KODAKS AND

FROM A KODACHROME ORIGINAL (SEE, ALSO,
PAGES 20 AND 21, AND INSIDE BACK COVER)

BROWNIES

TO HELP YOU CHOOSE YOUR CAMERA

IN selecting a camera consider, first of all, the picture size. In this connection it is important to decide whether you will want to use the bulk of your pictures in their original size, or whether you expect to have them enlarged (or enjoy the fun of enlarging them yourself). Kodaks and Brownies offer you a wide range of models that make album-size pictures. Other types are designed for "miniature" photography, which begins with diminutive cameras and negatives and ends with striking enlargements, or large images projected on a screen.

TYPE OF CAMERA From the standpoint of design, the cameras in this catalog fall into three classes. The box models, easy to use and modest in price, are, nevertheless, thoroughly dependable picture makers in their intended sphere. The largest class, represented by the famous folding Kodaks, offers greater compactness and carrying ease, and includes several groups of successively greater versatility. Minia-

ture Kodaks of the 35-millimeter type do not fold yet are extremely convenient, especially since they can be carried in a "field" case suspended around the neck, and used at an instant's notice without complete removal from the case.

VARIETY OF PICTURES Consider the variety of pictures you want, and the conditions under which you expect to take them. Even the very simplest Eastman cameras regularly make sharp, clear pictures of average outdoor subjects in good light, and modern films and photo lamps have extended their scope to certain indoor situations. The more pretentious types of Kodaks broaden this scope still further to include rapidly moving subjects in the sports and other fields, varied indoor subjects, and ...in the case of most miniature Kodaks ...full-color transparencies.

LENS AND SHUTTER The versatility of a camera depends largely upon the "speed" of its lens; that is, upon the relative ability of the lens to collect light from the subject and transmit

it to the negative material within a given interval. The illustration below shows the approximate design of the glass elements of several Eastman lenses, and the relative speeds that result. All Kodak and Brownie

lenses are specially designed for efficient performance on their particular cameras. They reach the peak of their design and construction in the superb Kodak Ektars. Above, at left, is shown one of the Ektars for the new Kodak Ektra.

In order to capitalize the varied ability of fast lenses, they must be geared to shutters that afford adequate exposure-speed ranges, and that have been carefully tested for time-after-time accuracy and stability. An outstanding example of precision shutter construction is Eastman's Supermatic—the

TYPE OF LENS	ELEMENTS OF LENS	RELATIVE SPEED
Meniscus		1
Doublet		1½
Anastigmat f/8.8		3
Anastigmat f/6.3		6
Anastigmat f/4.5		11
Anastigmat Special f/3.5		18
Ektar f/1.9		61

world's finest high-speed between-the-lens shutter. This is illustrated on the opposite page.

Chiefly responsible for the scope of any camera, the lens and shutter likewise account for a large share of the cost—particularly on cameras that fall into the higher classifications. It is well to bear this in mind in deciding the final point . . .

THE PRICE TO PAY Determine this in the light of the preceding paragraphs—in general, according to the purposes to which the camera is to be put. Your Kodak dealer will be glad to help you make your decision. Regardless of your final choice, you can be sure that your Kodak or Brownie has been not only expertly manufactured but also exhaustively tested, as in the bellows "breakdown test" illustrated above. It will bring you the matchless extra values of more than fifty years' experience in camera making . . . plus an investment of millions in precision equipment . . . plus the inventiveness and skill of the largest group of camera craftsmen ever brought together.

KODAK VIGILANTS

Brilliant "moderns" for album-size pictures

THESE modern cameras for $2\frac{1}{4} \times 3\frac{1}{4}$ - or $2\frac{1}{2} \times 4\frac{1}{4}$ -inch pictures are especially noteworthy because

they offer a surprising number of improvements at moderate cost. They have a distinctive ten-point support, by which the lens and shutter are erected and held with exceptional precision to assure sharp pictures. All the lenses are genuine Kodak Anastigmats, topped by the $f/4.5$ Special. Paired with them are shutters thoroughly tested for accuracy . . . for time-after-time uniformity of speeds. They include the Supermatic . . . the world's finest high-speed between-the-lens shutter.

The camera bed is opened . . . and also released for closing . . . through a single push button. You sight on your subject from waist level or eye level, for Vigilants have both direct-view and reflecting finders. You release the shutter by means of a button located on the camera body to minimize danger of movement. Though at your finger tips as you make the picture, this device is automatically retracted to an out-of-the-way position when you close

6

● Five-point support on each side positions lens and shutter with great accuracy, to assure excellent pictures.

● Pressing a button releases bed for opening . . . same button frees it for closing when picture has been made.

● Shutter-release button, at your finger tips when in use, is retracted to position close to body when camera is closed.

● Supermatic shutter, with 9 speeds from 1 to $1/400$ second, is unsurpassed in accuracy of speeds, design, finish.

the camera. And if you want to attach a cable release, you will find a socket for it placed ingeniously in the top of this same button.

These features, plus general construction that is typically Eastman in its reliability, add up to outstanding picture-making proficiency. You will find the Kodak Vigilants soundly engineered, carefully equipped, completely competent.

DETAILS Six-16's make $2\frac{1}{2} \times 4\frac{1}{4}$ -inch pictures on No. 616 Kodak Films; Six-20's, $2\frac{1}{4} \times 3\frac{1}{4}$ -inch pictures on No. 620 Kodak Films. Diomatic shutter has settings for 1/25, 1/50, 1/100 second, time, "bulb"; Kodamatic, 1/10, 1/25, 1/50, 1/100, 1/200 second, time, "bulb," delayed action; Supermatic, 1, 1/2, 1/5, 1/10, 1/25, 1/50, 1/100, 1/200,

1/400 second, time, "bulb," delayed action. All models have apertures to $f/32$. Self-erecting front. Focusing by revolving lens mount, from infinity to $3\frac{1}{2}$ feet on Six-20's, infinity to 4 feet on Six-16's. Threaded supplementary socket on shutter takes either cable release or flash synchronizer. Kodak Parallax Correction Finder regularly supplied on $f/4.5$ and $f/4.5$ Special models, and may be substituted for regular eye-level finder on $f/8.8$ and $f/6.3$ models (see price below). Vertical and horizontal tripod sockets; also supports for resting camera in either position on flat surface. Creased black grain covering (genuine pin-seal grain leather on $f/4.5$ Special models). Dimensions and weights: $f/8.8$, $f/6.3$, $f/4.5$ models—Six-16's, $7\frac{7}{8} \times 4 \times 1\frac{7}{8}$ inches, 32 ounces; Six-20's, $6\frac{9}{16} \times 3\frac{11}{16} \times 1\frac{3}{4}$ inches, 23½ ounces; $f/4.5$ Special models—Six-16, $8 \times 4\frac{1}{8} \times 1\frac{7}{8}$ inches, 34 ounces; Six-20, $6\frac{11}{16} \times 3\frac{7}{8} \times 1\frac{3}{4}$ inches, 24½ ounces.

KODAK VIGILANT JUNIORS

Capable new Kodaks at low cost

When you inspect a Vigilant Junior, you will find that it opens by means of a push button . . . and the same button frees the bed for closing. As you open the camera, the lens and shutter are not only erected, but are positioned with unusual accuracy in relation to the film. Utilizing five points of support on each side, this precise new erecting mechanism gives every user extra assurance of sharp pictures.

FOUR distinguishing features will help you to decide whether one of these new Kodaks is the camera for you. All of the models make album-size pictures. Their operation is simple and quick. They are decidedly inexpensive. And, in spite of their low cost, they offer improvements that have heretofore been available only on higher-priced cameras . . . features that truly spell both added picture quality and greater convenience.

There is a choice of two lens-and-shutter combinations, both reliable and both easy to work. All models have direct-view and reflecting finders, so that you can sight on the subject from either eye level or waist level. Two tripod sockets are provided for use in making time exposures. Roomy interiors make for quick loading, and, once this operation is completed, you can count on easy, enjoyable, successful picture taking.

8

● Eye-level finder in use. Provision of reflecting finder, at upper left, permits "shooting" from waist level as well.

● Five points of support for erecting struts on each side of camera position lens with great rigidity and accuracy.

● Convenient push button opens camera. After picture has been made, same button frees camera bed for closing.

● Tan leather Snap-sacks, available for all Kodak Vigilant Junior models, have both hand and shoulder straps.

If, like many other people, you are looking for a simple, economical folding camera, see the Kodak Vigilant Juniors. They afford large pictures . . . and *good* pictures . . . at a small initial cost.

DETAILS Six-16's make 2½ x 4¼-inch pictures on No. 616 Kodak Films; Six-20's, 2¼ x 3¼-inch pictures on No. 620 Kodak Films. Models with Kodet lens and Dak shutter have fixed focus (no focusing required); adjustments for snapshot, time, and "bulb" exposures; aperture range from f/12.5 to f/32. Models with Bimat lens and

Dakon shutter have simple 3-point focusing by revolving lens mount—adjustable for distances of 5 to 8 feet, 8 to 15 feet, and beyond 15 feet; shutter speeds of 1/25, 1/50 second, time, "bulb"; aperture range from f/11 to f/32. All models have trigger shutter release (cable release may be added); folding direct-view eye-level finder—also reflecting waist-level finder, reversible for horizontal or vertical views. Bed support to hold camera in vertical position on flat surface—also two sockets, for attaching tripod, Kodapod, or Optipod. Black morocco-grain covering. Dimensions and weights: Six-16's, 8 x 4⅜ x 1⅞ inches, 29 ounces; Six-20's, 6⅝ x 3⅞ x 1¾ inches, 23 ounces.

● Simplest Vigilant Junior models—those fitted with Kodet lens and Dak shutter—require no focusing.

● Models equipped with Bimat lens give added scope, and are easily focused by revolving the lens mount.

KODAK MONITORS

The famous folding Kodaks at their finest

IN THE Kodak Monitors you will discover the most expertly designed cameras available in their class. To the making of their large

pictures they bring highly advanced construction, exceptional lenses and shutters, and many important refinements. The result is a breadth of photographic scope and a degree of certainty and convenience that you will sense as soon as your dealer shows you a Monitor.

Lens-and-shutter combinations are the highly corrected Kodak Anastigmat $f/4.5$ in Kodamatic shutter and the even more precise Kodak Anastigmat Special $f/4.5$ in Eastman's new but already famous nine-speed Supermatic. They are brought into position . . . and held in exact, rigid alignment with the film plane . . . by scientific ten-point support of the erecting arms. Exposures are normally made by a shutter release button located on the camera body and automatically retracted when the camera is closed. The

button has a socket to receive a cable release, and another socket on the shutter itself takes either cable release or flash synchronizer.

The handsome satin-chrome turret houses further conveniences

10

● A part of the mechanism of the highly precise nine-speed Supermatic shutter.

● Roomy interiors and floating film rollers make loading and winding unusually easy.

● A single push button both opens the camera and releases the bed for closing.

● The Kodak Parallax Correction Finder assures extra-accurate sighting from eye level.

● Turret controls of the Kodak Monitors: (left to right) film-winding knob, opening-closing button, exposure counter, direct-view finder, universal accessory clip, body shutter release, depth-of-field indicator (on *f*/4.5 Special models only).

and safeguards: a device that stops the film at the correct point as you advance it . . . a counter that shows the exposure number . . . a mechanism that prevents double exposures. To the right of the eye-level finder is a clip that takes the Kodak Service Range Finder, and on the *f*/4.5 Special models the turret also carries a depth-of-field indicator.

Mere enumeration of features cannot give you a full appreciation of the Monitors. See, and study, the cameras themselves at your first opportunity.

DETAILS Six-16's make $2\frac{1}{2} \times 4\frac{1}{4}$ -inch pictures on No. 616 Kodak Films; Six-20's,

$2\frac{1}{4} \times 3\frac{1}{4}$ -inch pictures on No. 620 Kodak Films. Focal lengths: Kodak Anastigmat *f*/4.5—Six-16, 126 mm.; Six-20, 103 mm.; *f*/4.5 Special—Six-16, 127 mm.; Six-20, 101 mm. Focusing (by revolving lens mount): Six-16's, infinity to 4 feet; Six-20's, infinity to $3\frac{1}{2}$ feet. Aperture range, *f*/4.5 to *f*/32. Shutter settings: Kodamatic—1/10, 1/25, 1/50, 1/100, 1/200 second, "bulb," delayed action; Supermatic—1, 1/2, 1/5, 1/10, 1/25, 1/50, 1/100, 1/200, 1/400, "bulb," delayed action. Time exposures with aid of T.B.I. Cable Release No. 2 (extra). Self-erecting front. Kodak Parallax Correction Finder (eye-level); reversible waist-level finder. Horizontal, vertical tripod sockets. Aluminum body, with tooled black grain covering (genuine pin-grain seal leather on *f*/4.5 Special models). Dimensions and weights: Six-16's, $8 \times 4\frac{1}{4} \times 1\frac{5}{16}$ inches, $37\frac{1}{2}$ ounces; Six-20's, $6\frac{3}{4} \times 4 \times 1\frac{3}{4}$ inches, $27\frac{1}{2}$ ounces.

3A KODAK

SERIES II

*The Kodak that makes
postcard-size negatives*

IF YOU want plus-size prints without resorting to enlarging, 3A Kodak, Series II, is likely to be your camera. It makes $3\frac{1}{4} \times 5\frac{1}{2}$ -inch negatives . . . as big as postcards. Fine quality in the pictures is assured by the Kodak Anastigmat $f/6.3$ lens in Diodak shutter, and they are easy

to make because of the simple, dependable operating procedure.

The 3A Kodak has long been the favorite of many amateur photographers. In the present model this popular camera takes on the full effectiveness of modern design and equipment.

DETAILS Makes $3\frac{1}{4} \times 5\frac{1}{2}$ -inch pictures on No. 122 Kodak Films. Lens, Kodak Anastigmat $f/6.3$; focal length, 170 mm. Aperture range, $f/6.3$ to $f/45$. Diodak shutter; settings for $1/10$, $1/25$, $1/50$, $1/100$ second, time, and "bulb"; trigger, cable releases. Reflecting waist-level finder (direct-view finder may be added as an accessory). Focusing from infinity to 6 feet by shifting draw front. Morocco leather covering; metal side panels with chromium and black finish. Dimensions, $10 \times 4\frac{1}{8} \times 2$ inches. Weight, 50 ounces.

12

● The finder supplied on 3A Kodak, Series II, is of the brilliant reflecting type, reversible for vertical or horizontal pictures.

● The accessory Direct-View Finder enables you to use the 3A Kodak, Series II, at eye level as well as at waist level.

● The lined black leather case, supplied with hand and shoulder straps, affords the protection every good camera deserves.

SUPER KODAK

SIX-20

The camera with the electric eye

THIS remarkable Kodak represents the first practical application of a light-measuring cell coupled with a camera diaphragm to give automatic exposure control. Because of this feature, plus a new-type focusing finder and other refinements, Super Kodak Six-20 attains a long-sought photographic ideal. It offers the great scope of a fast lens, speedy shutter, and variable diaphragm, yet its operating simplicity is comparable with that of a box camera.

In using this revolutionary Kodak, you simply choose a shutter speed to fit your subject and bring the subject into focus by a turn of the lens mount. As you trip the shutter, the diaphragm is automatically set at the proper opening to give optimum exposure.

DETAILS Makes $2\frac{1}{4} \times 3\frac{1}{4}$ -inch pictures on No. 620 Kodak Films. Kodak Anastigmat Special $f/3.5$ lens; focal length, 100 mm. Built-in shutter; speeds, 1, $1/2$, $1/5$, $1/10$,

$1/25$, $1/50$, $1/100$, $1/200$ second; self timer. Diaphragm apertures (range, $f/3.5$ to $f/22$) automatically selected by photoelectric cell for all hand-held shutter speeds. Built-in coupled split-field combination range and view finder. Double-exposure prevention. Dimensions, $8\frac{3}{16} \times 3\frac{13}{16} \times 2\frac{3}{8}$ inches. Weight, 44 ounces. *For further details, ask your dealer for special folder.*

JIFFY KODAKS

Box-camera simplicity...folding-camera style

MANY people who hesitate to carry box cameras would, nevertheless, like to have the benefit of their pronounced operating simplicity. Jiffy Kodaks are a happy solution for such people, as they are for many others who want to make pictures in the easiest possible way.

The Jiffys are stylish and compact folding cameras, yet they are actually no more complicated than a box model. Press a button—the camera opens and the front springs out into position. Sight on your subject and press a trigger—the picture is made. Return the front

to its original position and your camera, as easy to work as a Brownie, again takes on the slender, dignified lines of the folding type. Any of the three models is handy to carry, and Jiffy Kodak

16

● Soft leather cases, with hand straps, are available for Jiffy Kodaks Six-16 and Six-20. A shoulder strap may also be had at nominal extra cost.

V.P. is so small that it can be readily slipped into a pocket or handbag.

Convenience and style are, however, only a part of the Jiffy story. All three models make pictures large enough to mount in an album. Furthermore, they're definitely good pictures... the sound Eastman design and carefully tested equipment see to that. And, naturally, you can "shoot" Jiffy pictures fast, for the same construction that makes the cameras easy to operate gets them into action swiftly when the need arises. You will be interested to see and handle these popular Kodaks at your dealer's.

DETAILS Jiffy Kodaks, Series II—Six-16 makes $2\frac{1}{2} \times 4\frac{1}{4}$ -inch pictures on No. 616 Kodak Films; Six-20, $2\frac{1}{4} \times 3\frac{1}{4}$ -inch pictures on No. 620 Kodak Films. Twindar lens with simple two-position focusing for distances of 5 to 10 feet, and beyond 10 feet, by revolving lens mount. Built-in shutter with snapshot and time actions, trigger release. Two crowned brilliant reflecting finders, for vertical and horizontal pictures. Spring-actuated front, controlled by push button. Aluminum body with black pin-

● The eye-level finder of Jiffy Kodak V.P. opens at a touch... can be folded out of the way after the picture has been made.

● The touch of a button springs the front out into position. After the exposure the front is simply pressed back to the locked position.

● The "V.P." model's lined cowhide leather case (extra) provides ample protection and carrying ease for this smart little camera.

KODAK BANTAMS

*Small cameras that
lead to big pictures*

THE Bantam family, comprising three of the most convenient picture takers ever designed, are definitely built around the idea of big pictures from small cameras. They are palm-size, yet through modern photofinishing methods may lead to prints $2\frac{3}{4} \times 4$ inches . . . almost as large as the cameras themselves. You load easily and quickly with Kodak Films that are decidedly inexpensive—in special eight-exposure rolls. Pressing a button springs the lens out into position, ready for the picture. And not to be overlooked is the fact that you don't

have to watch the window while winding to the next exposure: a special device centers the film . . . locks it in position.

The three Kodak Bantams have successively wider scope. The $f/8$ model makes good black-and-white snapshots under average conditions, without adjustment of any kind. The $f/6.3$ model brings users the lens speed of the Kodak Anastigmat $f/6.3$, and makes snapshots or time exposures. Photography with either of these dependable, inexpensive little cameras is worth investigating.

In the $f/4.5$ model, Bantam versatility is stepped up greatly by the fast Kodak Anastigmat Special $f/4.5$ lens, a shutter with speeds up to

18

● Kodak Bantam $f/4.5$ has the sturdy, precise construction so essential in a fine "miniature."

KODAK BANTAM $f/8$

1/200 second, and extra-accurate construction. These factors permit enlargement far beyond the standard 2 $\frac{3}{4}$ x 4-inch size, and adapt Kodak Bantam *f*/4.5 not only to varied black-and-white photography but also to the making of vivid full-color Kodachrome transparencies. A true precision miniature, this camera is capable of dealing with almost any situation, whether monochrome or Kodachrome picture making is the order of the day.

DETAILS Kodak Bantams make 28 x 40-mm. negatives on No. 828 Kodak Films. Standard enlarged print size, 2 $\frac{3}{4}$ x 4 inches. Folding optical eye-level finder (open-frame on *f*/8 model). *F*/8 model: snapshot action; aperture, *f*/8; fixed focus; black molded body, grained surface. *F*/6.3 model: snapshot, time actions; apertures, *f*/6.3, *f*/11; fixed focus; black molded body with ornamental ribbing. *F*/4.5 model: shutter

● Hardly a handful, Kodak Bantams are among the most convenient cameras ever designed.

settings—1/25, 1/50, 1/100, 1/200 second, time, "bulb"; body shutter release; aperture range, *f*/4.5 to *f*/16; focusing, by revolving lens mount, from infinity to 2 $\frac{1}{2}$ feet; die-cast metal body, black grained covering. Dimensions (vary slightly according to model): 4 $\frac{1}{2}$ x 2 $\frac{11}{16}$ x 1 $\frac{1}{2}$ inches. Weights: *f*/8, 7 ounces; *f*/6.3, 8 ounces; *f*/4.5, 12 ounces.

KODAK 35'S

*The "more for
your money"
miniatures*

KODAK 35'S are miniature cameras of the popular 35-millimeter type. More than that, their fine design and construction assure the big enlargements . . . the brilliant, detailed Kodachrome images . . . on which miniature-camera users count. They have not only fast, color-corrected lenses, and shutters of unusual accuracy, but also the extreme exactness which alone

can stamp a group of cameras as true precision miniatures. You will find that in design, workmanship, and reliability of operation, they are not matched by any similar cameras in their price range.

Aside from their basic soundness, the 35's have such conveniences as the automatic film stop and exposure counter. $F/4.5$ and $f/3.5$ models add not only wider scope but double-exposure prevention, delayed-action adjustment to enable the photographer to get into the picture, and automatic shutter setting. Heading the group is the superb model with coupled split-field range finder, illustrated at left. You turn a handy wheel, bring the halves of the range-finder image into alignment, and your subject is in focus.

If your camera tastes run to moderately priced

22

A Sturdy, precision-built body of damage-resistant material.

B Superior tongue-and-groove seal between body, back gives complete light-leak protection needed for good pictures.

C Precision-finished film track, to avoid binding or tearing of film.

D Positive film-centering mechanism stops film at proper point as it is advanced . . . positions new section exactly.

E Machined sprockets and gears of fine materials, for accurate operation.

F Carefully machined shafts in phosphor-bronze bushings assure long life.

G Film-pressure plate adjusted to 1/1000-inch for sharp, detailed pictures.

H Strong latch locks camera securely.

35-mm. miniatures, choose a Kodak 35 and use the wide range of Kodak Films available. Then you will be set for years of varied, enjoyable picture taking.

DETAILS Kodak 35's make 24 x 36-mm. negatives on No. 135 Kodak Films. Standard enlarged print size, $2\frac{3}{4} \times 4$ inches. Lenses and shutters: Kodak Anastigmat $f/5.6$ in Kodex, with 1/25, 1/50, 1/100 second, time, "bulb." Kodak Anastigmat $f/4.5$ in Diomatic, with 1/25, 1/50, 1/100, 1/150, time,

"bulb," delayed action. Kodak Anastigmat Special $f/3.5$ in Kodamatic, with 1/10, 1/25, 1/50, 1/100, 1/200, time, "bulb," delayed action. Focusing, by revolving lens mount, from infinity to 4 feet. Optical eye-level view finder. Dimensions and weights: Range finder model, $5\frac{7}{16} \times 3\frac{7}{16} \times 3\frac{1}{16}$ inches, 24 ounces; regular models, $5\frac{7}{16} \times 2\frac{3}{4} \times 2\frac{3}{4}$ inches, 18 ounces.

● Aided by Kodak Combination Lens Attachments, Kodak 35's give unlimited variety of effects.

KODAK EKTRA

The world's most distinguished camera

the field angle of any of the lenses, and automatically compensating for parallax. Also built in, and usable with all of the lenses, is a brilliant advanced-type military range finder which, because of its sharply split field, high image magnification, and exceptionally wide base, gives the

AMONG all the world's still cameras there is no parallel to the new Kodak Ektra. Result of years of research and planning, it is the first camera which fully capitalizes the newer films and other modern photographic materials. It meets to an unprecedented degree the demand for super-precision and super-flexibility. It gives finer results, over a wider range of photography, than any other existing camera.

One of the chief factors contributing to the Ektra's great picture-making scope is the six superb, interchangeable Kodak Ektar lenses of various focal lengths available for it. Complementing them is a focal plane shutter giving exceptionally even exposure over the entire field, and affording speeds of great accuracy and stability up to 1/1000 second. An integral part of the camera is a variable-power view finder, instantly adjustable to

most precise automatic focusing obtainable on any camera. A miniature-camera feature entirely exclusive to the Ektra is the provision for interchangeable magazine backs. By means of extra backs any of eight different 35-millimeter Kodak Films can be quickly interchanged between exposures.

The exquisite, exhaustively precise Kodak Ektra marks an epoch in camera construction. Eastman presents it, without reservation, as the world's most distinguished camera.

DETAILS Makes 24 x 36-mm. negatives on No. 135 Kodak Plus-X, Super-XX, Panatomic-X, Infrared, Micro-File, Direct Positive, or Kodachrome (regular or Type A) Film. Lenses: surface-treated by process that improves clarity and brilliance of negatives; choice offered—50-mm. $f/1.9$; 50-mm. $f/3.5$; 35-mm. $f/3.3$; 90-mm. $f/3.5$; 135-mm. $f/3.8$; 153-mm. $f/4.5$. Focal plane shutter with predetermined variable slit; settings, 1, $1/2$, $1/5$, $1/10$, $1/25$, $1/50$, $1/100$, $1/250$, $1/500$, $1/1000$ second, "bulb," delayed action. SIX-20 FLASH BROWNIE

KODAK DUEX

*A new miniature for
album-size pictures*

THIS miniature camera is of the popular "split 620" type. It makes sixteen pictures, instead of the usual eight, on a roll of Kodak Film No. 620. The resulting film economy is obvious, and the pictures— $1\frac{5}{8} \times 2\frac{1}{4}$ inches—are big enough for album use. In addition, modern photofinishing methods lead to prints $2\frac{3}{4} \times 3\frac{3}{4}$ inches.

Aside from its film economy, the Kodak Duex is notable for its easy operation, genuine photographic ability, and low price. Its spiral-threaded lens tube, which gives it a compactness comparable with that of a folding camera, is

illustrated below. To appreciate this, you must see the Duex itself.

DETAILS Makes $1\frac{5}{8} \times 2\frac{1}{4}$ -inch pictures on No. 620 Kodak Films. Standard enlarged print size, $2\frac{3}{4} \times 3\frac{3}{4}$ inches. Kodak Doublet lens; fixed focus (no focusing required). Snapshot and "bulb" exposures. Enclosed optical eye-level finder. Sturdy, damage-resistant molded construction.

Kodak Duex, with Kodak Doublet lens, braided neck cord
Kodak Verichrome, Super-XX, Plus-X, or Panatomic-X Film (16 exposures)

For prices please turn to supplement at back of catalog

28

● Though built without bellows, Kodak Duex has the compactness of a folding camera. One full turn of a spiral-threaded tube brings the lens out into position. A turn in the opposite direction and the camera is back to its slim shape.

ONE turn of the spiral front brings the Bullet's lens into position. Then just aim and "shoot" . . . as simple a photographic formula as you'll find anywhere. Turn back the lens, fold the finder, and the Bullet fits snugly in your hand, pocket, or handbag. Most impor-

BULLET

tant of all, it makes thoroughly satisfying album-size pictures. New in design, reliable in results, and low in price, it is a real camera bargain.

DETAILS Makes $1\frac{5}{8} \times 2\frac{1}{2}$ -inch pictures on No. 127 Kodak Films. Meniscus lens. Shutter with snapshot and "bulb" actions. Folding eye-level direct-view finder. Molded construction, with raised ribbing and permanent black glossy finish. Removable back. Dimensions, $4\frac{7}{8} \times 2\frac{13}{16} \times 1\frac{7}{8}$ inches. Weight, 7 ounces.

SIX-20 BULL'S EYE

YOUNG people and beginners of all ages are instantly attracted to this modern box-type camera. Its glossy black molded body tapers toward the front, while the back is gently curved. These details of design not only lead to unusual compactness, but, together with the rounded edges and raised ribbing, give the Bull's Eye distinctive looks. Operation is, of course, exceptionally simple. You load, sight on your subject, and trip the shutter. The "spyglass" finder shows the subject brilliantly and accurately. The tested lens and smooth-working shutter do the rest to give you good pictures. In short, the Bull's Eye qualifies as a real star among easy-to-use, inexpensive cameras.

DETAILS Makes $2\frac{1}{4} \times 3\frac{1}{4}$ -inch pictures on No. 620 Kodak Films. Meniscus lens; fixed

focus. Snapshot, "bulb" actions. Tubular optical eye-level finder. Braided strap, for carrying and steadying camera. Dimensions, $3\frac{5}{8}$ inches high, $4\frac{5}{16}$ inches wide, $4\frac{1}{16}$ inches thick. Weight, 16 ounces.

BROWNIES

The favorite box cameras of millions

BROWNIES are the world's best-known and most widely used box cameras, because they combine great simplicity with pronounced photographic ability. The basic Brownie formula of "load, aim, shoot" yields good pictures with amazing regularity. The models shown here have refinements that make them even more capable than their predecessors.

The Baby Brownie and Baby Brownie Special are "babies" in size and price, but full-fledged cameras nevertheless. They make good, sizable snapshots. Extremely easy to use, they are unsurpassed "starters" for beginners of all ages.

Six-16 and Six-20 Brownie Juniors are adjustable for time expo-

sures as well as snapshots, and make larger pictures than the Baby Brownies . . . but they are just as simple to operate. Once loaded, they require only sighting on the subject, tripping the shutter. Neatly finished and low in price, they are sound photographic investments.

Efficient new members of this famous family are the Target Brownies Six-16 and Six-20. Like the Juniors, they make large pictures, but they have a new, specially accurate single-action shutter, handy circular film-winding knob, and brilliant view finders for extra-easy sighting.

Finest of the whole group are the Six-16 and Six-20 Brownie Specials. Their compact, tapered form makes them distinctively smart, and the "spyglass" finder and plunger shutter release bring added certainty of excellent pictures.

DETAILS Baby Brownie, Baby Brownie Special make $1\frac{5}{8} \times 2\frac{1}{2}$ -inch pictures on No. 127 Kodak Films; Six-20 models, $2\frac{1}{4} \times 3\frac{1}{4}$ -inch pictures on No. 620 Kodak Films;

SIX-16 BROWNIE SPECIAL

BROWNIE REFLEX

A reflex-type miniature for young and old

LOOK into the hooded finder of the Brownie Reflex: there is your subject in full picture size—sharp, clear. Press the shutter release: the picture is yours. Because of the big, fully lighted image, the com-

pletely simple operation, it's easy for anyone to use a Brownie Reflex successfully. And though it is definitely a miniature, it gives you, without enlargement, pictures in the substantial, popular $1\frac{5}{8}$ -inch-square size. Through modern photofinishing methods it can lead to prints $2\frac{3}{4} \times 2\frac{3}{4}$ inches. You use economical Kodak Film No. 127, and get twelve pictures on a roll.

In spite of these features—in spite of its careful, accurate construction and expensive-looking finish, the Brownie Reflex is priced decidedly low. One of the most intriguing little cameras ever offered, it is bound to interest you on sight.

DETAILS Makes $1\frac{5}{8} \times 1\frac{5}{8}$ -inch pictures on No. 127 Kodak Films. Tested meniscus lens; fixed focus (no focusing required). Snap-shot and "bulb" actions; plunger release. Black body of tough molded material; morocco-grain surface finish. Ornamental satin-aluminum top and bottom covers. Etched metal front plate. Tripod socket. Braided black neck cord. Dimensions, $4\frac{3}{4} \times 3\frac{1}{2} \times 2\frac{1}{4}$ inches. Weight, 15 ounces.

32

● In the big finder you see your picture full-size, brilliantly sharp, while you're making it.

● The finder hood folds flush . . . springs open at a touch when you're ready to use it.

● The precision-molded film holder slips readily off the bottom of the camera for quick loading.

SIX-20 FLASH BROWNIE

*An inexpensive
all-round camera*

No. 5 lamp may also be used with proper adapter. 4-inch nickeled steel reflector.

Six-20 Flash Brownie
Flashholder for Six-20 Flash Brownie (with-
out lamps and batteries)
Kodak Verichrome, Super-XX, Plus-X, or
Panatomic-X Film (8 exposures)

For prices please turn to supplement
at back of catalog

HERE is a reliable low-cost Eastman camera with which anyone can make good Photoflash shots. And though it is designed especially for picture taking at night, the Six-20 Flash Brownie becomes a full-fledged daylight camera, trim and efficient, when used without the Flashholder. It is a real all-round model, with dependable flash synchronization added to the well-known Brownie features.

For Photoflash photography you attach the Flashholder, fit it with flash bulb and batteries, and operate according to easy directions. For daytime pictures you loosen two retaining screws, remove the Flashholder, and proceed as with any simple box camera. Let your dealer give you a demonstration.

DETAILS Makes $2\frac{1}{4} \times 3\frac{1}{4}$ -inch pictures on No. 620 Kodak Films. Meniscus lens, with simple two-position focusing. New single-action self-setting shutter with instantaneous and "bulb" settings, plunger-type release with safety latch. Enclosed "spy-glass" eye-level view finder. Covered metal body. Flashholder, of tough black molded material, has two receptacles for size AA flashlight batteries (not included). Takes No. 11A, 16A, or 21 Photoflash lamp.

KODAK ENLARGERS

Dependable equipment for making big prints

● Kodak Advance Enlarger—efficient, inexpensive.

KODAK ADVANCE ENLARGER

A sturdy, capable enlarger that is moderately priced. It accommodates all amateur negatives from 35-mm. and Bantam to $3\frac{1}{4} \times 5\frac{1}{2}$ inches (of which a $3\frac{1}{4} \times 4\frac{1}{4}$ -inch portion can be enlarged). With its standard 4-inch $f/11$ lens it makes fine enlargements up to $5\frac{1}{2}$ diameters at the baseboard. For greater magnifications, or for greater printing speed, any of the Kodak Precision Enlarger lenses (see opposite page) and the Kodak 2-inch Projection Anastigmat $f/6.3$ can be used interchangeably. Other features: rigid construction; even illumination; simple, direct adjustments.

KODAK TRANSPARENCY ENLARGER

A simple means of making black-and-white negatives from miniature Kodachrome transparencies. Makes eight enlarged negatives, approximately $2\frac{1}{8} \times 3\frac{1}{8}$ inches, on a roll of No. 616 Kodak Film. The transparency—unmounted, mounted in glass, or in a Kodaslide—is clamped in position before the lens. Exposure is made by placing the Enlarger close to a brilliant light, such as a No. 1 Photoflood, and opening the shutter. A set of Wratten Tricolor Filters is supplied with the Enlarger.

For prices please turn to supplement
at back of catalog

● Kodak Transparency Enlarger makes black-and-white negatives from Kodachrome transparencies.

● The super-versatile Kodak Precision Enlarger.

KODAK PRECISION ENLARGER A high-precision machine that not only makes enlargements of superior quality but that can be adapted to copying, titling, photomicrography, macrophotography, and making color-separation negatives. It can also be converted into a double-extension-bellows camera. In other words, it is the nucleus for interchangeable precision photographic apparatus having wide use both in the darkroom and in actual photography. In addition to the lenses listed, three Kodak Projection Ektars and a number of accessories

are available. For complete details, ask your dealer for special booklet.

KODAK PORTABLE MINIATURE ENLARGER

A precision instrument that provides new efficiency and convenience in enlarging from 35-mm. or Bantam negatives. It can be quickly taken down and packed in the Carryall Case. The case also accommodates a camera, film, developers, film tank, and other accessories . . . a complete outfit for miniature photography, easy to store, handy to take on trips and vacations. Outside dimensions of the case are $13\frac{3}{4} \times 13\frac{3}{4} \times 6\frac{1}{4}$ inches. The enlarger gives magnifications from about $2\frac{1}{2}$ to 9 diameters at the baseboard—larger by projection to wall or floor.

Kodak Portable Miniature Enlarger

● Assembled, the Kodak Portable Miniature Enlarger makes brilliant enlargements from small negatives.

● Taken down, it fits into the Carryall Case as part of a miniature photographic outfit.

KODAK FILMS

for every need

VERICHROME For surer results in day-in and day-out photography with the average camera. Special double coating offsets reasonable exposure errors. Standard rolls and packs.

SUPER-XX Exceptional speed, for snapshots at night, fast action shots, fully timed negatives under difficult conditions. (To avoid overexposure, do not use in bright sunlight in a camera with only one or two diaphragm openings.) Rolls (including miniature sizes), packs, sheets.

PLUS-X All-round film combining high photographic quality, extra speed, unusually fine grain. Negatives made under adverse conditions yield generous enlargements without perceptible graininess. Rolls (including miniature sizes), packs.

PANATOMIC-X Grain of truly microscopic fineness, and speed ample for ordinary purposes. The film for big, brilliant enlargements. Rolls (including miniature sizes), packs, sheets.

KODACHROME Yields full-color transparencies, for viewing as they are, or, in miniature sizes, for projection on a screen. Prices include processing. Standard miniature transparencies (24 x 36 mm. and 28 x 40 mm.) are returned mounted, ready for projection. Miniature rolls, sheets.

INFRARED With a red filter such as No. 25A, minimizes effect of haze, increases photographic visibility of distant objects. Gives dramatic effects: dark skies, light foliage, hard shadows. Popular rolls (including miniature sizes).

• • •

Other Eastman Films Direct Positive (miniature rolls)—a superior material for making black-and-white positive transparencies by chemical reversal. Micro-File (36-exposure No. 135 rolls)—extremely fine grain, high contrast, for microfilming newspapers, manuscripts, etc. Portrait Panchromatic—a favorite multi-purpose sheet film. Panchro-Press (sheets)—a splendid, physically hardened "press" film. Super Panchro-Press (sheets)—extra speed for adverse light. Tri-X Panchromatic—Eastman's fastest sheet film. Super Ortho Press (sheets and packs)—fine, fast ortho material. Ortho-X (sheets)—top-speed ortho film.

KODACHROME ACCESSORIES

For projecting transparencies

CAMERAS described on pages 18 to 25 of this catalog may, if desired, be loaded with Kodachrome Film in miniature sizes (Nos. K135 and K828). After processing without extra charge, the film is returned to you in the form of full-color transparencies individually mounted as Kodaslides. These can then be viewed as they are, but their matchless beauty can best be appreciated by projecting them in one of the Kodaslide Projectors listed below. Viewed in large size on the home screen with the aid of one of these simple devices, the images have a realism and richness of detail matched only by the original scenes.

For showing in projectors not equipped to take Kodaslides, the transparencies may be slipped into Kodaslide Adapting Frames, or they may be mounted in glass slides by means of materials available for this purpose. For further details see the booklet "Color With Your Miniature Camera."

● Kodaslides (actual size 2 x 2 inches) bring you your Kodachrome transparencies ready for projection.

For prices please see supplement

KODAK DARKROOM OUTFITS (1) The essential materials, plus instructions, for developing and printing in the home darkroom.

KODAFLECTOR SENIOR (2) A new lighting unit for high efficiency from photo lamps in indoor photography.

KODAK HANDY REFLECTORS (not illustrated) Effective cardboard reflectors, with handy measure, for photo lamps in home fixtures.

KODAK COMBINATION LENS ATTACHMENTS (3) A versatile system of attachments that fit nearly all cameras, permitting many combinations of filters, Pola-Screen, diffusion disk, supplementary lenses. Also other attachments for all cameras.

KODAK ALL-METAL PRINTER (4) A modern, ultra-convenient printer that accommodates all amateur-size negatives.

KODAK DAY-LOAD TANK (5) An ingenious tank for daylight processing of 18- or 36-exposure 35-mm. film in magazines.

KODAK REFERENCE HANDBOOK (6) An invaluable new 388-page illustrated book on lenses, filters, films, transparencies, papers, darkroom design, processing, copying, microfilming.

KODAK SENIOR SYNCHRONIZER Speedgun Model E (7) A highly accurate synchronizer especially designed and sized for flash work with Kodaks, at speeds up to 1/400 second.

"HOW TO MAKE GOOD PICTURES" (8) Simple, practical information on all types of pictures. Hundreds of illustrations.

KODAGUIDES (9) A series of handy guides to correct exposure, home lighting, use of filters, development.

KODAK TABLE TOP TRIPOD COMBINATION (10) A versatile camera support for indoor and outdoor use, consisting of Table Top Tripod; Pan-a-pod, an indexed revolving head for panoraming; and Tilt-a-pod, for tilting camera to unusual angles. Units available separately.

• • •

See these accessories at your Kodak dealer's. For other photo accessories, see the booklet "Kodak Picture-Making Aids." For home movie equipment, ask your dealer for a Ciné-Kodak catalog.

Kodachrome Film brings home the highlights of your outings, trips, and vacations in all their vivid color and charm. For miniature cameras that load with Kodachrome Film, see pages 18 to 25. For accessories that help you to enjoy the beauty of their full-color transparencies, see page 37.

KODAK FILMS

for Every Need

WHATEVER the picture situation, load with Kodak Film. Millions have found it doesn't pay to take chances. They use Kodak Film always — and come home secure in the knowledge that their snapshots will "turn out" . . . be all that they should be. Accept nothing but the film in the familiar yellow box — Kodak Film — which only Eastman makes.

NEW — An Important Safety Margin: An exclusive "skiving" process provides, in all popular Kodak Film sizes, a safeguard against light leak along the edges of the film — an extra assurance of better pictures with Kodak Film.
