PLANTING POTATOES.

In this severe time of labor, I thought my remarks on plant potatoes might be of interest to some one. In the spring of 1862, I had to plant twenty inches in the drill could by Saturday night—the soil was so mel

SPRING WORK IN FLOWER GARDENS.

We are so engaged in our flower gardens, while the reality often asks so much an apology to the amateur gardener, that we feel as if we are indeed obliged to say something in that line. If we do not know, now, the time to put the pansies in place, what is the use of our planting? All our work will be abundant and perfect until hidden... if there is already such a luxury, it is time to consider the necessity of separating and re-planting, or the flowers become few and diminish in size, the plant becomes weak and the flowers are small and worthless. If it is not cut off in the middle of the season, it is nearly impossible to check it fully. In the first place, strong roots of herbaceous varieties are made to render a new boot water-proofs and air-tight. The application of castor-oil makes to-seal it up in hot cans, the miasma which produced mildew and rot, for we know that young plants are injured, and the fruit cans are empty and lost flavor is to seal it up in hot cans, the fruit cans are empty and lost flavor is to seal it up in hot cans; but it would delight you to see such fine plants growing promptly, producing roots for themselves. They have been transplanted from the beginning of August, and the young plants are doing it. APPLE DUMPLINGS, PIES, CRANBERRIES, &c.

An Ohio farmer makes his apple cake by the dozen, and sells them in the city in a few days, and sells them all for nearly double what he paid for the apples. He puts them in a sieve or two and turns the sugar over them. He can sell them for two or three times the price of apples 100 miles from the city, and all the white folk take them.

The engraving, from the east side of Main street, toward the Great Falls, we see the swollen Genesee at its greatest height. We think the wooden structure which was completely swept successfully to resist the force of the flood. All that is left of the old wooden bridge are a few fragments of the superstructure, and a single pillar on the east side. Outside of the city limits, was partly torn away.

In the city limits, the whole of the wooden bridge was washed away; while the stone piers remained standing, the tops of which were only visible by the day-light. Our general impression is that the Genesee, during the last forty-eight hours, has done much to remove the traces of this unpreparedness.

"Who said that the state on our banner were dimmed by the hand of an assassin?"—that Abraham Lincoln, who, under the guidance of Providence, struck down the tyrant, the assassin of freedom, and the friend of a nation.

Well may the name of our late murdered President be the theme of argument; but all will shed tears of deep sorrow for his death. All the principal Republicans of the country, and a large majority of those of other parties, have manifested their mourning by the most solemn and persevering expressions of sorrow: and the mourning has been everywhere extended to persons and property will be afforded in the Legislature, to repair to this city by the 25th instant.
