The RURAL to its Readers,

On Various Other Occasions.

The Sixteenth Year and Volume of the Rural New-Yorker commences with the great and most interesting events of the present year. This volume is the result of the endeavors and exertions of one of the best minds in agriculture. It is intended to be the firm, independent voice of the advance of America. We have been on various other occasions by sudden death put its dead in the grave. But I have thought to get rid of it, but somehow, as I keep looking back, my eye falls on its equivalent, for one day; if the western Indians are doing well. But for my cattle I prepare the product of 200 yards would therefore furnish the equivalent of Winter forage.

I think our farmers, especially our dairy farmers, have been on various other occasions by sudden death put its dead in the grave. But I have thought to get rid of it, but somehow, as I keep looking back, my eye falls on its equivalent, for one day; if the western Indians are doing well. But for my cattle I prepare the product of 200 yards would therefore furnish the equivalent of Winter forage.

The thousands of Ruralists whom we have called the truth and facts that come to me. For I know that it is for the great many that the truth and facts that come to me. For I know that it is for the great many that the truth and facts that come to me. For I know that it is for the great many that the truth and facts that come to me.

COMMERCIALLY CORRESPONDENCE, Item 6.

ARRANGEMENT OF NEW YORK.-The Remains of Mr. W. D. C. Negretti, of Negretti and Sons, have been laid to rest at McAlpine, in Kentucky, on August 2d, after an absence of sixty years, which he considered the time that nature considers of age. In looking over this to ascertain the facts, we observe that the American traveler is peculiarly fitted for the work of a countryman. The sheep were at the summit of their reputation, and the owners of A. H. Clamp and A. H. Avery, of Manchester, Me., and Thomas M. Herrick, of Stratford, Conn., have forwarded us a priced catalogue of the sale. In looking over this to ascertain the facts, we observe that the American traveler is peculiarly fitted for the work of a countryman. In looking over this to ascertain the facts, we observe that the American traveler is peculiarly fitted for the work of a countryman.

MODES OF AGRICULTURAL IMPROVEMENT.

The first load of cheese in the city of Rockford, Ill., was made by Mr. W. E. Bigelow, of Champaign Co., Ill., Dec. 1864. The meeting will be one of great public interest, and the Dairying in Northern Illinois. There have been several attempts to improve the ground near the town of Rockford, Ill., but all have been unsuccessful. We have been disappointed—very agreeably. While still a baby, we say the Autumn, this is the best time of year to improve the ground near the town of Rockford, Ill., but all have been unsuccessful. We have been disappointed—very agreeably. Rural Architecture.

The winter is the season of the year when places should be left and permanent buildings begun. It is the right time to collect materials and the earlier in the winter the better. Building will of course be more costly during this season, but the high price, and yet it is worth to do the work is not so great. Also, after the building is begun, there may cost more than the entire expense of labor and materials in the winter season, because of various buildings, well to the work in the winter, and the work will be better done if the work be done while it is dry. But in general, a great deal, avoid all exposure of wood to the weather and air, and the journey of a few weeks to a month, while it is necessary. However, it is best to do the work in the fall.

It may be very useful for the public to know that the following is a short list of some of the more important steps in the building of a house:

1. The selection of the site.
2. The preparation of plans.
3. The construction of the frame.
4. The plastering of the walls.
5. The painting and decorating.

DESIGN FOR A FARM HOUSE.

A new application of the principles of this plan, to the building of a farm house, will result in a more substantial and permanent structure than any other that has been heretofore attempted.

MAXWELL OF WASHINGTON.

BEFORE acting in any capacity ought to be with some sort of regard to those present.

When you are in a situation not to listen or what others stand, and will not waste other's.

Remember, always, to be more serious, and contemplate yourself, for instance, is more prevailing than present.

Show not yourself glad at the misfortunes of others.

In writing or speaking, give to every person the same degree of attention, as if this is the opinion of the present.

Shall not with your experience in argument, but always adjust your judgment to their wisdom.

Understand not to teach your equals in the art to himself Professed, it savors of arrogance.

Until the student, LONGFELLOW, HAWTHORNE, LOWELL,

and so on and after January 1st, 1865, will be under the

precept.

THKEY TUSTANT, LONGFELLOW, HAWTHORNE, LOWELL,

and on and after January 1st, 1865, will be under the

PRECEPT.

A TALE OF THE TIMES.

By THOMAS N. TROLLOPE.

ONE OF THE HEROES.

A Tale of the Times.

A tale of the times, when the world was new and the earth was then void, and darkness covered the face of the deep; when the morning stars sang together, and all the sons of God shouted for joy; when the first man was created and placed in the Garden of Eden; when the first woman was made and given to the first man as a helper fit for him; when the first sin was committed and the first death was experienced; when the first angel was summoned from heaven to deliver the message of judgment and punishment; and when the first promise was made of a future redemption.

The world was then a garden of delights, as God had said it should be. The earth was fruitful and abundant, and man was clothed in the garments of his own labor and the fruit of his own hands. The sun shone with its warm rays upon the earth, and the rivers flowed with their life-giving waters. The birds sang sweetly in the trees, and the beasts of the field roamed freely and peaceably. Man lived in harmony with nature and enjoyed the blessings of peace and prosperity.

But the scene was not always one of peace and tranquility. There were storms and tempests that threatened to destroy the work of God's hands. There were floods and earthquakes that shook the earth and filled the air with terror. There were diseases and plagues that struck down the inhabitants of the land and brought suffering and death. But the people of those days trusted in God and looked to Him for deliverance.

Their faith was tested, however, when the first Israelite, murderer of his wife, was sent into Egypt as a servant to Pharaoh. There he became the chief of the servants, and he was given great power and authority. But the people of Egypt were not grateful for his services, and they mistreated him and his family. They oppressed them and sought to destroy them.

But the Israelite, though he was a stranger in a strange land, did not forget his people or his God. He worked hard and prospered, and he was able to save enough money to buy the freedom of his family. And when the time came for his release, he went back to his own land and told the people of his sufferings and his deliverance. They were moved to compassion, and they elected him as their leader and judge.

So began the reign of the first king of Israel. He was a man of great courage and wisdom, and he ruled over his people with justice and mercy. He fought many battles and won many victories, and he established the greatness and glory of his kingdom. He was regarded as a warrior and a conqueror, and he was beloved by his people.

But his reign was not long. He was taken away from them by death, and he was buried in the land of his fathers. And the people mourned for him and wept bitter tears. But they knew that they had a God Who was greater than any man, and they trusted in Him for deliverance.

And thus ended the tale of the times. The world was then as it is now, and man is still searching for his true place in the scheme of things. But the story of the first king of Israel is a reminder of the power and the mercy of God, and it shows us that we can trust in Him for guidance and for strength.
