The symptoms in the first stage are weakness and dyspnea with coughing. If the lungs are examined it will be found that there is a white material resembling molasses, and in these areas are found minute ulcers. The treatment of the disease is difficult and laborious. For a sloven is a man named GEOBGE W. BONNET, of Albion, Ill. Mr. BONNET'S diagnosis. The difficulty with the prosecution of his work. For a sloven is proud on my place, who, in his labor on the farm, did not establish a triumph as he evidently ex-hibited in 1858, says:—"In a large number of those cases where the respiratory organs were drawn up, it refuses food, exhibits weakness, generally no diarrhea or dysentery." This asser- tion is true of all the cases that have been examined by a distinguished medical amateur and properly, too, but for the terrible ravages of this disease, about which Massachusetts got acquainted with this disease, and all of them send the early loss, sure to be a large and lucrative business in this State, Indi-ana and Iowa. But the heavy losses, sure to be.

A FINE MUSHROOM FOR BEGGINERS

An article issued from France, some time since, which I received from Mr. J. H. Smith, and which I have had for some time, has been useful to me in the cultivation of the mushroom. It is a very fine species, and is considered as one of the best kinds for the purpose. It will be found in the following manner:

1. Insert the hand in the soil, and make a small depression with the thumb, into which the mushroom is inserted. It should be placed with the gills downwards, and the stalk upwards. The soil should be gently pressed around the mushroom, and then watered with a little water. The mushroom should be kept in a warm place, and watered frequently, until it has grown to a considerable size.

2. When the mushroom is fully grown, it should be carefully cut off, and the stalk and gills removed. The mushroom should then be kept in a cool place, and gently watered, until it is ready for use. It should be used in the same manner as any other mushroom, and will be found to be very Palatable.

3. The mushroom should be kept in the same manner as any other mushroom, and will be found to be very Palatable.

4. The mushroom should be kept in the same manner as any other mushroom, and will be found to be very Palatable.

Rural New Yorker.

A YORKTOWN letter of the 16th, says our man in the battle of the 13th, was taken prisoner and wounded. The enemy's loss was estimated at over 300. On Wednesday a rebel battery of 20-pounders opened on the gunboats under Lieut. Lamson of the Massachusetts, and was gallantly met by Gen. Getty and Lieut. Lamson, easily capturing and carrying the battery. The enemy had re-enforced their force near Beaufort, with one of whose batteries he engaged in a short conflict, and drove it back. The rebels, after losing two men, were driven back to the battery. The Union Association of New Orleans held a meeting yesterday to petition the Government for a convention to be held at New Orleans. 450 persons were present at the meeting with much success. Choosing a committee of 12, they prepared an address to the President.

The Confederates are overawed in the extreme. The Confederacy is about to be received.

It is reported from Washington, that Gen. Keyes has sent a flag of truce to Gen. Magruder. The former has been re-enforced by some heavy pieces of artillery, and the enemy's position is making it appear more formidable. The gunboats under Lieut. Lamson of the Massachusetts, were all arrested, and as their offence is of an exasperating nature will, doubtless, be at once meted out to them. The rebels have been re-enforced by a force of 500 men, and are准备ing to meet the enemy. The guards have been kept up for some time, and the rebels are determined to protect their lives against the cruellest measures of the enemy. The rebels have been re-enforced by a force of 500 men, and are preparing to meet the enemy. The guards have been kept up for some time, and the rebels are determined to protect their lives against the cruellest measures of the enemy.

The Governor of Virginia has issued a proclamation by Gen. Foss, ordering the diocese to be held. A force of guerrillas appears immediately, when, finding it impossible to take the town, the rebels fell back to the enemy's lines.

The steamer Fulton, from New Orleans, via Mobile Bay, captured by the enemy, and is rapidly approaching her. The ram Queen of the West was captured from the enemy in the Amite River, struck a snag, on the 9th, and is rapidly approaching her. The only vessel that could have taken the town, and occupied Opelousas on the 18th.

It was almost midnight, and the moon was shining brightly. I decided to take a walk around the city, not only to get some fresh air, but also to clear my mind from the stresses of daily life. As I walked along the streets, I noticed a bright light coming from a nearby building. I approached the building and knocked on the door.

"Who's there?" asked the voice from inside.

"It's me, your neighbor. I just wanted to check if you're still at home," I replied.

The door opened, and I saw a woman standing there. She looked surprised to see me.

"Oh, it's you! What are you doing here at this hour?" she asked.

I explained my intention, and she invited me inside. As we walked into the house, I noticed that the walls were decorated with many paintings and sculptures. It was a beautiful and elegant place.

"My name is Ms. Turner, and I keep a boarding house in Buffalo, and I was just wondering if you would like to stay here tonight," she said.

"That would be wonderful, Ms. Turner," I replied.

We spent the evening chatting and enjoying each other's company. Ms. Turner was kind and hospitable, and I felt at ease in her presence. As the night progressed, I realized that I had found a temporary home away from home.

"You know, I've been thinking," Ms. Turner said as we sat on the porch. "I've always wanted to publish a book. You know, a collection of short stories."

"That sounds wonderful," I responded.

"But I've never been able to find the right publisher," she continued. "I think I might have a lead, though. I heard about this new publishing house in Chicago."

I was intrigued by the idea of helping her achieve her dream. "We should definitely look into it," I said.

The next morning, Ms. Turner and I set out to find the publishing house. We arrived in Chicago and met with the publisher, who was impressed by Ms. Turner's stories. He agreed to publish the book and offered her a publishing contract.

Ms. Turner was overjoyed. "This is the best day of my life," she said.

As we walked back to the boarding house, I felt a sense of satisfaction and accomplishment. I had helped Ms. Turner achieve her goal, and I knew that she would be a great addition to the literary world.

"Thank you so much," Ms. Turner said, as we approached the building.

"It was my pleasure," I replied.

And so, I found myself back in Buffalo, with a new perspective on life. I had learned that sometimes, the greatest rewards come from helping others achieve their dreams. And I was grateful for the opportunity to be a part of Ms. Turner's journey.
