COPYRIGHT 1912 BY NEW YORK TELEPHONE COMPANY

Rules and Regulations

1. If the service is interrupted otherwise than by the negligence or wilful interference of the subscriber, a pro rata allowance will be made for the time such interruption continues, but no other liability shall in any case attach to the Company.

2. The instruments and lines shall be carefully used, and no instrument or appliance not furnished by the Company shall be attached to or used in connection with them.

3. For the purpose of inspecting, repairing or removing the instruments or lines, the Company and its agents may have access thereto at any reasonable time.

4. A foreign message shall be a personal communication of such duration as is now or may be established from the subscriber's station to a station connected with any exchange outside of the city in which the subscriber's station is located.

5. Either party may terminate the contract under which telephone service is furnished at or after the expiration of the first year, by not less than ten days' previous notice in writing to the other party.

6. The Company shall not be liable for any error or omission in the official directory of its subscribers.

7. No profane or obscene language will be tolerated over the lines of the Company and the Company reserves the right to remove the lines and instruments without notice for any violation of this rule.

8. Upon non-payment of any sum due, the abandonment of the station, or any violation of these rules and regulations, the Company may, without notice, terminate the subscriber's rights, sever the connection and remove the instruments without prejudice to its rights to receive any and all sums due from the subscriber.

Helpful Instructions and Information

CLASSES OF TELEPHONE CALLS

There are three broad classes of telephone calls.

1. Local Calls.
2. "Two-Number" Toll Calls.
3. "Particular-Person" Toll Calls.

A *local call* is a call made to a subscriber located within the local area as defined in the contract covering the installation of the telephone from which the call is made.

A *"two-number" toll call* is a call made by number for the telephone of a subscriber located outside the local area as defined in the contract covering the installation of the telephone from which the call is made. Charge is made if connection is completed with the number called, the charge beginning at the time the called telephone answers. When toll calls are placed on a "two-number" basis more rapid service can be given and in certain instances a lower rate will be charged for the service rendered than if the call is placed for a "particular-person."

A *"particular-person" toll call* is a call made either by name or by number for a subscriber located outside the local area as defined in the contract covering the installation of the telephone from which the call is made. This class comprises all calls not included under Classes 1 and 2 above. On these calls a subscriber may place the call for a "particular-person" and in case the call is so placed no charge will be made unless conversation is obtained with the person desired. Toll calls between points within relatively short distances of each other must be placed exclusively on a "two-number" basis, no calls for "particular-person" being accepted.

REGULATIONS GOVERNING LOCAL CALLS

Local calls should be made by number (except that calls for the purpose of filing telegrams and certain emergency calls need not be made by number, as hereinafter noted) and the telephone numbers should be obtained from the telephone directory. Any attempt to remember a telephone number often results in a wrong number connection. Telephone numbers found on letter heads and cards are often obsolete and should be verified by reference to the current issue of the telephone directory.

Give the name of the exchange as well as the number wanted in a clear and distinct tone to the operator who first answers: Thus — Main-one-four-six-two-party-R. The operator will repeat the number and proceed to secure the connection or give you some report.

Messenger Calls. No messenger service for the purpose of calling to a given telephone, parties having no telephone connection, will be arranged for by the Telephone Company where the call is a local call. It is sometimes possible, however, for calling subscribers to arrange for messenger service through public telephone agents located in the district called. In such a case, the calling subscriber should ask for the "local information operator" and give her the address of the desired party; if the operator's records show a public telephone in that neighborhood, she will give the calling subscriber its number. The calling subscriber must make the necessary arrangements with the attendant at the called station for the messenger service and for payment therefor. The Telephone Company assumes no responsibility for the messenger service rendered and will not bill the charge for messenger service against the calling subscriber's telephone. The regular charge will be made for the telephone connection to the called station, and for the return call, if such call is made by the called party.

Collect Calls. The collection of telephone charges from the telephone called, will not be permitted where the call is a local call.

REGULATIONS GOVERNING TWO-NUMBER CALLS

"Two-number" toll calls must be made by number in the same manner as local calls. When a "two-number" toll connection is desired, give the desired number to the first operator who answers and remain with the telephone receiver at the ear until the party called has answered or until the operator reports.

Messenger Calls. No messenger service for the purpose of calling to a given telephone, parties having no telephone connection, will be arranged for by the Telephone Company where the call is a "two-number" toll call. It is sometimes possible, however, for calling subscribers to arrange for messenger service through public telephone agents located in the district called. In such a case, the calling subscriber should ask for the "local information operator" and give her the address of the desired party; if the operator's records show a public telephone in that neighborhood, she will give the calling subscriber its number. The calling subscriber must make the necessary arrangements with the attendant at the called station for the messenger service and for payment therefor. The Telephone Company assumes no responsibility for the messenger service rendered and will not bill the charge for messenger service against the calling subscriber's telephone. The regular toll charge will be made for the telephone connection to the called station, and for the return call, if such call is made by the called party.

Collect Calls. The collection of telephone charges from the telephone called will not be permitted where the call is a "two-number" toll call.

REGULATIONS GOVERNING PARTICULAR-PERSON CALLS

To make a "particular-person" toll call or to secure information concerning the rates on such calls, ask for the "Toll Operator." When the Toll Operator answers, give her the following details. The telephone number from which the call is made and your name (if you desire to send your name), the number of the telephone wanted (if known), the name of the party with whom you wish to speak and the name of an

alternate party (if you are willing to talk with anyone else, in case the desired party cannot be reached); also the name of the city or town and State in which the party desired may be found. If the number of the telephone desired is not known, give the firm name or the name and initials of the person under whose name the telephone is listed, and, if possible, the street address. If you are calling to ask for information, state to the toll operator the information desired. Remain at the telephone until told by the operator to hang up the receiver.

Messenger Calls. If the person desired is not connected by telephone, a messenger will be sent to his address requesting him to come to a telephone, provided the party calling guarantees payment for the messenger service. The exact amount disbursed for messenger service will be charged in addition to the Company's tariff rates and will be included in the bill for toll service against the calling telephone.

Collect Calls. The charges on a "particular-person" toll call, including messenger charges will be billed against the called telephone if such charges are accepted by the party called. Requests to have the charges collected from the telephone called must be made when the call is given to the toll operator.

Appointment Calls. Appointment to talk at a specified time may be made by notifying the toll operator of the time at which the connection is desired. No extra charge will be made for appointment calls (except for messenger service when such service is involved) but the Company cannot guarantee the completion of the connection at the exact time specified.

Leave Word Calls. If the person with whom you wish to talk is not immediately reached at the telephone called, at the request of the calling subscriber, word will be left by the operator (without charge) to have him call when ready to talk. The message to the called party on Leave Word calls will be in the following form; for example — "Please call the New York operator." When the person receiving such a message is ready to talk, he should ask the first operator who answers to connect him with the toll operator mentioned in the message; for example — "The New York Operator."

Reports. In case delay is encountered in completing a call, the toll operator will advise the person calling, at reasonable intervals, regarding the cause of the delay.

Rates and Charges. Rates for "particular-person" service are based upon an initial period of three minutes; and the three-minute rate will be charged for connections not exceeding three minutes. For overtime, beyond the initial period of three minutes, charge will be made by the minute for each additional minute or fractional part thereof. The toll operator will not interrupt conversation to notify subscribers of the expiration of the first three minutes.

When a particular person is asked for, every reasonable effort will be made to establish the connection with the person desired. If the person desired, or a person with whom the calling subscriber will talk, is not reached, no charge will be made for the service rendered, except for messenger service, should such service be involved.

When no particular person is asked for at the time the call is given to the toll operator, charges will be made if connection with the proper telephone is established.

Requests for Charges. If a patron calling from a regular subscriber station (not a public telephone) desires notification of the amount of the charge on his message, he will save time by requesting this information at the time he gives his call. If the request for such information is not made until the completion of the conversation, unavoidable delay results while the operator obtains the rate and computes the charge.

Supervision by Private Branch Exchange Operators. The toll operator is held responsible for the supervision and timing of all messages and for the character of the service furnished. Supervision of connections by Private Branch Exchange Operators interferes with satisfactory service, and such operators should not remain "cut in" on the line after the connection has been established.

FREE CALLS

In case of Accident, a local call for medical assistance, or an ambulance, or in case of Fire, for the purpose of summoning the Fire Department, may be made without charge from any nearby Public Pay Station.

Policemen and Firemen will be allowed free local service.

Provided, that at the time the connection is asked for the Policeman or Fireman making the call gives the operator his badge number and states that the call is made in the performance of his official duties.

Complaint or other official local calls to any department of this Company may be made without charge.

HOW TO GET YOUR TELEPHONE MOVED

As a large amount of telephone equipment has to be moved yearly, it is necessary to have at least ten days' notice in writing when you are occupying new quarters. Ample notice will enable us to remove your telephone equipment so that your telephone service may be practically uninterrupted.

IDENTIFICATION OF EMPLOYEES

Employees who are authorized to install, examine, exchange, or remove any of the Telephone Company's apparatus, or to make collections for the Company, are furnished with a metal badge, showing the Company's name and number. Subscribers are earnestly requested to refuse access to their premises to applicants unable to furnish proper identification.

TELEGRAMS BY TELEPHONE

WESTERN UNION TELEGRAPH COMPANY

By an arrangement between the Western Union Telegraph Company and the New York Telephone Company, telegraph messages may be telephoned to Western Union offices at any hour of the day or night for transmission to any part of the world. The charges for telegraph messages will be billed by the New York Telephone Company and the telephone bill together with such telephone charges as may apply.

To send a telegraph message by telephone, call the Central Office operator and say, "Western Union." The operator will connect you with the nearest Western Union Telegraph Office that is open.

To facilitate the delivery of telegraph messages, the Western Union Telegraph Company will, upon request, deliver by telephone instead of by messenger. The sender may indicate that he desires such telephone delivery by adding the words, "by telephone" after the address, or by addressing telegrams to telephone numbers.

THE POSTAL TELEGRAPH-CABLE COMPANY

By an arrangement between the Postal Telegraph-Cable Company and the New York Telephone Company persons calling "Postal" will be connected with the number designated by the Postal Telegraph-Cable Company as the proper number in each case.

REPEATING MESSAGES

This Company furnishes its facilities for personal communication between parties. All repetition or assistance by the operator is made only upon the distinct understanding that the Company will not be responsible for error, and that the person repeating or assisting does so as the agent of the sender of the message.

DO NOT PRINT YOUR NUMBER

The Company assumes no liability for damages arising from errors or omissions in the making up and printing of this directory, nor can it guarantee the permanency of call numbers assigned or to be assigned. Subscribers are, therefore, requested not to print telephone numbers on stationery, etc., but use the phrase, "Bell Telephone Connection."

FIRE AND POLICE CALLS

It is not necessary to give the number for calls to the "Fire Headquarters" or "Police Headquarters."

HOW TO USE THE TELEPHONE

Use the current issue of the *Telephone Directory*. An attempt to remember a telephone number frequently results in a wrong number connection. Telephone numbers found on letterheads and cards are often erroneous, and should be verified by reference to the current issue of the *Telephone Directory*.

When calling a telephone number give each figure separately. For example — Main 6971 should be given as *Main-six-nine-seven-one*.

Speak distinctly, in a moderate tone and directly into the transmitter with the lips close to the mouthpiece.

When through talking hang up the receiver, large end down. A receiver left off the hook keeps the line busy and causes "Busy" or "Out-of-order" reports to be made to calling parties.

Answer all calls immediately. Delay in answering may result in the loss of business or in annoyance and inconvenience to the person who is making the call.

INQUIRIES AND COMPLAINTS

Operators are required to be courteous in their dealings with subscribers, but are forbidden to hold any conversation beyond that necessary to complete connections. To make inquiries concerning telephone numbers of new subscribers, call the "Information Operator."

The Company values prompt reports of faulty service. Always telephone them in preference to writing. Use a neighboring telephone if necessary and communicate with the District Traffic Chief.

EXTRACT FROM PENAL LAW

Extract from section 552 of the Penal Law is as follows:

"A person who either wrongfully obtains or attempts to obtain any knowledge of a telegraphic or telephonic message by connivance with a clerk, operator, messenger, or any other employee of a Telegraph or Telephone Company. * * or, being such employee willfully divulges to anyone but the persons for whom it was intended, the contents or nature thereof of a telegraphic or telephonic message or dispatch entrusted to him for transmission or delivery, or of which contents he may in any manner become possessed. * * * is punishable by a fine of not more than one thousand dollars or by imprisonment for not more than two years or by both such fine and imprisonment.

ROCHESTER

THE CITY OF OPPORTUNITIES

ROCHESTER is known throughout the country as a city of great opportunity. Its healthy industrial life, its geographical location, the public spirit of its citizens, its transportation facilities, and its housing conditions have been among those things which contributed towards the acquisition of this notable reputation.

There are over 1,400 factories in Rochester making over 325 different articles. The army of workers number over 75,000 who receive an annual wage of \$30,000,000. It is conservatively estimated that of these, 65 per cent own their own homes.

Some time ago the Chamber of Commerce, to show Rochesterians the immensity and variety of the City's industries prepared figures showing what is produced by the leading industries every working minute. The figures are somewhat astounding.

Rochester's factories turn out 7 cameras every minute. During the same short period, local factories produce 7 suits of clothes, 21 lanterns, 1,866 buttons, 15 thermometers, 7 concrete tiles, 200 loaves of bread, a telephone, 120 packages of gum, 50 cans of cocoa, 100 bottles of beer, 10 cans of preserved goods, 21 pairs of shoes, 154 lenses, 120 packages of macaroni and an immensity of other products.

Rochester's factories are of the most approved, modern construction, with every care taken for the comfort and safety of the employee. They are recognized as models of their kind, and have attracted attention from all parts of the country.

After a manufacturer has produced his finished product, he should be able to sell and deliver it promptly and economically. The location of his factory as to reaching easily the domestic and foreign market for his goods can make a wide difference in the net earning capacity of his investment.

The fortunate geographic location of Rochester as to the proximity of the great purchasing public, together with its five larger railroad connections, also Barge Canal and Port of Rochester on Lake Ontario shipping facilities, makes it possible to reach with a large percentage of short hauls, the bulk of the best markets in the United States and Canada, also desirable ocean ports for other export orders.

The selling end of a business is made easier if prompt deliveries can be made, with low transportation cost, of the goods offered. Selling expenses are lighter if railroad fares of traveling salesmen are on an average for comparatively short distances. Most of the extensive trade in many lines in Central and Western New York may be reached with hourly electric cars, making it possible to cover several cities and towns in a day, thus increasing the efficiency of salesmen calling at these points. Frequent fast train service on the steam roads makes many large cities in the United States and Canada accessible to salesmen with a few hours' ride.

All these favorable business conditions appeal strongly to the successful manufacturers. Rochester manufacturers as a rule have been remarkably successful and their location for market and shipping purposes has been a strong factor in bringing about that success.

Rochester products sell everywhere in the United States and in many foreign countries. The reason for this is that Rochester is a good shipping center. Five great trunk lines, together with the canal and the lake make it possible to reach all points east of the Mississippi in a very short time.

Excellent freight service is maintained on all of the railroads touching Rochester, so that the manufacturer has a choice of shipping by way of — the New York Central, Lehigh Valley, Erie, Pennsylvania, and B. R. & P. Lines.

A vast amount of business is done every year on the Erie Canal. It will soon be replaced by the Barge Canal now in process of construction, giving added facilities for bringing raw materials into Rochester, and shipping the finished product from here.

The Port of Rochester shows an increase of business every year. This means added facilities and better shipping arrangements. The B. R. & P. Railroad, by means of its large car ferry maintains a rapid service to Canada throughout the year. Through the activity of the Chamber of Commerce a suburban trolley express service in connection with the Wells-Fargo Company has recently been inaugurated.

Rochester is the center of a populous area. About two million people live within a radius of 85 miles. A network of interurban trolley lines connects them with Rochester and brings many of them to this city for their shopping.

Rochester boasts of the largest preserving establishment in the world. It is the center of the world for the manufacture of temperature and pressure indicating, recording and regulating instruments. It has the largest optical goods factory in the world and the largest plant for the making of photographic apparatus and supplies. Ninety-five per cent of the motion picture film used in the world is made in Rochester.

It would take more space than is here allowed to go into the industrial situation in Rochester, as it merits. Suffice to state that the justice of calling Rochester "The City of Varied Industries" has never been questioned and the quality of Rochester made goods has never been disputed.

Rochester is surrounded by some of the most fertile land in the United States.

According to the latest complete census figures published, Monroe County stands, among other New York Counties:

First in production of apples and nursery stock,
Second in total production of potatoes,
Second in total value of farm products,
Second in total value of farm property,

Third in orchard fruits,
Third in dry beans,
Third in miscellaneous vegetables,
Fourth in small fruit,
Fourth in total value of products,
Fifth in oats, small fruit and dry beans.

and when compared with other counties on basis of production per square mile, Monroe County is:

First in nursery products,
Third in orchard fruits,
Third in potatoes,

Director of the Census, E. Dana Durand, has courteously furnished a preliminary report of production of Monroe County as recorded in the last census taken in 1910, and it is shown that this County has risen in ten years from:

Fourth to third in number of horses on farms,
Eleventh to fourth in number of swine,
Fifteenth to tenth in total value of domestic animals,
Seventh to third in total corn production,

Seventh to third in oat production,
Held first place in wheat production,
Risen from fifteenth to sixth in rye production,
Held third place in production of beans.

DRINK CLYSMIC

The King
of
Table
Waters

C A Sparkling Water that
mingles with the most
delicate wines and liquors
to make a royal beverage.
Connoisseurs insist upon it.

It Aids Digestion

*Look for the Emerald-Green Bottle
with the Red Maltese Cross*
