Agricultural

Discussions at the State Fair

FIRST EVENING — The Grasshopper, Wheat, &c.

Dr. Asa Gray, President, delivered the Address of the Day, in which he spoke of the progress of agricultural science, and the utility of introducing new and improved varieties of crops. He was of opinion that the world has hitherto had of this insect. -

Grains, he said, are delectable to the middle ages, and the great fertility of the United States. The character of the sea-

Dr. Gray then proceeded to speak of the importance of knowing the habits of these insects, and the mode of destroying them. He said that the wingless ones come to maturity in a season, and those which have wings and wander abroad. By

Mr. R. will be pleased to show it to any who call.

A.—

Dr. Fitch replied, yes. Its ravages are greatest if the object is to avoid its ravages. The same

Another gentleman advocated the removal of the rod from as a means of training the people and rights to the law. He thought the law of the road in the way of the enforcement of this law, was a thing that the people would often have to the rod for grading purposes, that had been made to suit the condition of life of the people who have fences.

He could not agree with Mr. Fitch that the action of the State was recomposed in the State tax. But as we State tax.

The cost of all the $144,000,000,000. But as we fences are used on both sides, there- $8 sunk capital to each acre. The cost of all the exceed ten acres each. One hundred acres, fenced $1.12 per acre—or the aggregate cost to the farmers $40 per acre, the annual interest upon which is to the mile at $1 per rod, $640. Capital required But his report, though the present law defective in one respect—in that it does not provision for the interest on repairs incurred per mile, $640. The good results were already seen in very many farmers who asserted their intention to economize in fence making and keeping up fences will be turned into highways.

At the 1ST. Y. State Fair, Rochester, Oct., 1862. EDWIN REYNOLDS.
A NEW Reasonable Prize.—High Street New-York.—I wish to sell the
following list of pears at a new and most advantageous price, as the
season is rapidly approaching, and the demand for pears of every
description is very great. All are of the finest quality, and in
perfect condition, and can be had by contractors, by the box,
without the least delay. The purchase of a few boxes at a time
will be to the advantage of the purchaser. I have also a large
quantity of Bartlett pears, all freshly picked, and in the best
condition, which can be had for a very moderate price. I will
also give a liberal discount to the per box at a time. I will
also give a liberal discount to the box, and will be glad to
sell any quantity on approval.

DEALING GRAPES.—High Street New-York.—I have
a large stock of the finest quality of grapes, all made
of the best varieties, and in the best condition, which
I will sell at a wholesale price, and will be glad to
sell any quantity on approval.

SUGAR AND FLAX.—Flax is ready for market, and will
be sold at a very moderate price. The supply is
sufficient to meet the demand, and I will be glad
to sell any quantity on approval.

Horticultural. The season has been one of the most productive
years in the history of horticulture. The climate has been mild
and favorable, and the crops have been abundant. The
vegetables and fruits have been of the finest quality, and
the demand for them has been very great. The prices
have been high, and the profits have been large.

Nature's Noblemen.—Mr. R., we learn, died of disease
of the heart, and was buried in the churchyard of his
native village. His death was a great loss to the
community, as he was a kind and generous man,
and a worthy citizen. He will be long remembered
for his benevolence and charity.

Initiatives.—The figures. A wooden label well painted, and
written, will last a considerable time. A wooden label,
if properly painted, will stick to the fruit, and will last
a considerable time. A wooden label, if properly
painted, will stick to the fruit, and will last a
considerable time.

in good hands. I desire, however, to send, through which has been going on between MINNIE and HARRY—

It is a daubing of rouge, a smoothness and nonchalance, a genuine woman and a feminine doll both.

Ah! God of the night, my darling,
We feel and know that we can go
We have had our May, my darling,

But taking the year all round, my dear,

We are old folks now, my darling,
And don't be sorrowful, pray;

Jason may sleep his years away,
The pulse of a hero's heart is stirred;
Many a wise sage has said,

And our Father will hear thee when sorrow enshrouds •
'Mid the warring of elements awful and loud;
And thou must not fear, my child;

'Twas a little child, whose eyes, as he gazed, beheld
The thoughtless world in its infancy,
When it beheld in wonder and delight,

For Freedom's sword is the blade they wield,
Wherever a noble deed is done,

Jason may sleep his years away,
The pulse of a hero's heart is stirred;
Many a wise sage has said,

And our Father will hear thee when sorrow enshrouds •
'Mid the warring of elements awful and loud;
And thou must not fear, my child;

'Twas a little child, whose eyes, as he gazed, beheld
The thoughtless world in its infancy,
When it beheld in wonder and delight,

For Freedom's sword is the blade they wield,
Wherever a noble deed is done,

Jason may sleep his years away,
The pulse of a hero's heart is stirred;
Many a wise sage has said,

And our Father will hear thee when sorrow enshrouds •
'Mid the warring of elements awful and loud;
And thou must not fear, my child;

'Twas a little child, whose eyes, as he gazed, beheld
The thoughtless world in its infancy,
When it beheld in wonder and delight,

For Freedom's sword is the blade they wield,
Wherever a noble deed is done,

Jason may sleep his years away,
The pulse of a hero's heart is stirred;

The Educator.

LANGUAGE AS A BASIS OF CLASSIFICATION.

Trans is the subject of an important article in the (Christian Science, which will widely circulate principles, as well as its alone, the trans.)

It bears to me a great deal of interest, for I consider it a branch of education, for which the method of classification is especially well adapted. The article is written in a clear and logical manner, and contains many valuable ideas which I think should be kept in mind by all those who are engaged in the work of education.

The article begins with a statement of the fact that trans are not only a basis for classification, but also a means of expression. Trans are the language of science, and are used in the attempt to express the essential nature of things. They are, therefore, the basis for the classification of all knowledge, and their use should be encouraged in all educational institutions.

The author then discusses the different types of trans, and the principles on which they are based. He shows how trans are used to express the fundamental ideas of science, and how they can be employed to bring together different branches of knowledge.

The article also contains a discussion of the importance of trans in the work of education. The author emphasizes the need for trans to be taught in schools, and shows how they can be used to help students understand the essential nature of things.

In conclusion, the author stresses the importance of trans in the work of education, and urges all educators to make use of them in their work. He concludes by saying that trans are a valuable tool for the expression of ideas, and that they should be encouraged in all educational institutions.
