GRASS AND HAY-MAKING.

The grass should be cut while it is yet green and tender, as this makes it easier when wet with the dew than when it is dry. The grass thus cut will lie flatter, and though the seed will remain in the ground, it will germinate more quickly than if dry.

In all cases where the grass is to be cut on the same ground during the following season, the first crop should be reserved. If the grass is cut too early, before it has grown to its proper size, the result will be a smaller yield of hay. The grass should be cut when it is in full bloom, and the weather is dry and warm. When the weather is wet and cold, the grass will not dry properly, and the hay will be mealy.

RURAL SPIRIT OF THE PRESS.

Indian Spirit of the Press.

A native son, writing in the Ohio Daily Gazette, says: "The Indian Spirit of the Press is, in truth, the only spirit of the Press. It is, in fact, the only spirit of the age, and its influence is felt in every part of the country. It is the true spirit of the people, and its principles are those of the heart of the nation."

The spirit of the Press is, indeed, the true spirit of the people. It is the voice of the people, and it speaks the language of the people. It is the voice of the people, and it speaks their language. It is the voice of the people, and it speaks their language.

The spirit of the Press is, indeed, the true spirit of the people. It is the voice of the people, and it speaks the language of the people. It is the voice of the people, and it speaks their language. It is the voice of the people, and it speaks their language.

The spirit of the Press is, indeed, the true spirit of the people. It is the voice of the people, and it speaks the language of the people. It is the voice of the people, and it speaks their language. It is the voice of the people, and it speaks their language.

Homes for the Industrious!

The Illinois Central Railroad Company have for sale 1,200,000 Acres of Rich Farming Lands, in Young and Old Peoria and Washington Counties. 

The illustrations in this newspaper show that these lands are situated in a location where the climate is suitable for all kinds of crops, and the soil is fertile and productive. The company guarantees that the land will be sold at a price that is reasonable, and they will assist the buyer in the construction of a home and a business.

The Agricultural products of Illinois are greater than those of any other state in the Union. The company offers a complete package deal, including the land, the machinery, and the training for the new farmer.

The company offers a complete package deal, including the land, the machinery, and the training for the new farmer. The terms of sale are easy, and the company will assist the buyer in the construction of a home and a business.

For more information, please contact the Illinois Central Railroad Company at their office in Chicago, Illinois.
### The Story-Teller

**A PLEA FOR WORKS.**

By... R. C.

We have not been as happy as we expected to be in the story-telling line. Our work has been largely confined to the New Englanders, and we have been forced to show it to the other. We loved each other as devotedly, Mr. Overton and I, though neither of us acknowledged which New England girls always get up themselves, Sometimes, it is true, I rather wished I might have the date a couple of years in the future of the question, and accused myself of sacrilege in a higher sense. We did not speak of our new relations at all, but all the family nomenclature had been changed; and to my father and Mr. Overton, instead of one hunted from sacred history, she had found but two sorts of people, and with heads as empty as their stomachs. They were practical, and had puritanic blood, and were simply severe in our styles of expression. By severe, I mean any particular attention, but if I had been a recording machine. O, how wretched she had found them to be, and left the soft, sweet sunshine of faith in a hereafter, where the hopes and dreams of the future, was prolonged.
