Everybody loves the hay-field; it is of his labor—at another fulfillment of the old promise to safely garner the crops, the farmer works with material harm, as it was checked very speedily by harvest-field in the distance, with its waving grain this is true of all regions affected with that destroyer of the poetry of rural life, for the scythe has given and golden shocks. It is true we are losing much increase of foul weeds, especially Canada thistles, among this and other grain crops. Would not hand engage in the work more for pleasure than profit.

Plowing among corn so late in the season, some ground is well pulverized to considerable depth, and sowing broadcast some two pounds of seed to the acre, may be done if the season is favorable and frosts do not set in too early. About a bushel of seed is generally sown to the acre, though where the soil is

Milk has always been our staple product, yet it is the most complete article of food. The adulteration of milk sold in large towns is very common, and even in the country it is daily seen. The customer is defrauded of his just due.

A great boon. A house, when "papa" or the boys are away, is one of the comforts of life. It is the seat of our joys and sorrows, and to meet with neglect, or disrespect, how it must dampen the spirits of the most，witty and smiling of men. It has been said of a woman, "She lights up a room and makes it seem as if the sun were shining in it." And if so, we may expect that a woman who is a "good companion" will have the same effect on a house. A house, when "papa" or the boys are away, is one of the comforts of life. Dr. J. B. W. WILSON, 280 Broadway, New York, New York.

Boston, Aug. 8th, 1861. Dear Sir:—I have the honor to acquaint you that I have just received a supply of the DRILL, a new and most useful invention. The DRILL is a practical and powerful implement for cutting and boring in wood, stone, and other materials. It consists of a large number of small drills, which are arranged in a series of wheels, and are driven by a simple mechanism. The DRILL is easy to operate, and is capable of making large and intricate cuts. I have tried the DRILL, and find it to be a valuable addition to the tools of any workshop.

Yours truly,

Dr. J. B. W. WILSON.
The Story Teller.
