AGRICULTURAL.

AUGUST PATTAIL SHEEP.

Western Erbicular Notes.

We are now in the midst of the season of Kansas, or otherwise. Here are good boards along the road, and in all directions we see the traces of a busy people. In the fields, we meet with a multiplication of corn, and such another that a farmer in Maine would have been surprised at.

A dressing of ashes after harrowing would, in a short time, make the whole field quite free from weeds. It is assumed, of course, that the soil is not too loose, but the ashes will keep the soil in place, and will also give it a good dressing of manure.

The farmer who can afford to use ashes is fortunate, for it is one of the most complete methods of improving the soil. The most complete and beautiful in appearance. Its conductor devotes his per-

EDITORS AND OWNERS.

Falling Falling Clear Land.

Now, New York. Have a piece of orchard land, twenty acres, for sale at a few dollars, and if you want a farm of your own, take it away. It is very good land, and I have no doubt that it will bring a good price. I have been there myself, and I can testify to the fact that it is a good piece of land.

Thank you for this opportunity to tell you about the land. It is the best land I have ever seen, and I have no doubt that it will bring a good price. It is the best land I have ever seen, and I have no doubt that it will bring a good price.

I have seen no cause for alarm, though many fields are being ploughed, and the soil is being turned over. The Potato in this Section of the Country.

The potato in this section of the country is an excellent little plant, and is quite common on the plaines river, I find a fruit orchard, and have heard it is quite as good as wheat, but this year the grain is not so good.

Rural Notes and Items.

The San Francisco Daily Bulletin, in a recent article, speaks of the great agricultural progress which has been made during the last ten years in the Northern States. It says, "The growth of agriculture in the Northern States has been remarkable. The number of farms has increased greatly, and the produce of the soil has been greatly increased. The farmers have been more enterprising, and have been more successful in their operations. The crops have been more abundant, and the prices of the produce have been more favorable. “Now, tell me,” said John, “do you think that the money he’s got, means as much to him as the money that he’s earned?”

“I think not,” replied Paul. “Money earned by labor is more valued than money that is inherited or given. The former represents hard work and perseverance; the latter is often considered as a trust or a burden.”

John was silent for a moment, then continued, “Does he study?”

“Of course he does,” said Paul. “Although he is only a boy, he reads and learns every day. He wants to be a man someday and contribute to society.”

They walked into the kitchen, where John realized that everything was clean and orderly. “I think I will hire a woman to come to the house and do it; so that she knows every thing already, and treats the kindest with the poorest,” said Paul.

“Is there anything else you want?”

Paul looked at him gravely and said, “No, John. I have asked if all these solemn strains of the past year to go to gladden the hearts of men. Here is one of these smoky treasures whose date has perhaps been the beginning of the fortune of humanity, as in manhood’s morn, long since was laid to rest. It is published in this book-making age, and dealt out as we see their formative power; the work of the heart is to feel the music of our heart replies, while the music of our heart replies, and the music of our heart replies, and the music of our heart replies.”
