THE PARAMOUNT IMPORTANCE OF AGRICULTURE.

The late Hon. Edward Everett, in a speech before the Agricultural Society of the State of New York, after speaking of the effects of animal fertility, said: "With comparison applied to animals for domestic purposes, that it supplies the first want of our people—the daily nut and the great family blessing of the side-kick for his daily bread—the call must be weighty, and of serious influence."

In the United States, and especially in the West, the paramount importance of agriculture is undeniable. The land is fertile, the climate is suitable, and the natural resources are abundant. These conditions have made the United States the world's largest producer of food and fiber, and a major contributor to global food security.

In recent years, however, the challenges facing agriculture have increased. Climate change, soil degradation, and environmental degradation are major concerns. To address these challenges, it is essential to adopt sustainable farming practices, such as crop rotation, conservation tillage, and integrated pest management.

In conclusion, agriculture is not only a means of livelihood for millions of people worldwide, but also a crucial component of global sustainability. The United States must continue to invest in agricultural research and education, to ensure a secure and sustainable future for all.

the highest price paid for any of the foreign \nmerino classes. In the case of the English merinos, the \nprices were $1,000 for the class of 2,000 sheep, $1,500 for \nthe class of 1,000 sheep, and $2,000 for the class of 500 \nsheep. In the case of the foreign merinos, the prices \npaid were $500 for the class of 2,000 sheep, $750 for the \nclass of 1,000 sheep, and $1,000 for the class of 500 sheep.

The result of the exhibition was to give the merino \nclasses a new lease of life, and to make her the leading \nsource of our wool. The class of merinos, however, is \nnow considered to be of less value than before, and the \nprices paid for them are much reduced. The wool of the \nmerino is considered to be of inferior quality to that of \nthe other classes, and the prices paid for it are much \nlower. The merino is, however, the most valuable class \nof sheep, and the prices paid for it are much higher. The \nmerino is the most valuable class of sheep, and the \nprices paid for it are much higher. The merino is the \nmiddle of the three classes, and the prices paid for it are \nmuch lower. The merino is the least valuable class of \n

We have just returned from a brief sojourn among the plants of Monroe County. Our first stop was at Albany, where we made the acquaintance of the Professor, Mr. J. Troubridge. He is a good friend of the botanic garden, and we understand that he has been very successful in his work. His garden is large and well stocked with various species of plants, many of which we have not observed elsewhere, and we think that it will prove to be of great value to the city of Rochester. The garden of Mr. Troubridge is known as the basal garden, and we hope it will become the model for similar gardens in other cities.

Horticulture.

The pleasures of social life.

We found friend TUCKER, as usual, industriously engaged in his garden, where he has been very successful in his work. He has sent home by his brother THOMAS, now in New York, a large number of plants, which seem to prosper. Such a splendid growth of flowers is expected among the Horticulturists in the Eastern part of the country.

A few days ago a neighbor of mine called my attention to a plant which had been newly transplanted last year to the nursery. A plant of this kind, which has been placed in the hands of a person whom he knew, who had no knowledge of the care required, and who had not made a proper selection, could not be expected to prove to be of the least benefit. He finally decided to transplant it to a bed where it could be properly cared for.

The Dianthus Heddewigii, and its varieties, the first season. Among the novelties of the previous season which we have in flower, a few others have passed away, never known after the first season. Some of these flowers are delicate rose, with a large white border, but as it lacks sweetness will never be a favorite among the people.

The ice plant. It is rather pretty and makes a good border, but as it lacks sweetness will never be a favorite among the people.

NEW FLOWERS.

Every season sees the introduction of new varieties of flowers, which add to the beauty and variety of our gardens. Among the most interesting of these new introductions are the following:

The strawberry. The strawberry will be one of the most popular fruits of the season. It is a hardy and productive plant, which can be grown in almost any climate.

The sweet potato. The sweet potato is a valuable crop, which can be grown in most parts of the country. It is a hardy and productive plant, which can be grown in almost any climate.

The grape. The grape is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The tomato. The tomato is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The cucumber. The cucumber is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The lettuce. The lettuce is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The celery. The celery is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The onion. The onion is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The garlic. The garlic is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The carrot. The carrot is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The radish. The radish is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The turnip. The turnip is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The beet. The beet is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The potato. The potato is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The cabbage. The cabbage is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The kale. The kale is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The Brussels sprout. The Brussels sprout is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The broccoli. The broccoli is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The cauliflower. The cauliflower is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The swiss chard. The swiss chard is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The green pepper. The green pepper is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The bell pepper. The bell pepper is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The hot pepper. The hot pepper is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The sweet pepper. The sweet pepper is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The bell pepper. The bell pepper is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The hot pepper. The hot pepper is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

The sweet pepper. The sweet pepper is a hardy and productive plant, which can be grown in almost any climate. It is a valuable crop, which can be grown in most parts of the country.

(Decked too long, but number.)

"Two possessors of the house," said Madame de FONROSE, "if you were to present me with a troubadour, a sort of worthy, unambitious poet, who, by his carriage, assurance, and unpretending manners, had become the life and soul of her family, she would assuredly have made him a lord, I am sure. She was thus occupied, when a woman appeared at the door, and said, "Madame, the troubadour has come." "The troubadour!" said Madame, and sprang from her chair. "Yes, Madame," replied the woman, "the troubadour has come. He was the troubadour of the village, who, by his Poetic virtue, was the delight of all the fair sex around him. He was the life and soul of her family, and she was determined to make him a lord. She was thus occupied, when a woman appeared at the door, and said, "Madame, the troubadour has come." "The troubadour!" said Madame, and sprang from her chair. "Yes, Madame," replied the woman, "the troubadour has come.
