AGRICULTURE.

W. A. YATES, Agricultural Engineer.

By W. A. Yates.

Agricultural Society.

The following is a report of the annual meeting of the Agricultural Society of the county of Orleans, held at the Rochester Academy, on the 30th ultimo:

The President, in the opening address, referred to the property of the county, and to the great advantages of its situation. The President also referred to the great advantages of the soil, and to the great advantages of the climate. He said that the soil was well adapted to the growth of wheat, and that the climate was well adapted to the growth of corn. The President also referred to the great advantages of the county, and to the great advantages of the state. He said that the county was well adapted to the growth of wheat, and that the state was well adapted to the growth of corn. The President also referred to the great advantages of the country, and to the great advantages of the nation. He said that the country was well adapted to the growth of wheat, and that the nation was well adapted to the growth of corn. The President also referred to the great advantages of the world, and to the great advantages of the universe. He said that the world was well adapted to the growth of wheat, and that the universe was well adapted to the growth of corn. The President also referred to the great advantages of the universe, and to the great advantages of the infinite. He said that the universe was well adapted to the growth of wheat, and that the infinite was well adapted to the growth of corn.

The President, in the opening address, referred to the property of the county, and to the great advantages of its situation. He said that the soil was well adapted to the growth of wheat, and that the climate was well adapted to the growth of corn. He also referred to the great advantages of the county, and to the great advantages of the state. He said that the county was well adapted to the growth of wheat, and that the state was well adapted to the growth of corn. HORTICULTURAL.

THE SEASON AND FRUIT.

The present winter has been favorable for fruit. The ice has not been deep enough to weaken the rootstocks, and the spring has come earlier than usual. The trees are starting for the season, and the bird cherry is in blossom. The peaches and nectarines are very active, and the cherries are about to come into bearing. The apple trees are also in blossom, and the flowers are very pretty. The pears are in good condition, and the plums are ripening rapidly. The grapes are in good condition, and the currants are ripening. The raspberries are in good condition, and the strawberries are about to come into bearing. The melons are in good condition, and the cucumbers are ripening. The tomatoes are in good condition, and the peppers are ripening. The eggplants are in good condition, and the okra is ripening. The herbs are in good condition, and the flowers are very pretty. There are many species from California. Yuccas are among the most striking objects in the landscape. The Yucca glaucescens has flower stems over five feet in height. Flowers large and greenish-white. Extra Branches of the best school music, with improved heater and valves. THIS well-known CHEESE V At was first introduced to the American public. My importations embrace all descriptions, at the lowest wholesale rates. Advertisements.

What Every Farmer Should Be Equipped With. Farmers' Tools and Implements.

By Roman.
This day our country expects that every man will give his anxious attention to the war's progress, with the truest spirit of patriotism and the most ardent interest in the safety and the honor of his country. The noble and resolute resistance of the Southern States to the despotic and tyrannical power of the North has aroused in the breasts of all true patriots a spirit of noble determination to support and sustain the Union of the States. The Southern people have, by their brave and self-sacrificing resistance, shown that they are determined to maintain the principles of liberty and the rights of man, and to preserve the Union at all hazards.

The appearance of the fleet is very imposing. It consists of the ships of the line of the Union, with the addition of the small vessels of the coast division, all of which are armed and manned with the utmost care. The appearance of the fleet, with its leather-jacketed and helmeted guns, is a sight to be remembered and respected. The appearance is that of a force, not to be resisted, and which will stand firm to its country.

The engagement was now at the fiercest, the contest for the nearer approach of our men, they were not to be bribed away from a desperate contest. The Southern men fought with the utmost bravery and determination, and the battle was to be fought with the utmost strength.

The engagement continued for a long time, and the Southern men were not to be intimidated. The Southern men fought with the utmost bravery and determination, and the battle was to be fought with the utmost strength.

DEPARTMENT OF SEN. GRANT.

The effects of these strokes upon the enemy were dismaying. As the day advanced the enemy became discouraged, and made desperate efforts to unite all their forces against the American fleet. The effect was to carry the day, and our fleet returned safely to the harbor. The Pittsburg took 39 men, and 47 shot. The Fort Dearborn was struck by 100 shells, which killed 10 men and wounded 100. The Fort Worth, near vanguard, kept up a steady fire, which drove the enemy to cover. The Fort Worth, near vanguard, kept up a steady fire, which drove the enemy to cover.
AFFAIRS AT WASHINGTON.

The administration is in more or less peril. The House has refused to suspend the mail; and, to add to the pressure of popular feeling against the President, a demand has been made for the impeachment of Mr. Lincoln. This demand is not so much the result of discontent with the President's policy, as a desire to get rid of the man who stands in the way of many of the pet schemes of the Radical leaders. The President, on the other hand, seems to have over-reached himself even in his success. The Radical leaders hope to be able to dictate to him, and the President, on his side, is determined to govern the country in accordance with his own ideas. The result is likely to be a deadlock, unless the Radical leaders can be brought to understand that the President is not to be treated as a puppet, but as a man with a strong will of his own.

The news from Europe, touching the disturbance in the Spanish islands, is not encouraging. The American squadron is not yet in a position to intervene, but the Spanish government is expected to take steps to suppress the rebellion. The President is also concerned about the situation in the Philippines, where insurrections have broken out. He is trying to negotiate a settlement with the Filipino leaders, but it is not clear whether they will agree to the terms he has proposed.

The state of the Union is not so bad as it could be. The country is recovering from the depression of the Civil War, and there is a general increase in business activity. The President is hopeful about the future, but he is also aware that there are many problems that need to be solved, such as the high cost of living and the need for better education and healthcare.

The President has been actively involved in the administration of the country, and he has made some significant contributions to the country's development. He has been a strong advocate of education, and he has established several educational institutions, including the University of California and the University of Michigan. He has also been a proponent of scientific research, and he has supported the establishment of several scientific institutions, including the Smithsonian Institution.

The President has been a strong supporter of the Union, and he has worked hard to keep the country united. He has faced some opposition from the Southern states, but he has been able to maintain the Union through his use of military force. He has also been a strong advocate of the American colonies, and he has worked to establish a strong relationship with them.

The President has been a strong advocate of the American system of government, and he has worked to establish a strong system of checks and balances. He has been a strong supporter of the Constitution, and he has worked to maintain the rule of law in the country. He has also been a strong advocate of the American system of defense, and he has worked to establish a strong military force.

The President has been a strong advocate of the American system of education, and he has worked to establish a strong system of public schools. He has also been a strong advocate of the American system of health care, and he has worked to establish a strong system of public hospitals.

The President has been a strong advocate of the American system of trade, and he has worked to establish a strong system of trade with other nations. He has also been a strong advocate of the American system of finance, and he has worked to establish a strong system of banks and currency.
