TO THE PUBLIC.

When we consider the personal qualities of the statesmen, who were associated in the first Congress of the United ate. and whose primes are affixed to the Deckiration of Independence, the perilous occasion which demanded the exercise of their wistheir councils on the interests of mankind, we must acknowledge that very rarely a more imposing and magnificent spectacle has been exhibited to the world, and we shall seek in vain, in the annals of nations, for an event more worthy of commemmoration, or of being cherished forever in the hearts of a grateful and generous people,-The love of independence is interwoven with the frame and constitution of the huthat animates the infant's features in the eradie; and amongst all the actions and enterprise of man, none has awakened into activity a greater exertion of the virtuous energies of his nature, none has excited a greater wrinth of veneration, and has more imperiods claims upon our gratitude, than missistance of tyranny and appression

In these republicen states which have

been the admiration of the world, the first tribute of genius was paid to the patriot or the hero who promoted the cause of libarty and maintained the independence and dign's of man. The animated canvas, the breating marble snatebed his features from the grasp of death, and the historian inscribed his name and achievments in the imperishable records of fame. It would indeed be no favorable presage of the perpecover an inscusibility to the obligations we owe the memory of the illustrate pations of American Fredom. They avancel us by their magnanimity from the inglorinus state of colonial subjection and from the arbitrary dominion of a foreign power, to the distinguished elevation of a sovereign and independent people; they asserted and man tained the impreseribable rights of humently by the "inutual pledge of then lives there fortimes and their sacred honor;" & as form as Virtue hold. her empire in the hearts of their succesors, the example of these generous benefactors will not be lost to the world, their names will not pass away nor he forgotter, or their glorious deeds he confounded in the common and eastal transactions of lile. Finding himself involved in a gross contradiction, he attemps to shift his ground; he recollects the circumstance, he says, because thieves attacked the house. My lords, you recollect the account this witness gave of his leaving the service of her majesty-an account which contains as much gross and deliberate falsehood as ever polluted the walls of a court of justice; and allow me here, my lords, to observe that where you see one material part of a person's evidence grossly and palpably false, it is not necessary to go more into detail-it is not necessiry to prove him a perjurer throughoutthe whole of his evidence must be discredited-nothing that falls from the lips of a perjured man ought to be en;

My lords, in giving you an account of his leaving the service of the princess, the witness tho't it necessary, in order to raise his character, I suppose to flourish on this point. He told you that he left the service; that he was not discharged, but that he left the service, because he did not like the bad people by whom her royal highness was surrounded. He did this for a double purpose-to raise his own credit, and to debase the queen, and those by whom she was surrounded.

My lords, this story is false-it has been proved false out of the mouth of this very witness. A question was put to him-"Did you not ask to go back ?" What was his answer ?- " He did not recollect." GOVERNOR'S SPEECH. As might have been expected the clim

tonian presses throughout the state have renewed their encomiums upon the abilities & acquirements of his excellency, since the appearance of this document. and point to it as a renewed evidence of the comprehensiveness of his views and of the correctness of his judgment .-The usual superlatives are made use of on the occasion, unsparingly, and Mr. Clinton is be-praised without mercy. It cannot, however, have escaped the observation of discerning men that there is a meaning in much of what is said in this speech, that the writer would, probably, have concealed, had his feelings permitted, but which is still plain not to be mistaken. The Republicans of this state and of the union have here additional evidence, if that were wanting, to convince them of the deep-voted hostility of Mr. Clinton and of his party to the present administration of the general government. The existence of such hostility has often been asserted by republicans, and as often stoutly denied by the partizans of his excellency. The assertion has been maintained by proofs which ought to have been regarded as conclusive, since they were drawn from the whole tenor of the "state constitution" for the last three years, and from the occasional unguarded declarations of its principal supporters. We have no occasion now, however, to look further than to this single speech for abundant proof of the truth of that assertion .-That Mr. Clinton has been betrayed by his feelings, in this instance, to exhibit what prudence should have taught him to conceal there can be no doubt. The topicks which he has selected, and the manner in which he has treated them prove this:

A direct charge is made against the general government and its officers of attempting an interferance in our state elections. This is a high charge, and should not have been lightly or inconsiderately made. It is a charge affecting not only the honour of the government, ternative of not publishing the whole of but the character and standing of its the gov's, speech of breaking off in the subordinate officers.
