THE IOWA STATE FAIR.

In the Cattle department the show of Devons was the most interesting. It was the best-known breed in the United States, and the most numerous in the fair. A few of the best specimens were exhibited, and the buyers were ready to pay a high price for them.

In the Sheep department the show of Border Leicesters was the most interesting. It was the best-known breed in the United States, and the most numerous in the fair. A few of the best specimens were exhibited, and the buyers were ready to pay a high price for them.

In the Swine department the show of Chester Whites was the most interesting. It was the best-known breed in the United States, and the most numerous in the fair. A few of the best specimens were exhibited, and the buyers were ready to pay a high price for them.

The show of horses was not large, but some excellent specimens were exhibited. The buyers were ready to pay a high price for them.

In the Fruit department the show of Apples and Grapes was the most interesting. A few of the best specimens were exhibited, and the buyers were ready to pay a high price for them.

THE PLOWING MATCH.

The committee and exhibitors. Finally, after three days of hard work, the show was closed, and the awards were made. The committee and exhibitors were all satisfied with the result, and considered it a great success.

The fair of the society, except that of last year. It was a great success, and the buyers were ready to pay a high price for the best specimens.

A word with you, brother farmer. The weather was too uncomfortable, most of the work being postponed to the next day, but the weather for the rest of the week was expected to be fine, and the work could be resumed. The crops were in good condition, and the farmers were looking forward to a successful harvest. There was a good section here for buckwheat, basswood, and Clinton, Bock, and other fruits, all in full bloom. Horticultural Notes.

This is the day when the old gardeners commence to look out for early signs of the new season. The seeds are sown, the frames are filled, and the flowers which were in bloom are cut and dried for over-wintering. The birds are building their nests, and the bees are busy gathering honey. The fruits are ripening, and the vegetables are growing. The air is filled with the fragrance of flowers, and the earth is covered with the green of grass and trees. The sun shines brightly, and the sky is clear and blue.

In the garden, the flowers are in full bloom. The colors of the roses are as bright as ever, and the sweet-scented lilies are still in their prime. The bees are busy gathering nectar, and the butterflies are fluttering about the flowers. The bees make their way to the flowers in search of food, and the butterflies flit from flower to flower, feeding on the nectar and collecting pollen.

In the orchard, the fruit trees are bearing their harvest of apples and pears. The apples are firm and ripe, and the pears are sweet and juicy. The fruits are ready for picking, and the trees are loaded with them. The fruit trees are an important part of the garden, and they provide a delicious treat for the family.

In the vegetable garden, the vegetables are growing strong and healthy. The tomatoes are ripe and red, and the cucumbers are long and green. The lettuce is crisp and fresh, and the radishes are bright and crisp. The vegetables are an essential part of the diet, and they provide necessary vitamins and minerals.

In the field, the crops are growing well. The wheat is a golden yellow, and the corn is a deep green. The crops are an important source of food, and they provide income for the farmers.

In the kitchen, the cook is preparing a delicious meal. The vegetables are being sliced and diced, and the fruits are being sliced and peeled. The meal is being cooked on the stove, and the aroma of food fills the air. The meal is a treat for the family, and it provides the necessary nourishment.

REPORT OF THE MEDICAL DEPARTMENT OF THE UNITED STATES.

The Surgeon-General, United States Army, Washington, D.C., September 19, 1863.

To the Surgeon-General of the Army of the United States:

The undersigned, Acting Surgeon-General of the Army of the United States, forwarding herewith a report of the condition of the various hospitals, medical and surgical staffs, and the various medical officers attached thereto, do hereby transmit the same for your perusal and action.

Surgeon-General, United States Army.

The Surgeon-General.

The War Department.

OCT. 19.

RURAL NEW-YORKER.

WILLIAM H. SLOAN, B.A., M.D.

ROCHESTER, N. Y., OCTOBER 19, 1861.

The War Progress.

The United States Government, in the prosecution of its war on the Southern States, has displayed an energy and spirit of purpose which has never before been seen in any great cause for the maintenance of national rights and the preservation of national peace. The Government has not only been able to resist the insurrections of the South, but it has been able to carry on the war with great success. The Union has been victorious in every battle, and the Southern States have been compelled to submit to the authority of the Government.

The Government has been able to carry on the war with great success because it has been able to control the resources of the country. The Government has been able to raise large sums of money, and to purchase a great deal of arms and munitions. The Government has been able to control the transportation of the country, and to secure the proper distribution of the supplies of the army.

"THE CHILD."

BY MARY J. CORYDON.

Let us enter the parlor of some family in the West, and take up the rambling thread of our story. The house is not very large, but it is very comfortable. The walls are covered with wallpaper, and the furniture is very neat and tasteful. The mother is a kind and gentle woman, and the father is a man of good character and many good qualities. The children are all well-behaved and well-educated. The eldest is a boy of twelve, and the youngest is a girl of two. The family live in a village, and the father is a farmer. He is a man of great energy and determination, and he has succeeded in making a good living for his family. The mother is a woman of great patience and kindness, and she has managed to bring up her children in a manner that is almost beyond praise. The children are all very much attached to their parents, and they are always willing to help them in any way they can. They are all very good friends, and they seldom quarrel with each other. They live in a happy home, and they are all very contented and comfortable. The father is a man of great strength and power, and he is very much respected by his neighbors. The mother is a woman of great sweetness and kindness, and she is very much loved by all who know her. The children are all very well-behaved, and they are all very fond of their parents. They live in a happy home, and they are all very contented and comfortable. They are all very good friends, and they seldom quarrel with each other. They live in a happy home, and they are all very contented and comfortable.
