ADVERTISE IN THE CITY DIRECTORY

Business Insurance

Your card in the Directory is just so much protection against business loss. Your name in large type prevents hurried searchers from overlooking you. The several listings in the business department speak for you to prospective buyers and the card in the front gives you the opportunity to be still more explicit regarding your business or goods.

The City Directory

Is the most effective and most economical method of reaching all the people all the time. Those who buy without looking at the classified list of those who sell do themselves great injustice. The classified lists in the Business Directory form the best Buyers' Guide on earth. A modern up-to-date method of getting what you want.

The Science of Advertising

is the analysis, study, and practical use of the different forms of display and reference advertising publicity.

Display advertising does not often produce the desire to buy at the time it is seen. It plants a seed of suggestion, but when the desire is realized it may be hard to find the ad which suggested it. Then one naturally refers to the Directory.

Reference advertising places wherever people may look for you or your goods, information that will point to you like a signboard.

Your advertisement in this book, properly indexed under all headings which describe your business (which is equivalent to repeating the advertisement under each heading) is the greatest value for the money it is possible to get, when the nature and life of the medium is considered.
