In the summer of 1860 I obtained a swarm of bees from a neighbor, and having fitted up a new hive for them, they were placed in it and treated kindly. This is an excellent plan, as it enables the bees to carry on their work much more quickly and secure them from all chance of disturbance. The bees were placed in the new hive, and were soon busy and nearly as busy as the bees in the old hive, which had been there for five years. In the spring of 1861, the bees were taken from the new hive and placed in the old one. They were still busy and working hard, and in the fall of that year, they had made a considerable amount of honey. This is a good plan, and one that is often adopted by beekeepers. The bees were then taken from the old hive and placed in the new one. They were still busy and working hard, and in the fall of that year, they had made a considerable amount of honey. BOUGHT IN THE FLOWER GARDEN.

A row of the harmonious pieris now forming the back of the herbaceous border, the flowers being so small that their chief charm is the beauty of the foliage, and that of the evergreen plants coming in for the border. There is a great deal of the usual hardiness here. Every plant has been chosen with a view to the beauty of the plant itself, the garden being made up of the various shades of pink, red, and purple, without the aid of the colors. The plants are all well-kept, and the flowers are in full bloom. The garden is a perfect delight, and the flowers are in full bloom. The garden is a perfect delight, and the flowers are in full bloom.

Petunias, Verbena, and Aconite.

Veronicastrum, sweetly, and the flowers are in full bloom. The garden is a perfect delight, and the flowers are in full bloom. The garden is a perfect delight, and the flowers are in full bloom.

There is no more interesting part of the garden than the herbaceous border, where the flowers are in full bloom. The garden is a perfect delight, and the flowers are in full bloom. The garden is a perfect delight, and the flowers are in full bloom.

Among the plants now in flower in the herbaceous border are the Aconite, which is a hardy plant, and is found in full bloom. The garden is a perfect delight, and the flowers are in full bloom. The garden is a perfect delight, and the flowers are in full bloom.

The New Militia Bill.

The New Militia Bill, which has been the subject of much discussion in Congress, was referred to the Senate Committee on Militia and was reported by them to the Senate on March 29th. The bill provides for the organization of a new militia, to consist of not less than 300,000 men, and to be commanded by the President of the United States. The bill also provides for the appointment of a new Secretary of War, who shall be responsible for the maintenance of the new militia.

The bill provides for the organization of the militia in the several states, and for the appointment of officers to command them. The bill also provides for the payment of bounties to those who enlist in the militia, and for the provision of arms and ammunition for them.

A NEW HALF VOLUME.

The present volume of the Rural New-Yorker is now in press, and will shortly be ready for distribution. It contains a number of interesting articles on agriculture, horticulture, and rural economy, and is well worth the attention of all who are interested in these subjects.

Special Attention is drawn to the following:

- The results of the experiment in the cultivation of strawberries, as reported by Mr. J. C. Seymour.
- The importance of the new method of preparing and preserving fruits, as described by Mr. W. D. Martin.
- The advantages of the new Patent Grain Drill, as illustrated by Mr. J. E. Cadwell.

To all these and many other interesting topics, the Rural New-Yorker devotes a large portion of its pages.

The price of the new volume is $1.00, and it will be sent to any address on receipt of payment.

The Rural New-Yorker is published weekly, and contains a large variety of information on agricultural and rural subjects.

A COMPLETE HISTORY OF THE REBELLION.

The history of the present war, as given by the most reliable authorities, is presented in a series of articles, which form a valuable and complete history of the rebellion.

The following is the table of contents:

1. The causes of the war
2. The outbreak of hostilities
3. The first engagements
4. The progress of the war
5. The concluding stages

The articles are written by a prominent historian, and are well supported by abundant evidence.

THE NATIONAL FRED CUTTERS.

The Patent National Fred Cutters, manufactured by the National Cutlery Co., New York, are now on the market. They are of the highest quality, and are sold at a reasonable price.

The cutters are furnished in different sizes, and are adapted to every kind of work. They are said to be the most durable and efficient cutters ever made.

A complete list of the sizes and prices will be found in the next issue of the Rural New-Yorker.

THE NEW NATIONAL TAX LAW.

The new national tax law, which went into effect on July 1st, is causing considerable excitement among farmers. The law provides for the assessment of real estate, improvements, and personal property, at a rate of 20% of their value.

Many farmers are not sure how to comply with the law, and are consulting lawyers and accountants. Others are predicting a great outcry against the law, and are preparing to resist it.

The Rural New-Yorker will endeavor to keep its readers informed of the progress of the law, and will publish articles on the subject as they become available.

Never or now! roars the hoarse-throated cannon
From the rank swamps where our martyrs are lying,
From the foul dens where our brothers are dying,
Now is the day and the hour of salvation;
But there came a time in BETSEY'S school-days,
Now, while the foremost are fighting and falling,
Through the black canopy blotting the skies;
She was ever meeting there some hero, and, almost
that after she left school her parents had taken her
undertook to get BETSEY'S sympathy, she gave it as
