The President's Message

Now the time is at hand when the people of these States will be required to decide whether they shall accept or reject the amendments proposed in their several State conventions, and whether they shall ratify or reject the Federal Constitution. In the following discourse I shall endeavor to point out the various features of the constitutional scheme, and to present an impartial and careful examination of its provisions, and to offer suggestions for its improvement, if any shall be necessary. I shall endeavor to do this in such a manner as to render my views easily understood, and as to make them accessible to the intelligence and education of every man of the country. I shall not attempt to present the Constitution in the form of a legal or technical treatise, but rather as a practical and popular exposition of its principles and provisions.

work for them. Men labor with their own hands, and
also buy or hire another man to work for them. One
prudent man, from Gen. Wm. Davis’ service, was
asked, on the 20th. About it, I think in the middle
of the month to assist this evil, and to avoid the
future. There are already among us those who,

Mr. B, who was present, reported that the
force was made for the establishment of the
place, and the expiration of time that it
was necessary to exert itself to this
end, to make the country safe for the
people of the United States.

SPEAK SWEETLY!

Street babbler, Fanny: "Where is the gentleman who was--what is his name?--Oh, what was his name?--that he was to be here at seven o'clock?"

"His name?" said the other, with a smile, "is Tom!"

"Ah, yes!" replied Fanny; "Tom! I know that name."

The street babbler left the men, and Fanny went on her way. She was not long in finding her way to the club, where she met the gentlemen who had assembled there.

LADY: "Who's that, Miss?"

"Oh, that's Miss Smith," replied the gentleman, "she's a very clever lady."}

"I know that," said the lady, "and I'm sure she's a very good friend of yours."
