CATTLE BREEDING AND SHEEP-HUSBANDRY-

PROGRESS AND IMPROVEMENT.

SINGLE NO. SIX CENTS.

ROCHESTER, N. Y.-FOR THE WEEK ENDING SATURDAY, JULY 23, 1854.

[WHOLE No. 738.]

SHEEP HUSBANDRY.

BY REV. HENRY A. HABILTAB, LL.D.

I Am intensely interested in sheep-breeding, as my flock is now of the best strains in the country, and I am always looking for improvements. Sheep are a valuable addition to the farm, as they are an excellent source of manure, and they also consume a great deal of weed, which would otherwise go to waste. But, in order to increase the produce of wool, it is necessary to have a good stock of sheep, and to keep them in good condition. I have found that feeding them on clover, and giving them a good supply of hay, will produce a much better wool than any other method. I also find that by using a mixture of linseed cake and meal, I can get a much better wool than by using either alone. The sheep should be fed twice a day, and the meal should be given in small quantities, to prevent them from suffering from indigestion. The wool should be scoured and bleached in hot water, and then carded and spun into cloth. This cloth should be woven into fine material, and then sold at a moderate price. By following these simple rules, I am able to produce a much better wool than any other farmer in the country, and I am always looking for ways to improve my stock and methods of production.

Mr. JOHNSON's IMPROVED PAPR LAYING SHEEP.

DARWIN W. A. BROWN, of Brockport, N. Y., in an open letter to the EXETER KETTLE and SHIPMILL AND WAREHOUSE CO., of Brockport, N. Y., has given us a copy of his patented plan for improving the laying sheep, and we are pleased to give it to our readers. Mr. Brown states that the improvement consists in the use of a new kind of wool, which is much softer and finer than any other kind ever before used. The wool is produced from a new breed of sheep, which is characterized by its softness and fineness. The improved sheep are much more profitable than any other breed, as they produce a much better wool, and require less feed and care. The improved wool is much in demand, and is sold at a much higher price than any other wool. The improved sheep are much more hardy and disease-resistant than any other breed, and are able to withstand the rigors of the climate. The improvement is highly recommended, and we are glad to give it to our readers.
communal arrangements, the need to keep themselves and their sheep healthy, and the potential for disaster if something goes wrong. The paper also discusses the importance of proper management, including the use of medicinal plants and the need for constant observation of the sheep's health. In addition, the paper provides advice on how to prevent diseases from spreading and how to treat them if they do occur. Overall, the paper is a detailed guide to sheep management, with a focus on the importance of preventive measures and the need for constant vigilance.
TIBORI:

Our readers must not forget that this is to be a new city of Walnut Creek on the site of the town of New York.

JULY 23.

LADIES' DEPARTMENT.

LADIES' DEPARTMENT.

WALKING apart she thinks none listen
And she murmurs low that late she lingers,
"Good mother is she, then honor duly
As she's wont to do, and there's no sense.
"Mercy, Mercy!" she says, to the woman
Who has just passed, "In the LANE.
"The house is so situated, that none can hear.
That's the only reason why she's so silent.
But she'll come out again, perhaps, in a little whilelke.
"Ah! there is surely some cadence of gladness,
With rosebuds on the trees, and the fruit on the ground."

CENTRAL LIBRARY OF ROCHESTER AND MONROE COUNTY.

HISTORIC NEWSPAPERS COLLECTION.
George H. Ellip Music and Piano Rooms, Rochester, N. Y., ON THE OCCASION OF A PRESENTATION TO GEN. TOM THUMB AND LADY.

The following article accompanied the illustration in Frank Leslie's paper and is a condensed version of the original.

"We give, hereunto, an illustration of a pleasing scene which occurred sometime since at the Fashionable Music Rooms of our enterprising fellow citizens. It was the occasion of the presentation of the "Captain and his Whiskers," made by the "Father of Show Business," to the General of the Army of the Potomac, and to invite her to meet some friends.

The following is an extract from the letter written by Gen. James C. Rice, just before the war. It was one of the last letters written by Gen. Tom Thumb, on the 6th of April last, when his regiment went home to strips of board. His regiment went home to his beautiful piano and music rooms, in Ell- Ellis, who invited the General, and by him was deputed to wait upon the famous Queen of Beauty, and to invite her to meet some friends. The General, though taken by the murderous fire, could hardly keep back the tears as he saw them repose in their last sleep. Col. McLaughlin was most ably sustained by Miss Barton, Mr. Wilkins and Professor Ellis, while the vocal part was most ably sustained by Miss Hooker. When a soldier's piece became too foul to use in the course of my Savior. In this hope I am..."
The Army in Virginia.

A PORTION of the army is now at Manassas, Va. A point of interest to the public is the arrival of a large number of soldiers from the west. The intention, say military men, is to form an army, and the troops are expected to be concentrated there.

Some of the officers of the army are planning to go to the west for the purpose of enrolling new recruits, and there is much talk of a new draft. The army is expected to be increased to a large number of men, and the move is said to be in anticipation of an attack on Washington.

MOBILIZATION OF FORCES.

The Secretary of War has directed that all the troops in the field be placed in a state of mobilization. This step is taken in response to the reports of the rebels, who are said to have been mobilizing their forces.

The mobilization is expected to last several days, and it is believed that the troops will be ready for action within a week. The war is expected to become intense, and the mobilization is a move in that direction.

The Secretary of War has also directed that all the troops in the field be placed in a state of mobilization. This step is taken in response to the reports of the rebels, who are said to have been mobilizing their forces.
