DEATHS.—The date of death and age of all citizens whose names appeared in the Directory, dying during the past twelve months, are recorded against the name in the proper alphabetical place in the present book. The same has been done each year since 1876, so that the several volumes of the Directory contain a mortuary list for that period, of great value for reference.

(A) Date of Rochester's incorporation as a city. The city charter occupying eighty-seven pages was included in this number.

(B) Decrease.

(C) In 1867 and 1868 there was a very imperfect canvass made.

(D) In 1877-78 the freight yards and division headquarters of the N. Y. C. & H. R. R. were removed to Syracuse, which caused several thousand of the employees of the road and their families to change their residence to that city. Except for this, there would probably have been a slight increase in names in those years notwithstanding the extreme business depression of the time.

(E) Of this increase, 1,249 represented deaths and removals, which were this year given for the first time, leaving the net increase 692.

(F) Enlarged to octavo size, and printed in double columns for the first time.

HOLIDAYS.

There are eight public holidays:—New Years Day, 1st of January; Washington's Birthday, 22d February; Memorial Day, 30th May; Independence Day, 4th of July; Labor Day, 1st September; Tuesday following the first Monday in November or day of State election; any day appointed by the Governor of the State or President of the United States, as a day of public fast or thanksgiving; Christmas Day, 25th of December; also every Saturday, from 12 o'clock noon until 12 o'clock midnight.

When a public holiday falls upon Sunday, the following Monday becomes a public holiday.

Notes falling due on Saturday, Sunday, or any public holiday, are payable on the business day next succeeding.

Accepted drafts should be treated as "paper made and dated" at time of acceptance.

The 30th of April, 1889, 100th anniversary of the inauguration of Washington, has been made a legal holiday, and notes falling due on that day must be paid on the 29th of April.

Arbor Day, the first Saturday after May 1st, is not a public holiday.

For School Holidays and Vacations, see Public Schools in Index of Contents.

SOME REASONS WHY NAMES ARE NOT FOUND IN THE DIRECTORY.

Many persons fail to find names on account of not knowing where to look for them. A slight variation in spelling will place names almost exactly alike, far apart. For instance—such names as Brown, Browne, Braun, though pronounced the same, and really the same name, are found in different places in the Directory. So, also, of Conner, Connor, Connors, O'Connor, and many others, each has its own place.

The pronunciation of foreign names usually varies from the pronunciation of such names in English. For instance—if an Irishman pronounces his name Agan, it is probably spelled Eagan or Egan. So, Mar, spelled Meagher or Mahr; Fay, spelled Fahy, etc. In names of nearly all European languages, the sounds of the vowels are usually as follows:—a is ah, e is ā, i is ē, o is o, u is oo.

In German names, ei and ai are pronounced like ī, ie like ē, au like ow, eu like oi; j is pronounced like y, w nearly like v, dt and th like t, etc. Thus, a name which is pronounced Yack, may be spelled Jack; Young, Jonge; Roiter, Reuter; Keefer, Kiefer; Line, Lein; and they must be looked for as spelled, not as pronounced.

The letters ä, ö, ü, in a German name, are equivalent to ae, oe, ue, and the name *should be looked for* as if the e appeared.

Owing to the difficulty which foreigners find in getting their names properly pronounced by the Americans with whom they come in contact, they frequently make very decided changes in them; taking sometimes an English name which sounds similar to theirs—as Gilbert for Gebhardt, Rice for Reis, Cole for Kohl, etc.; sometimes translating their names, as Blanc changed to White, Stein to Stone, etc.

Sometimes, members of the same family spell their names in two or three different ways; as Ballantyne, Ballantine, Ballintine; sometimes men bear two or three names, being known by one in their family, another in the shop, and perhaps still another among their associates.

To find a name, you *must know how to spell it.*

For measuring land—in the place of acre—the **centar** which is one square meter, equivalent to 1,550 square inches; the **ar** which is 100 square meters, equivalent to 119.6 square yards; the **hectar** which is 10,000 square meters, equivalent to 2.47114 acres, are used.

For Cubic Measure the cube of long measure is used; **ster** is used as a measure of wood in place of cord.

The mill, cent, dime, dollar, and eagle of U. S. money exactly illustrate the decimal system of the metric measures,—the mill, cent, dime, corresponding with the milli, centi, deci of the metric system.

Abbreviations.—For meter, liter, and gram, the small initial letter is used, viz: m. l. g.; each division deci, centi, milli, also is abbreviated by using the small initial letters d. c. m.; but each multiple, deka, hekto, kilo, myria, is abbreviated by using the capital initial letter D. H. K. M.

Equivalents.—1 inch equals .0254 meter, or about 2 1-2 centimeters; 1 foot equals .3048 meter, or about 30 centimeters; 1 yard equals .9144 meter, or ab. 10-11 of a meter; 1 mile 1609 meters, or ab. 1.6 kilometers.

1 U. S. liquid quart equals .946 liter, or a little less than 1 liter; 1 U. S. dry quart equals 1.101 liters; 1 U. S. gallon equals 3.785 liters, or about 3.8 liters; 1 U. S. bushel equals 35.24 liters, or about 4-11 of a hektoliter.

1 avoirdupois ounce equals .02835 kilogram, or a little less than 30 grams; 1 Troy and apothecaries ounce equals .0810 kilogram, or a little more than 30 grams; 1 avoirdupois pound equals .45359 kilogram, or about 5-11 of a kilogram; 1 long ton—2240 pounds—equals 1016.05 kilograms, or about 1 metric ton.

Basis of the system.—1. The unit of length, the meter, is the ten millionth part of a quadrant of the meridian of Paris, being 39.37 inches, nearly. 2. The unit of surface, the ar, is the square of ten meters, or a hundred square meters. 3. The unit of capacity, the liter, is a cube whose edge is a tenth of a meter. 4. The unit of weight, the gram, is the weight of a cube of rain-water, whose edge is an hundredth of a meter. From these four primary units all others are derived according to the decimal scale.

Where used.—The system is adopted by the following countries: in exclusive use in France, Germany, Austria, Belgium, Holland, Italy, Spain, Portugal, Norway, Switzerland, Roumania, Brazil; in partial use in Denmark, Greece, Argentine Confederation, Venezuela; legalized, but not in general use, in the United States, Great Britian, Russia, Norway, Sweden, Turkey, Mexico, Chili, Costa Rica, Equador, Peru, U. S. of Columbia, Uruguay. In Sweden compulsory law will take effect in 1889.

STREET DIRECTORY.

The Street Directory gives the location of each street, and shows what other streets or places run from it or across it, with the number at which they intersect.

From this list the location of any number on a street can be easily ascertained. As, for instance, wishing to know at what part of State street No. 425 comes: look at State street and you find that Brown street runs from 391 left side, and Jay street from 473, showing that No. 425 comes on the left side of State street between Brown and Jay.

Or, going up West avenue, suppose you wish to take a cross street so as to call at 312 Troup street; on examination, (see Troup) you find that 306 Troup is at the corner of Reynolds street; hence, by passing from West avenue through Reynolds street to Troup, you are near the desired number 312. When streets are not numbered, dashes are used to indicate whether the street runs from the right, the left, or crosses.

Even numbers are invariably upon the north or east side of streets, and **odd numbers** upon the south or west side.

Streets on the east side of the river which run east and west are usually numbered from the **west toward the east**; those on the west side from the **east toward the west.**

Streets north of Main street which run north and south are usually numbered from the **south toward the north**; those south of Main street from the **north toward the south.** In Rochester, as in all cities, street numbers usually begin at the end of the street nearest the centre of the city.

Number of miles of streets in city, 220¼ miles; alleys, 16¼ miles.

The Rochester Gas Light Co. supplies all the Coal Gas Used on the WEST side of the Genesee River.

PRICE, $2.00 per thousand feet; or, if paid before the 10th of the Month, $1.80.

TO CONSUMERS.

The following explanations will enable any person to understand the process of ascertaining the Registry of the Gas Meter, and by making observations every day, or at short intervals, to satisfy himself that the meter registers with uniform accuracy the amount of gas that passes through it. The following diagrams show the "Indexes" seen on the front of every meter.

EXPLANATION OF INDEX.

The figure or division on the different faces of the index indicates as follows, viz: On the Right Hand Face, *Hundreds*, as 100, 200, 300 cubic feet, &c.; on the Middle Face, *Thousands*, as 1,000, 2,000, 3,000 cubic feet, &c.; on the Left Hand Face, *Tens of Thousands*, as 10,000, 20,000, &c., and in this way multiplying by ten for every additional face.

TO TELL THE STATE OF THE METER.—Look at the *left hand* face of the Index, and set down the figure of *least* value next the hand, which on the diagram is **1**. Next look at the *middle* face and as before set down the figure of the *least* Value next the hand, which on the diagram is **3**. Next upon the *right hand* face, take the same relative figure, which is **5**, and you have the figures 1, 3, 5, to which last figure add two ciphers to represent hundreds, and the sum 13,500 is shown to be the present state of the meter. If a previous observation has been taken, subtract the state of the meter at *that* time from the *present* state, and you have the amount consumed in the interval.

☞ In case of the failure of the gas from any cause, immediate notice of the fact should be left at the Company's office, **No 62 Mumford Street.** At night ring the carriage bell on Mumford Street.

POINTS OVER THE OLD WAY.

First—The figures are in the center of the page, and not in the roll of the book or outside edge.

Second—Debit and Credit are side by side, not considerable ways apart, as in old way.

Third—In balancing an accouut, two lines only are drawn, and there are no lines running diagonally across the page, and every account can be neatly closed as above.

Fourth—No person to my knowledge has returned to the old system who has once used this style. We have them in stock of Weston's paper, pages 8½x14 and 10½x16, in all thicknesses, and all full pages or divided pages.

We endeavor to make first-class work, and shall always try to please all who may call on us.

First-class or no sale.

EXTRA DEBIT LEDGER,

On BYRON WESTON'S LEDGER PAPER (which always satisfies).

Arthur H. Staunton.

In a Retail business, most of the Ledger entries are made up of several smaller charges, which are brought into the Ledger as one item. By itemizing on the Ledger as above, all further reference to the Day-book is avoided, and an account can be drawn off in a much shorter time. To accommodate these entries, the above ruling has been devised, and the credit, not needing much space, has been greatly shortened, thus giving several times more room on the debit side than on the credit side.

We have a very fine *stock* of Blank Books of our own make, and claim we cannot be excelled in the manufacture of Blank Books. Have several thousand patterns, which we will gladly show anyone who will call on us. Yours,

THE ROCHESTER BREWING CO.

Has been in existence but 10 years, and is provided with all the latest improvements known in the manufacture of

LAGER BEER.

The Company is now selling **OVER 75,000 BARRELS PER ANNUM,** and as a matter of fact is the only Brewery which can show such progress in so short a time. The great and growing increase in its sales is the best evidence of the excellent quality and purity of its product. Recognizing its worth, Physicians, almost without exception, recommend its use to their patients, and as a consequence family trade has grown to immense proportions.

In connection with our Brewery, we have established a

Bottling Department,

And are ready to promptly fill orders for our

EXPORT BOHEMIAN AND STANDARD LAGER BEERS.

Our uptown depot is at

MR. E. M. HIGGINS',

NOS. 61 STATE ST. AND 235 EAST MAIN STREET.

And orders left with Mr. HIGGINS will receive the same prompt attention as if sent direct to the Bottling Works.

Our goods can also be had on the EAST SIDE, at

B. FEIOCK & CO.'S,

135 EAST MAIN ST.

Knowing that the superior quality of our goods is our best advertisement, and assuring our customers of their getting only a pure, healthful and nutritious article, we hope for a liberal share of public patronage.

Very respectfully,

The Rochester-Volksblatt is one of the oldest german papers in the country and all of its three issues are valuable advertising mediums.

The "DAILY VOLKSBLATT" has an extensive and steadily increasing circulation in the City and its suburbs. It is an **8** page paper for **$5.00** a year; the largest, spiciest and cheapest paper in Western New York.

The "SONNTAGS-JOURNAL" largely circulates in Rochester and vicinity, also in Pennsylvania.

The "WEEKLY VOLKSBLATT" is one of the favorite papers of the german population in Western New York, Pennsylvania, parts of Ohio, Indiana and Michigan, and is represented in over 300 places by efficient Local Agents. An excellent traveling Agent is visiting all of those and other places twice a year and is continuously increasing the circulation of the paper.

Advertising Rates Moderate.

We are manufacturing a pipe that is indestructible from the action of all the elements, impervious to the action of acids, gases, and steam, all of which are found in corporation sewers. These pipes are made from a combination of superior clays, which, by powerful machinery, are rendered uniform throughout—pressed from a steam press, under a pressure of **sixty-three tons** upon each pipe, it is made very compact; and burned in close kilns, at a very intense heat, it becomes a thoroughly vitrified and iron-like body. All prominent architects, builders, and all those who have investigated the subject of **sewerage**, have become convinced that properly burned clay pipe is the only material suitable for **underground** drainage, and that sewer and drain pipe manufactured from cement, carbonated **stone, and** other similar materials, are liable to and do **decay, disintegrate,** and become **worthless,** as has been many times proved by the officials in many cities.

These vitrified pipe are suitable for well tubing; are **better than stone or brick,** because cheaper, more durable, and can be made perfectly tight.

☞ We deliver our pipe within the city limits Free of Charge, and in good condition.

Some of the points necessary to call attention to, are: First, a movable back and front, which throws off the spring in the leg. Second, it has an advantage in the use of the foot, hanging or unhanging, i. e., it can be used with a hanging foot, and it can be used the old way, by putting the foot into the boot and then on to the tree. Third, it is simple, durable, solid, and easy to work.
