Flowers.

Flowers are beginning to appear in abundance. The June lily is in full bloom, and the rose is just beginning to open its petals. The peony and the iris are also in bloom. The garden is a picture of beauty.

Agriculture.

The report shows that the crops of the year have been abundant. The wheat yield has been good, and the corn yield has been excellent. The potatoes have also been abundant. The report also shows that the prices of farm implements and supplies have been reasonable.

TO GROW FIRST CELERY.

For many years I have been a strong advocate of growing celery, and I feel that it is a very good idea to grow it, and to show the world that it is possible to do so. If a person has the proper tools and is well equipped, he can produce celery that is as good as any that can be had in the market. If you want to grow celery, I would recommend that you try it, and see if you can't make it a success. If you want to be successful in growing celery, you must have the proper tools and the proper methods. If you have the proper tools, you can grow celery that is as good as any that can be had in the market. If you have the proper methods, you can grow celery that is as good as any that can be had in the market.
