. Varnum.

Schedule B, Part 2. Wm. F. Peck, *Chairman;* Lewis P. Ross, David Hays. *Secretary*, George A. Benton.

EXECUTIVE COMMITTEE.

LOUIS CHAPIN, Chairman. *DON A. WATSON,*
THOS. C. MONTGOMERY, *PATRICK BARRY.*

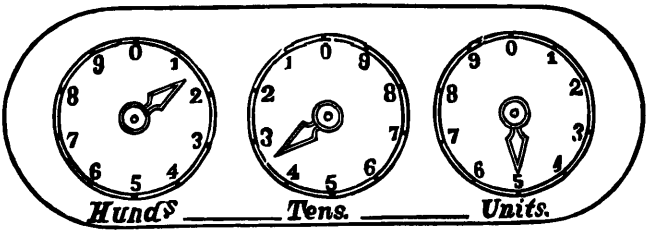

The Rochester Gas Light Co. supplies all the Coal Gas Used on the WEST side of the Genesee River.

PRICE, $2.00 per thousand feet; or, if paid before the 10th of the Month, $1.80.

TO CONSUMERS.

The following explanations will enable any person to understand the process of ascertaining the Registry of the Gas Meter, and by making observations every day, or at short intervals, to satisfy himself that the meter registers with uniform accuracy the amount of gas that passes through it. The following diagrams show the "Indexes" seen on the front of every meter.

EXPLANATION OF INDEX.

The figure or division on the different faces of the index indicates as follows, viz: On the Right Hand Face, *Hundreds*, as 100, 200, 300 cubic feet, &c.; on the Middle Face, *Thousands*, as 1,000, 2,000, 3,000 cubic feet, &c.; on the Left Hand Face, *Tens of Thousands*, as 10,000, 20,000, &c., and in this way multiplying by ten for every additional face.

TO TELL THE STATE OF THE METER.—Look at the *left hand* face of the Index, and set down the figure of *least* value next the hand, which on the diagram is *1*. Next look at the *middle* face and as before set down the figure of the *least* value next the hand, which on the diagram is *3*. Next upon the *right hand* face, take the same relative figure, which is *5*, and you have the figures 1, 3, 5, to which last figure add two ciphers to represent hundreds, and the sum 13,500 is shown to be the present state of the meter. If a previous observation has been taken, subtract the state of the meter at *that* time from the *present* state, and you have the amount consumed in the interval.

☞ In case of the failure of the gas from any cause, immediate notice of the fact should be left at the Company's office, No. 62 Mumford Street. At night ring the carriage bell on Mumford Street.

NEW LEDGER PATTERN,

— ON —

BYRON WESTON'S LEDGER PAPER.

(Nothing Like it. Have Used it 20 Years.)

MONTH.	DAY.	ITEM.	PAGE.	DEBIT.			CREDIT.			PAGE.	MONTH.	DAY.	ITEM
June.	1	To Mdse,	305		6 8 4	20	1	0 9 0	26	489	June	29	By Cash.

	9	" "	367		6 9	43							
	26	" "	477		2 7	47							
				1	0 9 0	26	1	0 9 0	26				

POINTS OVER THE OLD WAY.

First—The figures are in the center of the page, and not in the roll of the book or outside edge.

Second—Debit and Credit are side by side, not considerable ways apart, as in old way.

Third—In balancing an account, two lines only are drawn, and there are no lines running diagonally across the page, and every account can be neatly closed as above.

Fourth—No person to my knowledge has returned to the old system who has once used this style. We have them in stock of Weston's paper, pages 8½x14 and 10½x16, in all thicknesses, and all full pages or divided pages.

We endeavor to make first-class work, and shall always try to please all who may call on us.

First-class or no sale.

Yours,

JOHN C. MOORE,

North St. Paul Street, cor Andrews,

ROCHESTER, N. Y.

EXTRA DEBIT LEDGER,

On BYRON WESTON'S LEDGER PAPER (which always satisfies).

Arthur K Staunton.

Aug.	3	10 lb. Sugar 75. 5 Raisins 75, 1 Tea 75,	8	2	25	Sept.	4	Cash	495	1 5	42
	8	1 Broom 30. 1 Coffee 37. 1 Ginger 20,	36		87						
	30	Bbl. Flour 7 00, 27 Ham 498, 2 Eggs 32,	360	1 2	30						

In a retail business, most of the Ledger entries are made up of several smaller charges, which are brought into the Ledger as one item. By itemizing on the Ledger as above, all further reference to the Day-book is avoided, and an account can be drawn off in a much shorter time. To accommodate these entries, the above ruling has been devised, and the credit, not needing much space, has been greatly shortened, thus giving several times more room on the debit side than on the credit side.

We have a very fine *stock* of Blank Books of our own make, and claim we cannot be excelled in the manufacture of Blank Books. Have several thousand patterns, which we will gladly show anyone who will call on us. Yours,

JOHN C. MOORE,

The Company is now selling **over 75,000 bbls. per annum,** and as a matter of fact is the only Brewery which can show such progress in so short a time. The great and growing increase in its sales is the best evidence of the excellent quality and purity of its product. Recognizing its worth, **Physicians,** almost without exception, recommend its use to their patients, and as a consequence family trade has grown to immense proportions.

In connection with our Brewery, we have established a

Bottling Department,

And are ready to promptly fill orders for our

EXPORT BOHEMIAN AND STANDARD LAGER BEERS.

Our uptown depot is at

:: MR. E. M. HIGGINS', ::

Nos. 6 and 8 State Street, and 235 East Main Street,

And orders left with Mr. Higgins will receive the same prompt attention as if sent direct to the Bottling Works.

Our goods can also be had at the East Side Establishment of

MR. GEO. L. LUTT, 222 EAST MAIN STREET.

Knowing that the superior quality of our goods is our best advertisement, and assuring our customers of their getting only a pure, healthful and nutritious article, we hope for a liberal share of public patronage.

Very respectfully,

ROCHESTER BREWING CO.

We are manufacturing a pipe that is indestructible from the action of all the elements, impervious to the action of acids, gases, and steam, all of which are found in corporation sewers. These pipes are made from a combination of superior clays, which, by powerful machinery, are rendered uniform throughout—pressed from a steam press, under a pressure of *sixty-three tons* upon each pipe, it is made very compact; and burned in close kilns at a very intense heat, it becomes a thoroughly vitrified and iron-like body. All prominent architects, builders, and all those who have investigated the subject of sewerage, have become convinced that properly burned clay pipe is the only material suitable for underground drainage, and that sewer and drain pipe manufactured from cement, carbonated stone, and other similar materials, are liable to and do *decay*, *disintegrate*, and become *worthless*, as has been many times proved by the officials in many cities.

These vitrified pipe are suitable for well tubing; are *better than stone or brick*, because cheaper, more durable, and can be made perfectly tight.

☞ We deliver our pipe within the city limits Free of Charge, and in good condition.

CHURCH WINDOWS, HOUSE DECORATIONS,

Doors, Hall Lamps, Fire Screens, Window Blinds; also for curved surfaces, as Dome Lights, Globes, Cylinders, etc., etc., and all classes of Interior Mosaic Decoration.

Samples of the work may be seen at above office, and Designs and Estimates will be furnished on application.

The Company does not handle the Cheapest grade of work, but competes with the old-style leaden work, on jobs ranging in cost from $2.00 upwards. The finer the work the less its cost compared with old-style work. No saloon, bar-room, or tenement work handled by the Company.

Some of the points necessary to call attention to, are: First, a movable back and front, which throws off the spring in the leg. Second, it has an advantage in the use of the foot, hanging or unhanging, i. e., it can be used with a hanging foot, and it can be used the old way by putting the foot into the boot and then on to the tree. Third, it is simple, durable, solid, and easy to work.

PRESENTED WITH COMPLIMENTS OF

PUBLISHED BY
DE LAND & CO. FAIRPORT, N.Y.

UNIVERSITY OF ROCHESTER, N. Y., MAY 7, 1881.

I have, critically tested a sample of DeLand & Co,'s Chemical Baking Powder, also the separate materials of which it is composed, and find that this powder contains only Cream of Tartar and Bi-Carbonate of Soda, both of excelient quality, and combined in the proper proportions.

A. LATTIMORE, Chemist.

Central Library of Rochester and Monroe County · City Directory Collection · 1887

DeLand's Cap Sheaf Soda and Saleratus

has been used for over thirty-five years, with the best of success as it is pure. It is never adulterated.

TO THE FRONT!

DeLand's Chemical Baking Powder

never fails, is never adulterated, makes fine, sweet and wholesome pastry. As it contains nothing but Cream of Tartar and Bi-Carb. Soda, it will go farther and is more economical. It contains no Starch, Flour, Alum, Ammonia or any adulteration whatever. Try it and you will use no other.

THE
JOHNSTON HARVESTER CO.,
OF BATAVIA, N Y

THIS COMPANY have for many years built and put upon the markets of the world their peculiar MACHINES FOR CUTTING GRASS and HARVESTING GRAIN, which have from the beginning taken the FIRST place among all those manufactured for that purpose. They have been tested by Scientific Machinists, by casual observers, and by Pratical Farmers, and always with one and the same result, namely:

The First Award for Excellence of Workmanship and Quality of Work Done in the Field.

FARMERS IN WESTERN NEW YORK will find it greatly to their advantage to purchase SELF-BINDERS of the JOHNSTON HARVESTER COMPANY, in preference to those made at a distance. The Binders manufactured by this Company are made of the best material and in the best manner. This has given the preference to their machines in all parts of the world. We believe the intelligence of Farmers in Western New York is sufficient to show them that first-class material and workmanship cannot be produced for the prices at which poor machines are hawked about. If they want a GOOD MACHINE for their work, we can supply them to much better advantage than any of our competitors; and we only ask those who need them to try our Machines before purchasing elsewhere.

Farmers desiring this Excellent Machine need to send their orders early for 1888, to insure their supply.

Our Binders use TWINE ONLY, and are Warranted to do First-Class Work.

Every pains taken to please our customers.
Send for Circulars, and address
