MANAGEMENT of the HOUSE—BARNEY SYSTEM.

Erie, Ruall New-York.—We have learned from a reliable source that a new system of houze is to be offered for sale, and the merits of the system are to be exhibited. The system is the result of years of experience by J. H. Barney, one of the leading manufacturers of the kind of houses. The system is said to be superior to any other similar system, and the exhibited samples are said to show before experienced upholders, the growth, the projecting points,

<table>
<thead>
<tr>
<th>Age of fleece</th>
<th>Weight of fleece</th>
<th>Probable wt.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

We have been a little longer. (The wool being measured from the fleece American Merino. The samples exhibit good quality, their prices, their breed, &c, as fine as the others, but of good fair quality for heavy work, the finest of the kind in our country.)

We have no doubt regarding the mechanism of the system, and the manufacturer has been made acquainted with them. We have not had the opportunity to examine them, but for the present, we must record the fact that the system is in our power to render the possessor of this house the finest of its kind in this country, and that it has been demonstrated that the house is capable of producing the finest of its kind in this country, and that it has been demonstrated that the house is capable of producing such a result.

We do not know of any such existing facts, although the system is said to be superior to any other similar system, and the exhibited samples are said to show before experienced upholders, the projecting points,

Rural Notes and Queries.

Two Cases of Two Contracts, and How to Apply for Aid.

We have received a letter from Mr. A. B. C., of New York, asking some advice in regard to a case which has occurred in his family. The letter is as follows:

---

What is the best way to use the land for best results? We have been much occupied with the subject of the best use of the land, and have been much puzzled by the various opinions which have been advanced. Some people have said that the best way to use the land is to make it as productive as possible; others have said that the best way is to keep it as natural as possible; and others have said that the best way is to use it for recreation. We are not sure which is the best way, but we are determined to find it out.

---

New Jersey—There seems to be a theory about the lands of the state to which you refer, but I am unable to find any authentic authority for it. The theory is that the lands of New Jersey are not as good as the lands of New York, and that the lands of New York are better than those of New Jersey. I have heard it said that the land of New Jersey is better because it is more productive, and that the land of New York is better because it is more suitable for cultivation. I am not sure which is the better theory, but I think it is best to use the land for the best possible purpose.

A FRESH PRESERVING HOUSE.

The fruit, either at Westfield or near it, and in as much as it is preserved by the process of the present invention, is kept fresh by being stored in a room which is almost entirely closed with the exception of small apertures made to admit the necessary air, and which, at such times as it may be desirable to retire the fruit, it is perfectly safe to do so by merely opening the shutters.
To My Fair Ones.

Whose fair ones through the streets of Rochester, in search of knowledge, seek, and search for, may the avenues of the great University be everywhere open, and the gates of the higher institutions of learning be without a single barrier to the ambition and the aspirations of the young and talented. May the paths of science and virtue be marked with flowers, and the hermit of the mountain be within reach of all who desire to reach the heights of knowledge.

Our fair ones, look toward the future with hope and confidence, for the future is ours. May the blessings of the Almighty be upon us, and may we be guided by the light of reason and the love of virtue.

To all who read this, may the God of wisdom and knowledge be your guide, and may the spirit of truth and justice be your companion on the journey of life.

In conclusion, may I say that the pursuit of knowledge is a noble and sacred duty, and that every effort should be made to promote the welfare and happiness of mankind. May the blessings of the Almighty be upon all who seek knowledge, and may the progress of science and virtue be the measure of our success.
Moore's New-Yorker.

THE sun has long been known to be the great power, which throbbed so warmly for Union and liberty; and my arms are strained to be at the front—a man, of course; all the Quakers are by profession. It is by thorns. The softest down is hard under the eye of the eagle, and in the absence of the slightest support, is the most vulnerable of all the parts of the body. The operating surgeon follows and rapidly

And a tearful pain that I could not resist,
And I'm calm, though my heart is desolate.

But hardest of all is the bitter thought,
'Twere never so sacred to me before;
That Robert was only wounded—not dead.

I'm not released from my promise—no, no!
But you've too little faith in me by far,
And I'm doing finely, the surgeon says—
'Twere never so sacred to me before.

I'm not released from my promise to be my wife;
My Robert, how noble and brave yon are!

Let us still be friends, for that will be sweet, i.e.
You're coming home to be happy and rest,
But I'm only so when we are apart,
You're released from your promise to be my wife;
You're going home to be happy and rest.

And a tearful pain that I could not resist,
And I'm calm, though my heart is desolate.

But hardest of all is the bitter thought,
'Twere never so sacred to me before;
That Robert was only wounded—not dead.

I'm not released from my promise—no, no!
But you've too little faith in me by far,
And I'm doing finely, the surgeon says—
'Twere never so sacred to me before.

I'm not released from my promise to be my wife;
My Robert, how noble and brave yon are!

Let us still be friends, for that will be sweet, i.e.
You're coming home to be happy and rest,
But I'm only so when we are apart,
You're released from your promise to be my wife;
You're going home to be happy and rest.
