Agricultural

Improvements in Farming—No. 31.

In our last on this subject, without designing to disparage the good work of the Western Emigrant Association, it was pointed out that the system of farming there pursued was that of the US, which is more agriculturally and financially productive, although more laborious, than the system of planting and toil which is followed in most parts of the United States. We must, therefore, enter upon the subject of farming in general, and upon the system which is followed in the Western Emigrant Association, and especially in the Western Reserve.

The system of farming which is followed in the Western Emigrant Association is one of the most productive of all systems of farming. It is based upon the principles of the science of agriculture, and is designed to produce the greatest amount of wealth with the least amount of labor. It is characterized by the following features:

1. The selection of the best lands for cultivation, and the avoidance of poor soils.
2. The application of the best methods of husbandry, and the avoidance of wasteful practices.
3. The adoption of the best crops, and the avoidance of those which are not adapted to the soil.
4. The cultivation of the land in the most economical manner, and the avoidance of waste.
5. The adoption of the best methods of drainage, and the avoidance of waterlogged lands.
7. The adoption of the best methods of manuring, and the avoidance of waste.
8. The adoption of the best methods of rotation, and the avoidance of monoculture.
10. The adoption of the best methods of animal husbandry, and the avoidance of waste.

The following description of the naval expedi- tion from the Mississippi, which arrived at the Missouri River, on the 7th of this month, is published by the Hon. Joseph Holt, who procured them from a gentleman who was present at the landing. The expedition consisted of a small flotilla of steamers, comprising a number of schooners, sloops, and schooners, and was under the command of Commodore Schurz. The expedition was destined to explore the interior of the Missouri River, and was accompanied by a military force, consisting of a number of troops, under the command of General Schoepff. The expedition was, however, not successful, and ended in a complete failure.

The expedition was under the command of Commodore Schurz, who was accompanied by a military force, consisting of a number of troops, under the command of General Schoepff. The expedition was, however, not successful, and ended in a complete failure.

The Starg-Teller.

(From the New York Tin Teller.)

AN ORPHAN'S STORY.

During the war I was only four years old, and then there was a tremendous loss in my house, and then all the houses we knew. My father was in the regular army, and my mother in the United States. After the war, my father returned with his wife and children. Before returning, he wrote a letter to our mother, telling her about the war and his return. When she received the letter, she was very happy and very proud of her husband. She was also very proud of her children, and she always thought of them as the bravest and the most courageous of all. She was also very proud of her husband's army service, and she always liked to talk about it.

It was on the day following our return from the war that my father and mother went to visit some relatives in the country. While they were gone, I was left with a relative who was a very good friend of my mother. This relative was very kind to me, and she always took care of me. She was also very good at telling stories, and she always made sure that I had plenty of stories to listen to. She was also very good at making me feel special, and she always made sure that I had plenty of attention.

When my father and mother returned from the war, they were very happy to see me. They had missed me very much, and they were very glad to see me. They were also very proud of me, and they always talked about me with pride. They were also very proud of my relative, and they always talked about her with pride. They were also very proud of their army service, and they always talked about it with pride.

The next day, my father and mother took me to visit some relatives in the country. While they were gone, I was left with a relative who was a very good friend of my mother. This relative was very kind to me, and she always took care of me. She was also very good at telling stories, and she always made sure that I had plenty of stories to listen to. She was also very good at making me feel special, and she always made sure that I had plenty of attention.
