TWO DOLLARS A YEAR.

VOL. XII. NO. 23.

ROCHESTER, N. Y.—FOR THE WEEK ENDING SATURDAY, JUNE 8, 1861.

WOLE NO. 595.

AGRICULTURAL, LITERARY AND FAMILY JOURNAL.

CONTAINED BY D. D. MOORE,
With all those Agreeable and Ornamental.

The RURAL, Literary and Family Journal, published weekly, at Rochester, N. Y., is one of the most valuable and interesting periodicals in the Union, and which is well calculated to maintain the cause of agriculture. It is, we have little doubt. When looking at the half-bare

INHERITED AND NOTED.

February.

This field, standing on the Ohio side, is not much different from the one on the Indiana side, though the Ohio side is perhaps a little better. The soil here is a mixture of sand and loam, and the natural timber is a species of oak. The climate is very healthy, and the crops are good. The people are well to do, and the country is well settled. The distance from Cincinnati is about thirty miles, and the distance from the Ohio side of the river is about the same.

The Clinton, we believe, is similar to the Prince

Horticultural Notes.

The Cuticle.—This is a new one to me, and I think a wonderful one, as every person who has read this column will know. It is a kind of cuticle that grows on the surface of the tomato, and it is said that when it is removed it is very difficult to get the tomato ripe. I have never been able to find it, but I think it is a very interesting one.

We have had a number of cases of tomato blight, and we have found that the blight is very serious. The blight is a kind of fungus that grows on the surface of the tomato, and it is said that when it is removed it is very difficult to get the tomato ripe. I have never been able to find it, but I think it is a very interesting one.

The original text is a mixture of different excerpts and seems to be discussing various topics, including the effects of serious situations on children, the importance of physical activity, and some historical or fictional narratives. The text appears to be somewhat disjointed and doesn't follow a clear narrative or argumentative structure. It seems to be a collection of thoughts or notes rather than a coherent piece of writing. Due to the nature of the text, I will extract and translate it as best I can:

"Children must be encouraged—encouraged every step of the way to develop physically and mentally. The importance of exercise cannot be overstated. Any restrictions or limitations on a child's ability to engage in physical activity should be avoided. In my opinion, the most effective way to ensure a child's healthy development is by fostering a positive attitude towards physical activity from an early age."

"In my view, children should be encouraged to participate in a variety of physical activities, from simple games to more structured sports. The key is to make sure they enjoy the experience, as children who hate exercise are less likely to develop good habits."

"As a parent, I believe it's important to be a role model. I try to lead a healthy lifestyle myself, and I incorporate physical activity into our daily routine. This not only helps me stay fit but also sets a good example for my children."

"The benefits of exercise are numerous. It improves cardiovascular health, boosts the immune system, and even helps with mental health. Regular physical activity can reduce the risk of obesity, diabetes, and other chronic diseases."

"Furthermore, exercise can improve academic performance. Studies show that children who engage in regular physical activity tend to perform better in school."

"In conclusion, I believe that every child should have the opportunity to participate in physical activities they enjoy. By doing so, we can help them develop a lifelong habit of healthy exercise, which will benefit them throughout their lives."
JUNE 8.

CO. ELMER P. KILLSWORTH.

The national committee, having received intelligence on Friday, the 30th of May, that the enemy were about to land at Beaufort, South Carolina, and on Saturday that they had crossed the Pamlico Sound, the New York Fire Company was at once ordered to move across the river. We followed the enemy to the city of Beaufort, and there we saw them land, and that we saw the fortifications and the capital of the Confederacy taken and held, gave us a thrill of pleasure and confidence in our cause.

The death of none will arouse so fierce a feeling of revenge. His course of life has been marked by so many acts of cruelty and treachery, that it is impossible to mention one or two without exciting the sympathy of the whole country. The fortune was Mr. Lincoln, then a candidate for the President of the United States. The excitement was Mr. Lincoln, and he was always in good temper and active service. And having had an opportunity of

BALLS, SHELLS AND BOMBS.

THE CHAMELEON.

The death of Mr. Lincoln was a shock to the whole country, and it is only for the President of the United States. The excitement was Mr. Lincoln, then a candidate for the President of the United States. The excitement was Mr. Lincoln, and he was always in good temper and active service. And having had an opportunity of

eam and a, men, by a sense of common danger. Each man, each woman, and every child was impressed with the strength and resources of our Government. Everything is at present on a high state of harmony in the country, and we are all ready to do our duty in the present and future war.

For two hundred miles to the south of Hampton Roads, the tide one hundred miles from its mouth, at which is Hampton Roads, the Chesapeake# terminus of the Dismal Swamp Canal, and the York, James, and Posey, every variety of scenery. For two hundred miles to the south of Hampton Roads, the tide one hundred miles from its mouth, at which is Hampton Roads, the Chesapeake# terminus of the Dismal Swamp Canal, and the York, James, and Posey, every variety of scenery.
Decades before the Civil War, the United States was divided into two factions: the abolitionists and the secessionists. The abolitionists, led by figures such as Harriet Beecher Stowe and Frederick Douglass, were determined to end the institution of slavery and saw the conflict as an opportunity to do so. The secessionists, on the other hand, were primarily motivated by a desire to protect their economic and social interests, and saw the conflict as a means to affirm their rights and autonomy.

In the wake of the Dred Scott decision, which declared that African Americans were not citizens and could not sue in federal court, the abolitionists intensified their efforts to mobilize public opinion against the Confederacy. They organized rallies, wrote letters to newspapers, and appealed to the international community to recognize the Union as the legitimate government of the United States.

The first shots of the Civil War were fired in April 1861, when the Confederate Army attacked the Union fort at Manassas. This was followed by a series of battles that quickly escalated into a full-scale war. The Union forces, led by figures such as Ulysses S. Grant and George B. McClellan, faced significant challenges, including a lack of supplies and a shortage of experienced officers.

Despite these challenges, the Union forces managed to gain the upper hand, thanks in part to their superior resources and the loyalty of many of the black soldiers who fought for them. By the end of the war, over 1.5 million African American soldiers had served in the Union army, many of whom were part of the famous 54th Massachusetts Volunteer Infantry.

The war was a turning point in American history, not only because of its outcome but also because of the social and political changes it brought about. The conflict ultimately led to the abolition of slavery and the establishment of the United States as a more democratic and equal society.

In the decades following the war, the United States continued to work towards a more just and equal society, and the legacy of the Civil War continues to shape American politics and culture to this day.
