have no well-informed, experienced and intelligent medical assistants to give necessary information, and there is a lack of facilities for the treatment of all diseases. The lack of expert medical advice prevents the patient from receiving proper care.

There is a class of physicians who have not had the benefit of modern medical education and who are not familiar with the latest medical knowledge. They are often ignorant of the latest medical advances and are therefore unable to provide the best possible care for their patients.

The lack of proper education and training of medical professionals is a major problem in many countries. It leads to a lack of knowledge and understanding of the latest medical advances and techniques, which can result in substandard care for patients.

The need for better medical education and training is a pressing issue, and efforts are being made to improve medical education in many countries. However, there is still much work to be done to ensure that all medical professionals have the knowledge and skills they need to provide the best possible care for their patients.

The lack of proper medical education and training is a major problem that needs to be addressed. It is crucial that all medical professionals have the knowledge and skills they need to provide the best possible care for their patients. This requires a commitment to improving medical education and training in all countries.
Horticultural.

FRUIT AT THE LADIES’ TABLE.

Shaping vs. Creaming Seeds.—Mrs. M. A. K., of Grand Rapids, Minn., sends a note of her experience with the Astor beans, and in doing so humorously expresses her surprise at the amount of time and care that were required. She found that the seeds, although they had been soaked in water, were not thoroughly soaked. She then soaked them for a week, and then dry them for a week. She then put them in her hotbed, and they germinated in 10 days, and grew well. She also mentions that, when planting, she always makes a mound of loose earth, as a cheap insurance against any possible damage. She has found that the Astor beans are a little more resistant to cold than the common varieties.

WALTER WILLSON CULTURE.

W. A. Walsh, of Sherry Co., Neb., says he has had seven years’ experience in his garden, and that the Astor beans have given him satisfaction. He says that he had last year an acre of Astor beans, and that they grew well, and produced a good crop. He also mentions that the Astor beans are a little more resistant to cold than the common varieties.

SISTER BLOOMING PLANTS.

There is a beautiful class of plants, and many of them are to be found in our gardens. The Astor beans are one of these. They are the result of a cross between the common garden bean and the wild bean from the prairies. They are a little more resistant to cold than the common varieties, and are a little more productive. They are also a little more resistant to disease.

The Astor beans are a little more resistant to cold than the common varieties.

The Army in Virginia.

The war will not be allowed to return before next spring. When the confusion subsided, the order was given to turn over all Federal property and to remove it to the North. The little boat with three men in it, the lookout of which dated the 16th, says that Gibbons' Division of the army crossed the Potomac at Point Lookout. Savannah, Charleston and Wilmington; the damage done to the city is estimated at $7,500,000. The government loss is $40,000. The citizens are in great alarm, and are very anxious to get the news of their friends and to learn what is going on. The government has been engaged in the removal of women and children. Captain Hill, who was at the head of the expedition, has been killed. The rebels are in great numbers, and are said to have been engaged in the destruction of the city. The loss of life is estimated at 1,000. Col. True is pushing forward from Richmond, and a strong body of men are to intercept them. No fears are entertained of the success of the expedition. The public are very much in favor of the removal of the people, and they are much satisfied with the manner in which it has been carried on. The government has been very successful in the removal of the people, and they are much satisfied with the manner in which it has been carried on. The public are very much in favor of the removal of the people, and they are much satisfied with the manner in which it has been carried on. THE PROVISION MARKETS.

New York, April 14 —Foreign wools are active and advancing; importers offer sparingly. The advance is 10 and 20 per cent, over March prices. Domestic fleece drooping; sales at 88@89c for Canada; 99@89c for State, and 70@71c for Western.

DAIRY—Butter is down to 30@31 cents for choice roll, and 32@33 for common. Choice cheese 18@19 cents. Culls at 12@13 cents. No movement of consequence in flax.

Wool Sheep Husbandry, &c, &c.

BOSTON, April 12.—The following are the quotations:

Wool Sheep Husbandry, &c, &c.

GLES FROM MY BLACK-CRESTED WHITE CU-ban White Fronted South American Musk Ducks (as superior Poultry for early market,) being fall layers and breeders. Embryos for sale and ready for hatching in April. The eggs will hatch in 21 days. Address J. H. ROBERTS, 30 Buffal Street, Rochester, N. Y.

ROBERT REYNOLDS, Agent

GREAT CHANCE.—In this Money, a magnificent inclusion for any one to engage in the manufacture of the above-named wools: those who will make use of the machinery having the most experienced and skilled workmen to make the finished wools will have a good chance to make money. The machinery is now in readiness, and the wools are ready to be made. Address J. H. ROBERTS, 30 Buffal Street, Rochester, N. Y.

Agents Wanted in Every Town.

Two of the above-named works will be forwarded by mail, post-paid, on receipt of the price specified. Address P. H. MOORE, Rochester, N. Y.

WHEAT AND WHEAT PULSES.

ROBERT REYNOLDS, Agent

JULIUS REYNOLDS, M. H. WILSON MANUFACTURING CO., were the Manufacturers of the finest wools in the world. The above-named wools are now in readiness for manufacture, and will be forwarded on receipt of the price specified. Address P. H. MOORE, Rochester, N. Y.

H. C. WHEAT

Manufacturers of THE BRINKERHOFF CHURN IS the best ever offered to the public. (See RURAL, April 9th, 1864.) The undersigned own the right to make and sell these churns in Livingston Co., N. Y., to whom all orders from said county must be addressed. We are manufacturing from 100 to 1,000 churns per week, and are able to supply any quantity on short notice.

ASKET MAKERS—OSIER WILLOWS—100 good Basket Makers wanted, to whom constant work will be given for several years. Also 100 good Willow Gatherers, paid at C. VAN DER BRUGH'S Willow and Rattan Work Manufactory, 83 Main Street, Crystal Palace Block, Rochester, N. Y.

THE UNITED STATES PATENT "STAR" NO CHIMNEY BURNER.

This is entirely overcome by using Haley's manner of fastening, which not only prevents the Rollers from becoming loose on the shaft, but renders the use of COG-WHEELS (used on some Wringer) entirely unnecessary. Wringers with Cog-Wheels in the workmanship, are sold by dealers at 15@16 cents per wringer. The Star Wringer will never break, and is made in an artistic, pleasant employment, by a lady of taste and enterprise. One person only will be taught in a period of less than twenty thousand inhabitants. Address ARTIST, Box No. 10, 745 Madison Square Post-Office, New York City.
