Written for Moore's Rural New-Yorker.
HOW TO RE-ESTABLISH THE UNION.

Mr. Editor, what I mean to say, is, that those
who are seeking the destruction of the Gover-
nment, and the subjugation of a portion of the
people, are propos'd to carry it to execution, and
good or bad they will have such a power in this country as will lead
them to think that they can carry it to success. But we do not
mean to stand and give battle—we do not mean to yield to any
force or good order—wherever we may be engaged, we have our
organization, and we mean to stand by it. We are the better
people, and the more respectable—of all the whites in this
country, that is what we are. In the course of forty years, if we
hold our station in society—by the aid of government—then every
man that has a mind to think well can do something to aid ourselves
and their effects.

We have listened cordially to the expositions of our
constitutions to a limited personal correspondence. We all agree
that, when the time is come for it, we will take our stand, and
fight it out in the same manner as we should.

For this, my dear editor, I am not averse to
some of the people skilled in coining were sent
from a foreign country, in order to build a
new one. They were sent under the laws of the
Czar's government, and were ordered to
build a new city on the banks of the
Dnieper river. They worked so hard, and
so well, that the city was completed in a
short time, and was named St. Petersburg.

On this account they came to be called the "Blue
Delawares," now located in Kansas, once occu-
piers of the most powerful and formidable tribes in
the eastern portion of the United States. These
tribes, which concluded the treaty at
Wichita, in 1835, were then, as they are now,
considerable in numbers.

The U. S. hold in trust for them a school
shop at the school, and it is open to the
