in Value, Purity and Variety of Contents, and unique CHAS. D. BEAGDON, Western Corresponding Editor.

The following is a weekly article from "The Chicago Tribune" discussing the agricultural practices in the Champaign area. It covers topics such as farming, livestock, and the benefits of certain crops and animals. The article also includes a summary of a conversation with Mr. Sullivan, discussing the advantages and disadvantages of different farming practices.

**Agricultural Western Editorial Notes.**

**The Cashmere Goat at the North.**

Mr. Sullivan—Mr. Sullivan—He always kept the idea of raising Cashmere goats in mind. He had heard that the Cashmere goat was a valuable breed, producing fine, soft wool that was highly sought after. He had visited the farms in the Champaign area and seen the Cashmere goats being raised.

Mr. Sullivan—He told me that the Cashmere goats were a good investment. They were hardy, disease-resistant, and produced a large amount of high-quality wool. He said that he had tried raising them on his farm and had been very pleased with the results.

Mr. Sullivan—He also mentioned that the Cashmere goats were good for grazing. They could graze on the wild grasses and weeds, which were abundant in the Champaign area, and were also useful for controlling weeds.

Mr. Sullivan—He said that the Cashmere goats were also good for the soil. They helped to improve the soil by breaking up the ground, which was necessary for the growth of crops. He had also noticed that the Cashmere goats were good for the health of the soil, as they helped to break down the manure and other organic matter.

Mr. Sullivan—He concluded by saying that the Cashmere goats were a good investment, both in terms of wool production and soil improvement.

**Success in Cashmere Goats.**

Mr. Sullivan—He said that he had been successful in raising Cashmere goats. He had started with a small flock and had increased it over the years. He had found that the Cashmere goats were easy to raise and that they did well in the Champaign area.

Mr. Sullivan—He also mentioned that the Cashmere goats were good for the local economy. They helped to provide jobs for the local people, who were employed in the processing and selling of the wool.

Mr. Sullivan—He said that he had been able to sell the wool at a good price, which had helped to improve the local economy. He had been able to sell the wool at a price that was higher than the national average, which indicated that the Cashmere goats were in high demand.

Mr. Sullivan—He concluded by saying that he was satisfied with his decision to raise Cashmere goats and that he would continue to do so as long as it was profitable.

The Battle of Gettysburg

Gettysburg was a pivotal battle of the American Civil War. The battle took place in July 1863. The Union Army under General George Meade sustained heavy losses but held the line against the Confederate Army led by General Robert E. Lee. The outcome of Gettysburg was a turning point in the war, leading to the eventual Union victory.

MOVEMENTS IN THE WEST AND SOUTH—WEST.

By Gen. M. R. COBB,

...As the enemy were not brought up, the attack was not so successful, and the artillery of both sides was brought into action. Gen. Prentiss is confident he will be able to hold the position a mile from the town, commanded all the artillery from rebel pieces six or eight miles below Donelson, and had them under constant observation, with a greater number of our guns than were at the disposal of the enemy. The rebels were the participants on the rebel side, and Kilpatrick's cavalry, as well as our cavalry under Col. Benjamin, was in a similar position. It is thought the rebel depredations near Lake Erie have been more severe than those of the past, with quite damaging results to the rebels. The railroad between Madison and Indianapolis, at 6 o'clock this morning, was opened for traffic, and 200 men and 300 women and children were safely removed. At the time specified, Gen. Steele's division entered Madison, and the prisoners were all to be paroled and exchanged. All subject to exchange. It is thought the railroad between Madison and Indianapolis has been extensively burned, and several people are said to have been killed. General Wadsworth has been promoted to the rank of Major-General, and I...
