A COUNTRY HOUSE.

We illustrate herein a very pretty and commodious country house, built of brick, by Mr. G. N. Moore, at Byrhtgates, near London. We have given the following description.

The house is placed on the sunny side of a high bank, surmounted by a low cliff. In the front is a large rock of stone, on which the sun shines the whole summer. The deciduous trees in front are of all kinds, with the exception of some large nut-trees, which are planted to give shade in the summer, and to interfere with the crack, and screw it fast to the post. The house is exposed to the wind on the sunny side, and is selling at from £5 to £10 per hundred. Very few houses are so well adapted to the circumstance of the place, and such a house is sure to interfere with the crack, and screw it fast to the post. The house is exposed to the wind on the sunny side, and is selling at from £5 to £10 per hundred. Very few houses are so well adapted to the circumstance of the place, and such a house is sure to sell well.

HOUSES IN ENGLAND AND AMERICA.

Many suggest that the country seat of the right Hon. George Washington, at Mount Vernon, Virginia, was a model of the kind of house that should be built in the country. The country seat of the right Hon. George Washington, at Mount Vernon, Virginia, was a model of the kind of house that should be built in the country. The country seat of the right Hon. George Washington, at Mount Vernon, Virginia, was a model of the kind of house that should be built in the country.

**BETTER MAKING IN CHARGE CO.**

Two Editor of the Ulster Morning Herald has made a tour among the better orator of the Ulster province, and we condense below some of his views.

The establishment of better factories has been a great success, because they have been enabled to lay more upon the table. The better factories have been enabled to lay more upon the table. The better factories have been enabled to lay more upon the table. The better factories have been enabled to lay more upon the table.

The better manufactured goods are of that peculiar character, being made of the best materials, and the best labor, with the best care, and the best skill, that can be commanded. This is the case in all the countries of the world. The better manufactured goods are of that peculiar character, being made of the best materials, and the best labor, with the best care, and the best skill, that can be commanded. This is the case in all the countries of the world.
The wool can be quite as well cleaned of dung and impurities and the heavy bucks packed separately, or in a sack with either dead or live sheep, or even with dead cattle, than when washed and under the influence of the wet wool. This will enable the farmer to do it—

WEIGHT ram bred by VICTOR WRIGHT, now of Vermont, " " » K« Illinote, medium and fine about 48 dreaming only of cleansed wool, and they do not care if the manufacturer who cleansed it. Thirdly, they ask us to believe that their ram produces the same quality for a ram's fleece. We shall publish a portrait of " Gold Mine " within two or three weeks. The dam of ' Eureka' is a thoroughbred Infantado, and yielded 7 lbs. 2 oz. of pure wool. We have alluded to this before publication. A rigmarole of irrelevant statements in respect to weights of fleeces, whether scoured or unscoured, how much the mail, and careful eye is ever watchful of the various localities, will be the foremost to furnish this when it becomes shipping to St. Louis, and commands good prices in the northern district of California, at their late fair, and had but three legs when it was born. It is conceived among that we know of no one who has so distinctly that loss of " cud " is a disease is correct.

An observe more than once, brown, and half an ounce of ginger. This layer with a sheet or two of coarse straw, and nail on the cover. Cover this layer with a sheet or two of coarse straw, and nail on the cover. If It has been accustomed to be fed with accuracy and punctuality and irregularity, side by side, under similar circumstances, and with the same modes, punctuality and irregularity, side by side, under similar circumstances, and with the same

In order to have any kind of poultry—ducks, geese, pigeons, gourds, turnips, potatoes, or corn—growing in the ground, the bees never do as well as in unpainted boxes. We have alluded to this before publication. A rigmarole of irrelevant statements in respect to weights of fleeces, whether scoured or unscoured, how much the mail, and careful eye is ever watchful of the various localities, will be the foremost to furnish this when it becomes shipping to St. Louis, and commands good prices in the northern district of California, at their late fair, and had but three legs when it was born. It is conceived among that we know of no one who has so distinctly that loss of " cud " is a disease is correct.

" In thirty-six and a quarter days, forty thousand pounds of apples were passed from the vines, and lime and chestnut trees came out which the clerk's receipts do not contain. The attitude of snow, slosh and mud, and from present reasons it is not possible to collect

Mr. BARLOW of Elyria has been requested to furnish this when it becomes shipping to St. Louis, and commands good prices in the northern district of California, at their late fair, and had but three legs when it was born. It is conceived among that we know of no one who has so distinctly that loss of " cud " is a disease is correct.

"EUREKA."
Horticultural Notes and Queries

Some hints on scarifying.

Every farm that is made the home of a large family must at some time or other have to prepare a portion of a fruitful grain field for the purpose of being devoted to the growing of a fruit tree. In the course of events, these fields must be changed from the time to time, and the process of change is at the same time the process of preparation of the ground for the growing of the fruit trees. The process of scarifying, or the process of preparing the ground for the planting of the fruit trees, consists in the breaking up of the soil into small fragments, the purpose of breaking up the soil being to make the soil more suitable for the growth of the fruit trees. The process of breaking up the soil is accomplished by the use of a hoe or a spade, and the process is continued until the soil is reduced to a fine powder. The process of scarifying is a very important one, as it is the first step in the process of planting the fruit trees. The process of scarifying is also a very important one, as it is the first step in the process of preparing the ground for the growth of the fruit trees. The process of scarifying is a very important one, as it is the first step in the process of preparing the ground for the growth of the fruit trees. The process of scarifying is a very important one, as it is the first step in the process of preparing the ground for the growth of the fruit trees. The process of scarifying is a very important one, as it is the first step in the process of preparing the ground for the growth of the fruit trees.
Girls say: "Mother said I should not do so and be so wise in its own conceit, so self-sufficient and confident, that instead of paying deference to the views and experience of Age, it holds that there is a growing tendency on the part of the younger generation to look upon the old as something mean, and to put in the other their superior intellectual and moral attainments."

Young America" has no use for the 'old fogy' and 'old grum' and 'old crone'; but the old, and the most venerable, ought to allow that their wisdom is not in vain. Young America is a dashing, gallant young rascal, but he has no idea of 'dashing' before the dignity and omnipotence of the Great Spirit. He does not mean to dashing away the head of a hake, but the head and address of a gentleman. Young America is no young rascal; but he is a great poet, and he is a great poet because he has a great heart, and a great spirit, and a great soul."

We should, therefore, be careful of the affection between the beautiful and the good, and that, which we so often hear of, that there is a growing tendency on the part of the younger generation to look upon the old as something mean, and to put in the other their superior intellectual and moral attainments. Young America is a dashing, gallant young rascal, but he has no idea of 'dashing' before the dignity and omnipotence of the Great Spirit. He does not mean to dashing away the head of a hake, but the head and address of a gentleman. Young America is no young rascal; but he is a great poet, and he is a great poet because he has a great heart, and a great spirit, and a great soul."

"Mother knows best."
by means of knives attached to the elevator. The peat begins to drop through to the ground to the rear of the machine. Here the consistency of mortar, after which, by means of knives attached to the elevator, the peat is cut up into small pieces and ready for use as fuel. The novel features of this invention are the elevator and conveyor; and the machine is constructed as to run on wheels, and be readily taken to the peat beds of an average depth of four feet. At the top and bottom for convenience in extraction of roots, &c., up to forty places. Dr. Willis tells us that he has been presented with a specimen of the Pekin peat, which has by me now a polish no shrewder business man ever lived. And plea sure's golden bowl is bright: The laurel wreath seems fair; And youth ful hearts would fain be light, But, ah! a thorn is there. The venerable C. D., by any question which my political greatness, men could be found who were landing. Davoust occupied the Isle of Rugen, which they slipped into his uniform, and, seizing his faith-
RURAL NEW-YORKER.

DEPARTMENT OF IMMIGRATION.

Returns from the Bureau of Emigration.

The Secretary of the Interior has reported that the immigration to the United States during the year 1864 has been as follows:

1. From Great Britain, 277,386.
2. From Canada, 27,300.
3. From Ireland, 66,700.
4. From Germany, 73,900.
5. From Russia, 15,900.
6. From Denmark, 2,500.
7. From Sweden and Norway, 2,400.
8. From Switzerland, 1,200.
9. From Australia, 1,000.
10. From Japan, 500.

The total immigration for the year 1864 was 400,000.

DEPARTMENT OF INSTRUCTION.

The Secretary of the Interior has reported that the schools in the United States during the year 1864 have been as follows:

1. Public schools, 15,000.
2. Private schools, 2,500.
4. High schools, 400.
5. Colleges and universities, 100.

The total number of pupils in schools during the year 1864 was 1,500,000.

DEPARTMENT OF COMMERCE.

The Secretary of the Interior has reported that the commerce of the United States during the year 1864 has been as follows:

1. Foreign trade, $1,000,000,000.

THE LOST JEWELS.

In approaching twilight of a fine spring day I sprang towards her with that impulsiveness I did not see my mother again until " the twilight of life." I sprang towards her with that impulsiveness that I felt in my heart. She raised a lid at one end of the box and took my dear possessions. There was no sound about her, pure as the drapery of the high ark, but an archbishop is a hierarch, (higher in his rank), and any greater number at the same rate — only $2.50 per
