TRACY & GREENWOOD,
Newark, N. Y.
MANUFACTURERS OF
GRAIN DRILLS,
WHEEL CULTIVATORS,
AND
PLASTER SOWERS.

OUR GRAIN DRILLS,

IDES' PATENT, are acknowledged, by all eminent Agriculturists, to be the best in the market, for these reasons:

It sows and distributes any kind of grain more even and uniform than any Drill in the market.

The teeth are placed in two rows, and are therefore not as liable to clog among sods, stones or rough ground.

It is of simpler construction and therefore not as liable to get out of order, and is of light draft.

THE WHEEL CULTIVATOR

Is universally conceded to be an indispensable article for any farmer who would have his land in perfect order. The teeth of our Cultivators are made of steel, in one piece, but can put in cast iron shank teeth, if desired. They are made with wings or not, as a person may desire, and can be re-pointed at any time, thus making them last almost a life-time.

OUR PLASTER SOWER

Is conceded to be the desideratum for such an article—cheap, light and durable, and doing its work perfectly. It also sows oats and other grain, and can be furnished with a light Cultivator attached, which covers the grain, thus saving the usual process of "dragging in," after such an implement.

We offer these to the public with perfect confidence. S. R. TRACY has been engaged in the manufacture of these implements for the last twenty years, and has now over Six Thousand Cultivators alone scattered through the country.

INTRODUCTION.

In presenting the initial number of the “Gazetteer and directory of Wayne County” to the public, the publisher desires to return his sincere thanks to all who have so kindly assisted in obtaining the valuable information which it contains, and without whose aid it would have been impossible to have collected, in the brief space of time in which it is essential that all such works should be completed. Especially are our thanks due to the several editors of the Clyde Times, Lyons Republican, Wayne Democratic Press, Newark Weekly Courier, and Palmyra Courier, for the uniform kindness which has been evinced in calling public attention to the author’s efforts, and to them and the following gentleman, viz: George F. Torray, Henry Taylor, M. Loomis, Savannah; Dr. Mortimer F. Sweeting, John McGonnigal, Butler; Elisha N. Plank, Wolcott; Eron N. Thomas, Rose; Joseph Watson, Clyde; Thomas Dorsey, Lyons; Pomeroy Tucker, Palmyra; J. D. Ford, Dr. Charles G. Pomeroy, Newark; John F. Packard, Macedon; Jones Findley, T. G. Yeomans, Walworth; J. S. Thompson, Ethel M. Allen, Williamson; John W. Copping and Israel Springer, Marion; for essential aid in furnishing materials for the work. We have also drawn largely from French’s Gazetteer of the State of New York; and also to some extent from a “Review of Rev. Mr. Eaton’s Thanksgiving Sermon, by Wayne Democratic Press.” Many others have kindly volunteered their aid, to all of whom we return sincere thanks.
INTRODUCTION.

When it is known that time, equal to more than three years' labor, if done by one man, has been devoted to the canvass, it is believed the patrons of the work will willingly excuse the delay beyond the time it was expected the work would be issued.

The advertisers in this work represent the leading business men of the county, and we most cheerfully commend them all to the patronage of those under whose observation these pages may come.

So complete a canvass of a County for a Business Directory, and the additions of farmers names, together with the number of acres owned or leased by each, the whole arranged alphabetically, after their appropriate post office addresses, we believe was never before attempted.

That errors may have occurred in so great a number of names and dates as are here given, is probable. The indulgence of the reader is solicited, in marking such as had been observed in the subsequent reading of the proofs, and which are noted in the Errata, following the Introduction.

The usual amount of close application, ceaseless care and mental labor, necessarily given to this intricate and complicated part of book-making, has been bestowed on the present volume; and though it is hoped that none will find an error worth complaining of, yet, should there be, remember that nothing is perfect—that it is human to err, while it is a sublime prerogative to forgive.

THE COMPILER.
ADDITIONS AND CORRECTIONS.

Gazetteer.

County.—On page 22, for “Wm McNab,” read Andrew McNab.

On same page, it is said that an artesian well at Clyde yielded “weak brine,” &c.—Since that writing we have understood that the well in question yielded very strong brine, though in small quantity.

On page 24, for “F. B. Cornwell,” read F. E. Cornwell.

And we are informed, (same page,) that instead of “Hugh Jameson,” Thomas Armstrong was the first Sheriff, and Israel, instead of “Isaiah” J. Richardson, the first County Clerk.

Arcadia.—On page 35, last line but one, for “truth” or prosperity, read, trouble or prosperity.

Butler.—On page 37, for “Orastus” Hubbard, read Orestes Hubbard.

Galen.—On page 37, instead of “Wm.” McNab, read Andrew McNab, and instead of “Hornby” Estate, read Pulnecy Estate.

On page 38, instead of Darwin “Calvin,” at bottom of page, read Darwin Calvin.

On page 40, the sentence commencing “The Clyde Iron Works” should read—The Clyde Iron Works, now owned by Mr. A. S. Field, are carried on by Messrs. Wood, Candler & Co.

On page 41, for “Laomi” Beadle, read Loami Beadle. And on same page, instead of Major Fred. A. De “Zenz,” read Major Fred. A. De Zeng. Six lines further down the page, for “weak brine,” read strong brine.

Lyons.—The population of Lyons village is now understood to be about 4,000.

Ontario.—On page 47, instead of “2” miles, Ontario Center is but one mile west of Ontario Village.

On page 48, first paragraph, fifth line, for “David Jennings,” read Daniel Jennings.

Rose.—On page 53, after “Peter Valentine was the first Supervisor,” read: The town has 12 schools, employs 12 teachers, and has an average daily attendance of 267 scholars. The expenses for school purposes during the year ending Oct., 1866, was $2,796.11.

Savannah.—In addition to the historical description of this town, on pages 57–8, the following from M. Loomis, Esq., Civil Engineer at Savannah, additional in regard to the Cayuga Marshes, of which he is agent, will be read with interest:—
The extent of the Cayuga Marshes is about 16,000 acres, say 5,000 acres of which is in Wayne Co. The Seneca & Cayuga Marsh Company own about 10,000 acres. The surface soil is decayed vegetation to a depth of five feet, underlying which is a strata, or thickness of ten feet of decomposed shell marl.

By cutting a canal from the mouth of Crusoe Creek, through Crusoe Lake, up the valley to Post Mills, some two miles south of the village of Wolcott, the marshes could be effectually drained. The cost of a canal 40 feet wide on the bottom, with 6 feet in depth of water, would be $200,000.

By removing the remaining bars in the Seneca River, for a distance of four miles, the water at the marshes would be reduced from two to three feet, and these marshes be made available for grass, corn, broom corn, and most other summer crops. This could be done at a cost of $30,000.

Marsh grass, for paper stock, is now cut from these marshes. The value of this grass for this purpose is not yet determined. Flag for chair bottoming, for furniture and cooperage, to the extent of from 150 to 200 tons, is cut annually, which finds a ready sale at from $30 to $50 per ton. It is probable that these marshes afford a greater supply of this material than any other locality in the United States.

Sodus.—On page 58, under head of Sodus (village,) instead of “Baptist,” read Episcopal, as one of the churches of that village.

Sodus Center has two churches.

DIRECTORY.

Arcadia.—On page 98, JOSEPHUS COOKINGHAM, carriage maker, was omitted.

Fairville.—On page 105, Charles Crandall, farmer, was omitted.

Lyons.—On page 137, Bartlett R. Rogers, Sheriff of Wayne county, is also a farmer, owns 154½ acres.

Palmyra.—On page 177, Orson Archer is also a lawyer. On same page, for “Backers, Newman S.,” read Backus, Newman S.

On page 183, Peck, H. W., Agt., grocer, was omitted.

On same page, J. & W. Nolan, (John and William,) grocers, should be added.

On page 181, Foster & Smith, (L. H. Foster and J. H. Smith,) boot and shoe dealers, were omitted, but were entered on page 185, as “Smith, Foster,” which was a mistake.

On page 185, “Sherman, R. H., carriage ironer, &c,” should be added.

Rose.—On page 189, “Collier, Mark T.,” should not read “deputy collector internal revenue,” that office being held by WM. H. Thomas.

Sodus, (Village.)—On page 216, Teter & Wackman, (Geo. L. Teter and Willard Wackman,) patent well sinkers, should be added. Geo. L. Teter is also a canal captain.

Judd & Son, Proprietors of the Shortsville Woollen Mills, manufacture Superior Grades of Cloth, and do custom carding and cloth dressing to order. We are sure they will give entire satisfaction to customers. See card, page 5.

Wayne County Table of Distances,
Showing the Distances, in Miles, between the Villages, by the Nearest Public Road.
The Empire Wind Mill Mfg Co., Syracuse, N. Y.—This establishment is located at the corner of Grape and Water streets, giving employment to about twenty-five men. They manufacture Self-Regulating Wind Mills for pumping water and other purposes, and the American Farm Grinding Mill. These Wind Mills are sent to all parts of the country, and the company have many letters of commendation from their customers, who have bought the Mills, and sell a reliable and thorough article, and by their large experience in the business are able to meet the varied wants of different cases which come up. The Mills now built are from 6 to 32 feet in diameter, weighing from 320 to 8,000 lbs. They have been very thoroughly and severely tested in all sorts of weather, and the company feel able heartily to recommend them for any purpose for which wind power can be used. So cheap and universal a motive power as the wind, must be used to its full extent, so necessary for regulating, stopping, starting, &c., which render the machine quite akin to the steam engine and the waterwheel.

Labor-saving machines of all kinds are rapidly coming into universal use in this country, and he who would keep up with the spirit of the age should see to it that the great natural sources of power which are available almost everywhere, are not allowed to waste their energies on the "dust of the earth," but are set to turning the wheels of civilization and working out welfare for mankind. See card, page 19, and cut, page 263.

Rich & Freeman, Merchant Tailors, and dealers in Ready Made Clothing at Lyons, publish a card on page 216. We can recommend them as being prepared to do all they advertise. They deserve a liberal patronage.

Pease & Co., Photographers, at Newark, publish a card on page 204. We can recommend Mr. Pease as being an excellent artist, of long experience. Their rooms are fitted up with a splendid ground glass light, and superior instruments. Give them a call when in Newark. Their rooms are in the Blackmar Block, near the bridge.

American Hotel, Auburn, Herman L. Swift, Proprietor, is situated opposite the Court House, and is the best hotel in the city. Mr. Swift is uniformly courteous and obliging to guests, ever seeking to cater for their wants. We would most cheerfully recommend travellers to make the "American" their home while stopping at Auburn. See card, page 208.

Garrett & Beard, Successors to the firm of J. & F. B. Garrett, Wholesale and Retail Dealers in Printing, Writing, Wrapping, Tissue, Roll and Fancy Papers, Printer's Supply, Stationery, Maps, Books, &c., at No. 3 West Fayette street, Syracuse, have built up a healthy trade in their line, extending from Harrisburgh, in Pennsylvania, to the Canadian border. We have dealt considerably with this establishment, and have invariably been gratified in having our orders promptly filled, and always with just the article required. See card, page 216.

Mrs. Bristol's Baby Soother, the great remedy for children, is advertised on page 197. We have tried this valuable medicine in our own family, and can testify as to its virtues. It is manufactured by Ar- muckles & Co., at Newark. Enquire for it of any druggist.

D. C. Brown sells all kinds of Drugs, Medicines, Dye Stuffs and Fancy Goods, cheap, near the Post Office, Newark. See card, page 197.

J. Janecon, Dentist, on Canal street, Lyons, advertises on page 203. Mr. J. is in every way prepared to execute all kinds of Dentistry, in the most perfect manner. Call and see him.

Henry S. Mackie, of the City Music Store, Rochester, sells Steinway & Sons' and John B. Dunham's Pianos, Organs, Melodeons, and in fact all kinds of Musical merchandise, at astonishingly low prices. See card, page 203.

F. Mars, of Clyde, manufactures prime Cigars, and deals in Tobacco, Pipes, &c., of the best quality. See card, page 204.

F. C. Brown, Surgeon Dentist, at Palmyra, is a superior workman, cures Neuralgia and manufactures Teeth Powder. See card, page 204.

F. W. Boeheim, Agent, Manufacturer and dealer in Furniture, at Lyons, keeps a general assortment suitable for household use, of his own manufacture. His goods are well made, and he sells at fair prices. See card, page 220.

The Syracuse Business College, under the management of Warren, Milliman & Co., is one of the Bryant & Stratton "Chains" of Colleges, and has been eminently successful in fitting young men for conducting business successfully. For further information we would advise the reader to peruse their advertisement on page 131.

A. S. Weaver, of Sodus, is Agent for Dodge's celebrated Reapers and Mowers. This machine has several valuable points not possessed by others, and is altogether one of the best machines in the market. Mr. Weaver is also Agent for Bledgett's Patent Cat-Claw Horsed for Which he, without doubt, the best yet introduced. See card, page 234.
TO THE FARMERS OF WAYNE CO.,
AND ALL WHOM IT MAY CONCERN:

THE EMPIRE WIND MILL MFG COMPANY,
OF SYRACUSE, N. Y., SOLICIT YOUR CAREFUL ATTENTION

TO THEIR SELF-REGULATING, STORM-DEFYING WIND MILL,
AS A LABOR SAVING POWER

For pumping water. This, all allow to be one of the most tedious operations of farm labor, and hundreds of farmers might, and would keep more stock, were it not for the drudgery of pumping by hand. By this invaluable labor-saving machine, at an insignificant cost, the whole business may now be given over to the sport of the idle winds, which sweep over every farm, free as the air you breathe.

We are fully prepared to sell, erect and warrant our machines, and adapt them to all possible situations, so as to give durable and perfect satisfaction, and make the purchaser happy. READ THE TESTIMONIALS PRINTED BELOW. We have many more like them, and if you still doubt, write us the depth of well, quantity of water desired, height necessary for the mill, and all particulars, and one of our agents will not put you up a Mill on trial till you have a chance to test it, on your own premises, and be satisfied that we tell you the truth. Send for circulars, prices, and further particulars. We can give you what you need.

THEY PUMP FOR CHEESE FACTORIES.

DURHAMVILLE, N. Y., July 4, 1865.

To the Empire Wind Mill Manufacturing Co.—Gentlemen:—Your Mill that I have had in use since the first day of May, has proved itself quite equal to all that you claim for it. I think you can claim one thing more for the use of your Mill; that is, the raising of water for the manufacturing of Cheese. The two months’ experience I have had with the Mill in manufacturing cheese, is a fact of seven hundred cows, proves conclusively that one of your Mills may be relied on to raise water for a factory of any number of cows that may be desired. There has been but three days since the first of May but that the Mill has pumped all the water desired for cooling milk and other necessary uses connected with my factory. The Mill has pumped on an average, one hundred barrels per day, and much of the time could have raised twice the amount it desired. The manner in which the Mill regulates itself during high winds, is sufficient to recommend it to any one of observation. Yours truly,

F. FOSTER.

They Regulate themselves in Heavy Gales of Wind.

POTSDAM, N. Y., December 25, 1864.

Mr. J. W. Truesdell,—Dear Sir:—Yours of the 18th was duly received. I have carefully looked over your line, and in reply, would say, that the Empire Wind Mill, in my opinion, is the greatest invention of the age. I have run the Mill constantly ever since it was put up—that is to say, a portion of every twenty-four hours. I have a large farm destitute of living water, and a stock of cows from sixty to eighty, besides other stock. My well is sixty feet deep. I do not run the pump all the time—say upon an average of one and a half and two hours per day, which gives my stock all the water they require. In a fair wind, the Mill will pump from eight to ten gallons of water per minute, and I think will average about seventy-five to one hundred barrels of water per day. I have not paid out one cent for repairs, and the only expense attending its use is a little oil on the machinery once or twice a week. It will run with but little noise, and some of my neighbors say that they have seen it running when the wind did not blow at all. But that is not so; yet it is a very still time that it does not run sufficient to do my work. As to our County, it is large and level, and it may well be termed the valley of the St. Lawrence. We Farmers usually keep dairies, and must have water, and in my opinion the Empire Wind Mill will be extensively used in this section. As to a gale of wind injuring the Mill, I do not think it possible, for last summer we had a gale that unroofed several houses and barns, swept down fences, and blew down forests of timber that had stood for centuries. My Mill was running at the time, and was not injured in the least. I have hastily written the above, and if I have omitted to answer all your inquiries, please write me again.

MARTIN LESTER.

Address E. W. M. Mfg. Co.,
SYRACUSE, N. Y.

See Cut p. 263, and Notice, p. 18.
Respectfully informs Printers, Publishers and the public generally, that he is prepared to execute all styles of Book-Binding in the best manner, on short notice, and at low rates.

Blank books of every description manufactured to order.

Music, Magazines, Newspapers, &c., bound in every style of the art. Particular attention paid to First Class Ruling, in all its branches. Old books re-bound neatly and substantially. In short, every branch of work connected with the business, done in the best manner, and at reasonable prices.

Orders Solicited, and Promptness and Satisfaction Guaranteed.

Journal Building, 23 & 24 Washington St., Syracuse, N.Y.
WAYNE COUNTY.

THIS COUNTY, named in honor of the illustrious patriot, Gen. Anthony Wayne, was formed from Ontario and Seneca, April 11, 1823. It lies west of the center of the State, and is centrally distant 171 miles from Albany, and contains 624 square miles. Its northern border is washed by the waters of Lake Ontario. Joining it on the east is Cayuga, on the west Monroe, and on the south Ontario and Seneca counties. A series of bluffs from 25 to 75 feet high, extends along the lake shore; and from their summits, the surface rises in gradual slopes to the lake ridge, 4 to 5 miles distant. This ridge is 50 to 200 feet wide on the top, and about 200 feet above the lake. A road extends along the summit, through the entire length of the county, running in a due east and west course, known as the Ridge road. The ridge declines toward the east, and upon the east border of the county it can scarcely be traced. Its declivity upon the south is 8 to 20 feet; and from its foot, the surface gradually slopes upward to the surface of the limestone ridge, which extends east and west through the county, a little north of the center, and forms the water-shed between Lake Ontario and the Clyde River.

The summit of the ridge is 140 feet above the lake ridge, 340 feet above the lake, and is about three miles wide. It is highest upon the west border of the county, and gradually declines toward the east. This peculiar formation is accounted for by the theory that the low regions through the north and central parts of the county were once covered by the waters of the lake, and that the limestone ridge was a long bar, or point, extending into the lake from the west. From its southern edge the surface gradually declines to Clyde River, and slopes upward from the river to the south line of the county. South of the limestone ridge are numerous drift ridges extending north and south, and from one-fourth to one and a half miles in length. The declivities are usually very steep, and the summits 40 to 100 feet above the surrounding surface. They usually end in an abrupt declivity toward the north,
but gradually decline toward the south. They are composed of clay, sand and gravel, and seem to be deposits from great currents of water, or depostitions of the drift period. Considerable marshy land extends along Clyde and Seneca Rivers, and also through the county, north of the lake ridge. Ganargwa, or Mud Creek, enters the south-west corner of the county, from Ontario, flowing in an irregular, but generally easterly course, to Lyons, where it unites with the Canandaigua Outlet, and forms Clyde River—named by Wm. McNab, a Scotchman—which continues eastward to the east bounds of the county, where it discharges its waters into the Seneca River. At an early day Clyde River was navigable as far as Lyons, and was a link in the great chain of western travel. These streams receive from the north, West Red Creek, East Red Creek and Black Creek, and from the south, numerous small brooks. The streams flowing into Lake Ontario are Bear, Deer, Davis, Salmon, Thomas, Wolcott, and Big and Little Red Creeks. First, Second and Third Creeks flow into Great Sodus Bay. The principal indentations upon Lake Ontario are Great Sodus, East, Port and Blind Sodus Bays. Great Sodus Bay forms an excellent harbor. Crusoe Lake, in the south-east corner, is the only considerable body of water. The streams, in their course through the drift depositions and lake ridge, have usually worn deep ravines. Within more recent periods, considerable changes have been wrought by the action of present streams of water, and the wasting agencies of the atmosphere and frost. From these are derived marl, alluvium, and the greater part of the soils. The thickness of the rock strata is generally determined by its outcrop along the ravines of the streams, and by Artesian Wells, which have been sunk to considerable depths in different parts of the county. One at Little Sodus to a depth of 400 feet, producing a weak brine; one at Clyde, the same depth, producing weak brine and inflammable gas; and another at Savannah to a depth of 250 feet, also producing a weak brine.

The lowest rock in the county is the Medina Sandstone, appearing upon the lake, and in the ravines near it, which is extensively quarried for building stone. It is soft when first taken from the quarry, but hardens upon exposure to the atmosphere. It occupies a strip with an average width of two miles, being widest at the west. Next above this is the Clinton group of limestone and shales, extending to the foot of the limestone ridge. Next above this is the Niagara limestone, forming the summit ridge and occupying a strip about 3 miles in width. South of this is the Onondaga salt group, of red and green shales, and gypsum, extending to the south border, and occupying nearly one-half of the county. The rocks are mostly covered by thick deposits of drift, and are only exposed in the ravines of the streams. Shells, marl and muck, are found in
large quantities in the marshy regions. Weak brine and sulphur springs are found in various localities in the Medina sandstone, and the red shales of the Onondaga salt group. A vein of iron ore 330 feet wide, and 18 to 20 inches thick, runs through the northern part of the county. In Ontario it is only from 3 to 6 feet below the surface, while in Wolcott, in the eastern part, it is about 14 feet below the surface. It supplies the various furnaces in the county, and has contributed much to the growth and prosperity of the northern towns, where it is excavated. The soil derived from the drift deposits is generally a sandy or gravelly loam, with an occasional intermixture of clay. The soil along the lake shore, principally derived from the disintegration of Medina sandstone, is a reddish, sandy loam. At the foot of the mountain ridge, both north and south, is a strip of very productive clay loam. In the valley of Clyde River the soil is principally a gravelly loam and alluvium. The marsh lands, when drained, are covered deep with a rich, vegetable mold, which develops into the most fertile soil in the county. Along the borders of Lake Ontario there are quite extensive tracts of clay and argillaceous earth, with but a slight superstratum of mold. The whole, however, may be pronounced a very excellent tract for the various products of agriculture.

Agriculture, which forms the chief pursuit, has rapidly improved under the general and progressive exertions of hardy industry, and the enlightened efforts of men of wealth, talent, and influence. There are few portions of the State that display more of agricultural opulence than the entire extent of this county, a tract of country abounding alike with superior richness and fertility of soil, and most elegant prospective views. Indeed, there is probably no county in the State that offers better inducements to a farming community. The people are generally well aware of this fact, which is attested by the extensive improvements and luxuries with which they have surrounded themselves as the reward of thrift and industry; and there is no section of the State where the interests of each are so intimately connected with the interests of the whole. Here we fail to see, except in a few isolated cases, that striking contrast, so painfully manifest in large manufacturing communities, between the rich and poorer classes. The wealth of the country seems to be more uniformly divided among the majority. This County displays much of that element of free independence, so characteristic of the North, which is the result only of intelligence and industry, and having a tendency to diffuse among them a commendable spirit of liberality.

The agricultural products, in the order of importance, are grain-growing, stock-raising, dairying, and wool-growing. Fruit is extensively cultivated, and has become one of the most important of the agricultural products of the county, which is peculiarly adapted
to the growth of every variety of fruit common to this climate, especially that part bordering upon Lake Ontario, and extending from Niagara river to the Oswego. Peaches have been made a speciality, but within the past few years, they have failed almost entirely in the eastern section of the county. In the western part, however, they continue to produce an average crop. There are but few portions of the State that excel this county in the quality and quantity of fruit, and other agricultural products annually shipped to eastern markets. A large quantity of dried fruit is annually prepared. Peppermint and tobacco are raised along the valley of Mud Creek; the latter, however, to a very limited extent at present. At Lyons, in this county, is one of the largest establishments for purifying essential oils in the world.

The county seat is located at the village of Lyons, near the center of the county. The Court House is a fine cut stone building, standing on a rise of ground, fronting Church street. It has an Ionic portico, and is surmounted by a large dome. The first Court House was a brick edifice, erected soon after the organization of the county. It was superceded in 1856, by the present structure, built of Lockport lime-stone, at an expense of fifty thousand dollars. The building committee of the present Court House were John Adams, Stephen Marshall, and F. B. Cornwell. The first officers of the county, were John S. Talmadge, First Judge; Hugh Jameson, Sheriff; Wm. H. Adams, District Attorney; Isaiah J. Richardson, County Clerk; and John S. Talmadge, Surrogate. The Jail is a commodious stone building, in the western part of the village. It contains rooms for the Jailor's residence, and is one of the best arranged and conducted establishments of the kind in the State. The County Clerk's office is a fire proof building, fronting Pearl street, a little south of the Court House. The Poor House is situated upon a farm of one hundred and ninety-five acres, one and a half miles west of the Court House.

The whole number of paupers in Poor House on the 15th of Oct. 1865, was,................. 88
The number received during the fiscal year ending
Oct. 15th, 1866, was,.......................... 353
The number of children born, was,............. 1

Total,...................................... 437

Of the whole number mentioned in the foregoing, the places of nativity are as follows:
Born in United States,.............................. 145
" " Ireland,.................................... 199
" " Germany,.................................... 38

382
Amount brought up, ........................................... 382
Born in Poland, .................................................. 4
“ “ Scotland, ..................................................... 5
“ “ Holland, ...................................................... 6
“ “ England and Canada, .................................... 40

Total, .................................................................. 437

The whole amount of Drafts upon the Treasurer by this Board, for the year ending Oct. 15, 1866, as expenses of the poor, was $9,068.70. The number of weeks board furnished paupers the last fiscal year, was 5,419. The average weekly expenditures for each, $1.68. Expenses of board, clothing, care, and medical attendance of each per year, is $87.36.

Amount chargeable to several towns, viz:

The Board of Supervisors annually visit the institution on a tour of inspection. The premises present a neat and comfortable appearance, with the exception of some of the out-buildings, which are looking somewhat delapidated. It is conducted in a very satisfactory manner, and the inmates seem as cheerful and contented as could be expected under such circumstances. A school is taught throughout the year. The farm yields a handsome revenue.

This, and Cayuga County, form the 25th Senatorial District. Wayne County is divided into two Assembly Districts; the first comprising Butler, Galen, Huron, Lyons, Rose, Savannah, Sodus, and Wolcott; and the second, Arcadia, Macedon, Marion, Ontario, Palmyra, Walworth, and Williamson.
Five weekly and one monthly newspapers are published in the county.

1. The LYONS REPUBLICAN, published by Wm. T. Tinsley, was first published as the Palmyra Whig, in Feb. 1838, by Wm. N. and Samuel Cole. It was removed to Lyons by Wm. N. Cole, and its name changed to The Wayne County Whig. In the fall of 1850, it passed into the hands of Williams & Gavit. In the spring of 1852, they sold it to Silas A. Anderson, who continued it a few months, and sold it to Wm. Van Marter; and in Nov. of the same year, it passed into the hands of Rodney L. Adams. In Sept. 1856 its name was changed to The Lyons Republican; and April 30, 1859, Mr. Adams sold it to Wm. T. Tinsley, its present publisher, who enlarged it in 1866 to an eight column paper. It is the central organ of Wayne County Republicanism, and has the largest circulation of any paper in the county.

2. THE WAYNE DEMOCRATIC PRESS, published at Lyons, by Wm. Van Camp, was first issued at Palmyra, in 1855. It was removed to Lyons the same year. This is the central organ of Wayne County Democracy, and has a large circulation. Mr. Van Camp served his apprenticeship in the old Wayne Sentinel Office, where the Mormon Bible was printed. He set a good share of the type for that book.

3. THE PALMYRA COURIER, published by E. S. Averill, was commenced by the same name, May 28, 1843, by Fredric Morley. It passed into the hands of J. C. Bennett, who changed its name to The Palmyra Democrat. It was published again as the Palmyra Courier, by —— Benedict, from about 1851, to ’54. Mr. Benedict sold it to —— Beebe, and in a short time afterwards it passed into the hands of A. E. Averill, who changed its name to The Palmyra American, and subsequently again to The Palmyra Courier, under which name Mr. Averill still continues to publish it.

4. THE NEWARK WEEKLY COURIER, published by B. H. Randolph, was commenced at Newark, in June 1838, by David M. Keeler, as The Wayne Standard. In Aug. 1839, it was sold to Gen. Barney T. Partridge, J. P. Bartle, and S. Culver, who changed its name to The New Aegis, Stephen Culver, editor. In Jan. 1840, it was sold to —— Norton, and discontinued the following May. In July following it was revived as The Wayne Standard, by D. M. Keeler, and published until 1843, when it passed into the hands of H. L. Winants; and in about one year it was again discontinued. It was revived soon after, as The Newark Courier, by David Fairfield. It was successively published by Wm. K. Creague, and B. F. Jones, as The Newark Journal; and in 1854 by G. D. A. Bridgman, who changed its name to The Newark Whig. In Sept. 1856, it passed into the hands of C. F. White, who changed its name to
The Newark Weekly Courier. It subsequently passed into the hands of B. H. Randolph, who still continues its publication.

5. THE CLYDE TIMES was first published in 1844, by B. Frazee, as the Clyde Eagle. It was successively published by Dryer, Stephen Salisbury, and in 1847, by Rev. Chas. G. Ackly, and Wm. Tompkins, who changed its name to The Clyde Telegraph. It subsequently passed into the hands of Rev. W. W. Stroiker, and soon after to Wm. R. Fowle, and in a short time it was discontinued. The Clyde Industrial Times was commenced in Feb. 1850, by Payn and Smith. It soon passed into the hands of Joseph A. Payn, who changed its name in 1851, to The Clyde Weekly Times. It subsequently passed into the hands of Jas. M. Scarritt, who changed its name to The Clyde Times, and by whom it is still published.

6. THE COMMERCIAL PRESS, published at Pulteneyville, by John M. Reynolds, is a monthly paper.

The following obsolete papers have been published in the county:

The Palmyra Register, the first paper in the county, was commenced Nov. 26, 1817, by Timothy C. Strong. It was continued under various titles until 1823, when it was published as The Western Farmer and Canal Advocate, and passed into the hands of Pomeroy Tucker who changed its name to The Wayne Sentinel. It was afterwards published by Wm. N. Cole, in 1860, but has since been discontinued. The Lyons Republican was commenced Aug. 8, 1821, by George Lewis, and was discontinued in Feb. 1822. The Lyons Advertiser was commenced May 31, 1822, by Hiram T. Day. It underwent various changes in name and publishers. It was published as The Wayne County Gazette, by Ephraim S. Whitney; as The Lyons Argus by E. J. and W. W. Whitney; The Lyons Gazette by Barker and Chapman; The Wayne Co. Patriot and as The Western Argus by Chapman and Chapin, and Ashley & Co., and by the same name by Charles Poucher. In 1841 it was changed to The Lyons Gazette, and published by Russell, from 1849 to '53, when it was sold to Wm. Van Camp, and in 1855 or '56 it was merged in the Wayne Democratic Press. The Palmyra Freeman was commenced March 11, 1828, by D. D. Stephenson. It soon after passed into the hands of J. A. Hadley, who removed the press to Lyons and changed the name to The Countryman. Myron Holley became connected with it as associate editor. In 1831 it was suspended for a time, and afterward resumed as The Lyons American, by Myron Holley. In 1835 it was published by Wm. H. Childs.— In 1836, it was removed to Clyde and published as The Clyde Gazette, by Dennis Cord until 1838. The Reflector, mo., was commenced at Palmyra in 1828 by O. Dogberry, Jr. It was discon-
tinued in 1830. *The Newark Republican* was commenced at New-
ark in Nov., 1829, by Jeremiah O. Balch. It was discontinued in
1831. *The Clyde Standard* was published about six months in
1830, by E. P. Moon. *The Western Spectator* and *Wayne Ad-
vertiser* was commenced at Palmyra Jan. 9, 1830, by Luther How-
ard and Erastus Shepard. In 1831 its name was changed to *The
Spectator* and *Anti-Masonic Star*, which was removed to Rochester
the same year and merged in *The Anti-Masonic Enquirer*. *The Northern Methodist Protestant* was published by an-association at
Clyde in 1849, Rev. W. W. Stroiker, editor. *The Wayne Banner*
was published at Wolcott in 1850, by John McIntyre, and was re-
moved to Clyde and merged in *The Industrial Times*, on the first
issue of the latter paper. *The Farming Mirror* was commenced
at Lyons in July, 1853, by R. L. Adams & Co., and published one
year.

The Erie Canal was opened through the county in 1822, and ex-
tends through the southern tier of towns. Along its course are
the most populous and thriving villages of the county, though no
part of it is densely populated. The enlarged canal crosses Seneca
River on the east border of the county, on an aqueduct built upon
31 arches of 22 feet span each. It crosses Mud Creek a little west
of Lyons, upon an aqueduct of five arches, and again crosses the same
stream, north of Palmyra, upon an aqueduct of three arches. The
direct branch of the N. Y. C. R. R., opened through the county in
1854, between Syracuse and Rochester, extends along the course
of the canal, through Savannah, Galen, Lyons, Arcadia, Palmyra
and Macedon. In 1827, a charter was obtained for building a ship
canal from the Erie Canal, at Montezuma, to Great Sodus Bay.—
Surveys were made but no work was ever done. A new charter
was obtained by John Greig, of Canandaigua, in 1836; and anoth-
er by Gen. Wm. H. Adams, in 1841. The route named in the
last charter is from Sodus Bay to the Clyde River, a little west of
Clyde, and in that channel continue to Cayuga Lake. The natural
advantages for making a canal by this route was sufficiently appa-
rent to the lamented late Gen. Wm. H. Adams, and an association
of prominent men and heavy capitalists. A vast body of earth
has been removed, by a process of washing the earth out of the
intended channel; but before the project could be consummated,
as commenced, financial crisis and death occurred among the
prominent men of the association, and the charter expired. Gen.
Adams, in his extraordinary perseverance, succeeded in getting it
renewed, and again commenced the work vigorously in 1847 and
'48. Then, as before, unfavorable circumstances occurred to pre-
vent its completion, amongst which was a delay in the action of
the Erie Canal Board in changing the location of a lock to facilitate
the connection of the Sodus with the Erie Canal; pending all of
which the renewed charter expired. The right of way is secured to the heirs of Gen. Adams, and efforts are being made by them for a further renewal. The blood energy of the sire is sufficiently prominent in the son to foreshadow his perseverance in this worthy cause. The efforts of Gen. Adams has reclaimed thousands of acres of land, by a ditch, that will be a monument of a mind pressing for a valuable public benefit, when the present generations of his opponents, with their selfish propensities, are taking their rest in silence that would have benefited their country if practiced while living.

Meetings of individuals have been held, respectable in numbers and prominence, and efforts made to organize a Sodus and Clyde R. R. Co., but clashing interests of selfish individuals so crushed the project that no further progress was made than to procure a survey and estimate, which was in every feature favorable, but interested local parties could not agree upon the terminus at either end, and those who would have invested, withheld doing so for want of a starting point or a terminus.

Thus the fates continue against this Great Sodus Bay, safe harbor, and its connection with the Erie Canal and N. Y. C. R. R. at Clyde; and the last act was the recent appropriations made by Congress for the ports of Lake Ontario. We cannot fail to see the inappropriateness of favors, when this great bay and its little rival are compared—one, a great safe harbor with almost an entire natural entrance for lake vessels, with the lighthouse washed away, and piers and docks destroyed, and having the least appropriation; and the other an inland pond, unless a bar is dredged to connect the lake and bay waters visibly. It is natural to suppose that political policy and ill expended capital commits these errors, thro' men of less honest care of public interest than selfish motives.

The Sodus Point and Southern R. R. was incorporated in April, 1852. The road was to extend from Sodus Bay to Hall's Corners, in Ontario Co. The route was surveyed, and some grading done, but owing to the financial difficulties of 1857, the work was abandoned, and has never been recommenced.

The nine western towns in this county belonged to the Pulteney Estate; the east part, including Savannah, Galen, and portions of Wolfeott and Butler, constituted a portion of the Military Tract. The intermediate portion, except the three south tiers of lots in Rose, were compensation lands granted to the Pulteney Estate for the gore between the old and new pre-emption.

In the obscure background of history we find the sons of the forest, the Iroquois, the general term applied to the "Six Nations," ranging in lordly freedom through their wild domains. Next, the French claimed the command of this wilderness. At length they gave way to British power. After the Revolution, the treaty of
1783 left it in possession of the victorious colonies. But the indistinctness of the original charts involved Massachusetts and New York in a sharp controversy, each State insisting upon its claim to this part of the western territory. This dispute was submitted for decision to commissioners, appointed by the different States, who met at Hartford, Dec. 16, 1786, and was settled by a compact between the two States, in which New York "ceded, granted, released and confirmed to Massachusetts, all the estate, right, title, and property, (the right of government, sovereignty and jurisdiction excepted,) which the former had to a large territory west of the Military Tract, comprising the whole part of country through which the Genesee runs, from its source to where it flows into Lake Ontario." The amount of land was estimated at about six million acres. By the Legislature of Massachusetts, this district, in 1788, was granted to Oliver Phelps and Nathaniel Gorham, for the sum of $100,000, and from that time became private property. Phelps and Gorham the same year opened a land office in Canandaigua.

Besides this Massachusetts Reserve, there was the Military Tract. These constituted the two general divisions of Western New York. The Military Tract was reserved by an act of the New York Legislature, Jan. 25, 1782, to be distributed among the officers and soldiers of New York State who served in the Revolution. It was situated directly east of the Massachusetts Reserve, or the Phelps and Gorham Purchase. The western line of the Military Tract was drawn from the mouth of Assaro-dus Creek, (or Great Sodus Bay, a contraction of the Indian name,) south, along the western shore of Seneca Lake, and east by a line drawn from the most westerly boundary of Oneida, or Tuscarora County, on the Oneida Lake, through the most westerly inclination of the west bounds of Oneida and Tuscorora territory, south, by a line drawn due east from the southern extremity of Seneca Lake. The tract included 1,680,000 acres, and embraces the present Counties of Onondaga, Cayuga, Seneca and Cortland, the greater part of Tompkins and a small part of Oswego and Wayne.

The earliest white inhabitants were hunters and trappers. The first permanent settlements were made in 1789, at Palmyra, under the auspices of Gen. John Swift, agent of a company of settlers from Connecticut; and at Lyons, under Charles Williamson, agent for the Pulteney Estate. The name of John Swift figures conspicuously in the early settlement of this county, being identified with every effort to advance its political, social and religious interests.* Mr. Charles Williamson built roads from Palmyra and Lyons to Sodus Point; upon these the early settlers mostly located. He also laid out a city at Sodus Bay, which has not yet been built.

*See Palmyra, for more full account of Swift's career.
From 1790 to '94, colonies came in from Rhode Island, Long Island and Maryland. The latter brought with them several slaves; but it was soon found that slave labor was unprofitable. The settlements did not progress with great rapidity for several years, owing to the diseases which prevailed. The fear of Indian hostilities, and of British invasion during the war of 1812, greatly retarded settlement. On the return of peace, settlers began to arrive in considerable numbers, principally from New England and Eastern New York. The completion of the Erie Canal gave a new impulse to immigration; and in a few years the flourishing villages of Lyons, Clyde, Palmyra and Newark were built up along its course. The N. Y. C. R. R., built through the county in 1852–53, greatly benefited it, and enhanced the value of the lands.

Few now survive of the adult emigrants who, up to the beginning of the present century, pitched their tents in the then howling wilderness of "Ga-nar-gweh," (the aboriginal name of the tract,) now transformed to the blossoming gardens, the cultivated fields, and the happy "homes" of Wayne County. The reminiscences disclosed in the life of these early settlers are rife with interesting incidents, which have been snatched from the fleeting memories of the past, for the contemplation, perhaps emulation, of present and future generations. Such reviews are designed to quicken our patriotism and piety, and give new strength to the roots which bind us to the soil and the principles of our progenitors. Their works have left an impress upon the annals of time, like footprints on the sandy sea-shore, which bear to us rich lessons of wisdom and instruction. They were actuated by the same motives and passions which influence their descendants; and the same political, social and religious differences were rife then as now. It will perhaps present an interesting contrast of early and latter times, to mention an incident remembered by but few of the present inhabitants of the district where it transpired. Politics ran high about the years 1807–8, under Jefferson's administration, and the "federal" and "democratic" parties became greatly embittered in their divisions. The school was disturbed by these party animosities, even the boys in attendance espousing the quarrel, siding according to parental classification or individual sentiment. The trustee elections, and the teacher appointments, were all influenced by the political divisions, and the "federals" being in the ascendency of numbers, carried the district exclusively for their own side. It was resented by the "democrats," who in consequence procured a severance of the district, and the erection of a "democratic school house," with "democratic teachers." Such an example of partizan spirit by these good fore-fathers, might well admonish their sons to patience and forbearance in the evanescent party strifes annually occurring at the present day.
WAYNE COUNTY.

It was customary for the early settlers to take observations on "Winter Green Hill," of the marks, at different points, of the impressions made by civilized man. Seventy years have now passed away, and could the same men stand on the same eminence, how striking would be the contrast of the surrounding country at the present time to its pristine wildness! The dark and lofty forest has given way to the waving harvest. Where went up the smoke of the wigwam, now rises the elegant mansion. Instead of the howl of the wolf, are now heard the cheerful sounds of a busy and happy community. But what imparts the greatest interest to the recollection of things as they were, is the comparison presented by the canal, the railroad, the telegraph, the churches, the schools, the printing-presses, the edifices of industry and domestic peace, the densely populated streets, (comparatively,) the busy hum of commerce and trade, and the monuments of improvement and civilization generally, which now mark the same locality. Before us are evidences of men and agencies, to whom we may apply the words of inspiration:——"The wilderness and the solitary place shall be glad for them." There are some things in the early history of this county, which should be regretted and shunned. Stephen Durfee, (one of the early settlers,) used to say, "the first curse that came among us was whiskey." It was the ruin of many of the early settlers and their sons. "I," said the old veteran, "made the first move in the cause of temperance. In 1811, I raised my house without a drop of intoxicating drink," Afterwards, the "Friends" adopted strict temperance as a part of their discipline. Many a strong man has been cast down by this enemy. It is a painful fact that so noble a patriot as John Swift should be beguiled of his discretion, and fall a prey to the enemy through so insidious a foe. We would indeed go backward with a mantle of charity; but as we look forward we inquire, "Shall the sword devour forever?" My readers, you move over the graves of your fathers. Do you cherish their virtues? Will you make as good a bequest to posterity as they did? You, like they, are writing history, which others will read. These hills and valleys will remain, with the indelible impress of your works written on their rugged surface. Your posterity will turn, upon their Thanksgiving days, upon your memory; and they will come on pilgrimages to look at the humble stones which mark your last resting place. Shall the review stir the noble sentiment, the high resolve to promote intelligence, extend liberty—to know God—to save the world?

Two of the most notable events that have transpired in the history of this county, from their magnitude and importance, is the rise of Mormonism in Palmyra, and the origin of Spiritualism in Arcadia, for full account of which see respective towns.

During the late four years struggle for the life of the Republic,
Wayne County was fully represented by the many noble sons who fought and bled for their country's sake on Southern soil. It was our intention to have presented a complete statement of the disposition of the troops from this county, but owing to incompleteness of the military records, during the early stages of the war, it was found impracticable, and the census returns are evidently so far short of the truth, in regard to number of enlistments, as well as other details concerning military matters, that it was considered advisable to omit its publication altogether. Suffice it, that every town and every neighborhood, sent forth of their numbers a goodly portion of their fathers, sons or brothers, the bone and sinew of the land—and, after four years of fearful war; after one of the greatest struggles the world ever knew, success crowned both right and might, deciding that "This Union is one and inseparable," and that freedom and universal liberty belong to all who dwell in this great country—where good and bad, the great or poor, and oppressed of every land, find shelter and a home. Peace, smiling peace, returned to bless us, and those who outlived the great fight returned home, their breasts filled with rapture, for it was their day of hope and pride. But ah, how many did not return! Peace did not bring joy to the hearts bowed down with grief for the loved and lost. Theirs was a noble sacrifice, and should ever be remembered as such by a grateful country. O, may the differences now existing between the people of this country be speedily adjusted; and may we all again become a united and happy people; and may each State once more become a "bright particular star" in the coro- net of this unequaled nation; and in time of peace or war, in time of truth or prosperity, ever defend

"That banner, with the proud device, EXCELSIOR."
GAZETTEER OF TOWNS.

Arcadia was formed from Lyons, Feb. 15, 1825. It lies on the south border of the county, a little west of the center. Its surface is a rolling region, broken by drift ridges. Mud Creek flows east through the town, north of the center, and receives several small streams as tributaries. The soil is a sandy, gravelly loam, mixed with clay on the hills. Gypsum is found in the south-west, and marl in the centre. There are 25 school districts in the town, employing 58 teachers, (15 male, and 43 female,) with an average daily attendance of 647 pupils. The valuation of school property in 1866, was $21,750. The population of the town, taken from the census of 1865, was 5,253; area 30,944 acres.

Newark, (p. v,) including Arcadia, (p. v.) in the south part, was incorporated July 21, 1853, as Newark. It is on the Erie Canal, and is a station on the direct branch of the N. Y. C. R. R. The village is about one mile south of the depot, and is very pleasantly located, the streets being regularly laid out and beautifully shaded by well preserved ornamental trees. The Newark Weekly Courier is published by B. Howe Randolph. The village contains a union school, with nine teachers, and has an average yearly attendance of 300 scholars; 10 churches, viz: 1 Dutch Methodist, 1 Methodist Episcopal, 2 Baptist, 1 Dutch Reformed, 1 Christian, 1 Presbyterian, 1 Roman Catholic, 1 Episcopalian, and 1 Universalist; 2 banks, 2 flouring mills, 2 tanneries, 2 furnaces, and nearly 3,000 inhabitants. A number of years ago, the building of a large collegiate institute was commenced on the summit of the large hill at East Newark, but owing to trouble in collecting subscriptions, the building was discontinued after being raised to the height of two stories. The difficulty since being arranged, the work has recently been recommenced, and with a prospect of early completion. When done, Newark can boast of one of the finest school buildings in the State. The Sodus Point and Southern Railroad, which was to extend from Sodus Bay to Hall's Corners, in Ontario County, was incorporated in April, 1852. The route was surveyed, and in various places, sev-
eral miles west, graded. During the financial crisis in 1857, the work was suspended, and has never been recommenced. Fairville, (p. v.) about five miles north of Newark, contains 2 churches, Methodist and Presbyterian, 1 tannery, a hotel, school-house and about 185 inhabitants. Marbletown, near the south-east corner, is a hamlet containing about 100 inhabitants, all farmers. Jessup's Corners and Hydeville are small hamlets; the latter was the home of the Fox family, of "Rochester Rapping" notoriety. In this obscure place Spiritualism was born and nourished.

The settlement of the town was commenced by Joseph Winters and B. Franklin in 1791. Gilbert Howell and Paul Reese, settled in 1795; Samuel Soverhill in 1798; Humphrey Sherman, Reuben Starks and John Miller, from Long Island, in 1800; and Ebenezer Smith soon after. Jacob, Philip and Isaac Lusk came in from Columbia County in 1806, and purchased one square mile of land, which is now occupied by the village of Newark. Caleb Tibbetts came in in 1807, with Stephen Aldridge, Henry Croags, and Cooper Culver. Dr. A. Hyde settled in 1810. The first death occurred in 1792—a child in the family of B. Franklin; the first marriage in 1798, —— Hess and Amy Tibbetts. Hiram Soverhill, son of Samuel, was the first child born, in 1800. The first inn was kept by Stephen Aldridge, and the first store by J. P. Bartlett. The first church, (M. E.) was organized in 1805. J. Wesley Benton was the first settled minister, in 1806.

A very noted event transpired in this town, in the vicinity of Hydeville, viz: the origin of modern Spiritualism, previously mentioned. Margaret and Catharine Fox, and Elizabeth Fish, (a niece of the former girls,) were the first to discover an intelligence in the mysterious sounds known as the "rappings," on the night of March 31, 1849. The father of the sisters was a blacksmith, reported to be honest and industrious, who pursued his trade at that place. Those in the neighborhood who discard the idea of its spiritual origin, affirm that it was simply a ruse between the girls to dupe their mother, who was said to be very superstitious, or to subject her to the imposition so commonly practised on the 1st of April; and succeeding so well, they determined to initiate the whole family, and pursue their deception, at the expense of a credulous community, as a means of subsistence; while those who adhere to the belief in its validity, or superhuman origin, as firmly deny the assertion. Be that as it may, they created considerable excitement in the vicinity of Hydeville by exhibitions of what they termed "spirit manifestations." The people came in large numbers, from all directions, to witness this singular phenomena; some to deprecate and others to investigate its merits. About a month after its inception, they moved to Rochester, being unable to accommodate the throng of curious and eager spectators who daily visited them.
estor they gave public exhibitions in the halls at that place; hence the name, "Rochester Rappings." The incredulity of the people was aroused, and a series of investigations instituted; some claiming for it a spiritual origin, but the majority pronouncing it a humbug or delusion. From this source the great body of Spiritualists originated, numbering millions of professed believers. If it be an evil, it is a gigantic one. It has steadily progressed until it has developed itself into an acknowledged science, and effectually overcome a most bitter opposition from every other religious sect, and from scientists, whose realms it has dared to intrude. It has diffused itself over almost every part of the civilized globe, and numbers in its ranks some of the most learned and philosophical minds the world has ever produced. It has, and is still, agitating the minds of our most learned divines, whose rigid scrutiny it has challenged from the first, and ingenuously threatens to dethrone and revolutionize the hitherto presumed security of theology. It is a question which demands the careful and earnest attention of every rational, thinking being, and if it be the insidious monster it is claimed to be, should be speedily denounced and discountenanced.

**Butler** was formed from Wolcott, Feb. 26, 1826. It is the center town on the east border of the county. Its surface is diversified; level in the south-east, and rising into ridges in the north-west. The highest point is Armstrong Hill — named from Hon. Thos. Armstrong, who held prominent positions in public offices, as Member of Assembly and U. S. Senator. The principal stream is Wolcott Creek, which rises in the north-east, and flowing in a circuitous course, leaves the town near the north-west corner. The soil in the valley is a gravelly loam, and on the hills it is generally clay, with a tenacious sub-soil. Lime is manufactured in the north part to a limited extent. The population of the town, from census of 1865, was 2,083; area 21,993 acres. It contains 15 schools, in which 15 teachers are employed for the season. The average attendance during the year 1866, was 254. The expenses for the support of schools during the same year was $2,504.20. Private schools are taught during the winter season, supported by individual effort. The Normal system of teaching has been uniformly adopted throughout the entire county, great improvement having been made within the past few years. Much is owing to the untiring efforts of Dr. M. F. Sweeting, of South Butler, (who was the first School Commissioner in the county,) for this radical change.

South Butler, (p. v.) on the south line, contains 4 churches: 1 Baptist, 1 Disciple, 1 Methodist Episcopal and 1 Second Advent; 1 hotel, 1 steam flouring mill, 1 steam saw mill, 1 tannery, and other mechanical operations. It has three schools and about 450
inhabitants. **West Butler**, (p. o.) a little north of center, contains 1 hotel, 1 school and about 60 inhabitants. **Westbury**, (p. v.) in north-east corner, partly in the town of Victory, Cayuga County, contains about 100 inhabitants. **Butler Center** contains 1 church (M. E.) and about 12 houses.

Settlement was commenced in 1802. John Grand and Paul Wellman settled near the Center in 1807; also, Roger Olmstead, Henry Brunnel, Aaron Hoppin and Mrs. Bunce, previous to that time. Morris and Seth Craw came in in 1807; the former is still living in South Butler, and is 75 years old. Capt. Peter Mills and Wm. Hallett came in in 1805, Abijah Moore in 1806, and Orastus Hubbard about the same time. Horace Peck came in in 1810; he died in the Fall of 1865, aged 77 years. Ranson Winans was the first child born. The first death was that of Jedediah Wheeler, in April, 1811. Jesse Olmstead built the first saw mill, at the Center. Morris Craw kept the first inn, in 1817. The first local minister was Caleb Mills. Rev. Antoinette L. Brown, the first woman ever regularly ordained in the State, was settled for several years over the Congregational Church at South Butler.

**Galen** was formed from Junius, (Seneca Co.) Feb. 14, 1812. It was formerly Township No. 27 of the Military Tract, and received its name from having been appropriated to the Medical Department. Savannah was taken off in 1824. It lies on the south border of the county, east of the center. Its surface is hilly in the east, but more level in the west. In the south-west is a large tract of swamp land. Clyde River—named by Wm. McNab, agent of the Hornby Estate, Geneva,—flows through the town from west to east, in a circuitous course. The soil is a rich, sandy and gravelly loam. There is more business, of a mercantile and mechanical nature, carried on here than in any other town in the county, which, while it numerically increases its population, adds essentially to its material growth and prosperity. The products of the manufacturing and other mechanical interests of the town, afford employment and sustenance to about one-half the inhabitants. The remainder rely upon the fruits of agriculture. The N. Y. C. R. R. and the Erie Canal pass through the town, a little north of the center. The projected Sodus Canal—not yet completed—forms a junction with the Erie about the center of the town. There are 19 schools, 1 high school included, employing 26 teachers, with an average yearly attendance of 702 scholars, costing $8,285.92 during the year 1866. The population of the town in 1865 was 5,314; area 35,299 acres.

**Clyde**, (p. v.) near the center, on Clyde River, was incorporated May 2, 1835. This location was originally called "Block House,"
from a block house built here by Indian traders at an early day. During the Revolution it was converted into a "station," for smuggling goods from Canada via Sodus Bay, by the Tories. After it had assumed the dimensions of a village, it was named "Lauraville," from Henrietta Laura, Countess of Bath, daughter and heiress of Sir William Pulteney. Its name was changed to Clyde in 1818.

The canal passes through the village. It is also a station on the N. Y. C. R. R. It contains 6 churches: 1 Presbyterian, 1 Methodist, 1 Baptist, 1 Methodist Episcopal, 1 Episcopalian, and 1 Catholic; 3 banks, 1 newspaper office, (The Clyde Times) 1 window glass factory, 1 glass bottle factory, a distillery, steam flouring and saw mills, grain warehouses and elevators, 2 furnaces, &c., for manufacturing agricultural implements and heavy machinery, 2 cooperages, a brewery, 2 paper mills, 4 malt houses, and 1 tannery. Population about 3,100. Clyde possesses more valuable commercial advantages, naturally, than belongs to most villages in Western New York. Surrounded by hundreds of square miles of productive soil, whose products find them the most convenient market, and in that market enterprising, competing capitalists, who are shrewd in commercial matters where immediate gain appears in favorable prospective; but none of these as yet have been far-seeing enough to make a successful move towards improving the more essential public advantages lying in store for capital and enterprise of a future day.

This village is only ten miles from the navigable waters of Great Sodus Bay—the best harbor on the south shore of Lake Ontario—and the surface of the country between these points of suitable soil and easy grade for making a railroad cheaply, thus opening an avenue for a vast trade of coal, lumber, agricultural products, and various other articles of commerce, that would naturally pass through this short and convenient connection, were it established. A company was organized Jan. 22, 1853, with a capital of $150,000, to carry this work into execution; but, owing to clashing interests of selfish individuals, the project was abandoned after a survey had been effected which pronounced it a feasible route. The natural advantages for making a canal by this route was sufficiently apparent to early attract the attention of prominent individuals, among whom was the late Gen. Wm. H. Adams. Charters were obtained and much work has been effected upon this enterprise, which is still being agitated by the heirs of Gen. Adams, (to whom the right of way has been secured,) but owing to a combination of unforeseen events which have tended to retard its progress, the work still remains incomplete.

The First National Paper Manufacturing Co. of Clyde, (Darwin Calvin, President,) commenced building in the early part of Sept., 1866. They have recently commenced operations, and
the enterprise promises to be a success. The estimated product of the mill is nine tons of manilla wrapping paper per week. Their machinery and buildings are entirely new throughout.—

The Clyde Paper Manufacturing Co’s (Aaron Griswold, President,) buildings and machinery are entirely new, having been completed this year. The capacity of the mill is twelve tons of printing paper per week. The Company commenced making paper in Feb., 1867. The process of making straw paper is as follows:—About 95 per cent. of straw and 5 of manilla rope, are cut fine, by a machine made for the purpose, preparatory to being put into the boiler, or steeper, (usually capable of holding about 3,000 lbs.) where it remains from ten to twelve hours—

the boiler being constructed so as to make about two revolutions per minute. Soda-ash and lye are used to reduce the stock.—

When it has sufficiently softened, it is put into a paper engine to convert it into pulp. The paper engine consists of a large vat about two and a half feet high, with a wheel constructed, in which are inserted thirty-six steel knives, making 175 revolutions per minute, which cuts the straw very fine. It is thoroughly washed by water passing a brass cylinder sieve, or washer. It is subjected to this action about six hours, before being thoroughly converted into pulp. It is now passed through a pipe inserted in the bottom of the engine, and conveyed to an agitator, from which it is pumped into a square box and run into vats, where the paper is first formed on brass beds or molds. From these it is conveyed, by means of a felt belt, through press rollers, thus pressing the water from the pulp. It is then passed through six large iron cylinders, or rollers, heated by steam.—

This is called the drying process. It next passes through Calendar Rollers, upon which an immense weight is brought to bear; by this means it receives a fine glossy surface. From these it is wound upon reels, holding about 2100 feet each, from which it passes through a cutting machine, and cut into any size required. Two girls are employed to receive the paper and pile it as it passes from the cutter, after which it is counted and packed into quires, reams, and bundles. It is now ready for market. A composition of chlorine and other substances is used to bleach the paper while it is being converted to pulp. Various ingenious mechanical devices are employed to facilitate its transfer from one part of the mill to the other, thereby dispensing with much manual labor in the different processes through which it passes.

The Clyde Glass Works, owned by Messrs. Southwick and Reed, forms another important feature in the manufacturing interests of this busy village. This Company are engaged in the manufacture of bottles and window glass, each comprising different and separate departments. The composition used for each is the same, though
the process of making is entirely dissimilar. It is put into large crucibles—made of German clay, which are arranged in the furnaces—every night, and worked out the following day. The crucibles are usually capable of holding 1000 lbs each. The glass is taken from the furnaces on pipes about four feet in length. The first process by which bottles are made is called marbling, being rolled on a marble slab, after which they are put into molds of whatever shape and size required, and blown into shape. The molds are constructed to work like a spring clamp, being operated entirely by the foot. The bottles are taken from the molds and broken from the blow pipe, when they are finished, or the rim put on, by applying glass from the crucibles. They are now placed in large annealing ovens, for tempering, where they remain about thirty-six hours, and are then taken to the packing room, where they are packed and stored ready for market.

In the window glass factory the process is similar until after it is taken from the crucibles, when the mold is now dispensed with. It is blown into large cylindrical tubes about four feet long, and eight or ten inches in diameter. This is a very difficult branch of the business, and requires much practice to become proficient, as the workmen are governed entirely by the eye, in making a perfectly uniform tube. They are laid upon racks to cool, after which they are cut down the centre, and placed in a revolving carriage, or horizontal bed of clay, in a heated oven, where they remain a sufficient length of time to flatten out in sheets. They are again cooled, and removed to the cutting room, where they are cut into the required size, after which they are counted and packed, and are then ready to be shipped to market. The process is a simple, yet very beautiful one.

The Clyde Iron Works, formerly owned by Mr. A. S. Field, is now carried on by Messrs. Wood, Candler & Co., who have leased them of Mr. Field. The articles of manufacture are Plows and Cultivators, and a general assortment of agricultural implements. The principal market is in the county and the immediate vicinity. Messrs. Wood, Candler & Co. have increased their facilities for doing a general custom business.

There are many other mechanical branches carried on which contribute materially to the growth and prosperity of the village. The broken down bridge was replaced in 1866 by an iron structure.

From an analysis by Prof. Hadley, of Geneva College, in 1844, the Mineral Springs at Clyde are composed of

Muriate of soda, .............. 55 grains.
Muriate of lime, .............. 33 "
Sulphate and muriate magnesia, 12 "

It contains 288 grs. saline matter to the gallon.
WAYNE COUNTY.

Marengo, (p. v.) in the south part, contains a saw mill, tavern, and about 150 inhabitants. Lock Berlin, (p. v.) in the west part, on the canal, contains 1 church, (Meth.) and about 100 inhabitants. Angell's Corners, in the south-east, and Meadville, in the east, on the canal, are hamlets.

First settlement commenced by Laomi Beadle, in 1800; he is still living at Marengo, aged 84 years. Nicholas King, David Godfrey and Isaac Mills came the same year, and built the first house in town, a log cabin, on Military Lot No. 70. They moved their families into the town the following Spring, from Orange Co. N. Y. The first white family moved into town in 1801; J. Kings, David Creagher, from Md., Elias Austin and Capt. John Sherman, in 1804. Elias Austin is now living in Orleans Co., aged 87 years. Asaph Whittlesy settled in 1805. Isaac Godfrey was the first child born in town, Feb. 1, 1802; the first death that of David Godfrey, accidentally killed Oct. 13, 1801. Jabez Reynolds and Polly Mills formed the first marriage in 1805. In 1804 the Channel was cut across the “Ox-bow” in Clyde River, (then Canandaigua outlet,) to allow the passage of flat bottom boats above the “big wood reef,” this stream being then the only passage for all heavy carriage from Oneida Lake and Schenectady to Palmyra.

The first bridge was built across Clyde River, on Sodus St., in 1810. First house built in village of Clyde, (of hewn logs) by Jonathan Melvin, in 1811; first town meeting held at house of Jonathan Melvin, in 1812. In March, 1814, a bear and three cubs were captured in the hollow of a large whitewood tree, within half a mile south of Clyde. Mr. Joseph Watson, now living at Clyde, participated in this exploit. James B. West kept the first store. In 1818, the Clyde-Dam was erected; and the first saw and grist mill was built by Maj. Fred A. De Zenz. During this year, the bridge built in 1810 was carried away by a flood or freshet. In 1854 the Clyde Dam and Mills were taken down, and the N. Y. C. R. R. opened through the town. The first Church, (Presb.) was organized at Clyde, July 8, 1814. Charles Mosher was the first minister. Boring for salt to the depth of 400 feet has been made in the vicinity of Clyde, producing a weak brine, but not of sufficient strength to warrant its being worked. One of the wells emitted inflammable gas. The well was soon filled up.

Huron was erected as a township from Wolcott, as “Port Bay,” Feb. 25, 1826. Its name was changed March 17, 1834. Its northern border is washed by the waters of Lake Ontario. It lies east of the center of the county. A part of Great Sodus Bay lies in the north-west corner, and extends within a mile of the southern border of the town. East Bay, in the north, and a part of Port Bay, in the north-east, extend some distance into the town. Its surface is rolling, with a general northern inclina-
tion. In the west and north-west, near Great Sodus Bay, are several tracts of swamp land. The lake shore rises in a series of bluffs, the highest of which — Chimney Bluff — is 175 feet above the lake, and Bay Bluff 120 feet. The town is well watered by the several small streams which flow north through it, the principal of which is Mudge Creek, which empties into East Bay. The soil is a sandy and gravelly loam, intermixed with clay in the south. About 1822 a considerable business was carried on at Port Glasgow, but since the Erie Canal was opened, it has gradually decreased, until it has almost entirely dwindled away to nothing. The canal has had a tendency to draw the business interest away from this place. The early settlers of Huron brought with them some 70 or 80 slaves, but soon found they could not be used to advantage. The population of the town in 1865, was 1,972; area 21,826 acres. There are 11 schools, employing 12 teachers with an average yearly attendance of 223 scholars. Current expenses for school purposes during the year ending Oct. 1866, was $1,859.50. North Huron, (p. v.) near the head of East Bay, contains 2 churches, (Meth. and M. E.) 1 saw mill, 1 grist mill and about 260 inhabitants. South Huron, (Huron p. v.) contains 1 church, a town-house, and about 200 inhabitants. Port Glasgow is a hamlet, at the head of sloop navigation, on Great Sodus Bay. It contains a hotel, and about 30 inhabitants. Considerable shipping is carried on here during the summer season; but it has deteriorated much within a few years, and has almost become depopulated in consequence.

Peugrine, Fitzghugh and Wm. Helmus, were the first settlers, with other families from Md. in 1796. Dr. Zenas Hyde, — Knox, Osgood Church and family, with several other families from Mass. and Conn., came in 1807; Norman and Ralph Sheldon the same year; and Josiah Upson in 1808, who is now living in Huron, aged 70 years. Ralph Sheldon and Harlow Hyde are still living in Wolcott, the former 72, and the latter 63 years old. The first birth was that of a child of Dr. Hyde, and the first death that of Mrs. Hale, in 1809. The first school was taught in 1812 by Gardenier Mudge. Norman Sheldon kept the first inn in 1810; Jas. Mudge kept the first store; and Elihu Spencer built the first saw and grist mill in 1809. The first church, (Presb.) was organized in 1813.

LYONS was formed from Sodus, March 1, 1811. Arcadia was taken off in 1825. It lies on the south border of the county, a little east of the center. Its surface is a moderately rolling region, broken by sand ridges. The Canandaigua Outlet from the south, and Mud Creek from the west, join in the south part and form Clyde River. The soil is a sandy and gravelly loam, with marl upon the creek bottom lands. The N. Y. C. R.
R. runs, along the course of the canal, through the town, south of the center. The population of the town, from the census of 1865, was 5,007; area, 21,758 acres. It contains 13 schools, which employ 23 teachers, with an average attendance of 595 scholars. The expenditure for school purposes during the year ending Oct. 1866, was $9,175.30.

Lyons, (p. v.) on the canal, at the junction of Canandaigua Outlet and Mud Creek, and a station on the N. Y. C. R. R., was incorporated April 18, 1854. It contains the county buildings, gas works, 7 churches, (1 Presb., 1 Lutheran, 1 M. E., 1 Epis., 1 Dutch Meth., 1 Baptist and 1 Catholic,) a musical academy, a union school, (which was among the first of the kind established in the State,) 4 banks, 2 newspaper offices, (the Lyons Republican and Wayne Democratic Press,) a manufactory of essential oils; (principally peppermint,) a furnace, machine and agricultural implement shop, a pottery, 2 breweries, a tannery, a tile manufactory, a brick yard, 7 fanning mill factories, a manufactory of saddle-trees, 2 planing mills, 1 steam bending factory, and a sash and blind factory. Many of these, however, are carried on only to a limited extent. The village contained 3,036 inhabitants in 1865. Its streets are regularly laid out, and lined on either side with well grown and well cared for shade trees, and are lighted at night by gas. Its business blocks—mostly substantial structures—are too straggling, which makes them appear to great disadvantage, losing, as they do, all the benefits of a compact village. Many of its private residences are models of architectural beauty and mechanical execution. The Lyons people are justly proud of the architectural elegance of its public buildings, churches and school houses, as well as its substantial sidewalks, which are composed for the most part of flagstone. In this respect it is far ahead of most villages of its size. The Court House, a sightly edifice, standing on a rise of ground overlooking the Park, presents an imposing appearance. It was completed in 1856, at a cost of $50,000. It is a model of architecture, externally, as it is of convenience and good arrangement inside. One of the principal business features of Lyons is the Iron Foundry, owned by Messrs. Wickson and Van Wickle, who employ a large force of men in the manufacture of a general assortment of agricultural implements. The Lyons Pottery, owned by T. Harrington, also contributes materially to the manufacturing wealth of the village. Ten men are employed, and 400 tons white clay, (from Amboy, N. J.,) is annually consumed in the manufacture of ware; 20,000 pots of all descriptions are annually made.

Mr. H. G. Hotchkiss has acquired a world-wide reputation as a manufacturer of Essential Oils of Peppermint, and has received the first prize at every exhibition at which his products have been pre-
sent. He has been engaged in the business for twenty-five years, and has made great improvement, and acquired great proficiency in the art of purifying. Mr. Hotchkiss is the greatest producer of Peppermint in the world. He has from 200 to 300 acres under cultivation, 150 acres of which can be overflowed with water to the depth of 6 to 10 inches, at pleasure. This process enables him to continue to grow the crop upon the same soil for a series of years, and protect the young shoots in winter by a watery covering. Between April and July, he employs more than 100 laborers upon his plantation. The Spearmint and Peppermint plants are set out in April, and are ready for distillation the following July, and continues to produce a supply until November, according to the nature of the ground. The average product of the crop per acre is about twenty pounds of pure Oil of Peppermint. The process of distillation can only be effected while the plant is maturing, not more than three days after being cut, else the volatile oil evaporates and the plant becomes useless. After being distilled, it undergoes a certain purifying process, after which it is put into glass bottles, and shipped to all parts of the civilized globe; London, (England,) being the principal market. Mr. Hotchkiss' brand is considered the best in the world. His annual trade amounts to $200,000, and is gradually increasing, as the superiority of the article he manufactures recommends itself to the extensive trade dealing in that commodity. Of all the valuable oils produced in the United States, the oil of peppermint is perhaps most frequently found to be impure or adulterated, owing to negligence in its preparation. The plant yielding only a small proportion of oil, and requiring careful and continual cultivation, and a suitable soil, the time of gathering the plant also greatly affecting the quantity and quality of the product, its price is necessarily high; while this oil being so much used by the confectioner and pharmacist, consequently causing considerable competition for it among the dealers, that a great quantity comes to market deprived of the agreeable and refreshing aroma peculiar to the pure oil, or adulterated with spirits of turpentine, added during or after the manufacture. The product of Mr. Hotchkiss has been analyzed by the best chemists in Europe and the United States, upon whose testimony various medals have been awarded him.

Within the incorporation limits, and south of the canal, are situated the Wayne County Fair Grounds, a plane of several acres, well fenced and supplied with substantial buildings.

Alloway, (p. v.) in the east part, on Canandaigua Outlet, contains 1 school, 1 grist mill, and other local business carried on to a limited extent, and about 150 inhabitants.

The first settlement was commenced in 1789, by Nicholas and Wm. Stansell and John Featherly. They settled, with their fami-
Wayne County.

families (12 persons in all,) a half mile south of the present village of
Lyons. They were piloted up the Mohawk, (where they had previously settled,) by the usual water route, by Wemple, an Indian trader. Charles Williamson, agent of the Pulteney Estate, commenced a settlement at Lyons village in 1794, through Charles Cameron, his local agent. James Otto came in 1796. In 1798, Judge Evert Van Winkle and forty others came in, from New Jersey and Maryland, and in 1801, Judge Daniel Dorsey and family, from Maryland. Judge Dorsey had previously purchased of Mr. Williamson 1,048 acres of land, in the immediate vicinity of the village, the assessed value of which in 1802 was $2,696. Mr. Dorsey's personal property was assessed in the same year at $2,379, making a total value of assessed property of $5,075, upon which he paid a tax of $9.53. Among the early settlers were John Riggs, Richard Jones, George Carr, Wm. Gibbs, John Perrine, Robert Sutton and James Walters, who came previous to 1801. Thos. E. Dorsey, who came in 1801, with his father, Judge Dorsey, is now living in Lyons, is hale and hearty, and worked during the entire summer of 1866 at his trade, (carpenter and joiner.) Elizabeth Riley and Delia Rook, sisters of Mr. Dorsey, who came at the same time with him, are also living at Lyons village, the former 84 and the latter 82 years of age. As early as 1801, and some years later, the inhabitants were obliged to pilot their way through the woods with only the mark H cut in the bark of the trees to indicate that they were on the highway. The first marriage was that of James Otto and a daughter of Capt. John Dunn. John Riggs kept the first inn, in 1801. Judge Daniel Dorsey kept the first store. The first grist mill was built by the Pulteney Estate, at Alloway, in 1796. It was subsequently sold to Henry Tower. Daniel Dorsey and Milton Barney built the first carding and cloth-dressing mill in 1817. Rev. John Cole, (Meth.) who settled in 1800, was the first local preacher.

Macedon was formed from Palmyra, Jan. 29, 1823. It lies in the south-west corner of the county. Its surface is rolling and irregular. The valley of Mud Creek extends east through the south part of the town. It is drained by Mud and Red Creeks, and their tributaries. The soil is a clay and gravelly loam upon a limestone formation. The canal, and direct branch of the N. Y. C. R. R. extends through the center of the town. The population of the town, (taken from census of 1865,) is 2,472; area 22,818 acres. It contains 15 school districts, employing 7 male and 18 female teachers, with an average daily attendance of 267 scholars. The valuation of school property in 1866, was $6,515.

Macedon, (p. v.) a canal village, was incorporated in Nov. 1856. It is also a station on the N. Y. C. R. R. between Syracuse and
Wayne County.

Rochester, five miles west of Palmyra and eighteen miles east of Rochester. The village is about a mile south of the railroad. It contains 1 Baptist church, 1 saw mill, a grist mill, a furnace, and Machine shop. It has 2 hotels, and the usual number of stores and small shops incident to a village of its dimensions. The population of the village is about 500. Macedon Center, (p.v.) about a mile north of the railroad, contains 3 churches, the Macedon Academy, and about 100 inhabitants. West Macedon is situated on the canal, and owes its existence principally to that fact. It contains 2 stores, and about 50 inhabitants.

The first settlement commenced as early as 1789, by Webb Harwood, and Ebenezer Reed. Israel Delano, from Mass., and David Comstock, settled in the north part, and Darius Comstock and Jerome Smith in the central part in 1790. Jacob Gannett, John Gibson, Barnabas Brown, Abner Hill, Adam Kingman, Stephen and Abraham Spear, Jonathan Warner, Constant Southard, Paul Reid, Bartimeus Packard, Barney and Phillip Woods, from Mass., in 1791. A number of Friends came in in 1800, from Penn. and Mass. The first child born was Jacob Gannett, in 1791; the first death was that of David White. Barnabas Reed taught the first school. Wm. Porter kept the first inn, and Jacob Gannett built the first mill. Abraham Laphan, with his family, settled in 1791. Ira Laphan, his son, is now living, aged 89 years. His health is remarkably good. The first church (Bapt.) was organized in 1800.

Marion was formed from Williamson, as "Winchester," April 18, 1825. Its name was changed April 15, 1826. It is an interior town, lying west of the center of the county. Its surface is broken by sandy hills and gravelly ridges; the Niagara limestone crops out in the north part. It is drained by East Red Creek, which flows south into Mud Creek. The soil is a gravelly, calcareous loam and drift. Limestone is quarried in the north part for building purposes and public works. Near Marion village is a sulphur spring. The population of the town in 1865 was 2,136; area 17,391 acres. There are 13 school districts, in which 5 male and 21 female teachers are employed. The average daily attendance of scholars is 241. The valuation of the school property in the town in 1866, was $4,675.

Marion, (p.v.) in the south part, contains 5 churches, (1 Baptist, 1 M. E., 1 Christian, 1 Presbyterian, and 1 Dutch Presbyterian,) Marion Collegiate Institute, 1 furnace and machine shop, 1 spinning mill and 2 cabinet ware manufactories. A survey has been taken and efforts are being made to have the village incorporated. The population of the village from census of this spring, 1867, is 483.
The settlement of the town was commenced in 1795, by Henry Lovell and Daniel Powell. Moses A. Blakesley and David Sweezy settled in 1797, and Wm. Cogswell from Rhode Island, in March 1798. David Sherman and Robert Springer came in 1796, and Samuel H. Colwell in 1797. Robert Springer, who came in 1796, returned to Rhode Island the next year, and brought his family, after having purchased a piece of land and cleared a small place. Israel and Samuel, his sons, are now living in the village, and enjoying uniformly good health; the former being 73, and the latter 75 years old. Wm. B. Cogswell is still living in the village, aged 90 years. Annie Powell, (now Potter,) who came in the town with her father, (Daniel Powell,) was born in Palmyra, and is now living in the village, aged 72 years. The first birth that occurred in town was in the family of Henry Lovell; the first death that of Joel Phelps in 1797. Widow Stiles kept the first inn, in 1799; and — — — built the first grist mill in 1801. The first church, (Presb.) was organized Nov. 1, 1808.

**ONTARIO** was formed from Williamson, as "Freetown," March 27, 1807. Its name was changed Feb. 12, 1808. Walworth was taken off in 1829. It is the north-west corner town of the county; Lake Ontario forming its northern boundary. Its surface is mostly level with a general inclination toward the lake. It is drained by several streams running north to the lake, the principal of which are Bear, Deer, and Davis Creeks. The soil is a sandy, gravelly loam, with drift and muck north of the ridge. Between the lake shore and the Ridge road, are extensive marshes, heavily timbered. Iron ore, in the form of red oxyd, is found in large quantities in the Clinton group, extending east and west through the center of the town. Salt was formerly manufactured to some extent. The ore bed was first discovered by Mr. Knickerbocker, a resident of the town, in 1811, while engaged in digging a hole to water his cattle. The vein is about 20 rods uniform width, and 18 inches to 2 feet thick. In Ontario it is only from 3 to 6 feet below the surface. It has been quarried extensively, and has contributed largely to the growth and prosperity of the town. The population in 1865 was 2,312; area 19,977 acres. It contains 14 school districts, in which are employed 7 male and 21 female teachers. The average attendance of scholars is 321. The valuation of the school property in the town in 1866, was $6,010.

Ontario, (p. v.) in the south-east part, contains 1 church, (Wes. Meth.) 1 school, 1 hotel, 1 saw mill, and a stave and heading machine. Its population is about 250. Ontario Center, 2 miles west of Ontario village, contains 2 churches, (Bapt. and Presb.) several small mechanical shops, and about 150 inhabitants. Furnace Village contains the Wayne Co. Iron Co's. Works. They manufacture
a large quantity of pig iron, from ore dug in the town. It has about 75 inhabitants. *New Boston*, on the lake shore, is a hamlet, and *Lake Side* about 2 miles south-east of the north-west corner of the town, is a post-office.

The first settlement was commenced by Freeman Hopkins, from Mass., in 1806. Among the early settlers were Peter Thatcher, Harry Leavins, and Noah Fuller, who settled on the lake shore in 1809. Willard Church, Isaac Simmons, John Case, Wm. Middleton, Jared Putnam, David Jennings, and Amos, Amasa, and Levi Thayer, from Conn., in 1810. In the south part settlement commenced in 1808. Daniel Inman settled at the corners in 1809; John Edwards, Samuel Sabin, Abraham Smith, Wm. Billings, Lewis Janes, and George Sawyer, near the same place, soon after. Alfred Town, Nathaniel Grant, and Wm. Greenwood, located at West Corners. Alanson Goodnow settled in 1811. He is now living at Ontario Village, and is 71 years old. He has had no sickness within 45 years. David Jennings, a very early settler, is still living in town, and is 80 years old. The first child born was Melissa Hopkins, May 7, 1806; and the first death was that of Harriet Kilburn, in 1811. Daniel Inman kept the first inn, in 1811; and Freeman Hopkins built the first saw mill. Daniel Inman built a saw mill about the same time. The first church (Bapt.) was organized in 1811, by Elder Lyon.

**PALMYRA** was erected, by Court of General Sessions of Ontario Co., in Jan., 1789. Macedon was taken off in 1823. It lies in the south border of the county, west of the center. Its surface is undulating. Its streams are East and West Red Creeks, with several smaller ones as tributaries. Mud Creek flows east through the town, south of the center. The soil is a calcareous loam, with marl on the creek bottoms, and drift, sand and gravel on the hills. The Erie Canal and N. Y. C. R. R. extend through the center of the town in a circuitous course. Its population in 1865 was 4,225; area 19,243 acres. It contains 16 school districts, employing 4 male and 29 female teachers, with an average daily attendance of 555 scholars. The valuation of school property in Palmyra (p. v.) in the south-west part, was incorporated April 9, 1819. It is an important canal village and station on the N. Y. C. R. R. It contains 5 churches (1 Presb., 1 M. E., 1 Bapt., 1 Cath. and 1 Episc.,) 3 banks, 1 printing office, (The Palmyra Courier,) gas works, the Palmyra Union School, (with nine teachers,) 2 machine shops and manufactories of agricultural implements, 1 scale manufactury, cigar manufactury, a flouring mill, vinegar factory, tannery, a printing press manufactury, and several hotels and stores; the population of the village in 1865 was 2,334.
East Palmyra, (p. v.) a canal and R. R. station, contains 2 churches, (Presb. and Meth.,) a grist mill, store, and about 150 inhabitants.

Some of the first families locating in Palmyra came from Litchfield Co., Conn., including numbers who had quit their lands in the Wyoming, (a beautiful valley of the Susquehanna,) on account of controversies about titles to land, &c. Col. John Jenkins and Gen. John Swift were among the primitive adventurers who pitched their tents in the then howling wilderness of "Ga-nar-gweh," (the original name of the tract,) now transformed to the blossoming gardens, the cultivated fields and the happy "homes" of Palmyra.

There is a humble stone in the old graveyard of this village, bearing the inscription—"John Swift." But few names are more deeply imbedded in the foundations of this community. He has figured so conspicuously in the events connected with it, as well as the county at large, that his name is worthy of especial mention. John Swift was a native of Kent, Litchfield County, Conn. When 15 years old he became a soldier in the Revolution, and served seven years, till the close of the war. He was one of the Connecticut colony in the valley of the Wyoming, and in a bold attempt to fire the Block House of the Pennamites, he was shot through the neck, the ball passing between the spinal column and the esophagus. A like recovery was scarcely ever known in the history of surgery. After the settlement of difficulties, a company of Connecticut people was formed, and John Swift and John Jenkins were appointed agents to select and purchase lands for their occupation. Jenkins had been in the employ of Phelps and Gorham, as surveyor, and was acquainted with this section of the Genesee country. In 1789, they purchased Tp. 12, R. 2, now Palmyra, and commenced the survey of lots along Mud Creek in March. During the summer, John Swift moved into the town, and erected a log house and storehouse, a little north of the lower end of Main St., Palmyra. While asleep there, with their assistants, four Indians, attracted by the light, put their guns through the open spaces between the logs, killed one man named Barker, and shot a ball through the nose of another by the name of Church. It is probable this dampened the zeal of the Pennsylvania emigrants. True it is, the Susquehanna company was given up, and Swift, in order to effect a settlement sufficiently formidable to render it safe, spent the summer of 1790 in forming companies in Massachusetts, Connecticut and Rhode Island. In Sept. 1790, Swift moved his family into this unbroken wilderness. He built the first house of logs, covered with bark. His wife was the first woman who ventured a residence in this native wilderness. One evening, while making hasty pudding, three Indians came in and sat around the fire. At length they made signs of violence. At this, the heroine of the log cabin seized a red-hot poker, and used it so efficiently
that they concluded a "swift" retreat was the better part of valor. John Swift was the first Moderator of the first town meeting; the first Supervisor; the first pound tender; the first Captain, and at his house was held the first training. At his house, if we except Canandaigua and Bloomfield, was formed the first church west of Oneida Lake. Asa Swift, his son, was the first male child born in the town. He gave lands for the first graveyard, the first school house, and the first church in the village. Indeed from 1790 to 1812, the name of John Swift is identified with every enterprise, pecuniary, political and religious. In the war of 1812 he became a victim to his own inadvertence. At its commencement he was appointed Brevet Gen. N. Y. Vols. In 1812, while stationed at Queenstown Heights, he led a detachment down the river, some six miles, to Ft. George; surrounded and took prisoners a picket guard of the enemy, with some 60 men. Instead of commanding the prisoners to ground their arms and march away from them, he suffered them to retain them. One of the captives inquired, "Who is Gen. Swift?" Most inadvisedly he stood forth and said, "I am Gen. Swift." In an instant the inquisitive prisoner put a ball through his breast. He was borne to the nearest house, where he died, and was buried July 12, 1814, aged 52 years. After the war the citizens of Palmyra disinterred his remains and deposited them in the old cemetery of the village. The N. Y. Legislature, out of respect to his patriotism and bravery, presented a sword to his oldest son, and directed that a full length portrait of Gen. Swift should be hung up in the City Hall of New York. Maj. Howe Cuyler was another, and an earlier sacrifice to the war of 1812, from Palmyra. He was the first lawyer that opened an office in Palmyra, and a man still remembered for his public enterprise and generous sympathies. He was the Aid of Gen. Hall. On the night of the 8th of Oct., 1812, he was killed at Black Rock, by a four pound ball from the British battery at Ft. Erie. He moved to Palmyra in 1804, from Greenbush. Soon after his arrival he purchased the village lot on which now stands the Methodist Chapel, and built and occupied the house yet remaining north of it. This being then a slave State, he brought with him two negro slaves, (Charles and Mahala,) and was the first, if not the only slaveholder ever residing in Palmyra. He took a laudable pride in village improvements, and gave a fresh impetus to things in that direction, providing himself a good garden and a dressed up door yard, painting his house and planting out shade trees, &c. In Nov. 1791, Gideon and Edward Durfee, and Isaac Springer, arrived from Tiverton, R. I. They came in wagons on the old Military road to the old castle at Geneva; from thence, without a path, they found their way to Palmyra. Prior to this, in the fall of 1790, the Durfees came on foot on a tour of discovery
to the "Genesee country," halting at the "Quaker Settlement," in Farmington, where they commenced a negotiation for land with Isaac Hathaway; but afterwards referring Swift's township, they bargained with him, and returned to Rhode Island, where they arrived on the 1st Jan., 1791. Their report was regarded with favor by their friends, and emigration was determined upon. Preparations being made, a colony of 100 men embarked upon their journey, with two yoke of oxen and a sled, about the last of Feb. the same year, reaching Palmyra the last of April. They planted that spring two or three acres of corn on the peak of land near the "Howell Saw Mill," east of the village, which had been cleared of timber and burnt over by the Indians. They also planted apple-seeds, which they had brought, on the same ground, (the first tame apples planted in the town,) and from these originated the old orchard of the Durfee family, yet remaining on the "homestead." Afterwards Pardon Durfee brought from Rhode Island and planted in the same garden, pear, and other fruit seeds, and it was from one of these that sprung the "Osband Pear," now propagated in fruit nurseries as the best of all summer pears. The seedling was given by Mr. Durfee to his brother-in-law, Weaver Osband, who brought it into bearing—hence the name it has taken. Pardon Durfee came in in 1792, driving the cattle belonging to the colony. The next August a boat landed near the farm house owned by Martin Butterfield, bringing Gideon the elder, and Job, Stephen and Ruth Durfee. Lemuel Durfee arrived four years later. Ruth Durfee married Capt. Wm. Wilcox—the first marriage in the town. It is said that Swift had failed to fulfil his engagements to Phelps and Gorham, but when the Durfee family came he "took heart," for they brought the hard coin, sufficient to pay down for 1,600 acres of land. This money enabled Swift to secure a warranty deed of the town. These were soon followed by Lemuel Spear, David Jacques, Jas. Galloway, Jonathan Willet and the Mattisons; and by Wm., James and Thos. Rogers, Festus and Isaac Goldsmith, Humphrey Sherman, Zebulon Williams and Weaver Osborn, from Rhode Island. David Wilcox, from Adams, Mass., came with his family in April 1791. Mary, his daughter, was born the 29th of next June, and was the first white female child born in the town. A colony was formed at Southampton, who in 1790 sent forward Elias Reeves and Joel Foster, as their agents, to buy land. Gen. Swift having failed to meet the payment for his purchase, they negotiated with Phelps and Gorham, in order to be sure of a good title. In April, 1792, the Long Island colony embarked at Southampton, in a sail boat built by Joel and Cyrus Foster. They sailed through the Sound to New York, thence to Albany; from there they transported their boat by land, 16 miles, to Schenectady; with "setting poles" they pushed the boat up the
Mohawk to Rome. From there they conveyed the boat by land something less than a mile to Wood Creek; thence floating down to Oneida Lake, through the lake and the outlet, they came to Oswego River; thence into Seneca River; through that to Clyde River; through Mud Creek to Saw-mill Creek, landing near the present residence of Hiram Foster. The voyage occupied 28 days. The way now being open, the same old hive sent out repeated swarms of working bees. The Clarcks, Posts, Howells, Jaggers, Culvers, Jessups and many others followed. This old boat did good service in going and returning with other companies. It was finally conveyed to Seneca Lake and used as a pleasure boat. In 1790-91, Lemuel Spear, Dr. Gain Robinson, David White and David Warner, with their families, came from Cummington, Mass. Also, Reuben Town, the first physician located in Palmyra, Isaac Kelley, Stephen Phelps, Webb Harwood, Abraham Laphan and Solomon Hathaway, were from Adams, Mass. Joseph Colt, the first merchant in the village, came from Lyme, Conn.; Silas Stoddard, from Groton, and Enoch Sanders, from Warren, Conn. Asa Lilly was from Athol, Mass. These came about 1800. The first store, a log edifice, on the spot where the R. R. Depot now stands, was kept by Zebulon Williams. Here were the head waters of navigation of Mud Creek, which was established as a navigable stream by an act of the Legislature in 1799. The town or district was first christened Tolland by the pioneers, (then in "Tryon" Co.) Ira Selby taught the first school (built in 1793,) in the village; which was succeeded in 1801 by a framed one built upon the same site. This building, like its predecessor, was used for both school and religious purposes; both being conducted for a number of years by Rev. Eleazer Fairbanks, who was the first pastor of the first church, (Presb.,) formed in 1797. Luther Sanford built the first framed barn. The first two-story framed house was built by Silas Harts. The first blacksmith was Zechariah Blackman. The first house burnt was Maj. Colt's smoke-house. Dr. Azel Ensworth was the first postmaster, also the first tavern-keeper and deacon. By reason of this latter double office, it was frequently Dr. E.'s good fortune to be the honored host of the clergy, either transient or resident. Slings was the favorite "treat" in those times, which was anterior to temperance societies. In his proverbial politeness the Dr. was duly observant of the prevailing custom, in treating his "minister" guests to sling made of West India rum, with white loaf sugar; while the "captains," "squires" and common people, were content with home-made whiskey and maple sugar.

Here the insidious monster, Mormonism, was nursed and cradled; which, like the "serpent in Eden," has chosen for its victims the fairest of God's creatures. For 37 years it has dragged its slimy footsteps through the annals of American history. Its progenitor,
Joseph Smith Jr., was born in Sharon, Windson county, Vt., Dec. 23, 1805. He removed to Palmyra, with his father, Joseph Sr., and family, in 1815 or '16. They soon after moved just over the town line into Manchester, some two miles south-west of Palmyra village. Joseph Smith, the father of the “Prophet,” previous to the Mormon dispensation, supported himself and family by digging and peddling “rutes and yarbs,” selling cake, beer, &c. In 1819 or '20, they commenced digging for money for a subsistence. The vocation was noised around among the community, and not a few were credulous enough to believe that they were within reach of a “chest of gold,” (“which had repeatedly eluded their grasp,”) and contributed money to the Smiths to enable them to continue their excavations. They, however, used the money thus obtained for the support of the family, and in the meantime kept their friends in a fever of excitement while treasure hunting. Here we must pause to relate an incident replete with important interest, from its intimate connection with the rise and progress of Mormonism. Rev. Solomon Spaulding, while residing at Conneaut, Ohio, in 1809, formed the basis of a romance purporting to give the history of a lost race of people, from the numerous mounds and relics of dilapidated fortifications in this vicinity, which inspired the idea of this literary production. His original design was merely to amuse himself and friends by the imaginary history, entitled “Manuscript Found.” It claims to have been written by one of the lost nations, and recovered from one of the mounds. After its completion it was left for perusal with a Mr. Patterson, publisher of a newspaper there; but possessing no real merit, Mr. Patterson refused to publish it. Spaulding neglected to call for it, and it was finally thrown among the waste paper, where it came under the observation of Sydney Rigdon, who was at that time connected with the office, and who took a copy of it. Rigdon upon hearing of the doings of the Smith family in Palmyra, conceived an idea, which resulted in the printing of the Mormon Bible. He at once proceeded to Palmyra, and had long and frequent private interviews with Joseph Smith Jr., when it is supposed they formed the plan of a new religious dispensation. From this romantic legend the Mormon Bible was transposed. Joseph Smith would repair at night to a cave in the hillside, and dictate to his amanuensis, (Oliver Cowdery,) what he “mysteriously translated from golden plates,” which he pretended to have found while digging for money in Sept. 1823, by spirit of revelation, but was not permitted to take them from the earth until 1827, about the time the Bible was commenced. The greatest secrecy was observed during the pretended revelations, which were only given in the cave at night, without any light, no one else being able to read the inscription on the plates but he. When it was completed, they were in a great dilemma to know
how they were to get it printed. This difficulty was soon obviated
by Martin Harris, a convert, mortgaging his farm to defray the
expenses, ruining himself in doing so. Application was made
about June 1829, to Mr. Egbert B. Grandin, the publisher of the
Wayne Sentinel at Palmyra, for the printing of the book. Grandin
at once advised them against the supposed folly of the enterprise.
All importunity, however, was resisted by Harris, and resented
with assumed pious indignation by Smith. Upon the refusal of
Grandin, they applied the same year to Mr. Weed, of the Anti-
Masonic Inquirer, at Rochester, and there met with a similar re-
fusal. They again applied to Mr. Grandin, who, upon seeing their
determination, consented to print it, stipulating to print 5,000 copies
of the book for a compensation of $3,000.

From such insignificant seed sprang the giant evil, which now, on
the soil of a distant Territory, threatens the troops of the United
States, subverts all principles of law and order, builds a mighty
hierarchy of falsehood and licentiousness, and will draw millions of
dollars from the public treasury to suppress it. That vice and
crime are fostered by the peculiarities of life in Utah, no one can
reasonably doubt. There has been no time, in a great many years
past, when the American Government would not have been justi--
fied in using its strong hand to crush the hydra-headed monster
which there holds hideous reign under the piteous pretence of being
a religious sect. The basis of Mormonism is polygamy, and noth-
ing else; the “prophets” are sensualists, whose sole desire is to
keep a harem of concubines; and in no other way can they carry
out their beastly designs, than by cloaking their hideousness under
the pretence of a religious sect. There are two reasons why they
can do this only so; the first is, that there is no influence that can
be brought to bear upon the weak and ignorant among females with
such swaying potency as the pretence that polygamy is the highest
development of religious abnegation on their part, and is taught by
the scriptures as a duty; the second is, that in this country, where
religious freedom is guaranteed by the Constitution to all, the Mor-
mons rest securely in the trust, that, as a religious sect, the Govern-
ment dare not meddle with them.

But we are of those who believe that Mormonism is in no true
sense a religious institution, and that its assumption of being such,
should not be sufficient to free it from the strong hand of the law.
The longer the Mormons are left alone, the more powerful they
grow; and this will be so, as long as there are sensual and brutal
men who seek to set aside the laws of morality and Christianity,
and practice licentiousness under the sanction of, or with a certain
immunity from the law. In the future history of our country, the
Western Territories, in the heart of which Utah lies, are destined to
play a most important and influential part. The march of progress
WAYNE COUNTY.

is steadily westward with us, and each succeeding year sees the springing up of new towns further and further away from the reach of railroads. Out of the way of the steady onward march of civilization and freedom, polygamy must be swept, and that soon. Scarce-ly any crime known to the Decalogue, but is openly—or almost openly—practised in Utah. Polygamy, itself a crime by the laws of every State in the Union, is of that nature that it calls to its assistance all other crimes. It calls in murder without hesitation, and no man's life is safe in Utah, who is not himself a polygamist, unless he is sheltered by a United States Fort. All local officials work the machinery of justice, in such a way as to play into the hands of polygamy. It is all in all, and woe to the man or thing that obstructs its course. To the list of their iniquities, the “Saints” (as they style themselves, after the brazen fashion of hypocrites, generally,) took occasion during our late war, to add that of treason. From Brigham Young down, the desire was general in Mormondom, that the Union should be destroyed, and slavery given a new lease of life. Not a soldier was sent out, not a dollar was given, to aid the Union cause. No doubt the “prophets” saw that in the future, the same power which was wiping the stain of slavery from our national life, would raise its arm to strike down polygamy. May the vision prove a true one.

ROSE, named in honor of Robert S. Rose, who held an interest in the “Nicholas 4000 acre tract,” was formed from Wolcott, Feb. 5, 1826. It lies in the interior of the county, east of the center, and contains an area of 21,849½ acres. Its surface is generally undulating or level, with drift ridges in the south-east. Several small tracts of swamp land are to be found in various parts of the town. The soil is a gravelly loam, intermixed with clay on the westerly side of the drift ridges, and with muck on the low lands. Good clay for brick and tile is found in many places. The highest elevation is 140 feet above Lake Ontario. Limestone approaches the surface in various places, and has been quarried to some extent for lime and building purposes. The old Lock on the Erie Canal at Clyde, was built in 1823 from stone taken from an extensive quarry in the north part of this town. The streams are small; Mudge, Sherman, and Thomas Creeks are the principal. The first town meeting was held at the house of Charles Thomas; Erastus Fuller, a justice of the peace of the old town of Wolcott, presiding. Peter Valentine was the first supervisor.

Rose Valley, (Rose p. o.) near the center, contains four churches, a steam saw-mill, tannery, several stores and two hotels. Population about 400. Wayne Center, (p. o.) in the west, and North Rose, (p. o.) in the north, are hamlets.

The first birth was that of a child of Milburn Salisbury, in 1812. The first marriage, that of Hosea Gillett and Hannah Burnham, in Jan. 1813; and the first death, a child of Harvey Gillett in 1812. Sally Bishop taught the first school, in 1813. Seth Whitmore and Simeon Van Aukin built the first grist and saw mill in 1812-13, on Thomas Creek, at Glenmark Falls. Aaron Shepard was the first blacksmith, in 1812. John Bassett, who commenced the business soon after, still resides in the village, aged 75 years. John Sherman kept the first inn, about the year 1815. John Barber Jr., opened the first store, in 1832. After one year hear he moved his goods to Clyde, and was succeeded in Rose Valley by Eron N. Thomas, his former clerk, who continued the business successfully until the year 1859, when, being largely engaged in buying and selling real estate, farming, manufacturing, building, &c, the selling of goods was abandoned. Dr. Peter Valentine was the first established physician, in 1819. The first church (M. E.) was organized in 1824 with six members. A stone church was erected in 1833, and was destroyed by fire in 1858. A new site was purchased, and in 1860 a church was built at an expense of about $8,000. The first Presbyterian church was organized Feb. 17, 1825, and a church built in 1832, which, in 1862, was sold for a school house, and the same year a brick church was erected on a new site. The Baptist society was organized about 1835, and their church was erected in 1839-40. The Free Methodist Church was organized about the year 1860, and have a small church. Some twenty or thirty years since, several deluded people from this and adjoining towns were engaged in "money digging," and on many of the farms the traces of their work are yet visible. They professed to work under the guidance of invisible spirits, through an interpreter, who claimed to know of money chests, gold, and valuable minerals;
and many a time they were just upon the expected treasure, when, under the excitement of the moment, some unlucky "digger" would break the spell by an exclamation, the untold riches vanished, and the poor frightened individuals run for life. The proposed "Sodus Canal," of which we have spoken under head of Galen, passes thro' this town. Population of the town in 1865, was 2,209.

SAVANNAH, named from the surface, in the south part, was formed from Galen, Nov. 24, 1824. It is the south-east corner town of the county. Its surface is broken by drift ridges in the north, and is low, and marshy in the south; about one-third of the south part is a wood-land marsh, known as Crusoe Island. Seneca River forms the south part of the east boundary. Crusoe Lake is a small, shallow body of water near the center; its outlet, Crusoe Creek, flows into Seneca River. The soil in the north is a sandy and gravelly loam, and in the south it is principally composed of muck and shell marl. The Galen Salt Works, of an early period, were in this town. They were discontinued in consequence of the successful competition of the Salina Salt Works, owing to the superior brine which those works produced. A tract of about 1,900 acres in the south-east part, is an open marsh, producing coarse grass, which has been successfully used in the manufacture of printing paper. Efforts have been made to reclaim this vast tract of swampy country, by a process of draining. A project of turning the course of a creek flowing into Seneca River was contemplated, but owing to an opposition of commercial interests in Oswego, it was abandoned, and the subject still remains an open matter.

The town has an area of 21,908 acres. Its population in 1865 was 1,938. There are 13 schools, employing 13 teachers, with an average attendance of 283 scholars. The expenses for school purposes during the year 1866, was $3,519.37.

Savannah, (p. v.) near the center, incorporated April 15, 1867, is a station upon the N. Y. C. R. R., and contains 2 schools, 1 church, (Presb.) and 350 inhabitants. A steam stave mill, owned by Mr. Devendorf, was burnt in the fall of 1866, and is now being rebuilt. In the spring of 1865, the country on the line of Crusoe Creek was inundated by the freshet at that time, carrying away all the bridges on the creek. Much damage was done to the parts flooded, and much inconvenience resulted to the inhabitants before the damage could be repaired.

The first settlement was made by Elias Converse and Joseph Mozier, in 1812. Alexander and Martin Lamb, John, Jacob and Cornelius Oves, settled previous to 1815. Henry Taylor, now living in town, followed in 1815; and Michael Weatherwax, Benjamin Seeley, Garret Burnham, Abner, Ezra and John Brockway, Henry Myers, David Cushman, and Sampson McBane, mostly
from Eastern New York, soon after. George Fredenburgh, now living in Ill., was among the early settlers. He and Sally Converse were the first couple married in the town; and their child was the first birth. The first death that occurred was that of Sweetman. Lorin Brown taught the first school in 1817. Rev. Mr. Wiers was the first minister settled in the town; but no church was in the town until very recently. It now contains but one. John Brockway and Chauncey Ives are still living in the town; the former 80 and the latter 70 years old.

*Sodus,* called by the Indians “Assorodus,” meaning “silvery water,” was formed in January, 1789, by Court of General Sessions of Ontario County. Williamson was taken off Feb. 20, 1802, and Lyons, March 1, 1811. It is the central town on the north border of the county, and is bounded north by Lake Ontario. A part of Great Sodus Bay lies in the north-east corner. Its surface in the north part is mostly level, with a gentle inclination toward the lake. A ridge, 140 to 190 feet higher than the surface of the lake, passes through near the center; and south of this the surface is broken by several ridges extending north and south. The lake shore varies in height from a low swamp to bluffs 70 feet high.—Second and Salmon Creeks are the principal streams. The soil in the north part is a clay and sandy loam, and in the south a gravelly loam. The manufacture of lime is extensively carried on in the south part; and red sandstone is quarried in the south-west. Red oxyd of iron (argillaceous ore) is found two miles west of Sodus Point. Salt was manufactured in 1831 and ’32. It is by far the largest town in the county, covering an area of 40,184 acres, and contains many beautiful natural prospective views. The lighthouse at Big Sodus Bay, built in 1825, with revolving light, 64 feet above the lake, was destroyed in a gale in 1857. The harbor at this place upon which so much has been expended, is in a very dilapidated condition, the piers being washed away into the harbor, thus rendering it very unsafe for vessels to put in. This was probably the best harbor on the south shore of Lake Ontario, and the money which has been expended on its would be improvement, has left it in a worse condition than when in its natural state, owing to the insufficiency of the appropriations, and incompleteness which has characterized the efforts to render it a good and safe harbor. The population of the town in 1865, was 4,603. It contains 23 schools employing 23 teachers, with an average yearly attendance of 492 scholars. The expenditures for school purposes during the year 1866, was $4,610.53.

*Sodus* (p. v.) contains 3 churches, (Bapt., Presb. and M. E.) the Sodus Academy, incorporated by Regents, Jan. 11, 1855, and employing four teachers; a planing mill, and about 700 inhabit-
ants. **Sodus Point** (p. v.) on the lake, west of the entrance to the Bay, is a U. S. port of entry in the Genesee District. It has a church, saw mill and boat yard, and about 250 inhabitants. It is a very general favorite and pleasant summer resort for the people of this section. Here, in fair weather, may be seen large numbers of visitors, eager for the joys of a day's fishing on the Bay. The Sodus Point and Southern R. R. was organized March 8, 1852, with a capital of $350,000. Operations were commenced in the construction of this road, which was surveyed and partly graded, but finally abandoned in 1854. It was designed to connect with the Catskill and Ithaca R. R. **Sodus Centre** (p. v.) contains 1 church, 1 foundry, 1 carding mill, 2 grist mills, 1 saw mill, and about 180 inhabitants. **Alton** (p. v.) contains 1 church, (Meth.) 1 saw mill, a tavern, and about 100 inhabitants. **South Sodus** (p. v.) contains a tavern, and about 125 inhabitants. **Joy** (p. v.) contains 1 church, (Meth.) 1 saw mill, and about 150 inhabitants.

The first settlement was made in 1794, under the auspices of Charles Williamson, agent of the Pulteney Estate. Mr. Williamson caused a road to be cut through from Palmyra to Sodus Point in the spring of 1794. During the summer the town was surveyed, an extensive city plan laid out between Salmon Creek and the Point, and within two years mills were erected on Salmon Creek. A tavern was built at an expense of $5,000, a pleasure yacht was placed upon the bay, and, in roads, surveys, buildings, &c., over $20,000 were expended. Thomas Little, and —— Moffat were the local agents of Mr. Williamson. Of all those connected with these premature improvements, but few remained after they were completed. Elijah Brown was an early settler, four miles west of the Point, and Amos Richards, seven miles west. Ammi Ellsworth came from Conn., in 1801, and settled near the point. Dr. Wm. Nixon Loomis, settled at the Point, and built mills and a forge. A daughter of his is Mrs. Elizabeth Ellet, author of "Women of the Revolution," and "Domestic History of the Revolution." Col. Peregrine Fitzhugh came from Md. in 1803, with his family and slaves—over 40 persons in all. Dr. Thomas G. Lawson, an Englishman, settled one mile from the Point in 1808. After expending considerable money in attempting to form a settlement, he abandoned the enterprise in 1805. In 1799, besides those already mentioned, there were 25 families in town on roads leading to Palmyra and Lyons. Moses and James Sill kept the first inn, at Sodus Point, in the building erected for that purpose by Mr. Williamson. The first church (Bapt.) was organized in 1805. Elder Seba Norton was the first settled minister. On the evening of June 13, 1813, a party of about 100 English landed at Sodus Point in boats, from the fleet of Sir James Yeo, for the purpose of seizing or destroying what public stores they could find. They
WAYNE COUNTY.

were opposed by about 40 Americans under Capt. Hull, of Lyons. After the first fire the Americans retreated. The enemy burned five houses, and the old Williamson Hotel, owned by Capt. Wm. Wickham. The public flour had been secreted in a ravine and remained undiscovered. The next day a gunboat proceeded up the lake to Nicholas Point and burned a warehouse. The British had two killed, and the Americans one killed and one mortally wounded. The total amount of property destroyed amounted to about $25,000.

WALWORTH, named from Gen. Chancellor Walworth, was formed from Ontario, April 20, 1829. It is the central town in the west border of the county. Its surface is a high rolling upland, the ridges being the most elevated land in the county. A stranger standing upon their summit is at once impressed by the grand and picturesque scenery, which here presents itself to his view. The Niagara limestone crops out in the north part, marking its course by a hard, stony surface, some rods in width. It is drained north by several small streams, and south-east by tributaries of Red Creek. The soil is a rich sandy loam. The population of the town in 1865 was 2,179; area 20,401 acres. It contains 13 school districts, in which 6 male and 16 female teachers are employed, with an average daily attendance of 267 scholars. The valuation of the school property in 1866 was $4,278.

Walworth, (p. v.), near the south-east corner, contains 2 churches, (Bapt. and M. E.,) the Walworth Academy, 1 hotel, 2 cooper shops, and other incidental mechanical interests. Its population is about 300. Its streets are lined on either side by ornamental shade trees, for which it is indebted to the enterprise of Mr. T. G. Yeomans, one of the most prominent residents of the village. Mr. Yeomans has quite an extensive nursery, which covers about 70 acres, in a very improved condition. He confines himself chiefly to fruit trees, but raises some ornamental trees. He has an orchard covering 140 acres of land, embracing about 14,000 trees, divided equally between apples, pears and peaches. An extensive vineyard is also attached to the nursery. Mr. Yeomans makes the Dwarf Pear a speciality. Last year he sent to market 170 bbls., which have been pronounced by competent judges second to none in the State. Three years ago he raised 3,000 bushels of peaches. The peach crop, however, is generally precarious. He has put in something more than 30 miles of draining tiles on about 175 acres. Mr. Yeomans attributes the peculiar advantages of this county as a fruit-growing country to its contiguity to the lake, and the hills which abound in this vicinity, which favor it most from the fact that there is less exposure to the frost than there is in the valleys. Jas. Peacock, in this town in 1865, raised a crop of ap-
pies by which he realized $3,000 from four acres of ground. West Walworth, (p. v.,) near the south-west corner, contains a tannery and about 175 inhabitants. Lincoln is a newly established post office in the north-west part.

The first settlement was begun about 1799. Among the early settlers were Andrew Millet in 1799, Dr. Hurlburt Crittenden in 1804, Stephen Douglass in 1802, who built the first frame building in town in 1804, for an inn, which is now occupied by the family as a dwelling house; Deacon Gideon Hackett, James and Jonathan Hill, Capt. Gilbert Hinckley, in 1804; and John, Marshall, David and Jerry Chamberlin about the same time. Daniel Douglass, George and Joseph Randolph, at West Walworth; and Jones Findley, who is now living in the village, came in 1806. Luther Filmore built the first tannery in 1805. Thomas Kempshall kept the first store. The first death that occurred in the town was that of a man named Green, in 1806, who was killed by the fall of a tree. The first church, (M. E.,) was organized previous to 1809. Mrs. Susan Douglass, wife of Stephen, who built the first frame house, is still living in the old homestead. She is 90 years of age, and enjoys exceeding good health. She works and seems as smart almost as ever. She is the oldest inhabitant in the town. George Randolph is now living in the village. Andrew Millett hung himself. He became insane from the belief that the wood would soon be cut away, and the world left without fuel in consequence. Daniel Douglass was accidentally drowned. Joseph Randolph, Deacon Hackett, Jonathan Hill, and Capt. Hinckley died natural deaths. The latter moved to and died in Ohio.

Williamson, named from Charles Williamson, the first agent of the Pulteney Estate, was formed from Sodus, Feb. 20, 1802. Ontario was taken off in 1807, and Marion in 1825. It lies on the northern border of the county, west of the center—Lake Ontario forming its northern boundary. Its surface is level in the north, with a gentle inclination toward the lake. In the south it rises into low ridges. It is drained by a few small streams that flow north into Lake Ontario. The soil is a sandy, gravelly loam, mixed with clay near the lake shore. Iron ore has been dug here to some extent at an earlier day, but has been discontinued. The area of the town is 20,543 acres. Its population in 1865 was 2,571. It contains 15 school districts, in which are employed 3 male and 26 female teachers, with an average daily attendance of 314 scholars. The valuation of school property in the town in 1866 was $5,050.

Pultneyville, (p. v.,) named from Sir Wm. Pulteney, situated on the lake shore, is a U. S. port of entry in the Genesee District, contains a church, (Union,) a grist and planing mill, and about 530
WAYNE COUNTY.

inhabitants. On the morning of June 13, 1813, Com. Sir James Yeo, with a British force, made a descent upon this place. Gen. John Swift, who commanded the Americans, surrendered, with the stipulation that private property and persons should be respected. Most of the U. S. stores had been previously removed to a place of safety, so that little loss was sustained. The British had 2 killed and 3 wounded. Williamson, (p. v.) south of the center, contains 4 churches, (Bapt., M. E. Presb. and W. M.) a saw mill, and about 350 inhabitants. East Williamson contains a church, saw mill and about 125 inhabitants.

The first settlement was made in 1803, by Wm. Waters. Capt. Samuel Throop, Jeremiah Selby, John Holmes and Alpheus Curtis, came in 1806; Maj. Wm. Rogers in 1807, and Daniel Poppins, Timothy Smith, — Denning, Andrew Connell, Samuel Ledyard, and Jacob W. Hallet, soon after. H. N. Throop was the first child born, in Nov. 1807. The first inn was kept by Maj. Wm. Rogers, in 1807; and the first store by Joseph Colt. Capt. Samuel Throop and Jeremiah Selby built the first saw and grist mill.

WOLCOTT, named from Gov. Oliver Wolcott, of Conn., was formed from Junius, (Seneca Co.,) March 24, 1807. Butler, Huron and Rose were taken off in 1826. It is the north-east corner town of the county—Lake Ontario forming its northern boundary. Its area covers an extent of 21,589 acres. Its surface is undulating, with a general inclination toward the lake. In several localities are tracts of low marsh land. The streams are Wolcott, and Big and Little Red Creeks, and several smaller streams, which flow north into Lake Ontario. A part of Port Bay, in the northwest, Blind Sodus Bay, (named from the sand bar which stretches across its mouth from the west shore) in the north-east, and two smaller bays, extend inland from the lake. The soil is a sandy and gravelly loam. Iron ore is found in the north-east part, and is extensively quarried to supply the furnaces in the town. On Wolcott Creek the water has a perpendicular fall of 40 feet, over Niagara limestone rock, which presents a very picturesque appearance, while at the same time it affords a splendid water power to the numerous mechanical and manufacturing establishments which have been erected upon its borders. The population of the town, from census of 1865, was 3,224. It contain 14 schools, employing 19 teachers, having an average attendance of 467 scholars. The expenses for school purposes for year ending Oct. 1866, was $5,846.56.

Wolcott, (p. v.) near the south-west corner, was incorporated Feb. 24, 1852. It contains 5 churches, (Epis., M. E., Presb., Advent and Bapt.,) a Union Free School, (formerly called “Leaven-
Worth Institute," named from Isaac Leavenworth, who contributed one-half the total cost, with 6 teachers and an average attendance of 210 scholars; a job printing office, 2 hotels, 2 flouring mills, 2 saw mills, a furnace and agricultural machine shop, and about 800 inhabitants. Red Creek, (p. v.,) in the south-east part, is incorporated, and contains 3 churches, (M. E., Bapt. and Presb.,) the Red Creek Union Academy, (incorporated by Legislature March 27, 1839, and by Regents Feb. 5, 1846, and employs 5 teachers,) 2 grist mills, 2 saw mills, a woolen factory, furnace and tannery, and about 600 inhabitants. Furnace Village, in the west part, (named from the extensive furnace located here,) contains, besides the furnace, a saw mill, and about 80 inhabitants. Owing to financial difficulties, the operations at the furnace have been discontinued during the past two years. It is being refitted by Messrs. J. K. Wagner and John Christopher, who contemplate commencing operations as soon as the necessary preparations can be completed. The ore used in the furnace is quarried in the north-east part of the town, where there seems to be an almost inexhaustible supply.

The settlement of the town was commenced by Jonathan Melvin, Sen., on lot 50, in 1805. Among the early settlers were Adonijah Church, from Massachusetts, in 1806, and Osgood Church and family, in 1807. Lambert Woodruff, in vicinity of Red Creek, bought in 1807, and moved in in 1810. Noadiah Child came in 1811, and Jacob Snyder, with his family of 10 children, in 1813. Peter, Amos, and Thomas Snyder are now living in the town, aged respectively 72, 65 and 75 years. Hiram Church, who came in 1807, is still living in town, about 60 years old. Elisha and William Plank settled in 1813; the latter is now living in the town, aged 70 years. The first death that occurred in town was that of a son of George Salmon. The first inn was kept by Obadiah Adams, and the first saw and grist mill was built by Jonathan Melvin, in 1810. The first settled minister was Daniel S. Buttuck. The first attempt to assess the property in the town was made by Luther Redfield, Assessor of Junius, who is now living at Clyde in the town of Galen. Much difficulty was experienced in doing so, as no roads were constructed at that time, and many of the settlers avowing their determination to resist any attempt that might be made to collect taxes, and sullenly and doggedly refusing to give the required information to enable the Assessor to prosecute his duties. The taxes at that early date were meagre and insignificant compared with the enormous taxes levied upon communities at the present day.
Alabama was settled near Mobile, in 1702, by the French; was formed into a Territory by act of Congress, approved March 2, 1817, from the eastern portion of the Territory of Mississippi; framed a Constitution August 2, 1819, and was admitted into the Union December 14 of the same year. Area 50,723 square miles, or 32,462,080 acres. Population in 1860, 964,201, of whom 435,080 were slaves. It is the chief cotton growing State of the Union. White male citizens, who have resided one year in the State and three months in the county, are entitled to vote. An election for a Convention was held December 24, 1860, and a majority of over 50,000 votes cast for secession; the Convention met January 7, 1861, and on the 11th passed the ordinance of secession, by a vote of 61 to 39, which was followed on the 21st by the resignation of its members of Congress.

Arkansas was settled at Arkansas Post in 1685, by the French, and was part of the Louisiana purchase ceded by France to the United States, April 30, 1803. It was formed into a Territory by act of Congress, March 2, 1819, from the southern part of the Territory of Missouri; its western boundary was settled May 26, 1824, and its southern, May 19, 1828. Having adopted a Constitution, a memorial was presented in Congress, March 1, 1836, and an act for its admission into the Union passed June 15 of the same year. Area 52,198 square miles, or 33,406,720 acres. In 1860 its population was 435,450, of whom 111,115 were slaves. It is an agricultural State, its staples being corn and cotton. Citizenship and residence in the State for six months, qualify voters in the county and district where they reside. January 16, 1861, its Legislature ordered a State Convention, which assembled, and on May 6, voted to secede, 39 to 1. January 4, 1864, a Convention assembled in Little Rock, which adopted a new Constitution, the principle feature of which consisted in a clause abolishing slavery. The Convention adjourned January 29. This body also inaugurated a Provisional Government. The Constitution was submitted to the people, and 12,177 votes cast for it, to 226 against it. The State was re-organized under the plan contained in the Amnesty Proclamation of President Lincoln, in pursuance of which an election was held March 14, 1864. The vote required under the Proclamation was 5,405. About 16,000 votes were cast.

California was settled at Diego in 1768, by Spaniards, and was part of the territory ceded to the United States by Mexico, by the treaty con-
THE STATES, THEIR SETTLEMENT, ETC.

included at Guadaloupe Hidalgo, February 22, 1848. After several ineffectual attempts to organize it as a Territory or admit it as a State, a law was passed by Congress for the latter purpose, which was approved September 9, 1850. Area 186,961 square miles or 120,947,784 acres.—Population in 1860, 305,439. It is the most productive gold mining region on the continent, and also abounds in many other minerals. White male citizens of the United States, and those of Mexico who may choose to comply with the provisions of the treaty of Queretaro, of May 30, 1845, who have resided in the State six months and in the county or district thirty days, are entitled to vote.

Connecticut was settled at Windsor, in 1633, by English Puritans from Massachusetts, and continued under the jurisdiction of that province until April 23, 1662, when a separate charter was granted, which continued in force until a Constitution was formed, September 15, 1818. It was one of the original thirteen States, and ratified the United States Constitution, January 9, 1788. Area 4,674 square miles, or 2,991,380 acres. Population in 1860, 490,147. It is one of the most densely populated and principal manufacturing States in the Union. Residence for six months, or military duty for a year, or payment of State tax, or a freehold of the yearly value of seven dollars, gives the right to vote.

Delaware was settled at Wilmington, early in 1638, by Swedes and Finns; was granted to William Penn, in 1682, and continued under the government of Pennsylvania until the adoption of a Constitution, September 20, 1776; a new one was formed June 12, 1792. It was one of the original thirteen States, and ratified the United States Constitution, December 7, 1787. Area 2,120 square miles, or 1,350,800 acres.—Population, in 1860, 112,218, of whom 1,795 were slaves. It is a grain and fruit growing State, with some extensive manufactories. Residence in the State one year, and ten days in the election district, with payment of a State or county tax assessed ten days prior to an election, gives the right to vote, except that citizens between twenty-one and twenty-two years of age need not have paid the tax.

Florida was settled at St. Augustine, in 1565, by Spaniards; was formed from part of the territory ceded by Spain to the United States by treaty of February 22, 1819; an act to authorize the President to establish a temporary government was passed March 3, 1819; articles of surrender of East Florida were framed July 10, and of West Florida, July 17, 1821, and it was then taken possession of by General Jackson as Governor. An act for the establishment of a Territorial Government was passed March 30, 1823, and by act of March 3, 1823, East and West Florida were constituted one Territory. Acts to establish its boundary line between Georgia and Alabama were passed May 4, 1826, and March 2, 1831. After several ineffectual attempts to organize it into two Territories, or into a State and Territory, an act for its admission into the Union was passed March 3, 1845. Area 59,268 square miles, or 37,930,520 acres. Population, in 1860, 140,425, of whom 61,745 were slaves. It is an agricultural State, tropical in its climate and products. Every free white male citizen, who has resided in the State two years and in the county six months, and has been enrolled in the militia (unless exempt by law,) is qualified to vote, but no soldier, seaman or marine can vote unless qualified before enlistment. Its Legislature called a Convention, December 1, 1860, which met January 3, 1861, and passed a secession ordinance on the 10th, by a vote of 63 to 7.
Georgia was settled at Savannah, in 1733, by the English under General Oglethorpe. It was chartered June 9, 1733; formed a Constitution February 5, 1777; a second in 1785 and a third May 30, 1798. It was one of the original thirteen States, and ratified the United States Constitution January 2, 1788. Area 53,000 square miles, or 87,120,000 acres. Population, in 1860, 1,057,286, of whom 462,198 were slaves. It is a large cotton and rice growing State. Citizens of the State, six months resident of the county where voting, who have paid taxes the year preceding the election, are entitled to vote. November 18, 1860, its Legislature ordered an election for a State Convention, which assembled and passed a secession ordinance January 19, 1861, by a vote of 208 to 89, and on the 23d of the same month its members of Congress resigned.

Illinois was settled at Kaskaskia, in 1683, by the French, and formed part of the northwestern territory ceded by Virginia to the United States. An act for dividing the Indiana Territory and organizing the Territory of Illinois, was passed by Congress, February 3, 1809; and an act to enable it to form a State Constitution, Government, &c., was passed April 13, 1818; a Constitution was framed August 26, and it was admitted into the Union December 23 of the same year. Area 54,405 square miles, or 34,819,200 acres. Population, in 1860, 1,711,951. It is the chief "prairie" State, and the largest grain growing and second largest cattle raising State in the Union. All white male inhabitants, who have resided in the State one year and election district sixty days, can vote in the district where actually residing.

Indiana was settled at Vincennes, in 1690, by the French, and formed part of the northwestern territory ceded by Virginia to the United States. It was organized into a Territory May 7, 1800, from which the Territory of Michigan was set off in 1805, and Illinois in 1809. An act was passed to empower it to form a State Constitution, Government, &c., April 19, 1816, and it was admitted into the Union December 11 of the same year. Area 33,809 square miles, or 21,637,760 acres. Population, in 1860, 1,850,428. It is an agricultural State, chiefly devoted to grain growing and cattle raising. A residence of one year in the State entitles males of 21 years of age to vote in the county of their residence.

Iowa was first settled at Burlington by emigrants from the Northern and Eastern States. It was part of the region purchased from France, was set off from the Territory of Wisconsin, and organized as a separate Territory June 12, 1838; an act for its admission as a State was passed and approved March 8, 1845, to which the assent of its inhabitants was to be given to be announced by Proclamation of the President, and on December 28, 1846, another act for its admission was passed. Area 50,914 square miles or 32,584,960 acres. Population, in 1860, 674,913. It is an agricultural State, resembling Illinois, and contains important lead mines. White male citizens of the United States, having resided in the State six months and county twenty days, are entitled to vote.

Kansas was formed out of the original Louisiana purchase, and organized into a Territory by act of Congress, May 3, 1854, and after several ineffectual attempts was finally admitted into the Union in January, 1861. Area 78,418 square miles, or 50,197,550 acres. Population, in 1860, 107,205. It is an agricultural State, with a soil of rich and deep black loam, except the central portion, which is partly a desert. The western portion is a fine grazing country, well wooded. It also abounds in minerals.
Kentucky was settled in 1775, by Virginians; formed into a Territory by act of the Virginia Legislature, December 18, 1789, and admitted into the Union June 1, 1792, by virtue of an act of Congress, passed February 4, 1791. Area 37,680 square miles, or 24,115,900 acres. Population, in 1860, 1,155,684, of whom 236,369 were slaves. It is an agricultural State, raising more flax and hemp than any other. Loyalty, a residence of two years in the State and one in the county are the requirements to vote. “Any citizen of this State who shall enter the service of the so-called Confederate States, in either a civil or military capacity, or into the service of the so-called Provisional Government of Kentucky, in either a civil or military capacity, or having heretofore entered such service of either the Confederate States or Provisional Government, shall continue in such service after this act takes effect (March 11, 1862), or shall take up or continue in arms against the military forces of the United States or State of Kentucky, or shall give voluntary aid and assistance to those in arms against said forces, shall be deemed to have expatriated himself, and shall no longer be a citizen, except by permission of the Legislature by a general or special statute.”

Louisiana was settled at Iberville, in 1699, by the French, and comprised a part of the territory ceded by France to the United States, by treaty of April 30, 1803, which purchase was erected into two Territories by act of Congress March 26, 1804, one called the Territory of Orleans, the other the District of Louisiana, afterwards changed to that of Missouri. Congress, March 2, 1806, authorized the inhabitants of Orleans Territory to form a State Constitution and Government, when their population should amount to 60,000; a Constitution was adopted January 22, 1812, and the State admitted into the Union April 8, of the same year, and under the name of Louisiana. Area 41,256 square miles, or 26,407,800 acres. Population, in 1860, 708,002, of whom 331,726 were slaves. It is the chief sugar producing State of the Union. Two years’ residence in the State and one in the parish are the qualifications of voters. December 10, 1860, the Legislature ordered a State Convention to be held, which assembled and passed an ordinance of secession on January 26, 1861, by a vote of 118 to 17. The people voted on the question, and on March 28 the following was announced as the result: For, 20,448; against, 17,296; a majority of 3,152. The Convention ratified the ‘Confederate’ Constitution March 11, 1861, by a vote of 107 to 7, and refused to submit it to the people by 94 to 10. On the 11th day of January, 1864, Maj. Gen. Banks issued a Proclamation for an election of State officers and delegates to a Constitutional Convention, for the purpose of effecting a reconstruction of the State Government under the plan suggested in the Amnesty Proclamation of President Lincoln. The election was held on the 22d day of February, 1864. The officers thus elected were installed March 4. The total vote cast was 10,723. The vote requisite under the Proclamation was 5,051. The Convention amended the Constitution so as to abolish slavery. The new Constitution was adopted by the people by a vote of 6,856 for, to 1,566 against.

Maine was settled at York, in 1623, by the English, and was formerly under the jurisdiction of Massachusetts. October 29, 1819, the Inhabitants of the District of Maine framed a Constitution; applied for admission December 8, 1819. Congress passed an act March 3, 1820, and it was admitted as a State March 15, of the same year. Area 31,766 square miles, or 20,330,240 acres. Population, in 1860, 628,379. It is largely engaged in the lumber trade and ship building. Citizens of the United States, except paupers and persons under guardianship, who have resided in the State for three months next preceding the election, are entitled to vote.
Maryland was settled at St. Mary, in 1634, by Irish Roman Catholics, having been chartered June 20, 1632. It was one of the original thirteen States; formed a Constitution August 14, 1778, and ratified the Constitution of the United States April 28, 1788. Area 11,134 square miles, or 7,119,260 acres. Population, in 1860, 687,049, of whom 87,189 were slaves. It is mainly an agricultural State, producing grain and tobacco. A residence of one year in the State, and six months in the county, gives the right to vote to every white male citizen who takes the oath of allegiance prescribed in the Constitution. January 28, 1864, a bill passed the Legislature submitting to the people the question of a Convention to revise the Constitution of the State. The popular vote on the question was as follows: For Convention 32,203; against, 19,937. The Convention assembled and adopted a Constitution abolishing slavery, which was submitted to and adopted by the people, and in accordance with its provisions, on the 29th of October, 1864, the Governor issued his Proclamation declaring the slaves in the State free from the 1st day of November.

Massachusetts was settled at Plymouth, November 3, 1620, by English Puritans, and Charters were granted March 4, 1629, January 13, 1630, August 20, 1726, and October 7, 1731. It was one of the original thirteen States; adopted a Constitution March 2, 1780, which was amended November 3, 1780, and ratified the Constitution of the United States February 6, 1788. Area 7,500 square miles, or 4,929,000 acres. Population in 1860, 1,231,068. It is a largely commercial, the chief manufacturing and most densely populated State in the Union. A residence of one year in the State, and payment of State or county tax, gives the right to vote to male citizens of 21 years and upward, except paupers and persons under guardianship.

Michigan was settled at Detroit in 1670, by the French, and was part of the territory ceded to the United States by Virginia. It was set off from the Territory of Indiana, and erected into a separate Territory January 11, 1805; an act to attach to it all the territory of the United States west of the Mississippi river, and north of the State of Missouri, was passed June 28, 1834. Wisconsin was organized from it April 30, 1836. In June of the same year an act was passed to provide for the admission of the State of Michigan into the Union, and a Constitution having been adopted, it was admitted January 26, 1837. Area 56,045 square miles, or 35,995,523 acres. Population, in 1860, 749,113. It is a grain growing and cattle rearing State, with rich and extensive mines of copper and iron in the Northern Peninsula. A residence in the State of six months preceding the election, entitles white male citizens to vote.

Mississippi was settled at Natchez, in 1716, by the French and was formed out of part of the territory ceded to the United States by South Carolina in 1787, and Georgia in 1802. It was organized as a Territory by act of Congress, April 7, 1789, and enlarged on the north March 27, 1804, and on the south May 14, 1812. After several unsuccessful attempts to enter the Union, Congress finally passed an act March 1, 1817, enabling the people of the western part of the Territory to form a State Constitution and Government, which being complied with August 15, it was admitted December 10 of the same year. Area 47,156 square miles, or 30,179,840 acres. Population, in 1860, 791,305, of whom 436,681 were slaves. It is the second cotton growing State of the Union. Citizens who have resided one year in the State, and four months in the county, and having performed military duty or paid taxes, are entitled to vote. A Convention met January 7, 1861, and on the 9th passed an ordinance of secession by a vote of 84 to 15.
Minnesota was settled about 1846, chiefly by emigrants from the Northern and Western States. It was organized as a Territory by act of Congress approved March 3, 1849, and admitted into the Union February 26, 1857. Area 95,274 square miles, or 60,975,536 acres. Population, in 1860, 172,123 whites, and about 25,000 Indians, many of the tribes being of a warlike character. It is an agricultural State, chiefly devoted to northern grains. The right to vote is extended to male persons of 21 years of age, of the following classes, if they have resided in the United States one year, the State four months, and the election district ten days: White citizens of the United States, and those of foreign birth who have declared their intention to become citizens; persons of mixed white and Indian blood who have adopted the customs of civilization, and those of pure Indian blood who have been pronounced capable by any district court of the State.

Missouri was settled at Genevieve in 1763, by the French, and was part of the territory ceded by France by treaty of April 30, 1803. It was created under the name of the District of Louisiana, by an act approved March 26, 1804, and placed under the direction of the officers of the Indiana Territory, and was organized into a separate Territory June 4, 1812, its name being changed to that of Missouri; and was divided March 2, 1819, the Territory of Arkansas being then created. An act authorizing it to form a State Constitution and Government was passed March 6, 1820, and it was admitted into the Union December 14, 1821. Area 67,380 square miles, or 43,123,200 acres. Population, in 1860, 1,182,012, of whom 114,931 were slaves. An act of gradual emancipation was passed July 1, 1863, by a vote of 51 to 30. On the 6th of January, 1865, a Constitutional Convention assembled in St. Louis, and on the 8th of April adopted a new Constitution, declaring the State free, prohibiting compensation for slaves, and adopting many other radical changes. On the 6th of June the Constitution was adopted by the people by a vote of 43,670 to 41,818, and pursuant to a Proclamation issued on the 1st of July, the Constitution went into effect July 4, 1865. It is an agricultural and mining State. Citizens of the United States who have resided in the State one year, and county three months, are entitled to vote. By an act passed by the Legislature of 1863, voting by ballot was adopted, and the viva voce system abolished.

Nevada was organized as a Territory March 2, 1861. Its name signifies snowy, and is derived from the Spanish word nieve (snow). It comprises 81,539 square miles, or 52,184,960 acres, lying mostly within the Great Basin of the Pacific coast. Congress, at its session in 1864, passed an act which was approved March 31, to enable the people of the Territory to form a Constitution and State Government, in pursuance of which a Government was organized and the Territory admitted as a State by Proclamation of the President, October 31, 1864. At the time of its organization the Territory possessed a population of 6,857 white settlers. The development of her mineral resources was rapid and almost without parallel, and attracted a constant stream of immigration to the Territory. As the population has not been subject to the fluctuations from which other Territories have suffered, the growth of Nevada has been rapid and steady. At the general convention election of 1863, 10,934 votes were cast. During 1864 great accessions to the population were made. It is probably the richest State in the Union in respect to mineral resources. No region in the world is richer in argentiferous leads. It also contains an immense basin of salt, five miles square. Quartz mills are a very important feature in mining operations. The State is barren for agricultural purposes, and is remarkably healthy.
New Hampshire was settled at Dover, in 1623, by English Puritans, and continued under the jurisdiction of Massachusetts until September 18, 1679, when a separate charter was granted. It was one of the original thirteen States, and ratified the United States Constitution June 21, 1788; its State Constitution was framed January 5, 1776, and amended in 1784 and 1792. Area 9,280 square miles, or 5,939,200 acres. Population, in 1860, 326,073. It is a grazing and manufacturing State. All male citizens, except paupers, are allowed to vote.

New Jersey was settled at Bergen, in 1624, by the Dutch and Danes; was conquered by the Dutch in 1655, and submitted to the English in 1664, being held thereafter under the same grants as New York, until it was surrendered to the Crown in 1702. It was one of the original thirteen States, adopted a State Constitution July 2, 1776, and ratified the United States Constitution December 18, 1787. Area 8,320 square miles, or 5,224,800 acres. Population, in 1860, 672,035. It is a grain and fruit growing region, its orchard and market products being relatively greater than those of any other State. A residence of one year in the State gives the right to vote, except to paupers, &c.

New York was settled at Manhattan, in 1614, by the Dutch; was ceded to the English by grants to the Duke of York, March 20, April 26, and June 24, 1664; was taken by the Dutch in 1673, and surrendered again to them by the English, February 9, 1674. It was one of the original thirteen States, ratified the United States Constitution July 26, 1788; framed a Constitution April 20, 1777, which was amended October 27, 1801, and November 10, 1821; a new one was adopted November 3, 1846. Area 47,000 square miles, or 30,080,000 acres. Population, in 1865, 3,831,777. It is the most populous, wealthy and commercial of the States. White male citizens of the United States, who have resided in the State one year, in the county four months, and election district thirty days, are entitled to vote, and all men of color who have resided in the State three years, and own and pay taxes on a freehold assessed at $250.

North Carolina was settled at Albemarle, in 1650, by the English, and was chartered March 20, 1663. It was one of the original thirteen States, and ratified the United States Constitution November 21, 1789; its State Constitution was adopted, December 18, 1776, and amended in 1835. Area 50,704 square miles, or 32,450,560 acres. Population, in 1860, 992,622, of whom 331,059 were slaves. It is an agricultural State, with some mines and extensive pine forests. Every freeman of 21 years of age, having resided one year in any county in the State, may vote for a member of the House of Commons, but must own fifty acres of land to vote for a Senator. A State convention passed an ordinance of secession May 21, 1861. An election for delegates to a State Convention took place September 21, 1863. The Convention assembled October 2. On the 3d of October it passed an ordinance forever prohibiting slavery. The Legislature ratified the Constitutional amendment December 1. An election was held on the first Thursday of November, for Governor, Members of Congress and the Legislature.

Ohio was settled at Marietta, in 1788, by emigrants from Virginia and New England; was ceded by Virginia to the United States October 30, 1783; accepted by the latter March 1, 1784, and admitted into the Union April 30, 1802. Area 39,984 square miles, or 25,576,960 acres. Population in 1860, 2,389,511. It is the most populous and wealthy of the agricultural States, devoted principally to wool growing, grain and live stock. A male of 21 years of age, who has resided in the State one year, and has paid or been charged with a State or county tax, is eligible to vote.
Oregon, although it had previously been seen by various navigators, was first taken possession of by Capt. Robert Gray, who entered the mouth of its principal river May 7, 1792, naming it after his vessel, the Columbia, of Boston. Exploring expeditions soon followed, and fur companies sent their trappers and traders into the region. In 1811 a trading post was established at the mouth of the Columbia river by the American Fur Company, who named it Astoria. For some time a Provisional Territorial Government existed, but the boundary remained unsettled until the treaty with Great Britain in 1846, when the 49th parallel was adopted. It was formally organized as a Territory August 14, 1848; was divided March 2, 1853, on the 49th parallel, the northern portion being called Washington and the southern Oregon. November 9, 1857, a State Constitution was adopted, under which it was admitted February 14, 1859, about one-third of it on the east being added to Washington Territory, its northern boundary following the Columbia river until its intersection with latitude 46° north. Area 102,606 square miles, or 65,667,840 acres. Population in 1860, 53,485. It is an agricultural State, possessed of a fertile soil, extensive pastures, genial climate, and is well wooded. Gold and other precious metals are found in considerable abundance.

Pennsylvania was settled at Philadelphia, in 1681, by English Quakers, and was chartered February 28 of the same year. It was one of the original thirteen States, ratifying the United States Constitution December 12, 1787; adopted a State Constitution September 28, 1776, and amended it September 2, 1790. Area 46,000 square miles, or 29,440,000 acres. Population, in 1860, 2,906,115. It is the second State in wealth and population, and the principal coal and iron mining region in the Union. Residence in the State one year, and ten days in the election district, with payment of a State or county tax assessed ten days prior to an election, gives the right to vote, except that citizens between 21 and 22 years of age need not have paid the tax.

Rhode Island was settled at Providence in 1636, by the English from Massachusetts, under Roger Williams. It was under the jurisdiction of Massachusetts until July 8, 1663, when a separate charter was granted, which continued in force until the formation of a Constitution in September, 1842. It was one of the original thirteen States, ratifying the United States Constitution, May 29, 1790. Area 1,306 square miles, or 835,840 acres. Population, in 1860, 174,620. It is largely engaged in manufactures. A freehold possession of $13; or, if in reversion, renting for $7 together with a residence of one year in the State and six months in the town; or, if no freehold, then a residence of two years in the State and six months in the town, and payment of $1 tax or military service instead, are the qualifications of voters.

South Carolina was settled at Port Royal, in 1670, by the English, and continued under the charter of Carolina, or North Carolina, until they were separated in 1729. It was one of the original thirteen States, ratifying the United States Constitution March 28, 1776; it framed a State Constitution March 28, 1776, which was amended March 19, 1778, and June 3, 1790. Area 29,385 square miles, or 18,806,400 acres. Population, in 1860, 703,700, of whom 402,406 were slaves, an excess of 101,270 over the whites. It is the principal rice growing State. Whites, who have resided in the State two years and district six months, and have a freehold of fifty acres of land, or have paid a State tax, are entitled to vote. December 17, 1860, a Convention assembled in Columbia, adjourned to Charleston, and on the 24th unanimously adopted an ordinance of secession, which was followed the next day by a Declaration of Causes claimed to be sufficient to
justify the act. An election for delegates to a State Convention was held September 4, 1865. The Convention assembled September 13, and adjourned on the 28th. It repealed the ordinance of secession, abolished slavery, equalized the representation of the Senate and taxation throughout the State, giving the election of Governor and Presidential electors to the people, ordered voting in the Legislature by a voice vote, endorsed the Administration unanimously, and directed a commission to submit a code to the Legislature for the protection of the colored population. The Legislature ratified the Constitutional Amendment November 12, 1865.

Tennessee was settled at Fort Donelson, in 1756, by emigrants from Virginia and North Carolina; was ceded to the United States by North Carolina December, 1789, conveyed by the Senators of that State February 25, 1790, and accepted by act of Congress April 2 of the same year; it adopted a Constitution February 6, 1796, and was admitted into the Union the 1st of June following. Area 45,600 square miles; or 29,184,000 acres. Population, in 1860, 1,109,601, of whom 275,179 were slaves. It is a mining and agricultural State, and is largely productive of live stock. Citizens of the United States who have resided six months in the county are entitled to vote. A military league was formed between the Governor, Isham G. Harris, and the Rebel States May 7, 1861, ratified the same day by the Senate by a vote of 14 to 6, and a Declaration of Independence submitted to the people, the election to be held June 8, the result of which was declared by the Governor, June 24, to be 104,913 for, and 47,228 against. This movement not being acceptable to the people of East Tennessee, which had declared against separation by a vote of 32,933 to 14,780, they, in a Convention held at Greenville, June 18-21, repudiated it. Andrew Johnson, Provisional Governor of the State, called a State Convention to be held in Nashville the second Monday in January. Delegates were elected, the Convention met, declared slavery forever abolished, prohibited compensation to owners of slaves, and abrogated the secession ordinances. These amendments of the Constitution were submitted to the people 22d of February, 1865, with the following result: For ratification, 22,197; rejection, 63. The United States Constitutional Amendment was ratified April 5, 1865.

Texas was first settled at Bexar, in 1694, by Spaniards; formed a part of Mexico until 1836, when she revolted from that Republic and instituted a separate Government, under which she existed until admitted into the Union by a joint resolution approved March 1st, 1845, imposing certain conditions, which were accepted, and a Constitution formed July 4 of the same year, and another joint resolution adopted by Congress, consummating the annexation, was approved December 29, 1845. Area 237,504 square miles, or 152,002,500 acres. Population, in 1860, 604,215, of whom 182,566 were slaves. It is an agricultural region, principally devoted to grain, cotton and tropical fruits. Free white male citizens of 21 years of age, who have resided in the State one year and district six months are entitled to vote. A Convention assembled at Galveston January 28, 1861, and on February 1 passed an ordinance of secession by a vote of 166 to 7, to be submitted to the people February 23, and on March 4 they declared the State out of the Union, and Gov. Houston issued a Proclamation to that effect.

Vermont was settled in 1724, by Englishmen from Connecticut, chiefly under grants from New Hampshire; was formed from a part of the territory of New York, by act of its Legislature March 6, 1769; framed a Constitution December 25, 1777, and was admitted into the Union March 4, 1791, by virtue of an act of Congress passed February 18 of the same
Virginia was settled at Jamestown, in 1607, by the English, and was chartered April 10, 1606, May 23, 1609, and March 12, 1613. It was one of the original thirteen States, ratifying the United States Constitution June 25, 1788; it framed a State Constitution July 5, 1776, which was amended January 15, 1830. The State was divided in 1863. Present area 47,358 square miles. Population, in 1860, 1,314,532, of whom 481,410 were slaves. It is a large corn producing, and the chief tobacco growing State. Every white male citizen of the age of 21 years, who has been a resident of the State for one year, and of the county, city or town where he offers to vote for six months next preceding an election, and has paid all taxes assessed to him, after the adoption of the Constitution, under the laws of the Commonwealth after the re-organization of the county, city or town where he offers to vote, is qualified to vote for members of the general assembly and all officers elective by the people. A Convention sitting in Richmond on the 17th of April, 1861, passed an ordinance of secession, by a vote of 88 to 55, which was submitted to the people at an election held May 23, the result of which was announced June 25 to be 128,524 for, and 33,134 against. The State Government was re-organized by a Convention which met in Wheeling, May 11, 1861. Upon the division of the State in 1863, the seat of Government was removed to Alexandria. A State Constitutional Convention, March 10, 1864, adopted a section abolishing slavery.

West Virginia.—On the passage of the ordinance of secession by the Virginia Convention, a Convention of the western and other loyal counties of the State was held at Wheeling, which assembled May 11, 1861, and on the 17th unanimously deposed the then State officers and organized a Provisional Government. On the 26th of November, 1861, a Convention representing the western counties assembled in Wheeling and framed a Constitution for West Virginia, which was submitted to the people on the 3d of May, 1862, and adopted by them by a nearly unanimous vote. The division of the State was sanctioned by the Legislature May 13, 1862, and ratified by Congress by an act approved December 31, 1862, conditioned on the adoption of an amendment to the Constitution providing for the gradual abolition of slavery, which was done on the 24th of March, 1863, by a vote of the qualified electors of the proposed State, 28,318 voting in favor of the amendment and 572 against it. In pursuance of the act of Congress, the President issued a Proclamation April 20, 1863, admitting the State sixty days from the date thereof, and on the 20th of June the new State Government was formally inaugurated. Area 24,000 square miles. Population, in 1860, 350,599, of whom 12,754 were slaves. It is a large corn producing State, and abounds in coal and other minerals. The Alexandria Legislature adopted the United States Constitutional Amendment February 9, 1865.

Wisconsin was settled at Green Bay, in 1669, by the French; was a part of the territory ceded by Virginia, and was set off from Michigan December 23, 1834, and organized into a Territory April 30, 1836. Iowa was set off from it June 12, 1838, and acts were passed at various times setting its boundaries. March 3, 1847, an act for its admission into the Union was passed, to take effect on the issuing of a Proclamation by the President, and by act of May 29, 1848, it was admitted into the Union.
Area 53,924 square miles, or 34,511,860 acres. Population, in 1860, 775,881. It is an agricultural State, chiefly engaged in grain raising and wool growing. Both white and colored citizens of the United States, or white foreigners who have declared their intention to become citizens, are entitled to vote. Colored citizens were admitted to the franchise, by a decision of the Supreme Court, rendered the 27th day of March, 1866, holding that, whereas an election was held in 1849, under the provisions of chapter 187, of that year, at which election 5,265 votes were cast in favor of the extension of the right of suffrage to colored men, and 4,075 against such extension, therefore, the section of said law conferring such right had been constitutionally adopted and is the law of the land.

**THE TERRITORIES, THEIR BOUNDARIES, AREA, PHYSICAL FEATURES, ETC.**

**Arizona** was organized by the Thirty-Seventh Congress, in the winter of 1863, out of the western half of New Mexico, the boundary between the two Territories being the 109th meridian (126° west from Washington,) and includes the greater portions of the valleys of Colorado and Gila, which two rivers drain its entire surface, with parts of Utah, New Mexico and Nevada, and yet convey, it is reported, a less volume of water to the sea than the Hudson at Albany. The fertile Messilla Valley was left with New Mexico. The Territory forms a block nearly square, and contains 126,141 square miles, or 80,730,240 acres. Its white population is probably considerably less than 10,000. For agricultural purposes it is probably the most worthless on the Continent, owing to the absence of rains, but it is reputed to abound in silver mines.

**Colorado** was organized March 2, 1861, from parts of Kansas, Nebraska, and Utah, and is situated on each side of the Rocky Mountains, between latitude 37° and 41°, and longitude 25° and 29° west from Washington. Area 104,500 square miles, or 66,880,000 acres. Population 50,000, besides numerous tribes of Indians. By an enabling act passed March 21, 1864, the people of the Territory were authorized to frame a State constitution and organize a State Government, and a Convention accordingly met in 1865, and on the 12th of August adopted a Constitution, which was submitted to and adopted by the people September 5, and State officers elected November 14. A bill to admit the Territory as a State passed Congress, but was vetoed May 25, 1866. It is said to be a superior grazing and cattle producing region, with a healthy climate and rich soil; an extensive coal bed, and also gold, iron and other minerals abound.
Dakota was first settled by employees of the Hudson Bay Company, but is now being peopled by emigrants from the Northern and Western States. It was set off from the western portion of Minnesota when that Territory became a State in 1857, and was organized March 2, 1861. Area 148,932 square miles, or 95,316,480 acres. Population 2,576 whites, and 2,261 Indians, besides the roving tribes.

Idaho was organized by the Thirty-Seventh Congress, at its second session, in the winter of 1863. Its name means Bead of the Mountains, and it embraces the whole breadth of the Rocky Mountain region, and has within its bounds the head waters of nearly all the great rivers that flow down its either slope, but the greater portion lies east of the mountains. Its southern boundary is the 41st, its northern the 46th parallel of latitude. It extends from the 104th meridian on the east to the 110th on the west. Area 326,373 square miles, or 208,878,720 acres. For agricultural purposes it is comparatively worthless, but abounds in gold and other valuable mines.

Montana was settled by emigrants from the Northern and Western States. Organized in 1864, with the following boundaries: Commencing at a point formed by the intersection of the 27th L. W. from Washington with the 45th N. L.; thence due west on said 45th degree to a point formed by its intersection with the 34th degree W. from Washington; thence due south along said 34th degree of longitude to its intersection with the 44th degree and 30 minutes of N. L.; thence due west along said 44th degree and 30 minutes of N. L. to a point formed by its intersection with the crest of the Rocky Mountains; thence following the crest of the Rocky Mountains northward till its intersection with the Bitter Root Mountains; thence northward along the crest of said Bitter Root Mountains to its intersection with the 39th degree of longitude W. from Washington; thence along said 39th degree of longitude northward to the boundary line of the British possessions; thence eastward along said boundary to the 27th degree of longitude W. from Washington; thence southward along said 27th degree to the place of beginning. This makes it the northernmost Territory next the States east of the Missouri Valley. It is a good mining and agricultural region. The total population is put down at 15,822. Large accessions have been made since the census was taken.

Nebraska was settled by emigrants from the Northern and Western States, and was formed out of a part of the territory ceded by France, April 30, 1803. Attempts to organize it were made in 1844 and 1848, but it was not accomplished until May 30, 1854. Area 75,955 square miles, or 44,796,160 acres. Population 28,841, besides a few roving tribes of Indians. A Convention adopted a State Constitution February 9, 1866, which was submitted to the people on the 22d of June, and adopted by a vote of 3,938 for, to 3,838 against, and State officers were elected. A bill was passed by Congress, July 27th, admitting the State, but the President withheld his signature. It is an agricultural region, its prairies affording boundless pasture lands.

New Mexico was formed from a part of the territory ceded to the United States by Mexico, by the treaty of Guadalupe Hidalgo, February 2, 1848, and was organized into a Territory September 9, 1850. Area 121,201 square miles, or 77,563,640 acres. Population 83,000, besides large tribes of warlike Indians. The principal resource of the country is its minerals.

Utah was settled by the Mormons, and was formed from a part of the territory ceded to the United States by Mexico, by the treaty of Guadalupe Hidalgo, February 2, 1848, and was organized into a Territory, Sep-
tember 9, 1850. Area, 106,382 square miles, or 68,084,480 acres. Population, 40,273, of whom 29 are slaves. Brine, sulphureous and chalybeate springs abound; limestone, granite, sandstone and marble are found in large quantities; iron is abundant, and gold, silver, copper, lead and zinc have been found. Not one-fiftieth part of the soil is fit for tillage, but on that which is, abundant crops of grain and considerable cotton are raised. A Convention was held at Great Salt Lake City, January 22, 1862, and a State Constitution formed, but it has not been acted on by Congress.

Washington was settled by emigrants from the Northern and Western States, and was organized into a Territory, March 2, 1853, from the northern portion of Oregon, to which was added another portion from the eastern part when the latter Territory was admitted as a State, February 14, 1859. Area, 69,994 square miles, or 46,036,800 acres. Population, 11,168, besides numerous tribes of Indians.

### STAMP DUTIES

**SCHEDULE OF DUTIES ON AND AFTER MARCH 1, 1867.**

</table>

**CANCELLATION.**

In all cases where an adhesive stamp is used for denoting the stamp duty upon an instrument, the person using or affixing the same must write or print thereupon the initials of his name, and the date (the year, month, and day) on which the same is attached or used. Each stamp should be separately cancelled. When stamps are printed upon checks, &c., so that in filling up the instrument, the face of the stamp is and must necessarily be written across, no other cancellation will be required.

All cancellation must be distinct and legible, and except in the case of proprietary stamps from private dies, no method of cancellation which differs from the above described can be recognized as legal and sufficient.

**PENALTIES.**

A penalty of fifty dollars is imposed upon every person who makes, signs, or issues, or who causes to be made, signed, or issued, any paper of any kind or description whatever, or who accepts, negotiates, or pays, or causes to be accepted, negotiated, or paid, any bill of exchange, draft, or order, or promissory note, for the payment of money, without the same being duly stamped, or having thereupon an adhesive stamp for denoting the tax chargeable thereon, cancelled in the manner required by law, with intent to evade the provisions of the revenue act.

A penalty of two hundred dollars is imposed upon every person who pays, negotiates, or offers in payment, or receives or takes in payment, any bill of exchange or order for the payment of any sum of money drawn or purporting to be drawn in a foreign country, but payable in the United States, unless the proper stamp has been affixed thereto.

A penalty of fifty dollars is imposed upon every person who fraudulently makes use of an adhesive stamp to denote the duty required by the revenue act, without effectually cancelling and obliterating the same in the manner required by law.

Attention is particularly called to the following extract from section 165, of the act of June 30, 1894, as amended by the act of July 13, 1895:

> “If any person shall wilfully remove or cause to be removed, alter or cause to be altered, the cancelling or defacing marks on any adhesive stamp, with intent to use the same, or to cause the use of the same, after it shall have been used once, or shall knowingly or wilfully sell or buy such washed or restored stamps, or offer the same for sale, or give or expose the same to any person.”
son for use, or knowingly use the same or prepare the same with intent for the further use thereof; or if any person shall knowingly and without lawful excuse (the proof whereof shall lie on the person accused) have in his possession any washed, restored, or altered stamps, which have been removed from any vellum, parchment, paper, instrument, or writing, then, and in every such case, every person so offending, and every person knowingly and willfully aiding, abetting, or assisting in committing any such offence as aforesaid, shall, on conviction thereof, be punished by a fine not exceeding one thousand dollars, or by imprisonment and confinement to hard labor not exceeding five years, or both, at the discretion of the court.

It is not lawful to record any instrument, document, or paper required by law to be stamped, or any copy thereof, unless a stamp or stamps of the proper amount have been affixed and cancelled in the manner required by law; and such instrument or copy or such other document, so affected by means of which it is made null and void, and cannot be used or admitted as evidence in any court until the defect has been cured as provided in section 158.

All wilful violations of the law should be reported to the United States District Attorney within and for the district where they are committed.

GENERAL REMARKS.

Revenue stamps may be used indiscriminately upon any of the matters or things enumerated in Schedule B, except proprietary and playing card stamps, for which a special use has been provided.

Postage stamps cannot be used in payment of the duty chargeable on instruments.

The law does not designate which of the parties to an instrument shall furnish the necessary stamp, nor does the Commissioner of Internal Revenue assume to determine that it shall be supplied by one party rather than by another; but if an instrument subject to stamp duty is issued without having the necessary stamp affixed thereto, it cannot be recorded, or admitted as evidence in any court until the defect has been cured as provided in section 158.

It is only upon conveyances of realty sold that conveyance stamps are necessary. A deed of real estate made without valuable consideration need not be stamped as a conveyance; but if it contains covenants, such, for instance, as a covenant to warrant and defend the title, it should be stamped as an agreement or contract.

When a deed purporting to be a conveyance of realty sold, and stamped accordingly, is inoperative, a deed of confirmation, made simply to cure the defect, requires no stamp. In such case, the second deed should contain a recital of the facts, and should show the reasons for its execution.

Certificates of loan in which there shall appear any written or printed evidence of an amount of money to be paid on demand, or at a time designated, are subject to stamp duty as "promissory notes."

When any person, for the execution of an instrument, the stamp to which the instrument is liable under the law, may be affixed and cancelled by either of them; and "when more than one signature is affixed to the same paper, one or more stamps may be affixed thereto, representing the whole amount of the stamp required for such signatures."

No stamp is required on any warrant of attorney accompanying a bond or note, when such bond or note has been payable on the stamp or stamps denoting the duty required; and, whenever any bond or note is secured by mortgage, but one stamp duty is required on such papers—such stamp duty being the highest rate required for such instruments. In case of a note or memorandum of the value or denomination of the stamp affixed should be made upon the margin or in the acknowledgment of the instrument which is not stamped.

Certificates of loan in which there shall appear any written or printed evidence of an amount of money to be paid on demand, or at a time designated, are subject to stamp duty as "promissory notes."

When any person, for the execution of an instrument, the stamp to which the instrument is liable under the law, may be affixed and cancelled by either of them; and "when more than one signature is affixed to the same paper, one or more stamps may be affixed thereto, representing the whole amount of the stamp required for such signatures."

No stamp is required on any warrant of attorney accompanying a bond or note, when such bond or note has been payable on the stamp or stamps denoting the duty required; and, whenever any bond or note is secured by mortgage, but one stamp duty is required on such papers—such stamp duty being the highest rate required for such instruments. In case of a note or memorandum of the value or denomination of the stamp affixed should be made upon the margin or in the acknowledgment of the instrument which is not stamped.

When a deed purporting to be a conveyance of realty sold, and stamped accordingly, is inoperative, a deed of confirmation, made simply to cure the defect, requires no stamp. In such case, the second deed should contain a recital of the facts, and should show the reasons for its execution.

When any person, for the execution of an instrument, the stamp to which the instrument is liable under the law, may be affixed and cancelled by either of them; and "when more than one signature is affixed to the same paper, one or more stamps may be affixed thereto, representing the whole amount of the stamp required for such signatures."

No stamp is required on any warrant of attorney accompanying a bond or note, when such bond or note has been payable on the stamp or stamps denoting the duty required; and, whenever any bond or note is secured by mortgage, but one stamp duty is required on such papers—such stamp duty being the highest rate required for such instruments. In case of a note or memorandum of the value or denomination of the stamp affixed should be made upon the margin or in the acknowledgment of the instrument which is not stamped.

When a deed purporting to be a conveyance of realty sold, and stamped accordingly, is inoperative, a deed of confirmation, made simply to cure the defect, requires no stamp. In such case, the second deed should contain a recital of the facts, and should show the reasons for its execution.

Partition deeds between tenants in common, used not be stamped as conveyances, but in such cases, the boundaries of the part belonging to each; but where money or other valuable consideration is paid by one co-tenant to another for coaling the property, it should be stamped as an agreement or contract.

A conveyance of lands sold for unpaid taxes, issued since August 1, 1866, by the officers of any county, town, or other mu-
STAMP DUTIES.

A conveyance of realty sold, subject to a mortgage should be stamped according to the consideration, or the value of the property sold, or both. The consideration in such case is to be found by adding the amount paid for the equity of redemption to the mortgage debt. The fact that one part of the consideration is paid to the mortgagee and the other part to the mortgagor does not change the liability of the conveyance.

The stamp tax upon a mortgage is based upon the amount it is given to secure. The fact that the value of the property mortgaged is less than that amount, and that consequently the security is partial, does not change the liability of the instrument. When, therefore, a second mortgage is given to secure the payment of a sum of money partially secured by a prior mortgage upon other property, or where two mortgages upon separate property are given at the same time to secure the payment of the same sum, each should be stamped as though it were the only one.

A mortgage given to secure a surety from loss, or given for any purpose whatever, other than as security for the payment of a definite and certain sum of money, is taxable only as an agreement or contract.

The stamp duty upon a lease, agreement, memorandum, or contract for the hire, use, or rent of any land, tenement, or portion thereof, is based upon the annual rent or rental value of the property leased, and the duty is the same whether the lease be for one year, for a term of years, or for the fractional part of a year only.

Upon every assignment or transfer of a mortgage, a stamp tax is required equal to that imposed upon a mortgage for the amount remaining unpaid; this tax is required upon every such writing, whether there is a sale of the mortgage or not; but no stamp is necessary upon the endorsement of a negotiable instrument, even though the legal effect of such endorsement is to transfer a mortgage by which the instrument is secured.

An assignment of a lease within the meaning and intent of Schedule B, is an assignment of the leasehold, or of some portion thereof, by the lessee, or by some person claiming by, from, or under him, such an assignment as subrogates the assignee to the rights, or some portion of the rights, of the lessee, or of the person standing in his place. A transfer by the lessor of his part of a lease, neither giving nor purporting to give a claim to the leasehold, or to any part thereof, but simply a right to the rents, &c., is subject to stamp tax as a contract or agreement only.

The stamp tax upon a fire insurance policy is based upon the premium. Deposit notes taken by a mutual fire insurance company, not as payment of premium nor as evidence of indebtedness therefor, but to be used simply as a basis upon which to make ratable assessments to meet the losses incurred by the company, should not be reckoned as premium in determining the amount of stamp taxes upon the policies.

When a policy of insurance properly stamped has been issued and lost, no stamp is necessary upon another issued by the same company to the same party, covering the same property, time, &c., and designed simply to supply the loss. The second policy should recite the loss of the first.

An instrument which operates as the renewal of a policy of insurance is subject to the same stamp tax as the policy.

When a policy of insurance is issued for a certain time, whether it be for one year only or for a term of years, a receipt for premium or any other instrument which has the legal effect to continue the contract and extend its operation beyond that time, requires the same amount of revenue stamps as the policy itself; but such a receipt as is usually given for the payment of the monthly, or quarterly, or annual policy, does not change the liability of the instrument. The payment simply extends the policy from expiring, on the payment, by reason of non-performance of its conditions; a receipt given for such a payment requires no stamp, if that amount received exceeds twenty dollars, and a two-cent stamp only. When, however, the time of payment has passed, and a tender of the premium is not sufficient to bind the company, a new policy or a new contract in some form, with the mutuality essential to every contract, becomes necessary between the insurer and the insured, the same amount of stamps should be used as that required upon the original policy.

A permit issued by a life insurance company changing the terms of a policy as to travel, residence, occupation, &c., should be stamped as a contract or agreement.

A bill single or a bill obligatory, i.e., an instrument in the form of a promissory note, under seal, is subject to stamp duty as written or printed evidence of an amount of money to be paid on demand or at a time designated, at the rate of five cents for each one hundred dollars or fractional part thereof.

A waiver of protest, or of demand and notice, written upon negotiable paper and signed by the indorser, is an agreement, and requires a five-cent stamp.

A stamp duty of twenty-five cents is imposed upon the "protest of every note, bill of exchange, check or draft," and upon every marine protest. If several notes, bills of exchange, drafts, &c., are protested at the same time and all attached to one and the same certificate, stamps should be affixed to the amount of twenty-five cents for each note, bill, draft, &c, thus protestated.

When a subscription is for a purpose in which there is a community of interest among the subscribers, the list should be stamped as a contract, or agreement, at the rate of five cents for each sheet or piece of paper upon which it is written.

When there is no community of interest, and the subscription is conditional, each signer executes a separate contract, requir-
ing its appropriate amount of stamps; this amount depends upon the number of sheets or pieces of paper upon which the contract is written.

When each of the subscribers contracts to pay a certain and definite sum of money on demand, or at a time designated, the separate contract of each should be stamped at the same rate as a promissory note.

When, as generally the case, the caption to a deposition contains other certificates in addition to the jurat to the affidavit of the deponent, such as a certificate that the parties were or were not notified, that they did or did not appear, that they did or did not object, &c., it is subject to a stamp duty of five cents.

When an attested copy of a writ or other process is used by a sheriff or other person in making personal service, or in attaching property, a five-cent stamp should be affixed to the certificate of attestation.

A marriage certificate issued by the officiating clergyman or magistrate, to be returned to any officer of a State, county, city, town, or other municipal corporation, to constitute part of a public record, requires no stamp; but if it is to be retained by the parties, a five-cent stamp should be affixed.

The stamp tax upon a bill of sale, by which any ship or vessel, or any part thereof, is conveyed to or vested in any other person or persons, is at the same rate as that imposed upon conveyances of real estate; a bill of sale of any other personal property should be stamped as a contract or agreement.

An assignment of real or personal property, or of both, for the benefit of creditors, should be stamped as an agreement or contract.

Written or printed assignments of agreements, bonds, notes not negotiable, and of all other instruments the assignments of which are not particularly specified in the foregoing schedule, should be stamped as agreements.

No stamp is necessary upon the registry of a judgment, even though the registry is such in its legal effect as to create a lien which operates as a mortgage upon the property of the judgment debtor.

When a "power of attorney or proxy for voting at any election for officers of any incorporated company or society, except religious, charitable, or literary societies, or public cemeteries," is signed by several stockholders, owning separate and distinct shares, it is, in its legal effect, the separate instrument of each, and requires stamps to the amount of ten cents for each and every signature; one or more stamps may be used representing the whole amount required.

A notice from landlord to tenant to quit possession of premises requires no stamp.

A stamp tax is imposed upon every "manifest for custom-house entry or clearance of the cargo of any ship, vessel, or steamer for a foreign port." The amount of this tax in each case depends upon the registered tonnage of the vessel.

If a vessel clears in ballast and has no cargo whatever, no stamp is necessary; but if she has any—however small the amount—a stamp should be used.

A bond to convey real estate requires stamps to the amount of twenty-five cents.

The stamp duty upon the probate of a will, or upon letters of administration, is based upon the sworn or declared value of all the estate and effects, real, personal, and mixed, undiminished by the debts of the estate for or in respect of which such probate or letters are applied for.

When the property belonging to the estate of a person deceased, lies under different jurisdictions and it becomes necessary to take out letters in two or more places, the letters should be stamped according to the value of all the property, real, personal, and mixed, for or in respect of which the particular letters in each case are issued.

Letters de bonis non should be stamped according to the amount of property remaining to be administered upon thereunder, regardless of the stamps upon the original letters.

A mere copy of an instrument is not subject to stamp duty unless it is a certified one, in which case a five-cent stamp should be affixed to the certificate of the person attesting it; but when an instrument is executed and issued in duplicate, triplicate, &c., as in the case of a lease of two or more parts, each part has the same legal effect as the other, and each should be stamped as an original.
LETTERS.—The law requires postage on all letters (including those to foreign countries when prepaid), excepting those written to the President or Vice President, or members of Congress, or (on official business) to the chiefs of the executive departments of the Government, and the heads of bureaus and chief clerks, and others invested with the franking privilege, to be prepaid by stamps or stamped envelopes, prepayment in money being prohibited.

All drop-letters must be prepaid. The rate of postage on drop-letters, at offices where free delivery by carrier is established, is two cents per half ounce or fraction of a half ounce; at offices where such free delivery is not established the rate is one cent.

The single rate of postage on all domestic mail letters throughout the United States, is three cents per half ounce, with an additional rate of three cents for each additional half ounce or fraction of a half ounce. The ten cent (Pacific) rate is abolished.

To and from Canada and New Brunswick 10 cents per half ounce, irrespective of distance.

To and from other British North American Provinces, for distance not over 3,000 miles, 10 cents.

For every additional half ounce, or fraction of a half ounce, an additional rate is charged. Prepayment is optional on all letters for the British North American Provinces except Newfoundland, to which prepayment is compulsory.

NEWSPAPERS, ETC.—Letter postage is to be charged on all handbills, circulars, or other printed matter which shall contain any manuscript writing whatever.

Daguerreotypes, when sent in the mail, are to be charged with letter postage by weight.

Photographs on cards, paper, and other flexible material, (not in cases), can be sent at the same rate as miscellaneous printed matter, viz., two cents for each four ounces or fraction thereof.

Photograph Albums are chargeable with book postage—four cents for each four ounces or fraction thereof.

NEWSPAPER POSTAGE.—Postage on daily newspapers to subscribers when prepaid quarterly or yearly in advance, at the mailing office or office of delivery, per quarter (three months), 35 cts.; six times per week, per quarter 30 cts.; for tri-weekly, per quarter 15 cts.; for semi-weekly, per quarter 10 cts.; for weekly, per quarter 6 cents. Weekly newspapers (one copy only) sent by the publisher to actual subscribers within the county where printed and published, free.

LETTER POSTAGE TO FOREIGN COUNTRIES.

For each half ounce: To England, Ireland, and Scotland, 34 cts.; to France and Algeria, 15 cts.; monthly, not over 4 oz., 5 cts.; over 4 oz. and not over 8 oz., 6 cts.; over 8 oz. and not over 12 oz., 9 cts.; quarterly, not over 4 oz., 1 cent; over 4 oz. and not over 8 oz., 2 cts.; over 8 oz. and not over 12 oz., 3 cts.; over 12 oz., 5 cts.

To and from other countries as follows:

For one copy only of a newspaper, magazine, or other periodical regularly issued to subscribers: To England, Ireland, and Scotland, 34 cts.; to France and Algeria, 15 cts.; monthly, not over 4 oz., 5 cts.; over 4 oz. and not over 8 oz., 6 cts.; over 8 oz. and not over 12 oz., 9 cts.; quarterly, not over 4 oz., 1 cent; over 4 oz. and not over 8 oz., 2 cts.; over 8 oz. and not over 12 oz., 3 cts.; over 12 oz., 5 cts.

To and from other countries as follows:

For one copy only of a newspaper, magazine, or other periodical regularly issued to subscribers: To England, Ireland, and Scotland, 34 cts.; to France and Algeria, 15 cts.; monthly, not over 4 oz., 5 cts.; over 4 oz. and not over 8 oz., 6 cts.; over 8 oz. and not over 12 oz., 9 cts.; quarterly, not over 4 oz., 1 cent; over 4 oz. and not over 8 oz., 2 cts.; over 8 oz. and not over 12 oz., 3 cts.; over 12 oz., 5 cts.

To and from other countries as follows:

For one copy only of a newspaper, magazine, or other periodical regularly issued to subscribers: To England, Ireland, and Scotland, 34 cts.; to France and Algeria, 15 cts.; monthly, not over 4 oz., 5 cts.; over 4 oz. and not over 8 oz., 6 cts.; over 8 oz. and not over 12 oz., 9 cts.; quarterly, not over 4 oz., 1 cent; over 4 oz. and not over 8 oz., 2 cts.; over 8 oz. and not over 12 oz., 3 cts.; over 12 oz., 5 cts.

To and from other countries as follows:

For one copy only of a newspaper, magazine, or other periodical regularly issued to subscribers: To England, Ireland, and Scotland, 34 cts.; to France and Algeria, 15 cts.; monthly, not over 4 oz., 5 cts.; over 4 oz. and not over 8 oz., 6 cts.; over 8 oz. and not over 12 oz., 9 cts.; quarterly, not over 4 oz., 1 cent; over 4 oz. and not over 8 oz., 2 cts.; over 8 oz. and not over 12 oz., 3 cts.; over 12 oz., 5 cts.

For one copy only of a newspaper, magazine, or other periodical regularly issued to subscribers: To England, Ireland, and Scotland, 34 cts.; to France and Algeria, 15 cts.; monthly, not over 4 oz., 5 cts.; over 4 oz. and not over 8 oz., 6 cts.; over 8 oz. and not over 12 oz., 9 cts.; quarterly, not over 4 oz., 1 cent; over 4 oz. and not over 8 oz., 2 cts.; over 8 oz. and not over 12 oz., 3 cts.; over 12 oz., 5 cts.
28 cts.: to the Two Sicilies, 22 cts.; to Denmark, 20 cts.; to Sweden, 88 cts.; to Norway, 38 cts.; to Russia, 29 cts.; to Prussia, 22 cts.; by French mail, the postage to these countries is higher.—The prepayment of letters to them, excepting to the Two Sicilies, is optional; as also to Canada and the British North American States, where the postage is 10 cts. under 3,000 miles, and 15 cts. over. To the follow-
ing, postage must be prepaid: To British West India, 10 cts.; to Ceylon, 10 cts.; to Panama, 10 cts.; to Peru, 10 cts.; to Sandwich Islands, New South Wales, and China, by mail to San Francisco, thence by private ship, 10 cts.; to China and Australia via England, 33 and 45 cts., via Marseilles, 35 and 57 cts.

Infallible Rules for Detecting Counterfeit or Spurious Bank Notes.

1st.—Examine the shading of the letters in title of Bank called LATHESWORK, which in genuine notes presents an even, straight, light and silky appearance, generally so fine and smooth as to appear to be all in one solid, pale body. In the counterfeits the lines are coarse and irregular, and in many of the longer lines breaks will be perceived, thus presenting a very inferior finish in comparison to genuine work.

2d.—Observe the dyes, circles and ovals in the genuine; they are composed of a network of lines, which, by crossing each other at certain angles, produce an endless variety of figures; see the one cent stamp attached. The line alone is the unit which enables you to detect spurious work. In the counterfeit, the represented white lines are coarse, irregular, and cross each other in a confused, irregular manner, thus producing blurred and imperfect figures.

3d.—Examine the form and features of all human figures on the note. In the genuine, the texture of the skin is represented by fine dots and lines intermixed. In the eyes, the pupil is distinctly visible, and the white clearly seen; the nose, mouth and chin, well formed, natural and expressive; the lips are slightly pouting, and the chin well thrown out; and the delicate shading of the neck perfectly harmonizes with the rest of the figure. Observe the fingers and toes; they should be clearly and accurately defined. The hair of the head should show the fine strands and present a fine, finished appearance. In the counterfeit the quality of the work is generally poor; the features are poorly executed, particularly the head and limbs; the eyes are seldom clearly defined. Ships are poorly drawn, the lines representing water are scratchy rather than parallel, the sky is represented generally in like manner, and where rolling clouds are to be seen, the unnatural effect is obvious. Domestic animals are generally poorly executed, particularly the head and limbs; the eyes are seldom clearly defined. Ships are poorly drawn, the lines representing water are scratchy rather than parallel, the sky is represented generally in like manner, and where rolling clouds are to be seen, the unnatural effect is obvious.

4th.—Examine the imprint or engraver’s name in the evenness and shape of the fine letters. Counterfeits never bear the imprint perfect. This rule should be strictly observed, as it is infallible in detecting counterfeits.

5th.—In the genuine note the landscapes are well finished; trees and shrubs are neatly drawn; the hills well proportioned, and the foliage presenting a fine natural appearance; clear sky is formed of fine parallel lines, and when clouds or heavy skies appear, they cross each other, and bear a soft, smooth and natural appearance. The perspective, showing a view of the surrounding country, is always clear and distinct. The smaller figures in the background are always plainly seen, and their outlines and general character recognized. Ships are well defined and the canvas has a clear texture; railroad cars are very accurately delineated; in examining a train, note carefully the car most distant. In the counterfeit the landscape is usually poorly executed; the lines of trees poorly and unnaturally defined. The lines representing still water are scratchy rather than parallel, the sky is represented generally in like manner, and where rolling clouds are to be seen, the unnatural effect is obvious. Domestic animals are generally poorly executed, particularly the head and limbs; the eyes are seldom clearly defined. Ships are poorly drawn, the lines representing water are scratchy rather than parallel, the sky is represented generally in like manner, and where rolling clouds are to be seen, the unnatural effect is obvious.

6th.—Bills altered from a smaller to a higher denomination, can readily be detected by a close observer, in consequence of the marked difference between the parts which have been extracted and the rest of the note. This difference is readily perceived in the lack of color, body and finish of the dye; we have seen bills where the surrounding shading in altered dies was
GENERAL REMARKS IN REFERENCE TO COUNTERFEITS.—The paper on which they are printed is generally of a very inferior quality, with less body, finish and toughness than bank note paper has. The ink generally lacks the rich luster of the genuine; the red letters and figures are generally imperfect, and the ink does not present the vermillion hue as it should. The printing is generally inferior, usually exhibiting specks of white in the most prominent letters. The date and filling up, and the President's and Cashier's names are generally written by the same person, although in many instances they present a different appearance. There are bills in circulation bearing either genuine dies or vignettes; but upon close examination you will be enabled to detect any spurious bill, whether counterfeit or altered, by the instructions here given, if persevered in for a short time. We beg to suggest, if time will admit, the learner should examine minutely every bill he receives. A powerful pocket magnifying glass, which can be purchased for from fifty cents to one dollar at any of the opticians, will greatly enable you to see and comprehend the difference between genuine and spurious work.

HOW TO SUCCEED IN BUSINESS.

What will my readers give to know how to get rich? Now, I will not vouch that the following rules will enable every person who may read them to acquire wealth; but this I will answer for, that if ever a man does grow rich by honest means, and retains his wealth for any length of time, he must practice upon the principles laid down in the following essay. The remarks are not original with me, but I strongly commend them to the attention of every young man, at least as affording the true secret of success in attaining wealth. A single perusal of such an essay at an impressionable moment, has sometimes a very wonderful effect upon the disposition and character.

Fortune, they say, is a fickle dame—full of her freaks and caprices; who blindly distributes her favors without the slightest discrimination. So inconstant, so wavering is she represented, that her most faithful votaries can place no reliance on her promises. Disappointment, they tell us, is the lot of those who make offerings at her shrine. Now, all this is a vile slander upon the dear blind lady.

Although wealth often appears the result of mere accident, or a fortunate concurrence of favorable circumstances without any exertion of skill or foresight, yet any man of sound health and unimpaired mind may become wealthy, if he takes the proper steps. Foremost in the list of requisites are honesty and strict integrity in every transaction of life. Let a man have the reputation of being fair and upright in his dealings, and he will possess the confidence of all who know him. Without these qualities every other merit will prove unavailing. Ask concerning a man, "is he active and capable?" Yes. "Industrious, temperate and regular in his habits?"—Oh yes. "Is he honest? Is he trustworthy?" Why, as to that, I am sorry to say that he is not to be trusted; he needs watching; he is a little tricky, and will take an undue advantage, if he can. "Then I will have nothing to do with him," will be the in-
variable reply. Why, then, is honesty the best policy? Because, without it, you will get a bad name, and everybody will shun you.

A character for knavery will prove an insurmountable obstacle to success in almost every undertaking. It will be found that the straight-line is, in business, as in geometry, the shortest. In a word, it is almost impossible for a dishonest man to acquire wealth by a regular course of business, because he is shunned as a depredator upon society.

Needy men are apt to deviate from the rule of integrity, under the plea that necessity knows no law; they might as well add that it knows no shame. The course is suicidal, and by destroying all confidence, ever keeps them immersed in poverty, although they may possess every other quality for success in the world.

Punctuality, which is said to be the soul of business, is another important element in the art of money getting. The man known to be scrupulously exact in the fulfillment of his engagements, gains the confidence and regard of all with the means he can use with advantage; whereas, a man careless and regardless of his promises in money matters will have every purse closed against him. Therefore be prompt in your payments.

Next, let us consider the advantages of a cautious circumspection in our intercourse with the world. Slowness of belief, and a proper distrust are essential to success. The credulous and confiding are ever the dupes of knaves and impostors. Ask those who have lost their property how it happened, and you will find in most cases that it has been owing to misplaced confidence. One has lost by endorsing; another by crediting; another by false representations, all of which a little more foresight and a little more distrust would have prevented. In the affairs of this world men are not saved by faith, but by the want of it.

Judge of men by what they do, not by what they say. Believe in looks rather than words. Observe all their movements. Ascertain their motives and their ends. Notice what they say or do in their unguarded moments, when under the influence of excitement. The passions have been compared to tortures which force men to confess. The same is true of the human mind. A careful examination of a man's character, his habits, his inclinations and propensities, his reputation for honor, industry, frugality and punctuality, his prospects, resources, supports, advantages and disadvantages; his intentions and motives of action; who are his friends and enemies, and what are his good or bad qualities. You may learn a man's good qualities and ascertain from his friends—his bad qualities and disadvantages from his enemies. Make due allowance for exaggeration in both. Finally, examine carefully before engaging in anything, and act with energy afterwards. Have the hundred eyes of Argus beforehand, and the hundred hands of Briareus afterwards.

Order and system in the management of business must not be neglected. Nothing is more to dispatch. Have a place for everything and everything in its place; a time for everything, and everything in its time. Do first what press and have determined what is to be done, lose no time, and when time is wasting, it is hurrying confusion, little or nothing is accomplished, and business is attended to with neither pleasure nor profit.

A polite, affable deportment is recommended. Agreeable manners contribute powerfully to a man's success. Take two men, possessing equal advantages in every other respect, but let one be gentlemanly, kind, obliging and conciliating in his manners, the other harsh, rude and disabusing, and the one will become rich, while the other will starve.

We are now to consider a very important principle in the business of money-getting, namely—industry—persevering, indefatigable, indefatigable labor. Industry is the Philosopher's stone which transforms everything into gold. Constant, regular, habitual and systematic application to business, must in time, if properly directed, produce great results. It must lead to wealth, with the same certainty that poverty follows in the train of idleness and inattention. It has been truly remarked that he who follows his amusements instead of his business, will, in a short time, have no business to follow.

The art of money-saving is an important part of the art of money-getting. Without frugality no one can become rich; with it, few would be poor. Those who consume as fast as they produce, are on the road to ruin. As most of the poverty we meet with grows out of idleness and extravagance, so most large fortunes have been the result of habitual industry and frugality. The practice of economy is as necessary in the expenditure of time as of money. They say if we take care of the pence the pounds will take care of themselves. So, if we take care of the minutes, the days will take care of themselves.

The acquisition of wealth demands much self-denial, and as many sacrifices of present gratification, as the practice of virtue itself. Vice and poverty proceed, in some degree, from the same sources, namely, the disposition to sacrifice the future to the present; the inability to forego a small present pleasure for great future advantages. Men fall of fortune in this world, as they fall of happiness in the world, simply because they are unwilling to deny themselves moments of employment for the sake of permanent future happiness.

Every large city is filled with persons who, in order to support the appearance of wealth, constantly live beyond their income, and make up the deficiency by contracting debts which are never paid. Others there are, the mere drones of so-
How to Secure the Public Lands.

OR THE ENTRY OF THE SAME UNDER THE PRE-EMPTION AND HOMESTEAD LAWS.

The following circular gives all necessary information as to the procedure necessary in purchasing and securing the public lands:

Numerous questions having arisen as to the mode of procedure to purchase public lands, or acquire title to the same by bounty land locations, by pre-emptions or by homestead, this circular is communicated for the information of all concerned.

In order to acquire title to public lands the following steps must be taken:

1. Application must be made to the Register of the district land office in which the land desired may be situated.

A list of all the land offices in the United States is furnished by the Department, with the seats of the different offices, where the duty of the Register and Receiver is to be in attendance, and give proper facilities and information to persons desirous of obtaining lands.

The minimum price of ordinary public lands is $1.25 per acre. The even or reserved sections falling within railroad grants are increased to double the minimum price, being $2.50 per acre.

Lands once offered at public sale, and not afterwards kept out of market by reservation, or otherwise, so as to prevent free competition, may be entered or located.

2. By the applicant filing with the Register his written application describing the tract, with its area; the Register will then certify to the receiver whether the land is vacant, with its price; and when found to be so, the applicant must pay that price per acre, or may locate the same with land warrant, and thereon the Register will give him a "duplicate receipt," which he is required to surrender previous to the delivery to him of the patent, which may be had either by application for it to the Register or to the General Land Office.

3. If the tract has not been offered at public sale it is not liable to ordinary private entry, but may be secured by a party legally qualified, upon his compliance with the requirements of the pre-emption laws of 4th September, 1841, and 3d March, 1849; and after such party shall have made actual settlement for such a length of time as will show he designs it for his permanent home, and is acting in good faith, building a house and rearing therein, he may proceed to the district land office, establish his pre-emption claim according to law, by proving his actual residence and cultivation, and showing that he is otherwise within the purview of these acts. Then he can enter the land at $3.90, either in cash or with bounty land warrant, unless the premises should be $2,500 acre lands. In that case the whole purchase-money can be paid in cash, or one-half in cash, the residue with a bounty land warrant.

4. But if parties legally qualified desire to obtain title under the Homestead Act of 20th May, 1862, they can do so on con-
LAW MAXIMS.

1. A promise of a debtor to give "satisfactory security" for the payment of a portion of his debt, is a sufficient consideration for a release of the residue by his creditor.

2. Administrators are liable to account for interest on funds in their hands, although no profit shall have been made upon them, unless the exigencies of the estate rendered it prudent that they should hold the funds thus uninvested.

3. Any person who voluntarily becomes an agent for another, and in that capacity obtains information to which as a stranger he could have had no access, is bound in subsequent dealing with his principal, as purchaser of the property that formed the subject of his agency, to communicate such information.

4. When a house is rendered untenable in consequence of improvements made on the adjoining lot, the owner of such cannot recover damages, because it is presumed that he had knowledge of the approaching danger in time to protect himself from it.

5. When a merchant ship is abandoned by order of the master, for the purpose of saving life, and a part of the crew subsequently meet the vessel that formed the subject of his agency, to communicate such information.

6. A person who has been led to sell goods by means of false pretenses, cannot recover them from one who has purchased them in good faith from the fraudulent vendor.

7. An agreement by the holder of a note to give the principal debtor time for payment, without depriving himself of the right to sue, does not discharge the surety.

8. A seller of goods who accepts, at the time of sale, a note of a third party, not endorsed by the buyer, in payment, cannot in case the note is not paid, hold the buyer responsible for the value of the goods.

9. A day-book copied from a "blotter" in which charges are first made, will not be received in evidence as a book of original entries.

10. Common carriers are not liable for extraordinary results of negligence that could not have been foreseen by ordinary skill and foresight.

11. A bidder at a Sheriff's sale may retract his bid at any time before the property is knocked down to him, whatever may be the conditions of the sale.

12. Acknowledgment of debt to a stranger does not preclude the operation of the statute.

13. The fruits and grass on the farm or garden of an intestate descend to the heir.

14. Agents are solely liable to their principals.

15. A deposit of money in bank by a husband, in the name of his wife, survives to her.
16. Money paid on Sunday contracts may be recovered.
17. A debtor may give preference to one creditor over another, unless fraud or special legislation can be proved.
18. A court cannot give judgment for a larger sum than that specified in the verdict.
19. Imbecility on the part of either husband or wife invalidates the marriage.
20. An action for malicious prosecution will lie, though nothing further was done than suing out warrants.
21. An agreement not to continue the practice of a profession or business in any specified town, if the party so agreeing has received a consideration for the same, is valid.
22. When A consigns goods to B to sell on commission, and B delivers them to C, in payment of his own antecedent debts, A can recover their value.
23. A finder of property is compelled to make diligent inquiry for the owner thereof, and to restore the same. If, on finding such property, he attempts to conceal such fact, he may be prosecuted for larceny.
24. A private person may obtain an injunction to prevent a public mischief by which he is affected in common with others.
25. Any person interested may obtain an injunction to restrain the State or a municipal corporation from maintaining a nuisance on its lands.
26. A discharge under the insolvent laws of one State will not discharge the insolvent from a contract made with a citizen of another State.
27. To prosecute a party with any other motive than to bring him to justice, is malicious prosecution, and actionable as such.
28. Ministers of the gospel, residing in any incorporated town, are not exempt from jury, military, or fire service.
29. When a person contracts to build a house, and is prevented by sickness from finishing it, he can recover for the part performed, if such part is beneficial to the other party.
30. In a suit for enticing away a man's wife, actual proof of the marriage is not necessary. Cohabitation, reputation, and the admission of marriage by the parties, are sufficient.
31. Permanent erections and fixtures, made by a mortgagee after the execution of the mortgage upon land conveyed by it, become a part of the mortgaged premises.
32. When a marriage is denied, and plaintiff has given sufficient evidence to establish it, the defendant cannot examine the wife to disprove the marriage.
33. The amount of an express debt cannot be enlarged by application.
34. Contracts for advertisements in Sunday newspapers cannot be enforced.
35. A seller of goods, chattels, or other property, commits no fraud, in law, when he neglects to tell the purchaser of any flaws, defects, or unsoundness in the same.
36. The opinions of witnesses, as to the value of a dog that has been killed, are not admissible in evidence. The value of the animal is to be decided by the jury.
37. If any person puts a fence on or plows the land of another, he is liable for trespass whether the owner has sustained injury or not.
38. If a person, who is unable from illness to sign his will, has his hand guided in making his mark, the signature is valid.
39. When land trespassed upon is occupied by a tenant, he alone can bring the action.
40. To say of a person, "If he does not come and make terms with me, I will make a bankrupt of him and ruin him," or any such threatening language, is actionable, without proof or special damage.
41. In an action for slander, the party making the complaint must prove the words alleged; other words of like meaning will not suffice.
42. In a suit of damages for seduction, proof of pregnancy, and the birth of a child, is not essential. It is sufficient if the illness of the girl, whereby she was unable to labor, was produced by shame for the seduction; and this is such a loss of service as will sustain the action.
43. Addressing to a wife a letter containing matter defamatory to the character of her husband is a publication, and renders the writer amenable to damages.
44. A parent cannot sustain an action for any wrong done to a child, unless he has incurred some direct pecuniary injury therefore in consequence of some loss of service or expenses necessarily consequent thereon.
45. A master is responsible for an injury resulting from the negligence of his servant, whilst driving his cart or carriage, provided the servant is at the time engaged in his master's business, even though the accident happens in a place to which his master's business does not call him; but if the journey of a servant be solely for a purpose of his own, and undertaken without the knowledge and consent of his master, the latter is not responsible.
46. An emigrant depot is not a nuisance in law.
47. A railroad track through the streets is not a nuisance in law.
48. A married woman can neither sue nor be sued on any contract made by her during her marriage, except in an action relating to her individual property. The action must be commenced either by or against her husband. It is only when an action is brought on a contract made by her before her marriage, that she is to be joined as a co-plaintiff, or defendant, with her husband.

50. The fact that the insurer was not informed of the existence of impending litigation, affecting the premises insured, at the time the insurance was effected, does not vitiate the policy.

52. The liability of an innkeeper is not confined to personal baggage, but extends to all the property of the guest that he consents to receive.

53. When a minor executes a contract, and pays money, or delivers property on the same, he cannot afterwards disaffirm such contract and recover the money, or property, unless he restores to the other party the consideration received from him for such money or property.

55. Any person dealing with the representative of a deceased person, is presumed, in law, to be fully apprized of the extent of such representative's authority to act in behalf of such estate.

56. A guest is a competent witness, in an action against a railroad company, by a passenger, to recover damages for injuries sustained in the journey which he has undertaken, is a party to the contract, and pays money, or delivers property on the same, he cannot afterwards disaffirm such contract and recover the money, or property, unless he restores to the other party the consideration received from him for such money or property.

58. A married woman can neither sue nor be sued on any contract made by her during her marriage, except in an action relating to her individual property. The action must be commenced either by or against her husband. It is only when an action is brought on a contract made by her before her marriage, that she is to be joined as a co-plaintiff, or defendant, with her husband.

59. Any contract made with a person judicially declared an insane is void.

60. Money paid voluntarily in any transaction, with a knowledge of the facts, cannot be recovered.

61. In all cases of special contract for services, except in the case of a minor, the plaintiff can recover only the amount stipulated in the contract.

62. If a wife is a competent witness with her husband, to prove the contents of a lost trunk, or when a party.

63. A wife cannot be convicted of receiving stolen goods when she received them of her husband.

64. Insurance against fire, by lightning or otherwise, does not cover loss by lighting when there is no combustion.

65. Failure to prove plea of justification, in a case of slander, aggravates the offence.

66. It is the agreement of the parties to sell by sample that constitutes a sale by sample, not the mere exhibition of a specimen of the goods.

67. An agent is liable to his principals for loss caused by his misstatements, the unintentional.

68. Makers of promissory notes given in advance for premiums on policies of insurance, thereafter to be taken, are liable thereon.

69. An agreement to pay for procuring an appointment to office is void.

70. An attorney may plead the statute of limitations, when sued by a client for money which he has collected and failed to pay over.

71. Testimony given by a deceased witness on first trial, is not required to be repeated verbatim on the second.

72. A person entitled to a reward offered for lost property, has a lien upon the property for the reward; but only when a definite reward is offered.

73. Confession by a prisoner must be voluntarily made, to constitute evidence against him.

74. The defendant in a suit must be served with process; but service of such process upon a wife, even in his absence from the State, is not, in the absence of statutory provision, sufficient.
75. The measure of damages in trespass for cutting timber, is its value as a chattel on the land where it was felled, and not the market price of the lumber manufactured.

76. To support an indictment for malicious mischief in killing an animal, malice towards its owner must be shown, not merely passion excited against the animal itself.

77. No action can be maintained against a sheriff for omitting to account for money obtained upon an execution within a reasonable time. He has till the return day to render such account.

78. An interest in the profits of an enterprise, as profits, renders the party holding it a partner in the enterprise, and makes him presumptively liable to share any loss.

79. Males can marry at fourteen, and females at twelve years of age.

80. All cattle found at large upon any public road, can be driven by any person to the public pound.

81. Any dog chasing, barking, or otherwise threatening a passer-by in any street, lane, road, or other public thoroughfare, may be lawfully killed for the same.

82. A written promise for the payment of such amount as may come into the hands of the promisor, is held to be an instrument in writing for the payment of money.

83. The declaration of an agent is not admissible to establish the fact of agency. But when other proper evidence is given, tending to establish the fact of agency, it is not error to admit the declarations of the agent, accompanying acts, though tending to show the capacity in which he acted. When evidence is competent in one respect, and incompetent in another, it is the duty of the court to admit it, and control its effects by suitable instructions to the jury.

84. The court has a general power to remove or suspend an attorney for such immoral conduct as rendered him unworthy of confidence in his official capacity.

85. Bankruptcy is pleadable in bar to all actions and in all courts, and this bar may be avoided whenever it is interposed, by showing fraud in the procurement of the bankruptcy act.

86. An instrument in the form of a deed, but limited to take effect at the termination of the grantor's natural life, is held to be a deed, not a will.

87. A sale will not be set aside as fraudulent, simply because the buyer was at the time unable to make the payment agreed upon, and knew his inability, and did not intend to pay.

88. No man is under an obligation to make known his circumstances when he is buying goods.

89. Contracting parties are bound to disclose material facts known to each, but of which either supposes the other to be ignorant, only when they stand in some special relation of trust and confidence in relation to the subject matter of the contract. But neither will be protected if he does anything, however slight, to mislead or deceive the other.

90. A contract negotiated by mail is formed when notice of acceptance of the offer is duly deposited in the post-office, properly addressed. This rule applies, although the party making the offer expressly requires that if it is accepted, speedy notice of acceptance shall be given him.

91. The date of an instrument is so far a material part of it, that an alteration of the the date by the holder after execution, makes the instrument void.

92. A corporation may maintain an action for libel, for words published of them and relating to its trade or business, by which it has incurred special damages.

93. It is unprofessional for a lawyer who has abandoned his case without trying it, a term or two before trial, to claim a fee conditional upon the success of his client, although his client was successful.

94. Although a party obtaining damages for injuries received through the fault of another, was himself guilty of negligence, yet that will not defeat his recovery, unless his negligence contributed to cause the injury.

95. A person may contract to labor for another during life, and consideration of receiving his support; but his creditors have the right to inquire into the intention with which such arrangement is made, and it will be set aside if entered into to deprive them of his future earnings.

96. A grantor may by express terms exclude the bed of a river, or a highway, mentioned as boundary; but if without language of exclusion a line is described as 'along,' or 'upon,' or 'running to,' or 'running to the highway or river, or as 'by,' or 'running to the bank of the river;' these expressions carry the grantee to the center of the highway or river.

97. The court will take pains to construe the words used in a deed in such a way as to effect the intention of the parties, however unskillfully the instrument may be drawn. But a court of law cannot exchange an intelligible word plainly employed in a deed for another, however evident it may be that the word used was used by mistake for another.

98. One who has lost his memory and understanding is entitled to legal protection, whether such loss is occasioned by his own misconduct or by an act of Providence.
GOVERNMENT LAND MEASURE.

92. When a wife leaves her husband voluntarily, it must be shown, in order to make him liable for necessaries furnished to her, that she could not stay with safety. Personal violence, either threatened or inflicted, will be sufficient cause for such separation.

100. Necessaries of dress furnished to a discarded wife must correspond with the pecuniary circumstances of the husband, and be such articles as the wife, if prudent, would expect, and the husband should furnish, if the parties lived harmoniously together.

101. A fugitive from justice from one of the United States to another, may be arrested and detained in order to his surrender by authority of the latter, without a previous demand for his surrender by the executive of the State whence he fled.

102. A watch will not pass under a bequest of "wearing apparel," nor of household furniture and articles for family use.

103. Money paid for the purpose of settling or compounding a prosecution for a supposed felony, cannot be recovered back by a party paying it.

104. An innkeeper is liable for the death of an animal in his possession, but may free himself from liability by showing that the death was not occasioned by negligence on his part.

105. Notice to the agent of a company is notice to the company.

106. An employer is not liable to one of his employees for an injury sustained by the latter in consequence of the neglect of others of his employees engaged in the same general business.

107. Where a purchaser at a Sheriff's sale has bid the full price of property under the erroneous belief that the sale would divest the property of all liens, it is the duty of the court to give relief by setting aside the sale.

108. When notice of protest is properly sent by mail, it may be sent by the mail of the day of the dishonor, if not, it must be mailed for the mail of the next day; except that if there is none, or it closes at an unseasonably early hour, then notice must be mailed in season for the next possible mail.

109. A powder-house located in a populous part of a city, and containing large quantities of gunpowder, is a nuisance.

110. When the seller of goods accepts at the time of the sale, the note of a third person, indorsed by the purchaser, in payment, the presumption is that the payment was intended to be absolute; and that in a note should be dishonored, the purchaser will not be liable for the value of the goods.

111. A man charged with crime before a committing magistrate, but discharged on his own recognizance, is not privileged from arrest on civil process while returning from the magistrate's office.

112. When one has been induced to sell goods by means of false pretences, he cannot recover them from one who has bona fide purchased and obtained possession of them from the fraudulent vendor.

113. If the circumstances attendant upon a sale and delivery of personal property are such as usually and naturally accompany such a transaction, it cannot be declared a legal fraud upon creditors.

114. A stamp impressed upon an instrument by way of seal, is good as a seal, if it creates a durable impression in the texture of the paper.

115. If a party bound to make a payment due diligence to make a tender, but through the payee's absence from home is unable to find him or any agent authorized to take payment for him, no forfeiture will be incurred through his failure to make a tender.

Government Land Measure.

A township, 36 sections, each a mile square.

A section, 640 acres.

A quarter section, half a mile square, 160 acres.

An eighth section, half a mile long, north and south, and a quarter of a mile wide, 80 acres.

A sixteenth section, a quarter of a mile square, 40 acres.

The sections are numbered from one to thirty-six, commencing at the northeast corner, thus:

<table>
<thead>
<tr>
<th>6</th>
<th>5</th>
<th>4</th>
<th>3</th>
<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td>w</td>
<td>n</td>
<td>e</td>
<td>s</td>
<td>w</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>7</th>
<th>8</th>
<th>9</th>
<th>10</th>
<th>11</th>
<th>12</th>
</tr>
</thead>
<tbody>
<tr>
<td>13</td>
<td>14</td>
<td>15</td>
<td>16</td>
<td>17</td>
<td>18</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>19</th>
<th>20</th>
<th>21</th>
<th>22</th>
<th>23</th>
<th>24</th>
</tr>
</thead>
<tbody>
<tr>
<td>25</td>
<td>26</td>
<td>27</td>
<td>28</td>
<td>29</td>
<td>30</td>
</tr>
</tbody>
</table>

| 31 | 32 | 33 | 34 | 35 | 36 |

The sections are all divided in quarters, which are named by the cardinal points, as in section one. The sections are divided in the same way. The description of a 40 acre lot would read: The south half of the west half of the southwest quarter of section 1 in township 24, north or range 7 west, or as the case might be; and sometimes will fall short, and sometimes overrun the number of acres it is supposed to contain.
Discount and Premium.

When a person buys an article for $1,00—20 per cent off, (or discount,) and sells it again for $1,00, he makes a profit of 25 per cent. He pays $80 cents and sells for $1,00—a gain of 20 cents, or 25 per cent of 80 cents. And for any transaction where the sale or purchase of gold, silver, or currency is concerned, the following rules will apply in all cases.

Rule 1st.—To find premium when discount is given: Multiply 100 by rate of discount and divide by 100, less rate of discount.

Rule 2d.—To find discount when premium is given: Multiply the rate of interest by 100, and divide by 100, plus the rate of premium.

Suppose A has $140 in currency, which he wishes to exchange for gold, when gold is 27 per cent, premium, how much gold should he receive? In this case, the premium is given, consequently we must find the discount on A's currency and subtract it from the $140, as per rule 2d, showing the discount to be a little more than 21 per cent, and that he should receive $110.60 in gold.

A dagger (+) denotes the profit to be a fraction more than specified. A (*) denotes profits to be a fraction less than specified.

Facts on Advertising.

The advertisements in an ordinary number of the London Times exceed 2,500. The annual advertising bills of one London firm are said to amount to $200,000; and three others are mentioned who each annually expend for the purpose, $50,000. The expense for advertising the eight editions of the "Encyclopaedia Britannica" is said to have been $15,000.

In large cities nothing is common than to see large signs, buildings, which seem to have an immense advantage over all competitors, by the wealth, experience, and prestige they have acquired, drop gradually out of public view, and be succeeded by firms of a smaller capital, more energy, and more determined to have the fact that they sell such and such commodities known from one end of the land to the other. In other words, old establishments advertise; the old die of dignity; the former are ravenous to pass out of obscurity into publicity; the latter believe that their publicity is so obvious that it cannot be obscured. The first understand that they must thrust themselves upon public attention, or be disregarded; the second, having once obtained public attention, suppose they have arrested it permanently, while, in fact, nothing is more characteristic of the world than the cases with which it forgets.

Stephen Girard, than whom no shrewder business man ever lived, used to say: I have always considered advertising liberally and long to be the great medium of success in business, and the prelude to wealth. And I have made it an invariable rule to advertise in the dullest times as well as the busiest, long experience having taught me that money thus spent is well laid out; as by keeping my business continually before the public I have secured me many sales that I would otherwise have lost.

The annual advertising bills of one London firm are said to amount to $200,000; and three others are mentioned who each annually expend for the purpose, $50,000. The expense for advertising the eight editions of the "Encyclopaedia Britannica" is said to have been $15,000.
Brilliant Whitewash.

Many have heard of the brilliant stucco whitewash on the east end of the President's house at Washington. The following is a recipe for it; it is gleaned from the National Intelligencer, with some additional improvements learned by experiments. Take half a bushel of nice un-slacked lime, slack it with boiling water, cover it during the process to keep in the steam. Strain the liquid through a fine sieve or strainer, and add to it a peck of salt, previously well dissolved in warm water; three pounds of ground rice, boiled to a thin paste, and stirred in boiling hot; half a pound of powdered Spanish whiting, and a pound of clean glue, which has been previously dissolved by soaking it well, and then hanging it over a slow fire, in a small kettle within a large one filled with water. Add a portion of hot water to the mixture, stir it well, and let it stand a few days covered from the dirt.

It should be put on right hot; for this purpose it can be kept in a kettle on a portable furnace. It is said that about a pint of this mixture will cover a square yard upon the outside of a house if properly applied. Brushes more or less may be used according to the neatness of the job required. It answers as well for oil paint for wood, brick or stone, and is cheaper. It retains its brilliancy for many years. There is nothing of the kind that will compare with it, either for inside or outside walls.

Coloring matter may be put in and made of any shade you like. Spanish brown stirred in makes the mixture reddish brown; more or less deep according to the quantity. A delicate tinge of this is very pretty, for inside walls. Finely pulverized common clay, well mixed with Spanish brown, makes a reddish stone color. Spanish brown make a yellow wash, but chrome goes further, and makes a color generally esteemed. In all these cases the darkness of the shades of course is determined by the quantity of coloring used. It is difficult to make rules, because tastes are different. It would be best to try experiments on a shingle and let it dry. We have been told that green must not be mixed with lime. The lime destroys the color, and the color has an effect on the whitewash, which makes it crack and peel. When walls have been badly smoked, and you wish to have them a clean white, it is well to squeeze indigo plentifully through a bag into the water you use, but it is stored in the whitewash mixture. If a larger quantity than five gallons be wanted, the same proportion should be observed.

How to get a Horse out of a Fire.

The great difficulty of getting horses from a stable where surrounding buildings are in a state of conflagration, is well known. The plan of covering their eyes with a blanket will not always succeed. A gentleman whose horses have been in great peril from such a cause, having tried

in vain to save them, hit upon the expedient of having them harnessed as though going to their usual work, when, to his astonishment, they were led from the stable without difficulty.

The Chemical Barometer.

Take a long narrow bottle, such as an old-fashioned Eau-de-Cologne bottle, and put into it two and a half drachms of camphor, and eleven drachms of spirits of wine; when the camphor is dissolved, which it readily does by slight agitation, add the following mixture: Take water, nine drachms; nitrate of potash (saltpetre) thirty-eight grains; and muriate of ammonia (sal ammoniac) thirty-eight grains. Dissolve these salts in the water prior to mixing with the camphorated spirit; then shake the whole well together. Cork the bottle well, and wait the top, but afterwards make a very small aperture in the cork with a red-hot needle. The bottle may then be hung up, or placed in any stationary position. By observing the different appearances which the materials assume, as the weather changes, it becomes an excellent prognosticator of a coming storm or of a sunny sky.

Leech Barometer.

Take an eight ounce phial, and put in it three gills of water, and place in it a healthy leech, changing the water in summer once a week, and in winter once in a fortnight, and it will most accurately prognosticate the weather. If the weather is to be fine, the leech lies motionless at the bottom of the glass and coiled together in a spiral form; if rain may be expected, it will creep up to the top of its lodgings and remain there till the weather is settled; if we are to have wind, it will move through its habitation with amazing swiftness, and seldom goes to rest till it begins to blow hard; if a remarkable storm of thunder and rain is to succeed, it will lodge for some days before almost continually out of the water, and discover great uneasiness in violent throes and convulsive-like motions; in frost as in clear summer-like weather it lies constantly at the bottom; and in snow as in rainy weather it pitches its dwelling in the very mouth of the phial. The top should be covered over with a piece of muslin.

To Measure Grain in a Bin.—Find the number of cubic feet, from which deduct one-fifth. The remainder is the number of bushels—allowing, however, one bushel extra to every 224. Thus in a remainder of 224 there would be 225 bushels. In a remainder of 448 there would be 450 bushels, &c.

**EXPLANATION TO**

**Storrs' Condensed Interest Table, at 7 Per Cent.**

**ONE DOLLAR TO NINE THOUSAND.** **ONE DAY TO SIX YEARS.**

The interest in the table is in all cases computed for the thousands, for the time designated. To determine interest for a less sum, as many figures should be pointed off from the right of the product as are pointed off from the thousands in the column of principals. For instance—the interest on $5,000 for ten months is $291.72. For $300, the figure 2 to the right should be pointed off, leaving $29.72 as the interest on $300 for the same time. For $50, the figure 6 must be pointed off, and the figures at the left represent the interest, and so on for smaller sums. By annexing a 0, you have the interest for $50,000.

**Explanation:** Find the year and observe the letter above it; then look for the month and in a line with it and the letter of the year above that letter find the day; and the figures on the left, in the same line, are the days of the same name in the month.

Leap years have two letters; the first is used till the end of February, the second during the remainder of the year.
WILMER COUNTY
BUSINESS DIRECTORY.

EXPLANATIONS TO DIRECTORY.

A Star (*) placed before a name, indicates an advertiser in this work. For such advertisements see Index.

Figures placed after the names, indicates the number of acres of land owned or leased by the parties.

Names set in Capitals, indicate subscribers to the work.

The name of a town in parenthesis, indicates that the party resides in said town, although receiving his mail at the post office under head of which his name appears.

ARCADIA.

Post Office address of residents of town of Arcadia, are as follows: Arcadia, Newark and Fairville, in the town; and Lyons, Joy and East Palmyra, in adjoining towns.

J. H. DOWD, Proprietor.
AND TELEGRAPH INSTITUTE,
SYRACUSE, N. Y.

THIS IS A
Practical Business College,
COMBINING THEORY AND PRACTICE;
WITH BANKS OF ISSUE,
Containing a Capital of Three Millions in Bank Notes, with Business
Offices furnished with all the Blanks generally used in Business,
such as Notes, Receipts, Due Bills, Orders, Checks, &c.

These are so employed by the student as to give rise to actual business operations. The student thus becomes the actual Merchant and Book-keeper, and transacts as scientifically as if engaged in genuine trade, all the business portraying to wholesale and retail Grocers, Commission, Jobbing, Shipping, Mining, Manufacturing, Banking, Steamboating, Railroading, Agencies, &c., &c.

PHONOGRAPHY
Is taught by Prof. JOHN B. HOLMES, A. M., a graduate of Graham’s Phonographic Academy, New York. Large classes are always in attendance.

THE TELEGRAPHIC INSTITUTE
Is under the management of Mr. OTIS E. WOOD, formerly Superintendent of the New York, Albany and Buffalo Telegraph Company’s Line, and the only Institute in the world where the theory and practice of telegraphing can be thoroughly learned. Thirteen instruments are now in operation, and over one hundred young men are now in attendance. Two experienced first-class operators are constantly employed to give instruction.

This Institution is independent and complete in itself. It is not connected with any of those monstrosities in education, called chains.

For terms and other information, address, [including stamp.] for the COLLEGE MONTHLY JOURNAL,

D. T. AMES, President,
SYRACUSE, N. Y.
RAILROAD HOUSE,
(Near the Depot,)

WAYNE COUNTY
STONE PUMP
MANUFACTORY,
Newark, Wayne County, N. Y.

VARY & SOUTHWELL,
Proprietors.

WE MANUFACTURE
STONE PUMPS
AND
AQUEDUCT PIPE
Of a Superior Quality.
They are made from the BEST NEW JERSEY STONEWARE CLAY, and for
Durability, Cleanliness and Ease of Working,
They are unsurpassed by anything in the Pump line; and, as an Aqueduct for spring
water, they are
SUPERIOR TO ANY OTHER.
They will not decay like wood; corrode or injure the water, like iron or lead; but are
always sweet and clean.
The expense to the purchaser of this pipe is but little more than for ordinary wood.
To be had at the Factory, WHOLESALE or RETAIL, in quantities to suit the pur-
chaser.

GOOD INDUCEMENTS OFFERED TO DEALERS.
All orders should be addressed to
VARY & SOUTHWELL,

First National Bank of Clyde,

C. MILLER, President.
W. H. MILLER, Cashier.

A. PARDEE, Ass't Cashier.
C. W. LEEK, Teller.

Office First National Bank,
Clyde, N. Y.

Dear Sir:

THE FIRST NATIONAL BANK
has recently removed from its temporary office, Miller's
Block, second floor, to its new and spacious Banking Offices,
corner of Columbia and Glasgow Streets.

With greatly increased facilities for transacting all
kinds of Banking business, we again tender you our ser-
vice, with the assurance that everything you may entrust
to our charge will receive the utmost care and attention.

COLLECTIONS on all accessible places in the
United States and Canada will be credited on their receipt,
at the lowest rate of exchange; those on the principal cities
and places adjacent to New York at par:

Coupons and Interest on U. S Stocks collected without
charge, and with the greatest promptitude.

We keep a supply of the different Government Se-
curities on hand, and are able to fill all orders with
promptness. We keep on hand U. S. Internal Revenue
Stamps of all denominations.

It will afford us pleasure to receive your account, and
we tender our services in every department of a general
Banking business.

Giving you the assurance of prompt and liberal dealing,

I am very respectfully yours,

W. H. MILLER, Cashier.

Teeth inserted on the most reasonable terms, from a single tooth to a FULL SET.

Particular Attention given to Filling and Saving the Natural Teeth.

Dentifrice and Mouth Wash, for Cleaning the Teeth, Healing Diseased Gums, and making the breath pure and fragrant. Prepared by myself and kept constantly on hand.

All Work Warranted as Represented.

Ladies, Attention!

The New Bazaar of Fashion

In Lyons, N. Y.

Mrs. Utter,

Would respectfully inform the Ladies of Wayne County, that she has recently opened a New Furnishing Store and Bazaar of Fashion, on Canal St., North Side, nearly opposite Strang's. Her Goods are ALL NEW, and of the latest styles and patterns to be found in the best New York Houses. The stock is comprised of the following:

- Ladies' Dress Trimmings
  - Colors, Trimming Ribbons & Braids of all Colors, Lace Edging, Inserting, &c. Also Point and Cluny Lace Collars, Veils—all Styles and Colors.
  - And everything else in these lines. A full assortment and at reasonable prices.

Dress Making

Done promptly and reasonably—this department being under the supervision of Mrs. Hartman.

Hoop Skirts made or repaired at short notice. Notwithstanding another party advertises that they have "more goods, and better goods than any rival," I will at all times be pleased to see the Ladies of Wayne county—preferring to leave the merit of goods to be decided by their own good judgment.

WAYNE COUNTY BUSINESS DIRECTORY.

MARION
COLLEGIATE INSTITUTE
AND
COMMERCIAL ACADEMY.

The next year of this Institution will commence on the

LAST TUESDAY IN AUGUST.

Three courses of study are provided, viz: Teachers' Course, Classical Course, and Scientific Course. Diplomas are granted to those who successfully complete any one of the above courses.

Book-keeping in all its various branches from the simplest entry, to the most complicated forms of Shipping, Partnership and Banking Business, is taught by theory and practice. The plan is similar to that pursued in most of the Commercial Colleges of the State.

Tuition in Commercial Department, including Penmanship, Time unlimited, - $25.00 Stationery extra.

Board can be obtained at $3.50 per week.

By the above prices the student can save at least 60 per cent.

The village of Marion is known for its excellent moral influences. No license for the sale of Alcoholic liquors has been granted (except to the Drug Store) for twenty years. Drunkenness with the influence of Rowdyism is unknown.

Tuition in Academic Department ranges from $5.50 to $8.00.

Letters of inquiry addressed to the Principal will meet with a prompt reply.

Dillingham, Stephen, farmer 8.
J. M. PAGE, MANUFACTURER OF
PAGE'S COMPOUND ARNICA OIL AND
SUGAR COATED MANDRAKE LIVER PILLS,
PAGE'S HOMEOPATHIC PHARMACY,
5 Seneca Street, Geneva, N.Y.

J. M. PAGE respectfully informs Homeopathic Physicians that he manufactures pure globules, and always keeps on hand all articles in the Homeopathic line. Pure medicines and all the standard and domestic works on the practice of Homeopathy. SUGAR OF MILK, etc.

PAGE'S MANDRAKE LIVER PILLS
THE PRINCIPAL REMEDY IN THESE PILLS, IS
PODOPHYLLIN,
A vegetable, possessing all the good and alterative effects of Mercury and the Blue Pills, without leaving any of those bad effects upon the system. They cure all Liver complaints, acting gently upon the bowels, removing all poisonous humors from the system, never creating any irritation nor gripping pains; they are a sure cure for Dyspepsia, improving the appetite; giving tone and vigor to the whole system; they also cure Jaundice, Constipation, Rheumatism, Neuralgia, Female Diseases, &c. When used in connection with PAGE'S COMPOUND ARNICA OIL, they are warranted to cure all cases of Scrofula and Fever Sores, Piles, and all diseases originating from impurities of the blood. They are sugar coated, and can be had at the Druggists for 25 cents. Manufactured only by J. M. PAGE, Geneva, N.Y., to whom all orders should be addressed. Ask for PAGE'S SUGAR COATED MANDRAKE LIVER PILLS, and take no others.

PAGE'S ARNICA OIL
IS A SCIENTIFIC COMPOUND,
An old and well tried remedy, that was never known to fail. When used in connection with PAGE'S MANDRAKE LIVER PILLS, it is a sure cure for Rheumatism, Neuralgia, Scrofula, Fever Sores, Salt Rheum, Ulcers, Piles, Chilblains, Sore Eyes, Cuts, Burns, Bruises, and all diseases of the Skin. Whenever there is pain and inflammation either in the Lungs, Stomach or Bowels, apply a plaster of PAGE'S ARNICA OIL, and immediate relief will be given. For SCROFULA SORES it has no parallel; it having completely eradicated this horrible disease after every other remedy had been used in vain. Any person making a trial of it who may not be satisfied with the result, can return the same and the purchase money will be refunded. It can be had at the Druggists for 25 and 50 cents a box, and is manufactured only by J. M. PAGE, Geneva, N.Y., to whom all orders should be addressed. Ask for PAGE'S ARNICA OIL and take no other.

</table>
Encouraged by the liberal patronage they have heretofore enjoyed, and relying upon a continuance of the same, the subscribers are constantly making ADDITIONS to THEIR STOCK of Goods, which renders their assortment the most complete ever offered in Lyons.

And **Everything Else** in the line of Ladies' Furnishing Goods, Trimmings, &c.

**DRESS MAKING!**

The undersigned have pleasure in announcing that all work in the line of Dress, Sacque or Basquine Making, will be placed in charge of **Mrs. HALE**, one of the best Dress-Makers in Western New York, and fully warranted. They do not desire that any piece of work should be accepted unless it satisfies the owner in every respect. All articles not on hand will be immediately procured, if desired by our customers.

**MRS. W. C. BELDEN & CO.**

---

**DENTISTRY.**

**E. M. ROFFEE,**

**SURGEON DENTIST.**

Rooms at the Old Quarters in Harmony Hall Block, Opposite Clyde Hotel,

**CLYDE, N. Y.**

Mr. ROFFEE's long experience enables him to successfully practice DENTISTRY in all its branches, and to give entire satisfaction to all his patients. Those having difficult Gums to fit need not go without teeth. They can here be fitted with beautiful teeth, natural in appearance, easy in fit, useful and durable.

Mr. ROFFEE has the pleasure of referring to the following gentlemen as to the superiority, durability and beauty of his work:

REV. R. Wilson, J. G. Hood, Aaron Gristwood, Isaac Miller, P. F. Rueterson, C. D. Lawton, Wm. Coffin, Seth Smith, Philip De Zeng, C. A. Rose, and others.

THE KING HATTER
OF THE EMPIRE STATE.
ESTABLISHED IN 1824.

H. G. DICKERSON & SON,
Water Street, Lyons, N. Y.,
MANUFACTURERS OF
LADIES' AND GENTLEMEN'S
FURS!
DEALERS IN
HATS, CAPS,
BUFFALO & FANCY ROBES,
STRAW AND FANCY GOODS.

This old and well established Hat Store has become one of the permanent "institutions" of the village of Lyons, having been located here for upwards of forty years, during which time it has had to contend against eleven out-and-out Hat Stores, and any number of shoddy concerns, besides having been robbed and burned out; during all of which time, and under all the trying scenes through which it has passed, it has always remained a strictly

HAT, CAP AND FUR STORE,
The proprietors never having interfered with the business of their mercantile neighbors, but always willing to follow the old adage, "Live and let live."

COMPETITION DEFIED.
Furs Altered and Repaired in the best of style.

H. WILKINSON.

H. M. NORTH.

IN PALMYRA,
FOR TWENTY-THREE YEARS, I HAVE BEEN PRACTICING

DENTISTRY

in all its branches, and with the reputation of eminent success; always aiming to preserve the natural teeth. In making artificial substitutes, I have followed the same rule,

TRUE UTILITY;

Being careful to adapt, as far as possible, the new teeth to the features of the wearer, and by all means to make them useful in eating.

Having competent assistance, I can now do more work in all branches, than heretofore, and invite all who wish thorough work at fair prices, and a warrentee that can be depended upon, to call at my office, (where I have been located for eighteen years,) in Williamson's Block, over the Post-office.

Photograph Gallery.

We offer superior inducements in the Style and Finish of Pictures. The new style of Picture, called the

IMPERIAL,

Which are becoming so popular in New York, are made at our Gallery with all the etceteras. In fact, all the latest styles and improvements in the Photographic Art will be found at our Gallery. All kinds of

Photographs, Porcelain Paintings, Ambrotypes, Views, Stereoscopes, &c., &c.,

Finished in the latest and best Style known to the Art. Particular attention paid to Children’s Pictures, and Copying from Old Pictures. Photographs finished in India Ink, Oil and Water Colors, in the best style, by one of the best Artists in this country.

Gilt, Rosewood, & Black Walnut Frames, Cord, Tassels, &c.,

Constantly on hand at the lowest prices, Cheaper than the Cheapest.

I have all the facilities for producing first class work in the way of large and small instruments, fine skylight, and splendid rooms. I have the only mammoth Camera in the County; so all who wish, can get large Pictures here without being obliged to go to a city. Solar Pictures of all sizes made at my Gallery equal to any made in this country. Also, Pictures and Engravings framed in all kinds of Molding, and of any size.

All are invited to visit my Gallery, and examine styles and finish of work. Don’t fail to visit our Gallery and be convinced.

Sodus—(Village.)

A post village on the Ridge road, north of the center of the town—contains about 700 inhabitants; is the seat of the Sodus Academy, a flourishing institution of learning. It has no water-power, and contains little in the line of manufactories, but it is noted for its mercantile interests; few villages of its size anywhere, enjoying such a wide spread patronage. Daily mail by stages from Lyons and Newark.

Would return their thanks to their numerous patrons in this and other counties for the liberal patronage bestowed upon them in the past, and they trust that the long experience they have had in the manufacture of

**AGRICULTURAL IMPLEMENTS,**

will ensure a continuance of patronage, inasmuch as their work cannot be excelled in Wayne County. Their

**Plows, Cultivators and Harrows,**

are acknowledged by all practical farmers to be the best in use. In fact all their manufactures are guaranteed to give satisfaction.

In connection with their other business they are now manufacturing

**HUMPHREY & FORBES’**

**Patent Water Elevator**

**THE BEST THING FOR DRAWING WATER EVER INVENTED.**

County rights for sale. Also Curbs at Wholesale or Retail.

Ames National Business College, Syracuse. During a recent visit to Syracuse, we had the pleasure of visiting the Business College, under the charge of Prof. D. T. Ames. While we expected to find an institution of a high order, and enjoying a large degree of prosperity, we were not prepared to find a degree of perfection as we found prevailing in the various departments of this Institution.—Three large halls are occupied for the departments. One exclusively as a Theory Department for the collegiate course, with a recitation room adjacent for recitations in phonography and other branches. Another large hall is furnished with banks, business offices and other necessary appliances for carrying into practice the details of actual business as applied to the various kinds of trade and commerce. This room is beautifully adorned with many of the most beautiful and perfect specimens of penmanship we have ever seen; many of which have received the first premiums at several State and International Fairs. Another spacious apartment is devoted exclusively to the art and science of telegraphing. Thirteen instruments of the most perfect pattern are constantly in operation, furnishing facilities for instruction to over one hundred students, while two experienced and successful operators are constantly employed as instructors, making the Telegraphic Institute, in our estimation the most complete and perfect in the world. We learned from the Register, that during the past season over five hundred students had been in attendance in the different departments of the institution; among whom were representatives from nearly every State in the Union, as well as many from the Canadas. Our visit to the institution has convinced us that the thoroughness of the organization of each of the several departments, and the efficient manner in which they were taught, places this institution far beyond the competition of any similar institution in the country. We should certainly recommend young ladies and gentlemen wishing to perfect themselves in any of the branches taught, to address the President, before making application elsewhere, for the College Journal, which is published monthly by the Faculty, and will be found an interesting and profitable paper for any young lady or gentleman, even though they may not expect to become patrons of the institution. When we take into consideration the central location and convenience of access, the enterprise and spirit of the Central City, added to the great advantages offered by the institution, we can but predict its permanent and entire success. See advertisement on page 101.

J. Strauss, Merchant Tailor at Clyde, can suit any taste as to style or price. His goods are manufactured from the best grades of cloth to be found in the market, by experienced workmen. No better place can be found in which to "dress up." See card, page 116.

The Lyons Republican, published by W. T. Tinsley, Esq., is deservedly a popular sheet. Making its appearance, as it does, once a week, it is a welcome visitor in families of a large number of the inhabitants of Wayne county. The Republican affords very superior advantages as an advertising medium, and is supplied with type and presses suitable for doing job printing in any style desired. See card, page 113.

James Forfar, Lumber Dealer and proprietor of planing mill at Lyons, publishes an advertisement on page 126, which we refer to all in want of lumber, boards, slabs, or shingles for any purpose desired. His prices are always low as the market will afford, and customers will find, that he keeps all he advertises.

The Clyde Times, James M. Scarlett, Esq., publisher, a radical Republican journal, is issued every Thursday, and is liberally supported by a very large list of subscribers. The paper is large and typographically neat in appearance. Since Mr. Scarlett's advent in Clyde, the paper has gained an excellent reputation, and it is now one of the "pillars" of Wayne co. Republicanism. As an advertising medium it is deserving of the extensive patronage it enjoys. The Job department has been replenished with a large amount of new material, and, what with first class compositors and good presses, Mr. Scarlett continues to turn out jobs equal to city work. Give him a call. See card, page 126.

N. B. Ziegel, at the "New York Store" in Lyons has the name of keeping one of the finest stores in this section of the State, and which has become a fashionable resort for those ladies and others who are in search for any of the latest novelties in the line of Dry Goods. His clerks are ever ready to attend to the wants of his customers. Give him a call and learn the truth of our statement. See card, page 114.

Pease & Co., of the "Central Photograph Gallery," Newark, are fully prepared to get up pictures in the finest style of the art. Mr. Pease has had many years experience in the practice of his art in the city of Utica, and in leading galleries in other sections of the State. His gallery is fitted up with a ground glass sky-light, rendering it superior to many others. See card, page 108.

R. G. Lowery, Surgeon Dentist at Lyons, though a new aspirant in this county, has yet contributed much to the profession by the superior quality of his work, shown himself to be an expert in the art of dentistry. His practice elsewhere has made him deserving of the confidence and patronage of those in need of his services. See card, page 108.
WAYNE COUNTY BUSINESS DIRECTORY.

WAYNE COUNTY INSURANCE AGENCY

JOHN H. SWEENY,
Main Street, Palmyra, N. Y.,
REPRESENTS THE

CHARTER OAK LIFE INSURANCE COMPANY
OF HARTFORD, CONN.

THE CHARTER OAK LIFE is the only Company that gives a DIVIDEND THE FIRST YEAR on the first premium.

Agent for Dunn’s Rochester Dye House.
Main Street, (Near the Post Office,) Palmyra, N. Y.

The First National Bank of Clyde, C. Miller, Pres., W. H. Miller, Cashier, is an institution of entire responsibility, and its managers noted as being first class financial managers. One looks upon their bills as upon the face of a friend. The Bank has recently been removed to their new office, corner of Columbia and Glasgow streets. This office has been fitted up at great expense. The furniture is of black walnut, and of the most magnificent workmanship, executed by a Buffalo firm, whose exclusive manufactures are of a similar character. See card, page 129.

Briggs & Palmer, Bankers at Clyde, deal extensively in all kinds of Government bonds, State, County and Town securities, and make collections on all points in the United States and Canadas. Their facilities for doing a general banking business are such as to warrant the confidence of all desiring the services of a banker.—Read the Company’s card, page 129.

Lawton & Crane, Attorneys and Counselors at Law, Bounty and Pension Agents, Clyde. See card, page 100.

F. C. Reed, Attorney and Counselor at law, Clyde. See card, page 106.

Van Demark & Chambers, Proprietors of the Livery Stables in rear of Congress Hall, Lyons, keep a large number of fine Saddle or Carriage Horses, and their carriages, buggies, sleighs or cutters are of the best manufacture; their charges are always reasonable, and finally, we know of no livery men, better entitled to the patronage of the public than the above gentlemen. See their cards, pages 3 and 158.

Vary & Southwell, at Newark, are manufacturers of superior stone pump and drain or aqueduct pipe of a superior quality. We would earnestly recommend the farmers of Wayne county to examine their wares, for we believe them to be worthy of their patronage, and just the thing wanted. See card, on page 103.

J. T. Mackenzie, Attorney and Counselor at Law, Lyons. See card page 106.

Reapers and Mowers,
Ohio and Buckeye Patents,
Combined, and
Blodgett's Patent
Cat Claw Horse Forks.
Sodus, N. Y.

W. D. Perrine & Son, watch makers and Jewelers, and dealers in Sewing Machines on Broad street, Lyons, have for many years been "leaders" in their line of trade. They keep fully stocked with all the rich and rare articles in the jewelry line. As skillful repairers for either watch work or jewelry, they are of the first class. See cards, pages 2 and 153.

Tracy & Greenwood, at Newark, are extensive manufacturers of Grain Drills, Wheel Cultivators, Plaster Sowers, Plows, and agricultural implements generally, they are experienced workmen, and their machines are all of them, among the best in market. The farmers of Wayne county will do well to give them a call. See card, page 3.

E. D. Langdon, Proprietor of the "Railroad House," at Newark, (near the Depot,) has by uniform kindness to guests and reasonable charges, won hosts of friends. He keeps a number of good horses and carriages for the use of travelers, and Mr. "Tom" Langdon is always on hand to attend to the calls of customers. See card, page 102.

We are personally acquainted with Mr. A. O. Bartle, of Newark, N. Y., and know manufacturers of whom he purchases his stock, and can stake our reputation upon any guarantees he may make to his customers. He does not resort to any tricks to secure trade. Whatever he may promise customers will be fulfilled; he is a one price man, and sells for cash only. Customers will get full measurement, and one man's money as good as another's. His machinery is of latest improved patents. Whatever he tells a customer he can rely upon. See card, page 1.

Thos. E. Smith, Manufacturer and dealer in Furniture and Upholstering goods, at No. 32 Seneca Street, Geneva, Ontario county, is justly known as one of the largest dealers in his class of goods in Central or Western New York. It is almost worth a trip to Geneva, to inspect his rooms. The main building has four floors, 40 feet front by 200 feet deep. This is connected with the manufactory in the rear, which is 35 by 100 feet, and yet back of this is a large lumber yard, and two extensive storehouses for the reception of duplicate goods. Mr. Smith is noted as being constantly supplied with good goods of all styles and descriptions, and which he offers at prices so low, that his customers live in many counties; the per-cent age saved to them being enough to richly pay them the expense of a trip to his store. See advertisement, page 124.

J. H. Dowd, Photographer, at Newark, is an artist of merit. His rooms are fitted up with taste, and he is supplied with improved instruments. We would recommend him to public patronage. We have seen several very fine views of buildings, machinery, &c., taken by him. See card, page 100.
WHITMAN.

Merson, John M., house and carriage painter.

Miljan, Aaron D., (Marion,) farmer, leases 60.

Miljan, David R., farmer 82.

MYLHAN, MARTIN, (Marion,) farmer 80.

Tucker, Daniel, (Rose,) farmer 55.
Turbush, Henry, (Huron,) farmer 16.
Turbush, Jackson, house and sign painter.
Underhill, Jason, (Butler,) farmer 60.
Union Free School, of Wolcott, Prof. A. J. Hutton, principal; Misses Sarah E. Dowd, Asenath Van Amken, Frank Dow, S. Dow, Frances Park, assistant teachers.
Vandervoort, Andrew, distiller of cider brandy.
Vandertoft, Thos., farmer 55.
Van Patten, Peter, (Huron,) farmer 55.
Van Valkenberg, John, (Butler.)
Van Vleck, Lawrence, (Butler,) farmer 55.
Vernon, Almond, farmer 55.
Vincent, John, carpenter and builder.
Vincent, John, farmer 6.
Vought, Isaac, farmer 50.
Wadsworth, Henry, (Huron,) farmer 112.
Wadsworth, Cornelius, farmer 60.
Waldorf, Peter, farmer 6.
Walker, Edward, farmer 100.
Walker, Samuel, farmer 60.
Walker, Samuel, (Huron,) farmer 60.
Walker, William H., (Butler,) farmer 425.
Ward, Joseph R., (Butler,) farmer 55.
Ward, Reuben, (Butler,) farmer 50.
Watkins, Henry, farmer 126.
Watkins, D. C., (Butler,) farmer 45.
Watson, Mrs. Elizabeth, (Butler,) farmer 75.
Wells, George, (Butler,) farmer 40.
Wells, Samuel, (Huron,) farmer 75.
Wheeler, Wm. W., farmer 32.
THE DECIMAL SYSTEM OF WEIGHTS AND MEASURES.

As authorized by Act of Congress--Approved July 28, 1866.

STANDARDS.

In every system of Weights and Measures, it is necessary to have what are called "Standards," as the pound, yard, gallon, &c., to be divided and multiplied into smaller and larger parts and denominations. The definition and construction of these Standards involve philosophical and scientific principles of a somewhat abstruse character, and are made and procured by the legislative department of the government. The nominal Standards in the new system are the Meter, the Are, the Liter, and the Gram. The only real Standard, the one by which all the other Standards are measured, and from which the system derives its name of "Metric," is the Meter.

THE METER

Is used for all measures of length, distance, breadth, depth, height, &c., and was intended to be, and is very nearly, one ten-millionth of the distance on the earth's surface from the equator to the pole. It is about 39 3/8 inches, or 3 feet, 3 inches and 3 eights, and is to be substituted for the yard.

THE ARE

Is a surface whose side is ten Meters, and is equal to 100 square Meters or about 4 square rods.

THE LITER

Is the unit for measuring solids and capacity, and is equal to the contents of a cube whose edge is one-tenth of a Meter. It is about equal to one quart, and is a standard in cubic, dry and liquid measures.

A cubic Meter (or Kiloliter) is called a Stere, and is also used as a standard in certain cubic measures.

THE GRAM

Is the unit of weight, and is the weight of a cube of pure water, each edge of the cube being one one-hundredth of a Meter. It is about equal to 15.4 grains. It is intended as the standard in all weights, and with its divisions and multiples, to supersede the use of what are now called Avoirdupois, Apothecaries and Troy weights.

Each of the foregoing Standards is divided, successively, and larger units are also formed by multiplying 10, 100, &c. The successive subordinate parts are designated by the prefixes Deci, Centi and Milli, the successive multiples by Deka, Hecto, Kilo and Myria, each having its own numerical signification, as will be more clearly seen in the tables hereinafter given.

The terms used may, at first sight, have a formidable appearance, seem difficult to pronounce, and to retain in memory, and to be, therefore, objectionable; but with a little attention and use, the apprehended difficulty will be found more apparent than real, as has been abundantly proved by experience. The importance, also, of conformity in the use of commercial terms, on the part of the United States, with the practice of the many nations in which the system, with its present nomenclature, has already been adopted, will greatly overbalance the comparatively slight objection alluded to.

Acts and Resolutions of Congress.

PUBLIC — No. 183.

AN ACT to authorize the use of the metric system of weights and measures.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That from and after the passage of this act, it shall be lawful throughout the United States of America to employ the weights and measures of the metric system; and no contract or dealing, or pleading in any court, shall be deemed invalid or liable to objection, because the weights or measures expressed or referred to therein are weights or measures of the metric system.

Sec. 2. And be it further enacted, That the tables in the schedule hereto annexed, shall be recognized in the construction of contracts, and in all legal proceedings, as establishing, in terms of the weights and measures now in use in the United States, the equivalents of the weights and measures expressed therein in terms of the metric system; and said tables may be lawfully used for computing, determining and expressing, in customary weights and measures, the weights and measures of the metric system.

PUBLISHER'S NOTICES.

M. M. Kenyon, Drugist, and dealer in Paints, Oils, Glass, Books, Stationery, Fancy Goods, &c., at Newark, is an experienced dealer. His drugs are of purest kind in the market, and his long practice enables him to prepare all prescriptions with accuracy. He also keeps music, photograph albums, &c., and will sell anything in his line at the lowest living prices. See card, page 142.

Misses Ross & Cline, Milliners and Fancy Goods dealers, at Clyde, keep a large assortment of fashionable hats, bonnets, flowers, ribbons, and millinery goods generally, which they know so well how to arrange to please the most fastidious customers, that, although they have but recently opened, their rooms are daily crowded by those in search of "something to wear." See card, page 134.

Matteson & Co., Hat, Cap and Fur dealers, at Clyde, N. Y., have opened a new store in Miller’s new block, on Columbia street. Their goods are new throughout, and of the most fashionable patterns. Their facilities for purchasing low, enable them to supply customers with anything in their line at astonishingly low prices. Call and see the new Hat Store. Card on page 134.

Charles McLouth, Attorney and Counselor at Law, and Insurance Agent, at Palmyra. See card, page 190.

S. E. McIntyre, Attorney and Counselor, and Insurance Agent, at Palmyra. See card, page 190.

Peddle & Finley, Attorneys and Counselors, Palmyra. See card, page 190.

HAYDEN & LETCHWORTH,
NO. 9 EAST GENESSEE STREET,
AUBURN, - - N.Y.,
MANUFACTURERS AND WHOLESALE DEALERS OF
HAMES, SADDLERY & CARRIAGE
HARDWARE.

HEADQUARTERS FOR HARNES, AND CARRIAGE TRIMMINGS, of every description, and offered at the lowest prices, to Harness and Carriage Makers, and all Dealers in these goods in Wayne County, warranting to give the best of satisfaction as to quality. Among our specialities are our new improved

FIFTH WHEEL,

CARRIAGE COUPLINGS,
ARCHIMEDEAN AXLES, LAKE BENDING WORKS SUPERIOR BENT WORK AND SPOKES,
Wheels, Jersey Hubs, LITTLEJOHN'S Compound Tire,
GENUINE PHILADELPHIA BOLTS,
PHILLIP'S PATENT SPRINGS, AND OTHER BEST MAKES.
ENAMELED CLOTHS, LEATHERS, SLEIGH TRIMMINGS,
ENGLISH AND AMERICAN VARNISHES,
OF ONLY THE BEST MAKES.

Orders by mail have the best attention, and prices guaranteed satisfactory. Goods shipped by Rail or Express, at lowest rates.

HORSE COLLARS OF THE BEST QUALITY.
The New Bazaar of Fashion.
IN LYONS, N.Y.

MRS. UTTER,
Would inform the Ladies of Lyons and Wayne county that she is constantly adding to her stock of LADIES' FURNISHING GOODS, DRESS TRIMMINGS, &c.
DRESS MAKING done promptly and in the best manner, after the latest styles. See card, page 144.

G. P. LIVINGSTON,
SURGEON DENTIST,
CLYDE, N.Y.
Office in Perkin's Block, (Next East of Post Office.)
LOW PRICES, GOOD WORK, AND WARRANTED.
See card, page 144.

H. G. Hotchkiss, Manufacturer and Dealer in Essential Oils, &c., Lyons, has this year received the first premium at the "World's Fair," at Paris, for the best Peppermint Oil. See card, page 180.

C. H. Ravell, Photographer, at Lyons, publishes a card on page 162. His rooms are finely located, and he is supplied with all the instruments necessary for making a perfect picture—all kinds of which he is prepared to furnish at the cheapest rates. Don't fail to go and see him when in Lyons.

James N. Taft, Dealer in Druggist, Medicines, Perfumery, Wines and Liquors, and all kinds of fancy goods, at Lyons, can supply customers with top articles in his line, at satisfactory prices. You have only to call, to learn the truth of our statement. See cards, pages 166 and 300.

A. F. Devereaux, near Clyde, has a fine Vineyard of about four acres. He grows grapes and manufactures pure wines and brandies, from native grapes. We would advise all who desire pure wines, to order from him. See card, page 166.

Wm. Van Camp, Publisher of the "Wayne Democratic Press," at Lyons, we believe, learned his profession many years ago in a Wayne County printing office. He publishes a tidy looking sheet, and the only Democratic paper in the county. His edition is large, and is circulated in every part of the county.

Wm. H. Farnham, Wholesale and Retail dealer in Dry Goods, Cloths, Yankee Notions, &c., Palmyra, publishes a card on page 160. Mr. Farnham's stock is very complete and full; indeed, many of the country merchants round about find it to their interest to make their purchases from him. Buying directly and at the most favorable prices, he is enabled to offer his customers rare inducements. Remember Mr. Farnham, when you want anything in the Dry Goods line.

ADDITIONAL STATISTICS FROM CENSUS OF 1865.

In addition to above abstracts, we give the following totals for the County, as per returns for the several heads mentioned:

**Cash Value of Farms, 1865, $19,492,570**; of Stock, 1865, $2,407,460; of tools and implements, 1865, $661,111. **Acres plowed, 1865, 85,257.**

**Tons of Hay, 1864, 48,326.** **Winter Rye, bushels grown in 1864, 3,436.** **Barley, bushels harvested in 1864, 141, 641⅔.** **Flax, acres sown, 1865, 400; pounds of lint, 1864, 64,752.** **Honey, pounds collected in 1864, 30,526.** **Working Oxen, 1865, 671.** **Neat Cattle, number killed for beef in 1864, 1,826.** **Swine, number of pigs in 1865, 14,795; one year old and over, 15,156; slaughtered in 1864, 16,115; pounds of pork made, 1864, 3,601, 743.** **Wool, pounds shorn, 1865, 459,774.** **Sheep, number of lambs raised, 1865, 44,448; number killed by dogs, 1864, 567.** **Poultry, value owned, 1865, $41,867.54; value of eggs sold, 1864, $44,741.53.** **Fertilizers, value bought in 1864, $17,989.62.**

**Domestic Manufactures, 1864, yards of fulled cloth, 1,168½; yards of flannel, 3,458½; yards of linen, 4,218½; yards of cotton and mixed cloths, 243.** **Apples, number of trees in fruit, 1864, 341,499; Barrels of Cider, 1864, 12,970.** **Hops, pounds raised, 1864, 21,108.**

The Census Report gives no statistics in regard to the growth of Peppermint.

**RULE FOR ALL INTEREST.**

**SUMMARY OF DIRECTIONS, FOR WORKING INTEREST OF ANY CONCEIVABLE PRINCIPAL, TIME, AND RATE.**

Place the Principal, Time, and Rate, on the right of a vertical line; and if the time is days, place 30 and 12 on the left; if the time is months, place 12 only, on the left; and if the time is years, place nothing on the left.

If the Principal, Time, or Rate is a mixed number, reduce it to an improper fraction, and place the numerator on the right, with the denominator on the left.

When the Principal is dollars, the answer is cents; in such case, two figures must be cut off for cents; when the Principal is cents, the answer is hundredths of cents; here, cut off two figures, commencing at the right, for hundredths, two more for cents, and the remainder at the left is dollars.

The figures thus cut off for cents, hundredths, &c., must be whole numbers; while any existing fraction will only be a fractional part of such cents or hundredths.

When the time is months and days, or years, months and days, reduce the years to months, and add in all the given months; then reduce the days to the fractional part of a month, and annex this fraction to the whole number of months; reduce all to an improper fraction, and place the numerator on the right, and the denominator on the left. In such case, divide by 12 only. If the time cannot be reduced to the fractional part of a month, reduce the whole time, years, months and days, to days, and divide by 30 and 12.

If the time is years and months, reduce the months to the fractional part of a year; add to the years; reduce all to an improper fraction, and divide by the denominator only.

**How to Judge a Horse.**

A correspondent, contrary to old maxims, undertakes to judge the character of a horse by outward appearances, and offers the following suggestions, the result of his close observation and long experience:

If the color be light sorrell, or chestnut, his feet, legs, and face white, these are marks of kindness. If he is broad and full between the eyes, he may be depended on as a horse of good sense, and capable of being trained to anything.

As respects such horses, the more kindly you treat them the better you will be treated in return. Nor will a horse of this description stand a whip if well fed.

If you want a safe horse, avoid one that is dish-faced. He may be so far gentle as not to scare; but he will have too much go-ahead in him to be safe with everybody.

If you want a fool, but a horse of great bottom, get a deep bay, with not a white hair about him. If his face is a little dish-ed, so much the worse. Let no man ride such a horse as that is not an adept in riding—they are always tricky and unsafe.

If you want one that will never give out, never buy a large, overgrown one.

A black horse cannot stand heat, nor a white one cold.

If you want a gentle horse, get one with more or less white about the head; the more the better. Many persons suppose the parti-colored horses belonging to the circuses, shows, &c., are selected for their oddity. But the selections thus made are on account of their great docility and gentleness.

**To Those Who Write for the Press.**

It would be a great favor to editors and printers should those who write for the Press observe the following rules. They are reasonable, and our correspondents will regard them as such:—1. Write with black ink on white paper, wide ruled. 2. Make the pages small, one-fourth that of a foolscap sheet. 3. Leave the second page of each sheet blank. 4. Write in a plain bold hand, with less respect to beauty. 5. Use no ab-
breviations which are not to appear in print. 8. Punctuate the manuscript as it should be printed. 9. For italics underscore one line; for small capitals two; for capitals three. 10. Never interline without the caret to show its place. 11. Take special pains with every proper name. 12. Review every word, to be sure that none is illegible. 13. Put directions to the printer at the head of the first page. 14. Never write a private letter to the editor on the printer's copy, but always on a separate sheet.

CASH AND CREDIT.—If you would get rich don't deal in bill books. Credit is the "tempter in a new shape." Buy goods on trust, and you will buy a thousand articles that Cash would never have dreamed of. A shilling in the hand looks larger than ten shillings seen through the perspective of a three months' bill. Cash is practical, while Credit takes horribly to taste and romance. Let Cash buy a dinner, and you will have beefsteak flanked with onions. Send Credit to market, and he will return with eight pair of woodcocks and a peck of mushrooms.—Credit believes in diamond pins and champagne. Cash is more easily satisfied. Give him three meals a day, and he don't care much if two of them are made up of roasted potatoes and a little dirty salt.—Cash is a good adviser, while Credit is a good fellow to be on visiting terms with. If you want double chins and contentment, do business with cash.

Habits of a Man of Business.
A sacred regard to the principles of justice forms the basis of every transaction, and regulates the conduct of the upright man of business. He is strict in keeping his engagements. Does nothing carelessly or in a hurry. Employs no one to do what he can easily do himself. Keeps everything in its proper place. Leaves nothing undone that ought to be done, and which circumstances permit him to do. Keeps his designs and business from the view of others.

Is prompt and decisive with his customers, and does not overtrade his capital. Prefers short credits to long ones, and cash to credit at all times, either in buying or selling; and small profits in credit cases, with little risk to the chance of better gains with more hazard. He is clear and explicit in all his bargains.
Leaves nothing of consequence to memory which he can and ought to commit to writing. Keeps copies of all his important letters which he sends away, and has every letter, invoice, &c., relating to his business, titled, classed, and put away.
Never suffers his desk to be confused by many papers lying upon it. Is always at the head of his business, well knowing that if he leaves it it will leave him.
Holds it as a maxim that he whose credit is suspected is not one to be trusted. Is constantly examining his books, and sees through his whole affairs as far as care and attention will enable him.
Balances regularly at stated times, and then makes out and transmits all his accounts current to his customers, both at home and abroad.
Avoids as much as possible all sorts of accommodation in money matters and lawsuits where there is the least hazard.
He is economical in his expenditures, always living within his income.
Avoids as much as possible all sorts of accommodation in money matters and lawsuits where there is the least hazard.
He is economical in his expenditures, always living within his income.

Avoids as much as possible all sorts of accommodation in money matters and lawsuits where there is the least hazard.
He is economical in his expenditures, always living within his income.
J. C. Lovett, Dealer in Dry Goods, at Palmyra, is conducting a business that was established in 1835. He is enabled to make the best selections of goods in market, and to purchase at the lowest prices. He does not mean to be undersold by any house in Western New York. See card, page 182.

E. A. Edgett, Proprietor of the "Wayne County Preserving Establishment" at Newark, has had many years practical experience in his profession—about ten, we believe, in Oneida County and two in Wayne. Mr. Edgett's factory is large and well proportioned, exactly calculated for the business for which it was created. He keeps several steamers constantly at work manufacturing cans. About 200,000 cans, of various kinds, are put up annually. Green Corn, Peaches, Tomatoes, and indeed all kinds of fruit or vegetables, may be perfectly preserved, so that if left in a warm room for one or two years even, they would appear fresh as when first canned. Mr. Edgett's specialty, we understand, is green corn, of which he puts up large quantities, principally for the New York market, though he will fill orders from other places. His green corn is considered the best in market. His establishment gives employment to about 100 hands—principally girls—during the preserving season. Housekeepers will generally find it cheaper, all things considered, to purchase canned fruits than to preserve them in the old fashioned way. See card, page 159.

H. M. North, Dentist, at Palmyra, has been in successful practice for twenty-one years, during which time he has gained a host of friends among his large number of patients. See his card on page 190. Mr. North is in every way qualified and prepared to do any amount of work in the best possible manner.

James H. Rudd keeps the Book Store No. 3 Center Building, Lyons. His stock of Standard, Miscellaneous and School Books, Wall Papers, Blank Books, Stationery, and School Felt, is complete. Call and see him. No better place can be found at which to purchase.

J. H. Cox, at Lyons, deals largely in Choice Family Groceries and Provisions, also all kinds of green and dried fruits. He is agent for Greenway's Syracuse Ales. All goods will be found fresh and nice at Hecox's. Call and see. Card page 183.

Huyck & Wilkinson, Merchant Tailors and dealers in Ready Made Clothing, Hats, Caps, &c., at Palmyra, offer rare inducements to purchasers. They are good tailors and will use their customers well. See card, page 190.

H. W. Smith, of South Butler, advertises Harness, Saddlery, &c, and also wishes to sell his house, shop, barn, &c. See page 170.

Tucker & Chase, Druggists and Grocers, and dealers in Crockery, Glassware, Wooden ware, &c., at Palmyra, advertise on page 183. They are close buyers, and can afford to offer, as they do, rare inducements for customers to purchase of them.

Mrs. W. C. Belden & Co., of Lyons, advertise Ladies' Furnishing Goods, on page 174. Their stock is very complete, and they are constantly making additions as anything new in the market makes its appearance. They also do a general dress making business.

E. M. Moofee, Surgeon Dentist, at Clyde, is a workman of rare merit. We have seen some very excellent work put up by him. He refers customers to a large number of the leading men of Clyde. See card, page 174.

Wells Tyler, Jr., Proprietor of the "Palmyra Clothing Emporium," manufactures to order applique suits, in a first quality of cloths. He has also ready made goods in great variety, styles, and prices, to suit. No one desiring a complete outfit should fail of visiting his store. See card, page 193.

C. P. Pettit & Co., Druggists and dealers in Toilet articles, Paints, Oils, Groceries, Wall Paper, Window Shades, Books, &c., at Palmyra, intend keeping a complete stock in every department, and will supply customers at the lowest possible prices. See card, page 192.

J. M. Page, of Geneva, advertises his Liver Pills and Arnica Oil, on page 168. The great curative qualities of these medicines have made for them a large sale. They can be found at any drug store. See card, page 168.

John C. Bishop, of Lyons, is a Surveyor of large experience. He uses the best instruments and does his work accurately. See card, page 170.

H. G. Dickerson & Son, Hatters, Cap and Fur Dealers, Lyons, have been a long time in business, and have all the time, we believe, succeeded in giving entire satisfaction to their customers. Their business is confined strictly to that of hats, caps and furs, straw and fancy goods, and that they do well. See card, page 176.

E. M. Anderson, Dealer in Boots and Shoes, Hides and Leather, at Palmyra, has been for many years engaged at his present business, and fully understands every branch. His goods are all manufactured from first quality of stock by experienced workmen. No better place can be found anywhere, as regards the dignity of style or price. Mr. A. also buys hides, calf-skins, sheep-skins, and hemlock bark, for which he pays cash. See card, page 186.
PUBLISHER'S NOTICES.

H. S. Brown & Son, general dealers in all kinds of Shelf and Heavy Hardware, and House Furnishing Goods, Stoves, Tinware, &c., at Newark, advertises on page 157. Their stock is very complete in all its branches. Messrs. Brown & Son will endeavor in every way to please their customers, and we would advise those in need of anything in their line to give them a call. They are agents for the celebrated "American" cook stove.

The Palmyra Courier, issued every Friday, by E. S. Averill, Esq., is a trim looking sheet, typographically neat and well printed; and by its large circulation presents a valuable advertising medium. Mr. Averill has superior facilities for executing all kinds of Job Printing in a neat and tasteful manner. We would advise those business men of Palmyra who have never done so, to try moving the wheels of business, by informing through the columns of the Courier, those who might become their customers, what they have to sell. They would undoubtedly find it beneficial. See Mr. Averill's card, page 164.

Geo. P. Livingston, M.D., Surgeon Dentist, at Clyde, advertises on pages 144, 249. The Doctor's long experience recommends him to the patronage of the suffering public. He manufactures a superior dentrifice and mouth wash, for cleaning the teeth, &c. Call and see him.

A. J. Denison, Dealer in Music and Musical Instruments, Sewing Machines, Wall Paper &c., at Clyde, advertises on page 159. Mr. Denison offers inducements to customers rarely met with. His agency is not confined to any one instrument or machine, but he is prepared to furnish any musical instrument or Sewing Machine manufactured in the United States, at the lowest prices. Certainly it is for the interest of customers to buy of him.

J. & S. Duncan, Manufacturers of Woolen goods, near East Palmyra, are experienced workmen in their line of business. Their mill is in perfect order for turning out splendid Full Cloth, Cassimere, Tweeds, Shirting, Flannels, Stocking Yarn, &c. They will work on shares or by the yard, or exchange cloth for wool. See card, page 140.

Wm. P. Russell, Proprietor of the Marion Foundry and Machine Shop, employs a number of experienced workmen, and he has excellent facilities for supplying the farmers of Wayne County with Agricultural Implements generally. Among them he makes some very excellent Plows, Cultivators, Straw Cutters, Field Rollers, Horse Power, Draw and Buzz Saws, &c. He also does anything in the line of castings to order. Mill gearing and machinery generally can be finished up in perfect style. Farmers will find Mr. Russell Mowers and Reapers of the shop. See card, page 152.

James E. Briggs, Atty. &c., and Licensed Claim Agent at Newark, makes the business of prosecuting Claims, &c., a specialty. His qualifications and facilities for successfully transacting the business of his clients, should bring him many customers. See card, page 162.

In the manufactures of Auburn, that of the Cayuga Chief Manufacturing Co. is important and worthy of note. The Company have extensive works located near the track of the N. Y. Central R. R. some forty rods west of the Depot. Their works are new, and complete in its machinery and appointments. At the time of our visit, they were completing Twenty-five machines daily, which include Mowers, and combined Hand and Self-Rake Reapers. An examination of their order book showed that notwithstanding the rapidity with which they were turning out machines, the demand was greatly in excess of the supply, and that a large number of orders must remain unfilled. The Company are preparing to still further enlarge their facilities by the erection of additional buildings. See card, page 286 and cut 195.

Frederick Boehmler & Son, Furniture Dealers and Undertakers, Broad Street, Lyons, have had more than twenty years experience at their business in this country. They employ none but skilful workmen, and their warerooms are constantly supplied with all varieties of Household, Hotel, or Office furniture. We cheerfully recommend them to the patronage of all citizens of Wayne county, in want of good furniture, and we can assure all, that they will be fairly dealt with. See advertisement, page 170.

Clyde Iron Works, Wood, Candler & Co., proprietors, Clyde, N. Y. These are among the most extensive works of the kind in this part of the State. The proprietors are practical workmen of long experience, and have facilities for turning out almost any machine, made of either wood or iron. Their specialties we would refer the reader to their card on page 4 of this work.

Their works are driven by a powerful steam engine, and are capable of turning out an immense amount of work yearly. As a testimonial of their skill, we would say that during the past winter and spring they have fitted up the gearings, rollers, &c. for both the paper mills at Clyde, and which we believe, are giving entire satisfaction. The firm gives employment to a large force of mechanics and laborers, thus adding materially to the growth and prosperity of this enterprising village. They deserve the patronage of the farmers of Wayne Co. For further particulars in regard to their productions, see cards, pages 4, 194 and 261.

J. W. Van Etten, Insuranee Agent and Lawyer, at Lyons, publishes a card on page 98. His are all good companies, and reliable as any. We cheerfully recommend Mr. Van Etten to the patronage of all desiring services in his line, and would assure them of his prompt and careful attendance to the same.
D. W. Parshall, of Lyons. The subject of our sketch, was born in the town of Palmyra, about 1812. His father was a well-to-do farmer for those times, and young Parshall grew up practically acquainted with the mysteries of successful farming, so doubtless did the man, and laid the foundations of his subsequent success in that direction. When quite a young man, Mr. Parshall attended school at Canandaigua, where he was for some time an intimate friend and room-mate of the late Stephen A. Douglas.

In 1834, he came to Lyons, where he commenced the study of law in the office of Gen. Wm. H. Adams. He was at this time 25 years of age. After being admitted he commenced business on his own account about 1840, since which time he has gained an extensive practice, and amassed a large fortune. He has been for many years very largely engaged in buying and selling real estate, and we understand it is a favorite practice of his to buy "abandoned" farms, which in a very brief space of time, it would, almost seem by magic, be transformed into places so entirely changed.

The buildings are repaired or new ones built, fences are all in their places, and substantially built, the fields are cleaned up and the land improved. By this process, Mr. Parshall is enabled not only to enrich himself but benefit others. At present he has about 1,400 acres situated in the towns of Sodus and Huron, on Sodus Bay, and known as the "Shaker Tract." He has also in Lyons and in Sodus, other farms, amounting to about 400 acres, and one in Genesee, near Clyde, of about 300 acres. In 1832, he commenced banking in Lyons, where he started the institution known as "The Palmyra Bank of Lyons," which was afterwards changed to "Lyons Bank," and was again changed to "Lyons National Bank," under which name the business is at present conducted.

Mr. Parshall has a large amount of real estate in the city of Buffalo, and also in the village of Palmyra. At the latter place, he owns several blocks, containing in all about 15 stores; he also has several lots centrally located on William and Canal Streets, on which he intends building new blocks. To him much of the prosperity and wealth of the town is due. Personally, Mr. Parshall is of commanding stature, full form, and we should judge enjoys robust health. He is a plain man, always attending to the interests of his business, and we believe enjoys the confidence and respect of all who have had occasion to make his acquaintance. — See card of "Lyons National Bank," page 172.

S. D. & J. M. Streeter, Malters and proprietors of the Brick Warehouse and Elevators, at Clyde, are extensive dealers in all kinds of malt. Their malt is worth the attention of those wanting to purchase. Their work is made up of the best materials of all kinds, by workmen experienced in their several departments. See card, page 222.

W. J. Bowne & Sons, Hardware dealers, at Palmyra. This establishment has for a long time been doing a successful business. Their stock is complete in every department, and very extensive. Probably the chief secret of their success is that their goods are uniformly good in quality and afforded at reasonable prices, they preferring to make large sales on small percentages, to small sales on the basis of large percentages. — See their card, page 193.
Cyrus Garlock, Dealer in Lumber, and Manufacturer of Sash, Doors, Blinds, Staves and heading, publishes a card on page 220. His main works are at Port Gibson, Ontario Co. He has an extensive Cooper Shop in Newark, Wayne Co. He also planes and re-saws lumber at his Port Gibson Mills. He does his work well and sells low, as the market will afford.

C. C. Teall, Attorney and Counsellor at Law, and Justice of the Peace, at Sodus. See card, page 204.

The Newark Courier, published by B. Howe Randolph, at Newark, advertises on page 208, a large circulation, a valuable advertising medium, and superior facilities for executing all kinds of job work. Mr. Randolph has recently enlarged his paper to thirty-two columns, and is determined to present such a variety of good, sound, miscellaneous reading, and weakly digests of general and local news, as will make it a welcome visitor to its patrons.

H. T. Tower, Surgeon Dentist, at Lyons, has had fifteen years experience at his profession, guarantees satisfaction, and warrants operations. See card, page 236.

John H. Sweeny, at Palmyra, is Section Agent for the "Charter Oak Life Insurance Co. of Hartford, Conn. and, we are told, is taking a large number of persons in Wayne County. The "Oak" is, we believe, the only company that declares a dividend the first year on the first premium, and in other respects it is equal to any other. Its business is increasing wonderfully. Remember that a "Policy of Life Insurance is the best legacy that can be left to one's family." See card, page 226.

Levant Bedell, at Clyde, is a Watch Maker and Repairer of well known merit. He is an expert in the line of fine watch work, and will warrant his repairs to be done. See card, page 223.

S. S. Morley & Co., Dealers in Hardware, Iron and Stoves, Tin, Sheet Iron Ware, &c., at Clyde, publish a card on page 228.

Mrs. E. G. Tripp, Fashionable Milliner, Fancy Goods, Hoop Skirt and Corset Dealer, at Palmyra, is doing a very extensive business in her line. No lady who desires fashionable goods, can be better suited than at Mrs. Tripp's. See card, page 226.

A. G. Myrick & Son, Marble dealers, at Palmyra, keep on hand a very extensive assortment of the fine grades of Marble, and are prepared to execute orders for anything in their line, with neatness and dispatch. We would advise those interested to visit the works of Messrs. Myrick & Son. See card, page 223.

Adam Pifer, of Sodus Village, has been long established in the Harness Business, and has won an enviable reputation for getting up durable and stylish work at reasonable prices. See card, page 234.

The Macedon Hotel, at Macedon, has recently passed into the hands of Messrs. Staudinger & Knapp, who have established a free running line to and from the cars for the use of their guests. They have otherwise fitted up their house, and intend to keep it in style to suit their customers. See card, page 230.

D. W. S. Lee, Dentist, at Sodus, has had an extensive and successful practice. He has, by his skill in workmanship, made many friends who can testify in his favor. The doctors has a very pleasant office, neatly fitted for the comfort of guests. See card, page 220.

The Marion Collegiate Institute and Commercial Academy, located at Marion, has, from its commencement, been a success. The building is substantially built of brick, three stories high, roomy and well ventilated. The various recitation rooms are fitted up with modern school furniture. The Institution is provided with a large library. It has also an extensive and valuable apparatus for the purpose of Philosophical and Chemical experiments, together with a French Manual and a Skeleton, which are valuable to the student in Anatomy and Physiology, a valuable Telescope for Astronomical students, a valuable Cabinet of Geological Specimens, &c. The village of Marion is peculiarly adapted for the location of such a school, and should be appreciated by parents and others who have the care and education of the youth of our country in their charge. The village is shown for its excellent moral influences, and for its anti-license population. Drunkenness is unknown. It is but six miles from Palmyra, on the N. Y. C. R. R., is connected therewith by a daily line of stages, and is therefore easy of access. Mr. Thos. B. Lovell, the present principal, has for some years past been at the head of the school, and has proved himself such an efficient officer as to make it popular. He is assisted by an able corps of popular and very successful teachers. We know of no school we could recommend to young ladies or gentlemen desiring a good sound education, as preferable to the Marion Collegiate Institute." See card, page 164.

The Franklin House, at Clyde, is under the management of Messrs. Howes & Holmes, gentlemen who uniformly strive to accommodate their guests. Their table is always supplied with the delicacies, as well as substantial of the season. We would recommend travellers to stop at the "Franklin," near the depot, when visiting Clyde. See card, page 218.

Perry Almy, Photographer, at Sodus, finishes up pictures of all styles in a superior manner. He takes great pains in the "toning," and warrants his pictures not to turn yellow or fade. We would recommend those who wish to "see themselves as others see them," to visit his gallery. See card, page 218.
Before leaving the work in which I have, for the past few months, been so earnestly engaged, I desire to return thanks to all who have so kindly aided me in the effort to produce a work, which I confidently hope will prove of great value to its possessors. Those who have furnished information, (historical or otherwise,) for its pages, have my special thanks, while those who have pecuniarily aided in the way of subscriptions for advertising, will, I trust, receive liberal cash dividends as the legitimate fruits thereof. Subscribers for the work it is hoped may find much that is new, instructive, and valuable.

As a parting word to my friends in Wayne County, I would suggest to the business men, that very many of them would find *Printer's Ink* a great lubricator of the wheels of business. Too many seem to have fallen into a settled apathy, as regards business matters; willing to serve such customers as come unasked to their doors, but who make no efforts to retain at home, the large amount of trade annually diverted to the cities of Syracuse and Rochester. As a general thing you are not willing to admit that the merchants of those cities can afford to sell the same class of goods cheaper than you can. Their rents, taxes and clerk hire, usually cost far more than yours—while your money will buy goods in market just as cheap as theirs. Why, then, should your citizens patronize the city merchants rather than yourselves? In penning this article, I can have no selfish interest in view, as my
present work with you is accomplished. It is purely for your own interest, that I suggest the propriety of your advertising more liberally. Advertise extensively, and all the time—through the columns of your local newspapers, by hand-bills, by circulars, by cards, by every means you can employ. Advertise; let the people know you are alive, and that you have good goods, and full assortments, in your special lines, and that you will sell cheap, at city prices. And, finally, if you keep posted as to the markets, and do as you advertise, our word for it, you will very soon be surprised at the increase of your sales. I do not mean that advertising alone will build up any business, or the want of it hinder its prosperity; but I do assert, emphatically, and had I time and space to do so, could prove by large numbers of the many thousand persons with whom I have had business, that, in nine cases out of ten, advertising liberally and long is one of the best of business investments.

Do not be deceived by the too popular idea that “you are so long established, that everybody knows where you are, and what you have to sell.” I tell you it is, on your part, a grave error.

How many men in your county have been there but one or two years, or, perhaps, have just made their residence with you? Of what benefit is your “long established reputation” in such a case. Your neighbor, perhaps, who has been in business but a few months, is just as well “established,” in the mind of such a man, as “you,” who boast of being “so long in business that everybody knows you, and you know everybody.” Politely speaking, you are “an old fossil.”

You will say that the new man must have some customers, and you will all stand your chances. Such a course will do very well when you are not anxious to increase your trade, or when you are quite willing to diminish it; for, while you are satisfied with this state of affairs, some more enterprising tradesman will reach your would-be customer, and perhaps withdraw his patronage from your village altogether. You should bear in mind always, that there is a dividing point between your village and those adjacent, and that
the custom of citizens living near such dividing point, generally
goes to that place which holds out the most favorable inducements.

A friendly rivalry in advertising, by parties engaged in the vari-
ous kinds of business, is invariably noticed and commented upon
by the masses who read, and tend to materially increase the busi-
ness of a village. Don't be altogether selfish in your motives.—
Work for the benefit of your locality, and you will surely reap
your reward. In other words, build up your village; make it a
center for a large strip of surrounding country.

As mediums for advertising, you have many: First of all is
your Local Papers; your Editors are all good fellows, and would
be pleased to advise their many readers who to deal with. Try
them; they are liberal, and uniformly obliging. Their local items,
if you would allow it, might be the means of depositing many dol-
lars in your till. As for other means of advertising, "their name
is legion," the principal ingredient of which is Printer's Ink; the
benefit to be derived from which, depends more or less upon the
size of doses.

With thanks to friends generally, and especially to the several
thousand patrons of the "GAZETTEER AND DIRECTORY OF WAYNE
County," I leave my work for the present, hoping in after years
to again meet and serve you in a similar undertaking.
