HOW TO BUILD AN ICE-HOUSE.
The Rural New Yorker—Tending an Ice-House is a business if properly managed, that yields a profit to the owner, and is well paid for the time and labor required. The ice-house should be built in the fall, when the ground can be dug with the least exertion and at the greatest economy. It should be placed near a spring of cold water, and should be as large as the family requires. The walls of the ice-house should be made of boards, and the roof should be covered with straw or hay. The ice should be chopped into small pieces and placed in the ice-house as soon as it is cut. The ice-house should be kept well covered at all times, and should be kept well supplied with ice. The ice should be cut from a spring of cold water, and should be as large as the family requires. Rural Notes and Items.

An exchange says a French Chemist has lately invented a process for making powerful colors by the aid of a gas composed of two gases; one of them being a gas which burns with a blue flame, and the other a gas which burns with a red flame. The colors thus made are said to be of a peculiar kind, and to be capable of being used in any manner. The process is said to be very simple, and to be capable of being carried out in a few minutes. RURAL NEWS.

Many people only think of ice being made in the summer months, when the weather is hot. It is, however, the custom of the farmers to make ice all the year round. The ice is cut from the frozen lakes and rivers, and is stored in the ice-house. The ice is then used for cooling the milk, and for other purposes.

AN EXCHANGE SAYS.

An exchange says that a new machine has been invented for the purpose of cutting ice. The machine is a great improvement on the old method, and is said to be much more efficient. The machine is said to be a great improvement on the old method, and is said to be much more efficient. The apple crop in Western New York has been of the greatest interest and full of encouragement to the young men engaged in the development of new orchards in the State. The number of apples also has increased as the result of the improved methods of cultivation and the greater attention which is being given to this industry. The apple crop has been a great success, and the prospect for the future looks promising.

WILL and I were so busy playing that I sat down, and thought of a mince pie, with nuts and apples in unlimited quantities. Thanksgiving is close at hand! To them it suggests a most delightful dish, a perfect lesson, but we never in the coming years, is the mouth of baby Bunn! Is more beautiful and sweet than the wee pink hands and feet of Bunn. The dimpled feet of Bunn! And fearlessly entered the phantom bark; where all the ransomed angels be, before my eyes. The same blest breeze that fans my cheek, the same end of his life. The tomb robber turned a back to the world! It is not my purpose to tell you of all those things that are collectively remembered as Thanksgiving. It is addressed to an "English" sportsman. Over the river the boatman pale, and over the river, the mystic river, Bunn. Is the mouth of baby Bunn! In their silken stockings dressed; Oh, the dimpled feet of Bunn! Hid like rose leaves in your breast I. In their silken stockings dressed; Oh, the dimpled feet of Bunn! Hid like rose leaves in your breast I.
On the Independency of our own continent, the President directs that the act of Congress for that purpose, be confirmed and enforced.

On the subject of the navigation of the Mississippi, the President recommends the following measures:

1. The establishment of a canal between the Great Lakes and the Mississippi.
2. The enlargement of the Mississippi River for the accommodation of vessels of greater tonnage.
3. The improvement of the port facilities at key points along the Mississippi.

The President further recommends that the government continue to support the following measures:

1. The construction of the Panama Canal.
2. The development of the Great Lakes system for navigation.
3. The improvement of transportation infrastructure across the continent.

On the subject of the military and naval operations required for the protection of the country, the President directs that:

1. Fortification of key strategic points.
2. The establishment of a rapid communications network.
3. The reinforcement of the frontier defenses.

The President concludes by expressing his deep concern for the welfare of the people and his hope for a peaceful and prosperous future for the nation.
The day before a small meeting of the House of Representatives, President Lincoln received a dispatch from Major General D. H. Baker, commanding an army of the State of New York, stating that he had been informed by a reliable source that the rebels were preparing to march on Washington. The President directed that immediate steps be taken to reinforce the garrison of the city.

The President had already ordered the mobilization of troops and the summoning of Congress to meet in special session. He had also authorized the issuance of $150,000,000 in paper money to finance the war effort.

In his message to Congress, the President stated that the nation was at war and that the Union must be preserved. He called on the people to rally to the cause of freedom and to support the government in its efforts to maintain the Union.

The news from the battlefield was grim. The Union army had suffered heavy losses in the recent battle at Antietam. The President urged Congress to pass the draft act and to increase the enlistment of volunteers.

The President had also ordered the construction of a new railroad from Washington to the Chesapeake Bay. The project was expected to be completed in six months.

In his message, the President thanked the people for their support and pledged to continue the war until victory was assured.

The day ended with a meeting at the White House, where the President and his family were joined by friends and supporters. The President spoke of the need for unity and determination in the face of the challenges that lay ahead.
THE CUMBERLAND.

This famous line by Tom Paine expresses the spirit of patriotism that fueled the Revolutionary War. The phrase "Tis the Dawn of Liberty" captured the hope and promise of a new nation emerging from the struggle for independence.

THE ORPHAN NIECE.

Through a series of letters, the author explores the theme of family and the importance of family bonds, especially in times of adversity. The narrative follows the life of an orphan girl, Little Harry, and her journey from orphanhood to finding a new family.

A useful, scientific, & literary weekly, for the Young.

The subtitle indicates that the publication aims to provide educational and informative content suitable for a young audience, covering a range of topics from astronomy to local history.

Astronomical.

This section delves into the mysteries of the universe, discussing recent developments in astronomy and the significance of celestial phenomena. It reflects the scientific interest of the time and the quest for knowledge about the cosmos.

Rural New Yorker.

The title suggests that this publication is dedicated to the rural communities and their way of life, offering insights into agricultural practices, local culture, and the lifestyle of people in the countryside.

Wit and Wisdom.

The section likely contains humorous or clever observations, possibly in the form of jokes or satirical comments, intended to entertain and provide a lighthearted moment amidst the more serious content of the publication.

AGRICULTURAL, LITERARY AND FAMILY WEEKLY.

The title indicates that the publication covers a broad range of topics, including agriculture, literature, and family matters, suggesting a comprehensive approach to providing valuable information for its readers.

MISCELLANEOUS ENIGMA.

A series of puzzles and riddles, this section challenges the readers' minds with a variety of enigmas, offering both entertainment and intellectual stimulation.

ALGEBRAICAL PROBLEM.

This section likely contains mathematical problems or puzzles designed to test the readers' mathematical skills and logical reasoning.

A personal message or a dedication, possibly from the author or a contributor, expressing gratitude or honoring someone.

My 12, 11, 10, 9, 12 is a girl's name.

A list or catalog, which might be a file of names or a record of a collection, possibly related to the publication or its audience.

LISA!

A personal note or a playful message, possibly from a friend or a colleague, expressing urgency or conveying a sense of importance.

ATTENTION, ATTENTION.

A call to action or an announcement, possibly related to a public event or a new initiative, encouraging the readers to pay attention or take notice.

A poem or a literary piece, this section reflects the literary interests of the time, offering readers a chance to engage with creative writing.

Eagle, N. Y., 1862. Frances E. Wilcox.

A personal note or a dedication, possibly from the author or a contributor, expressing gratitude or honoring someone.

Mistakes are my home, where I have lived a long time. My 74, 61, 33, 85, 38, 79, 88 is a city in Canada.

A list or catalog, which might be a file of names or a record of a collection, possibly related to the publication or its audience.
