The extreme rates of 1833 and 1855 were but tem-
perate, and the effects of the storm are very sensa-
tional. The wild horses, which are usually found in
the forests and mountains, have been greatly
reduced in number since the introduction of the plow.
In the northern states, the wild horses have nearly
disappeared, and in the southern states they are
very scarce. The effects of the storm are very sensa-
tional. The wild horses, which are usually found in
the forests and mountains, have been greatly
reduced in number since the introduction of the plow.

Horticultural Notes

IN THE HOUSE GARDEST.

Texas seeds to be incensing here for small flowers. We have a new variety of our old favorite, the fragrant Miss, in a dwarf form. It is the kind that will produce scented blossoms, and is therefore suitable for small hands by the balustrades. The flower is a light purple, while particular in blooming. The plant is hardy, and is well adapted to the average soil. The leaves are much less, and the flowers are larger and more scented. The name, however, is not so much as the old variety.

Among the small blue flowers, the Cornflower is the most handsome. It is a native plant, and is hardy and free bloomer. It is desirable, which, like all we have encountered, is the most useful. It grows from two to three feet in height, with a beautiful globular head. The Sepals are about an inch and a quarter long, and the flower heads are about an inch and a half in diameter. The stem is hard and strong, and the leaves are rather narrow and pointed. The plant is hardy and free bloomer, and is almost as large as the common Cornflower.

The flowers are not sufficiently abundant to suit our purposes, but they will be produced the next season, and plants should be raised now. Ten-Week-Stocks, &c. The flowers are produced in the spring, and the plant is hardy and free bloomer. The roots are propagated by dividing the roots. The plant is hardy and free bloomer, and is almost as large as the common Cornflower.

There is a considerable demand for our flowers, and the plant is hardy and free bloomer. It is desirable, which, like all we have encountered, is the most useful. It grows from two to three feet in height, with a beautiful globular head. The Sepals are about an inch and a quarter long, and the flower heads are about an inch and a half in diameter. The stem is hard and strong, and the leaves are rather narrow and pointed. The plant is hardy and free bloomer, and is almost as large as the common Cornflower.

The report of the Treasurer was then presented and accepted. The President then adjourned the meeting.

President—E. C. R. Rumph, of Boston.

Corresponding Secretary—A. A. W. E. New Haven.

Corresponding Secretary—J. C. Goehring, of Des Moines, Iowa.

Corresponding Secretary—M. M. Merrill, of Napier, Iowa.

Corresponding Secretary—J. W. Cole, of Troy.

The exercises of the occasion were opened by the Rev. E. W. Black, of the Troy University, delivering an address upon his highest proficiency and intellectual development, extending continually outward. He would maintain that the progress of the people, as a nation, was not a fair equivalent for her services. B. Fairfield, President of Hillsdale College, Michigan, was also present, and delivered an address. The exercises were then opened by Prof. Black and James G. Clark, Esq., with his subject, and a close acquaintance with the principles resulting from scientific investigation, and the application of them to educational reform.

The resolution was discussed at some length and finally adopted. The resolution was then referred to the Finance Committee. The Committee on location then reported that with the evening came an address by the Rev. E. W. Black, of the Troy University, and the greatest interest. The evening was then opened by Mr. Cole, who was elected Treasurer, Prof. Black, of the Troy University, Secretary, and James G. Clark, Esq., of Troy, Corresponding Secretary.

The Committee on location, after due deliberation, reported that the city of Troy, New York, was the most convenient and suitable place for the permanent headquarters of the New York State Teachers' Association. The Committee on location then reported that the city of Troy, New York, was the most convenient and suitable place for the permanent headquarters of the New York State Teachers' Association.

The Story-Teller.

A MOMENT OF PASSION.

Two story, or something like it, has been told before, but we wish it to be all our own way. We have a story to tell of Mr. Ellis, and the late Mrs. Pearly.

Mr. Ellis was a man of kind and tender feelings, and the possessor of much wealth. Mr. Edmonds had been so busy enjoying home life. Mr. Ellis was a man of kind and tender feelings, and the possessor of much wealth. Mr. Edmonds had been so busy enjoying home life.
