AGRICULTURAL.

A REPORT of a Discussion on the Blue Blotter by Mr. J. W. L. H. Mozley, N. Y., for the week ending Saturday, March 26, 1865.

WE tend to think that farmers would be much better off if they would all do slowly accumulate. Farmers, deal with capital, besides keeping up the necessary repairs. Even the minor jobs bankers and others do. Even the minor jobs.

PEDIGREE OF SHORT-HORN BULL HOPEWELL, 4040.

On the preceding page of this paper is a portrait of a fine animal, bred by L. H. Mansfield, of Kirkville, N. Y., and now owned by H. G. Thompson, of Newport, N. Y. We give hereewith a typical specimen of the short-horn breed. The peculiar uses are so different to the noble and well-known merino that we illustrate it the same way for the benefit of those who may be interested in forwarding it.

Mr. Mansfield, of Kirkville, N. Y., 23 years ago, obtained a short-horn bull from Mr. Thompson, of Newport, N. Y., having the same blood as the present bull, and now we have the same, only the latter is the offspring of the former. The bull is a fine animal, having the best qualities of the breed, and we doubt not that he will prove a valuable addition to any of the large stock of short-horns in the country. We are pleased to be able to give this information to the public, and hope that the bull will be of service to those who may want one of the same breed.

THE CARE.

By ALEX BURDINE.

Women love neat and orderly homes, and so they love the care of their hands. They enjoy the work of their hands, and they also enjoy the fruit of their labors. They like to see their work reflected in the faces and eyes of those they serve. They take pride in the fact that they are able to provide for their families, and they enjoy the satisfaction of knowing that they are doing something useful and important. They also enjoy the companionship of their loved ones, and the love and respect of those they care for. They are happy to be able to give of themselves, and to be able to do something for others.

I also enjoy the companionship of my loved ones, and the love and respect of those I care for. I am happy to be able to give of myself, and to be able to do something for others.

In caring for others, I have found that it is important to be patient, kind, and generous. It is important to be willing to listen, to be understanding, and to be willing to give of oneself. It is also important to be able to provide for the needs of others, and to be able to give of oneself.

The Story of Emeline Bay

By Alice Reynolds

There are three distinct classes of women: First, those who are all self, whose tendernesses and cares are all for themselves—self-seeking, self-loving, self-pitying. The second class is composed of women who are not selfish, but full of loving thoughtfulness—who are always thinking of others and never of themselves. These women are lovely, but sometimes they are scarce. The Crown Princesses of the world; pure for women that men admire and never think of loving. And next those who are all for others, whose beauty is in their kindness and gentleness, who are always helping others, who are useful and kind, who are willing to do anything for anybody. If you find them in a thick crowd, you will notice them at once by their sweet faces, their soft voices, their sweet manners, their gentle spirits. If you follow them into the thick crowd, you will see them leading the way, helping those who are in need, giving advice and giving help, with only the plainest features. The girl was not very graceful, nor was she very tall, nor was she very beautiful; but she belonged to the intellectual class, if her life had not been so full of disappointments. She had a pretty piano, the girl's own feelings justified her in being proud of it. She had been used to her own circumstances, and was used to being alone. She was a very good musician, and her music was very pleasing to her. She had been used to be the center of attention, and was used to being the toast of the town. She had been used to be the center of admiration, and was used to being the center of envy. She had been used to be the center of curiosity, and was used to being the center of interest. She had been used to be the center of attention, and was used to being the center of admiration. She had been used to be the center of envy, and was used to being the center of curiosity. She had been used to be the center of interest, and was used to being the center of attention.
