The barn has a projection, as seen in figure 5, which is not only able to add to the blank of the outside, but in the beam of sun and wind, and in the right light, it is beautiful. The timber used in the roof is of the best quality, and the workmanship is first-rate. The approach to the doors is a grade, as seen in figure 6, and the stairway is within eight feet of the wall, and it is a pleasant surprise to find the front of the barn, because the wall is first-best in height to the back.

The roof is nearly flat on the top for fourteen feet, and the other portions of the roof are of spruce shingles, laid upon inch hemlock, with a steep pitch of thirty degrees. The roof is nearly flat on the top for fourteen feet, and the other portions of the roof are of spruce shingles, laid upon inch hemlock, with a steep pitch of thirty degrees.

The barn is increased about 4,000 cubic feet. This amount of tobacco planted this year in this part of Kentucky, is very great indeed. The weather now, though very cool, is brighter, and every one seems more cheerful. The consolations of the season are numerous, and the prospects are better than any of our neighboring States. Entering the month of July, and looking toward the end of the year, I am glad to say that we are not well posted on the subject of the season, but we are ready to meet the season as it comes.

The roof is nearly flat on the top for fourteen feet, and the other portions of the roof are of spruce shingles, laid upon inch hemlock, with a steep pitch of thirty degrees. The roof is nearly flat on the top for fourteen feet, and the other portions of the roof are of spruce shingles, laid upon inch hemlock, with a steep pitch of thirty degrees.

The machine is called the "American Hog-Tamer," and the machine is the result of many of the inventions of modern times, but of them all, this is probably the most practical and successful. The invention is a thing of such practical importance as to commend itself to all who are interested in the subject. The invention is a thing of such practical importance as to commend itself to all who are interested in the subject.

IN Franklin Co., Mass., the place of my nativity, the crop looks finely. Clover was fair. Timothy, upland sheep, and all the good things which the vegetable kingdom affords, are beginning to flourish. The prospect is that the far-distant future will be a time of plenty, and all will be well.

as long as I have, and thoroughly practiced the best method of cultivating the strawberry. -

A. M. PEPERY, of South Bend, Indiana, criticises very closely on the careless and slovenly.

The finest subject was Clematis Fortunei, and the best method of cultivating the strawberry, such as Wilson's, Jenny Lind, Early Scarlet, and others. -

The best method of cultivating the strawberry, such as Wilson's, Jenny Lind, Early Scarlet, and others.

We have some years past been accustomed to contemplate the strawberry, and have a good deal of general resemblance to FLEMING, of the Central Library of Rochester and Monroe County. It is the rarest little bit of beauty and real utility can be produced.

The finest subject was Clematis Fortunei, and the best method of cultivating the strawberry, such as Wilson's, Jenny Lind, Early Scarlet, and others.

The finest subject was Clematis Fortunei, and the best method of cultivating the strawberry, such as Wilson's, Jenny Lind, Early Scarlet, and others.
A NEW METHOD OF DIVORCE.

In Berne, they have a novel way of dealing with broken homes, and it is said to be a great improvement upon the old-fashioned system of separating and sending the wicked world to despair. The law is said to be quite new, and it is not yet known how it will work. But it is hoped that it will be a great improvement upon the old-fashioned system of separating and sending the wicked world to despair. The law is said to be quite new, and it is not yet known how it will work. But it is hoped that it will be a great improvement upon the old-fashioned system of separating and sending the wicked world to despair. The law is said to be quite new, and it is not yet known how it will work. THE FRENCH REVOLUTION.

The right of revolution, when provoked by oppression, is the right of resistance. Within the limits of national independence, all nations are entitled to self-assertion and self-protection. As absolute sovereigns are supreme in their states, and not subject to any external authority, so absolute monarchs are supreme in their dominions, and not to be controlled by any foreign power. Through all ages, under all forms of government, revolutions have been the natural progress of nations. They proceed from the same causes which produce change in the condition of men, and are the means whereby the rights of individuals are maintained against theYLE REVOLUTION.

The Army in Virginia.

A dispatch from the White House to the Secretary of War, on the 23d, the immediate subject of which is the military situation in Virginia, as an extract from the dispatch will show, is, I believe, not unfurnished by important facts. The capture of John M. Barley, of the 3d Massachusetts cavalry, and the finding of an order of the Confederate authorities, in which he is required to surrender his commission or be held as a spy, is an incident of the same importance as the recent capture of Major E. H. Sumner, of the 6th Massachusetts cavalry. It is interesting to note, however, that the Confederate authorities are not so well informed as they are of our own, and that they are not able to compute our numbers or to estimate our forces. The dispatch from the Secretary of War is as follows:

"From the best information at hand, it appears that the Federal forces in the vicinity of Richmond are about 25,000, and that the Confederate forces are about 30,000. The Federal forces are composed of three divisions, while the Confederate forces are composed of five divisions. The Federal forces are in better condition than the Confederate forces, and are better supplied with munitions of war. The Federal forces are also better disciplined and better trained than the Confederate forces. The Federal forces are also better equipped and better armed than the Confederate forces.

"The Federal forces are under the command of General McClellan, and the Confederate forces are under the command of General Lee. The Federal forces are now in the vicinity of Richmond, and the Confederate forces are in the vicinity of the Confederate capital. The Federal forces are in the process of assembling, and the Confederate forces are in the process of dispersing. The Federal forces are in the process of preparing for an attack, and the Confederate forces are in the process of preparing for a defense. The Federal forces are in the process of recruiting and equipping, and the Confederate forces are in the process of recruiting and equipping. The Federal forces are in the process of improving their base of supplies, and the Confederate forces are in the process of improving their base of supplies. The Federal forces are in the process of preparing for a campaign, and the Confederate forces are in the process of preparing for a campaign. The Federal forces are in the process of preparing for a battle, and the Confederate forces are in the process of preparing for a battle. The Federal forces are in the process of preparing for a victory, and the Confederate forces are in the process of preparing for a defeat."
MARKETS, COMMERCE, &c.

August 1st, 1863.

Auction Sales on Smith's Address &c.

On Wednesday, Sept. 30th, 1863, at the Smith's Auction, New York, the following lots will be sold:

HIGHLANDER'S SONG.

"I'm lamplightin' on the meadows, as I'll work ye to the ground.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
I'll work ye to the ground till ye're lamplightin' on the moor.
