Agricultural.

The Annual Report of the State Board of Agriculture of Massachusetts for the year 1854, was laid before the General Court, on the 3d of March last, and was read, and ordered to be printed. A copy of the Report is now before this Committee, and I am instructed to say, that it contains a large amount of useful and interesting information, and that it is well calculated to promote the interest of agriculture in the state. The Report consists of two parts: the first, on the subject of agriculture, and the second, on the subject of mechanics. The first part contains an account of the various agricultural experiments and investigations made by the Board during the year, and the second part contains an account of the various mechanical experiments and investigations made by the Board during the year.

The Report states that the Board has been engaged in a variety of experiments and investigations, and that they have been successful in a number of cases. They have been successful in experiments on the cultivation of grass, and in experiments on the cultivation of fruits. They have been successful in experiments on the cultivation of vegetables, and in experiments on the cultivation of grains. They have been successful in experiments on the cultivation of flowers, and in experiments on the cultivation of herbs. They have been successful in experiments on the cultivation of trees, and in experiments on the cultivation of shrubs. They have been successful in experiments on the cultivation of roots, and in experiments on the cultivation of bulbs.

The Report states that the Board has been engaged in a variety of investigations, and that they have been successful in a number of cases. They have been successful in investigations on the subject of soil, and in investigations on the subject of climate. They have been successful in investigations on the subject of light, and in investigations on the subject of water. They have been successful in investigations on the subject of weather, and in investigations on the subject of time.

The Adirondac was presented at the BOTANICAL GARDEN for culture, and it is supposed, before the Hartford; sweet, worthy to be noted. We would not omit, however, to mention the chief varieties now in cultivation. Of these, Allom's Delight is the most generally cultivated, and is very productive. We cannot speak of the fruit of this variety, as we have not tasted it. The fruit is small, of a yellowish-green color, and of a sweet acid flavor.

The Black Locust is the most generally cultivated, and is very productive. We cannot speak of the fruit of this variety, as we have not tasted it. The fruit is small, of a yellowish-green color, and of a sweet acid flavor.

The Blackberry is the most generally cultivated, and is very productive. We cannot speak of the fruit of this variety, as we have not tasted it. The fruit is small, of a yellowish-green color, and of a sweet acid flavor.

I was so very
now-a-days. I think we who stay at home
would be more happiness and less misery in the
pen. I have got another, a beautiful leather-colored one
the soldiers or negroes, or something of the
years. Miss BEACH was a youug lady endowed with rare qualities of mind and heart, peculiar sweetness of disposition,
that I will say to you. I wish, NELLIE dear? she asked.
and, withal, was a devout Christian, she was greatly-beloved by a large circle of friends and relatives, she died in the triumphs of Christian faith, exhorting her
ical column.—E. w.

"I will wait for you in the library," I said, as
At eve the dew-drops gleam.
For Moore's Kural New-Yorker.

The alterations took place. His analytical
the autocrat assumes the dignified character of
the sphere of self-government; epistemic powers
affliction light.

One day a cousin of Count S arrived. He
and his wife were hardly seated when another
friend left, observed, without seeming the least
braved I know not how many degrees of cold.,

One day the wind blew stronger,
Then
And the withered buds of memory
Written for Moore's Kural New-Yorker.

"Ye;;" she is and I am glad enough.

the farmers around them which has been con-
trol. Much of the grand beauty and park-like
ness of the spread frontier, and the material of defense
country; in this hour of its extremity, Mr.
Wadsworth, in the capacity of a distinguished officer to the command of his first divis-
ion in the field, did so nobly that both sides were
satisfied with the conduct of the whole engagement. A decisive victory was his, but in no sense was it a
personal victory, for the result was due to the
ability of his whole command, as well as to the
ability of its commander. Therefore, on the 5th
of May, was placed in command of the 1st Corps
of the Army of the Potomac, with headquarters at
Monroe, Va., in charge of his duties, and the good
conduct and
ministerial and national recognition which fell to the lot of no one else.

In the 31st of Oct., Mr. Wadsworth was
appointed a major general of volunteers, and
selected for the command of the 1st Corps of
the Army of the Potomac, on the 5th of May,
and was placed in command of the 1st Corps,
with headquarters at Monroe, Va., and
in charge of his duties, and the good conduct and

promising years of the Wadsworths to come.

James Wadsworth was married at the
age of 28, and his marriage was
one of his first settlements, then called Geneseo.
Here were born and reared his children, two
dughters and two sons—one of whom
was dies in the year 1832, after a
thirty years' residence in the
neighborhood, in which he was
well known for his general hospitality, his dignified bearing and his kind and generous
character.

Few country preachers in the United
States are so singularly fitted to
their office as Mr. Wadsworth. His
preaching is not more powerful than
his moral influence. Much of the
grand beauty and park-like
ness of the spread frontier, and the material of defense
country; in this hour of its extremity, Mr.
Wadsworth, in the capacity of a distinguished officer to the command of his first divis-
ion in the field, did so nobly that both sides were
satisfied with the conduct of the whole engagement. A decisive victory was his, but in no sense was it a
personal victory, for the result was due to the
ability of his whole command, as well as to the
ability of its commander. Therefore, on the 5th
of May, was placed in command of the 1st Corps
of the Army of the Potomac, with headquarters at
Monroe, Va., in charge of his duties, and the good
courtize and considerate. Though loving, and
respectful to those who knew him so well as you; but
long loved, and now mourned him, his body was
removed through our lines to his friends. I live
about a mile to the left of the Plank road, as you
go from Fredericksburg to Orange Court House,
near New Hope Meeting House, on the Plank
county. The hand of filial affection rescued them
from their fate, and were deposited in the Episcopal
church. He fell, and were deposited in the Episcopal
episcopal church. He fell, and were deposited in the Episcopal
church. The cemetery of the Episcopal church
was his resting place. In the cemetery of the Episcopal church
was his resting place. In the cemetery of the Episcopal
church was his resting place. In the cemetery of the Episcopal
church was his resting place. In the cemetery of the Episcopal
church was his resting place. In the cemetery of the Episcopal

church was his resting place. In the cemetery of the Episcopal
church was his resting place.
Rural New-Yorker.

NEWS DEPARTMENT.

ROCHESTER, N. Y., OCTOBER 8, 1862.

FAUNUS.—A frequent reader of New-York papers is vexed by the horrid idea of being frightened out of his wits by any report, however exaggerated, that may be believed to have the smallest shred of probability of being true. As a matter of fact, he says, he has not the least notion of the trouble that will befall him, and it is a sign of weakness to be afraid. He is firm in his belief that the world will go on as it has gone before, and that there will be no change in the course of events. He is a man of deep reflections, and he has a great deal to say about the future. He is a man of decided opinions, and he is sure to have something to say about the present. He is a man of great energy, and he is sure to do something about the past. He is a man of great sagacity, and he is sure to see through any pretense. He is a man of great sagacity, and he is sure to see through any pretense. He is a man of great sagacity, and he is sure to see through any pretense. He is a man of great sagacity, and he is sure to see through any pretense.
