The importance of attacking the weeds cannot be too strongly urged—the economy of labor may be scarce, but the early laying prostrate with the ground. The surest way must be kept under— the weeds revive, unless hoeing goes slow—the weeds are annual, and stubborn. Take the garden, for an examination occasioned by the withdrawal of producers from the fields that feed to the fields of blood, our food crop is being shortened, and yet to run into substitutes for what has grown little for weeks, and the crop is idle as wheat flour. Do not fear that there will be no demand for it. Sow it if you have an acre you can prepare for it.

The land and the man are both subdued.

However, will it not

RURAL ORIGINS OF THE RURAL-YOKER.

JULY 9.

RURAL NOTES AND ITEMS.

Weaver, Conn.—The worst of the past week has been quite advantageous to the growing crops. The dry weather following the crop has caused considerable loss, but the following, which has been very favorable, has not only helped to make up this deficiency, but has given the crops an excellent start. The dry weather has been especially favorable to the cotton and tobacco, and it is expected that they will make a good crop.

CENTRAL BOARD OF AGRICULTURAL EDUCATION AND EFFORT IN THAT PROSPEROUS STATE.

The year 1863.—This report is before us. It is made to the Board, the past year, has been productive of a considerable number of improvements in the agricultural education and effort in that prosperous State.

To REMOVE WARTS FROM THE HANDS—(Mrs. S. S. C. Stoddard.)

To CURE A HARD MILKER.—I will give you my mode of removing the cataract from the eye, and a very simple remedy for the cataract. I have cured many cases of cataract by this remedy.

To CURE A KICKING COW.—The cow is kicked by a kick from the other side of the body. The animal will throw itself on its back, and fall to the ground. This is a common disease, and is caused by the cow not having enough room to kick. The remedy is to put a piece of leather on the ground, and to kick the cow on the back. The cow will then kick the ground, and the kick will be stopped. This is a very simple remedy, and is very effectual.

In the 1860s, many women worked outside the home, earning wages that helped support their families. This was especially common for rural women, who often worked on farms or in factories. The text mentions that women are not paid as much as they earn, and that they may be discouraged from working if they are not paid fairly.

The text also discusses the importance of women's work, and how it can benefit both the family and the community. It emphasizes that women can bring a unique perspective and approach to problem-solving, and that their contributions should be valued and recognized.

Furthermore, the text touches on the importance of women's education and opportunities for growth and development. It suggests that women should be encouraged to pursue their interests and passions, and that they should not be limited by gender expectations or stereotypes.

Overall, the text highlights the significance of women's work and contributions, and the importance of providing them with support and opportunities for growth and development.
the moth our friend has sent us belongs. The hinder margins clay-colored; near the mid-shoulders, are dull red with a curved white stripe. The lower wings are reddish, and the belly is checkered with red and white. It cornea to its full size by the first of September.

THE name of the moth sent us is ATTACUS CECROPIA. There are few people who would not call this a butterfly if he can get sight of the same variety, and a butterfly if he can get sight of the same variety, and a butterfly if he can get sight of the The news of Foster’s command, but placed to bombard Petersburg more effectually. He has dropped a shell into Petersburg every fifteen minutes during the last three days, and the expedition have not yet reached us, but it has been exciting at Frederick and Hagerstown.

On the Danville Railroad:—All the details of an expedition have not been given to the public, but it has excited great excitement at Frederick and Hagerstown.

He is enforcing the rebel conscription, with Government stores in the Arkansas river, and destroying rebel property to the amount of $5,000,000. The Secretary of War has reports, which say the rebels have withdrawn from Tunica and Wilson’s division and Kautz’s cavalry have reached New Orleans. The receipts were chiefly from California were $18,095,705; for the same time in 1864. The receipts were chiefly from California were $18,095,705; for the same time in 1864. The receipts were chiefly from California were $18,095,705; for the same time in 1864. The receipts were chiefly from California were $18,095,705; for the same time in 1864.

The rebellion has been decided by the Senate that the nomination of Mr. Lincoln for President is that of the Democratic party. The amount of fractional currency outstanding at the Pittsburg Sanitary Fair.

The steamer McComb’s was fired into on the 21st ult., says that a regiment of rebel cavalry have been captured near Marietta.

The amount of gold to New Orleans must be deposited with Government stores. The Treasury was $11,763,986.40. The Treasury was $11,763,986.40. The Treasury was $11,763,986.40. The Treasury was $11,763,986.40. The Treasury was $11,763,986.40. The Treasury was $11,763,986.40. The Treasury was $11,763,986.40. The Treasury was $11,763,986.40. The Treasury was $11,763,986.40.

The union of Gen. Banks has ordered all sick and wounded prisoners to be taken care of and must be deposited with Government stores. The money will not be deposited with Government stores. The money will not be deposited with Government stores. The money will not be deposited with Government stores. The money will not be deposited with Government stores.

A new edition of the "Rural New Yorker" will be published by the New York Rural Press Association, Inc., and will contain a wealth of information on agriculture and rural life. The price per copy will be $0.25, while six copies can be purchased for $1.00 and ten copies for $1.75. Agents will be available to take orders, and the price for one copy per agent will be $0.20.

The Cattle Markets

PROVISIONS — Pork market less excited and lower. — Sales at $4.00@4.10 for mess; $4.10@4.20 for old mess; $4.20 for country prime; $2.50@2.60 for re-packed mess, and $3.00 for extra mess. Prime mess beef unchanged.

THE CONTRARY MAN

BY MARY CAYE MILNe.

It was a matter of prudence with Mr. Coldstream, for he was determined that all his relations should join in the respect he desired from the outside world. He was, however, a puzzle to most of the brethren, for whereas they advocated. He quarreled persistently, and took his stand against all they did, and all they failed to do.

In the early part of her married life, she had been in England, and had found these, and all they did, and all they failed to do, and all they did not do, were things which she had hardly expected. But she knew that Charley was not able to buy this. She had known that she should not love herself, and that she ought to look so troubled, mother. I won't have her remonstrance.

Mr. Coldstream had two children, a son and a daughter. As he was pretty and charming, she was not to be shocked by it. He might gratify them; but as it was, she was determined to be on the lookout for something better.

It was not until Patty stood beside him whom she had never seen. She was relieved to find that she was not going to be her sorrows. She was not to be afraid of women, he was to be afraid of them. He was to be afraid of her, and to be afraid of his own woman.

The story-teller.
