*The Picture from Home*

# INSIGNIA *of Progress*

---

IT may be safely said, that in no industry has the past and present been welded into a more complete chain, than in photography. And although there seems to be little in common between the tiny film used in the Kodak box of 1888, and the magic ribbon that unfolds its picture story on the screen today, yet, each made the other possible.

For thirty-eight years this growing chain of photographic progress has been linked to the growth and development and broadening of the Eastman products.

The striving for an orthochromatic plate that would not render reds too dark and blues too light, was one of the early steps toward the present day panchromatic plate used by engravers to produce the wonderful color pictures we see in the magazines. And it was the linking up of the tiny Kodak film, grown to the long cinematograph ribbon, with this same panchromatic emulsion, that made possible the color motion pictures.

Similarly the X-Ray emulsion has been applied to a film for dental use, and the emulsion used by the Eastman Company way back in 1882 on its Bromide paper, the kind of paper used for enlargements, is practically the same as that used for the positive film in motion-picture photography.

In making improvements in apparatus and sensitized materials for the professional, opportunity for improvement in some amateur product often becomes apparent. And by the same token it often works the other way about, as in the case of Eastman Portrait Film, where the experience gained in making film base, combined with the knowledge of how to make the

most perfect plate for professional portraiture, made possible a product that is now widely supplanting glass plates in the very best studios. And so every link in photography seems to fit into every other link until it becomes more than a chain—it becomes as a woven suit of mail.

Our organization and our knowledge of things photographic, built up and acquired through nearly four decades of serving these varied, though closely allied, industries, have placed us in a unique position in the production of superior apparatus and material. The very size of the business and its resources have enabled us, for instance, to establish and maintain a Research Laboratory which carries on its work without the necessity of giving a thought to present profit. The truths that it establishes, the concrete facts that it unearths may not all be of intrinsic value today, but many of them will have their direct bearing on the photography of tomorrow.

In cameras and their accessories, in papers and plates and films, the products are used for distinct and widely variant purposes. But whether it be for the professional or the amateur, the surgeon, the scientist or the cinematographer, whether it be for the use of the astronomer in photographing the canals of the planet Mars, the press photographer capturing in its flight the racing automobile, or Mary making a snapshot of her soldier in his uniform, there is an interdependence in the products. The experimental work for bettering one product helps us, so frequently that one might almost say invariably, in making other things better. And having the men who *know*—scientists of the highest technical training, manufacturers whose long experience has taught them where the pitfalls are, experienced photographers with all the details of picture making at their finger tips—our research work counts for something. Having the men, the resources and the experience we are able to experiment with this process and with that piece of apparatus, to apply the acid test, at our own

expense, for the benefit of our customers. Whatever we market, whether a tiny Kodak to the most complex camera for scientific work, from a Brownie film to a Panchromatic plate, from a printing frame to an Anastigmat lens, is made under intelligent, experienced superintendence by men in whom honest workmanship has become a habit.

We not only cannot afford to make it wrong; we can afford to make it right. And we do. And therein lies the secret of Kodak dominance.

### AUTOGRAPHIC PHOTOGRAPHY

Not only have the sensitized products been perfected, but mechanical efficiency is something we have always striven to improve.

In 1914, Autographic photography became a reality. It had its inception because it was needed as a means of identifying unfamiliar scenes and connecting them with dates and places.

Kodak pictures are not made just for the pleasure of the taking, nor for the pleasure of seeing them today or tomorrow. They are made for the fuller pleasure of always remembering somebody, or some interesting place or event, and that is why the Autographic feature was added to all Kodaks and Folding Brownies. Somebody is going to save the Kodak pictures you make today, and no matter if it is many years hence, the fact that they can be readily identified and the dates established, makes them doubly valuable.

The Autographic record is photographically impressed on the film and becomes a part of the negative when the film strip is developed. The prices of Autographic Film and Kodak N. C. Film are the same; the process of development is the same, and either may be used in Kodaks or Brownies.

## THE KODAK RANGE FINDER

The Kodak Range Finder marks another epoch in the history of amateur photography—another important step in Kodak achievements.

When used with the same relative stop openings as other lenses, the high-speed anastigmats are equally simple to work. When used at their full opening they require more accurate focusing, because their depth of focus is then less. That is to say, if the photographer properly focuses on an object 15 feet away, objects 10 feet away and 20 feet away will be sharper

when he uses a small stop than when he uses a large stop, no matter what the type of lens. With the anastigmat, however, objects *at the focused distance* will be more sharply defined than will objects at that same distance made with a single or a rectilinear lens. It is obvious, therefore, that with the anastigmat one must be a fairly good judge of distance when focusing by means of a scale,

SHOWING POSITION OF RANGE FINDER ON  
*3A Special*

because an error in judging distance will be more damaging than with the slower small-stop lenses.

And here is where the Kodak Range Finder comes in. It gives you the correct focus to a hair. Its accuracy would be of material advantage with any camera. Because of the long focus and high-speed lenses used on the No. 1A and No. *3A Special* Kodaks, the Kodak Range Finder has a very important value in its application to those cameras.

EASTMAN KODAK COMPANY

ROCHESTER, NEW YORK  
"The Kodak City"

## VEST POCKET *Autographic* KODAK

IT opens like a flash, to a fixed focus, and instantly is ready for service. And then, just a slight pressure of the shutter release, at the upper right hand side of the front standard, and your exposure is made.

That is the simple story of the simple little Vest Pocket Kodak—the camera that is as small as is practical for a camera to be, and yet make pictures with real photographic quality. And with its autographic feature, it is a veritable vest pocket notebook, adding to the photographic record, the memorandum record of all that goes to make every good time a lasting pleasure. It fits into the day and the place unobtrusively, and though made almost entirely

of metal to stand the knocks and bangs, is so light in weight and compact as to make it convenient to carry at any time. There's always an added pleasure and an advantage in the possession of this little instrument.

The Vest Pocket Autographic Kodak is fitted with No. 0 Kodak Ball Bearing shutter, working without jerk or jar, at speeds of  $\frac{1}{25}$  and  $\frac{1}{50}$  of a second, as well as the time and "bulb" actions. Also fitted with Kodak Auto-time Scale to aid in giving the correct exposure.

It makes pictures  $1\frac{5}{8} \times 2\frac{1}{2}$  inches, loading in daylight with eight-exposure Autographic Film Cartridges (No. A127). The Vest Pocket (\$7.50 model) is supplied with tested meniscus achromatic lens, and the \$9.00 model, with carefully tested Rapid Rectilinear lens, both producing excellent pictures under all ordinary conditions.

The three Anastigmat equipments for the Vest Pocket, *Special*, are as perfect as can be found on any fixed focus hand camera. The Kodak Anastigmat, *f.* 7.7 lens, offers the usual advantages of an anastigmat, so far as sharpness, freedom from astigmatism and definition are concerned. The Kodak Anastigmat and Bausch & Lomb Kodak Anastigmat, *f.* 6.9 lenses, give these same advantages plus the maximum of practical speed in a fixed focus camera.

VEST POCKET KODAK  
(REGULAR) ACTUAL SIZE

The Vest Pocket Kodak has an all-metal body with black enamel finish for the regular model, while the *Special* is covered with finest pin grain Morocco leather.

*Details* For rectangular pictures,  $1\frac{5}{8} \times 2\frac{1}{2}$  inches. Capacity, 8 exposures without reloading. Size of Kodak,  $1 \times 2\frac{3}{8} \times 4\frac{3}{4}$  inches. Weight, 9 ounces. Lens, regular model, meniscus achromatic; for *Special*, Kodak Anastigmat, *f.* 7.7,  $3\frac{3}{8}$ -inch focus; Kodak Anastigmat, *f.* 6.9,  $3\frac{3}{8}$ -inch focus; or Bausch & Lomb Kodak Anastigmat, *f.* 6.9,  $3\frac{1}{2}$ -inch focus. Shutter, Kodak Ball Bearing No. 0. Brilliant reversible finder. All metal body, *Special* covered with pin grain Morocco; nickel and black enamel finish and black leather bellows.

NOS. 1 AND 1A  
*Autographic* KODAK JUNIORS

THE Juniors are thoroughly reliable cameras of high efficiency, easy to operate, and so thin and compact as to be pocketed without inconvenience. They are designed to fill the requirements of either the beginner, or the experienced, and at a low cost.

Though simple in every detail as focusing cameras, they will be supplied, if desired, as fixed focus cameras for those who prefer this feature. As fixed focus cameras, however, they are supplied only with meniscus achromatic lenses, as listed.

Both cameras are fitted with the Kodak Ball Bearing shutter, with cable release; the No. 1 having speeds of  $\frac{1}{25}$  and  $\frac{1}{30}$  of a second, except when supplied with *f.* 7.7 lens, in which case it has the same shutter that is supplied with the No. 1A, with speeds of  $\frac{1}{25}$ ,  $\frac{1}{30}$  and  $\frac{1}{100}$  of a second.

The No. 1 Junior makes  $2\frac{1}{4} \times 3\frac{1}{4}$  pictures, while the No. 1A makes pictures  $2\frac{1}{2} \times 4\frac{1}{4}$  inches, these being the only differences in the two cameras. Both are equipped with the autographic feature for the recording of dates and titles on the film; are well made in every respect, and covered with a good quality of grain leather.

*Details* For rectangular pictures, No. 1,  $2\frac{1}{4} \times 3\frac{1}{4}$  inches; No. 1A,  $2\frac{1}{2} \times 4\frac{1}{4}$  inches. Capacity, No. 1, 6 exposures; No. 1A, 12 exposures without reloading. Size of Kodak, No. 1,  $1\frac{7}{8} \times 3\frac{5}{8} \times 6\frac{5}{8}$  inches; No. 1A,  $1\frac{5}{8} \times 3\frac{3}{4} \times 8$  inches. Weight, No. 1, 23 ounces; No. 1A, 28 ounces. Lenses, meniscus achromatic, Rapid Rectilinear, or Kodak Anastigmat, *f.* 7.7. Shutter, Kodak Ball Bearing with cable release. (See page 36.) Brilliant, reversible, collapsible finders.

No. 2C  
*Autographic*  
KODAK JUNIOR

THE 2C Junior is similar, in every way, to the Nos. 1 and 1A Juniors, except in the size of the pictures it makes. It has the same thin, compact form and reliable equipment, but is supplied only as a focusing camera.

The 2C size, which was introduced about two years ago, was designed to retain the same pleasing proportions that have made the 1A and 3A sizes so popular. Its rectangular pictures ( $2\frac{3}{8} \times 4\frac{7}{8}$  inches) fit the view, making a pleasing composition in either the horizontal or vertical shapes.

The camera loads in daylight with ten, six or two-exposure Autographic Film Cartridges, permitting the recording of date

and title, or any data that one may desire on the negative. Though regularly supplied with meniscus achromatic lens, the camera, if desired, will be fitted with either Rapid Rectilinear or Kodak Anastigmat, *f.* 7.7 lens, the latter giving the advantages of a fine anastigmat equipment at a low price.

The shutter is the Kodak Ball Bearing with cable release, working at speeds of  $\frac{1}{25}$ ,  $\frac{1}{30}$  and  $\frac{1}{100}$  of a second, also for "bulb" and time exposures. The leaves of this shutter, opening in the shape of a star, admit the maximum of light for a given exposure.

The camera has the Kodak characteristics of simplicity, compactness and reliability, and offers the Kodak high standard of efficiency. It has automatic focusing lock, a finder of the new collapsible, reversible type, and two tripod sockets. The back and bed are of aluminum, covered with fine seal grain leather, black leather bellows, and metal parts in nickel and black enamel.

*Details* For rectangular pictures,  $2\frac{7}{8} \times 4\frac{7}{8}$  inches. Capacity, 10 exposures without reloading. Size of Kodak,  $1\frac{3}{4} \times 4\frac{3}{8} \times 8\frac{3}{4}$  inches. Weight, 38 ounces. Lens, meniscus achromatic. Also supplied with Rapid Rectilinear or Kodak Anastigmat, *f.* 7.7 lens,  $5\frac{3}{4}$ -inch focus, if desired. Shutter, Kodak Ball Bearing with cable release. (See page 36.) Brilliant, reversible, collapsible finder. Two tripod sockets. Black leather bellows.

No. 3A  
*Autographic*  
**KODAK JUNIOR**

**H**ERE is a new camera, which is designed to meet the requirements of those who prefer the simplicity of the Junior line, in the 3A size. It has the same general characteristics as the other Juniors; the same relatively thin, compact form; the same reliable equipment, and like the 2C, is supplied only as a focusing camera.

The No. 3A Kodak Junior makes pictures  $3\frac{1}{4} \times 5\frac{1}{2}$  inches—the most popular of amateur sizes—which is adaptable to almost any composition, whether in the vertical or horizontal position. It loads with Autographic Film Cartridges of ten, six and two exposures, and, of course, has the autographic

feature so that the dates and titles may be written on the films at the time of exposure.

The camera is regularly supplied with meniscus achromatic lens, but, if preferred, may be had with either Rapid Rectilinear, or Kodak Anastigmat, *f.* 7.7 lens, the latter a lens of our own manufacture which has given excellent results.

The shutter used is the No. 2 Kodak Ball Bearing with both finger and cable release working automatically, at speeds of  $\frac{1}{25}$ ,  $\frac{1}{50}$  and  $\frac{1}{100}$  of a second, also for "bulb" and time exposures.

The camera is carefully constructed throughout, the back and bed are of aluminum, covered with fine seal grain leather, the bellows of black leather and metal parts in nickel and black enamel. The finder is large and of the collapsible, reversible type.

*Details* For rectangular pictures,  $3\frac{1}{4} \times 5\frac{1}{2}$  inches. Capacity, ten exposures without reloading. Size of Kodak,  $1\frac{1}{2} \times 5\frac{1}{2} \times 9\frac{1}{4}$  inches. Weight, 35 ounces. Lenses, meniscus achromatic, Rapid Rectilinear, focus  $6\frac{5}{8}$  inches, or, if desired, the Kodak Anastigmat, *f.* 7.7 lens,  $6\frac{1}{2}$ -inch focus. Shutter, Kodak Ball Bearing No. 2, with cable release. Automatic focusing lock. Two tripod sockets. Brilliant, collapsible, reversible finder. Black leather bellows. Covering, seal grain leather.

No. 1A  
*Autographic KODAK*

HERE is a thin, compact Kodak in the 1A size, offering every photographic advantage that could be desired by the most exacting amateur. In this model there have been incorporated many new features, adding not merely to its appearance, but to its efficiency as well. It is easy to load, quick to operate, and its compactness makes it a desirable companion on any occasion.

The back is so cleverly devised as to permit free and instant access to all interior parts; the finder is large and of the collapsible, reversible, skeleton type, that is easily accessible for cleaning.

The No. 1A makes  $2\frac{1}{2} \times 4\frac{1}{4}$  pictures, a shape that is widely adaptable to either horizontal or vertical composition. It has the autographic feature for the recording of data on the film, and loads in daylight with twelve, six and two-exposure Autographic Film Cartridges.

Although regularly supplied with the best quality Rapid Rectilinear lens, it will be fitted, if desired, with Kodak Anastigmat lens, *f.* 7.7, giving the advantages of a fine anastigmat equipment at a low price. The shutter is the Kodak Ball Bearing, with cable release, working at speeds of  $\frac{1}{25}$ ,  $\frac{1}{30}$  and  $\frac{1}{60}$  of a second, and time and "bulb" exposures.

It has an improved automatic focusing lock, two tripod sockets, bellows of black leather, back and bed are covered with fine seal grain leather, and metal parts are in nickel and black enamel.

*Details* For rectangular pictures,  $2\frac{1}{2} \times 4\frac{1}{4}$  inches. Capacity, 12 exposures without reloading. Size of Kodak,  $1\frac{3}{8} \times 3\frac{3}{4} \times 8$  inches. Weight,  $27\frac{1}{2}$  ounces. Lens, double combination, Rapid Rectilinear,  $5\frac{5}{8}$ -inch focus, or if desired, Kodak Anastigmat lens, *f.* 7.7,  $5\frac{1}{8}$ -inch focus. Shutter, Kodak Ball Bearing with cable release. Automatic focusing lock. Two tripod sockets. Brilliant, collapsible, reversible finder. Black leather bellows.

NOS. 3 AND 3A  
*Autographic KODAKS*

SINCE its introduction of the post-card size picture, the 3A Kodak has been the leader in the hand camera field. Although the largest of the pocket Kodak series, the camera itself may be carried without inconvenience, and the fact that the shape of the picture ( $3\frac{1}{4} \times 5\frac{1}{2}$ ) is especially adapted to landscapes or portraits, has made it one of our most popular models.

By omitting no detail that is essential to the best results in general amateur photography, and adding none that is superfluous, the 3A Kodak, with its autographic feature, meets every need of the most advanced amateur.

In lens equipment, this camera is regularly supplied with the finest quality Rapid Rectilinear lens, with a speed of  $f. 8$ ,

or, if desired, the Kodak Anastigmat, *f.* 7.7 lens, offering the anastigmat advantages at a moderate price. Both the 3 and 3A will accommodate glass plates by the addition of a Combination Back. This back is interchangeable with the regular back, but it should be remembered that autographic records can be made only when the Autographic back is used, and not with Combination back or glass plates. The No. 3 Kodak is practically identical with the 3A, except in size and except that it has a capacity of twelve, six and two exposures, whereas the 3A uses ten, six and two-exposure Autographic Film Cartridges. Both are made of aluminum and covered with best quality seal grain leather.

*Details* For rectangular pictures, No. 3,  $3\frac{1}{4} \times 4\frac{1}{4}$  inches; No. 3A,  $3\frac{1}{4} \times 5\frac{1}{2}$  inches. Capacity, No. 3, 12 exposures; No. 3A, 10 exposures without reloading. Size of Kodak, No. 3,  $1\frac{1}{4} \times 4\frac{1}{2} \times 7\frac{1}{2}$  inches; No. 3A,  $2 \times 4\frac{1}{4} \times 9\frac{1}{2}$  inches. Weight, No. 3, 23 ounces; No. 3A, 41 ounces. Lenses (regular equipment), Rapid Rectilinear, focal length for No. 3, 5 inches; No. 3A,  $6\frac{3}{4}$  inches, or, if desired, Kodak Anastigmat, *f.* 7.7 lenses. Shutters, Kodak Ball Bearing with cable release. Two tripod sockets. Black leather bellows. Brilliant, reversible finders with hoods. Rising and sliding fronts. Automatic focusing locks. No. 3A has double focusing scale for films or plates.

SHOWING COMBINATION BACK

No. 1  
*Autographic KODAK, Special*

**H**ERE is a camera in which quality and speed are ingeniously combined. It is as small as is consistent with the utmost in lens and shutter efficiency.

Its lenses have sufficient length of focus to give the desirable perspective, and at the same time utilize the full speed at which they are listed.

The shutter is large enough and fast enough to work in harmony with its high-speed lenses, without, in the least, impeding their speed.

Smaller cameras than the No. 1 *Special*, for  $2\frac{1}{4} \times 3\frac{1}{4}$  pictures, can be and have been made, but here, Kodak ingenuity has avoided the mistake of sacrificing mere littleness for the more desirable photographic results. This little Kodak, like any fine piece of mechanism, works with smoothness and

precision—a thoroughly capable instrument that is optically correct. The regular equipment is the Kodak Anastigmat lens, *f.* 6.3, and Optimo shutter, with cable release, highest speed  $\frac{1}{300}$  of a second, and variable speeds to one second, and it has also both “bulb” and time actions. Four other high-grade lens equipments are also listed.

It is quickly opened and extended, the focusing scale is easily adjusted for all distances, by a simple lever attachment. It has a brilliant, collapsible, reversible finder with revolving mask for correct composition of pictures in both vertical and horizontal positions.

The camera is beautifully finished throughout and covered with the finest quality long grain calf; black leather bellows and highly nickeled trimmings.

*Details* For rectangular pictures,  $2\frac{1}{4} \times 3\frac{1}{4}$  inches. Capacity, 6 exposures without reloading. Size of Kodak,  $1\frac{3}{8} \times 3\frac{3}{8} \times 6\frac{5}{8}$  inches. Weight,  $26\frac{1}{2}$  ounces. Lens, Kodak Anastigmat, *f.* 6.3,  $4\frac{3}{8}$ -inch focus. Shutter, Optimo with cable release. New brilliant, reversible, collapsible finder. Two tripod sockets and new lever focusing device.

Ditto, 2 exposures . . . . .	.10
Kodak Portrait Attachment, (See page 39) . . . . .	.50

No. 1A  
*Autographic KODAK,  
 Special*

THE No. 1A *Special*, is typical of the best that is possible in efficiency, beauty in design and finish; in speed and accuracy in hand cameras. For a camera in the  $2\frac{1}{2} \times 4\frac{1}{4}$  size, equipped with the finest Anastigmat lenses, and a shutter speed capable of working harmoniously with the high-speed lenses, it meets every amateur requirement for quick, accurate results.

It is beautifully finished and covered with the finest long grain calf, and the best materials are used throughout in its construction.

One of the big features of this Kodak is the Kodak Range Finder, permitting accurate focusing without the necessity of

estimating the distances. High-speed lenses require accurate focusing, and the Kodak Range Finder does this simply, quickly, and efficiently.

The 1A *Special*, offers a choice of the Kodak Anastigmat, *f.* 6.3 lens, and two other high-grade lenses, and is equipped with the Autographic feature. The shutter is the Optimo, operated either by cable or finger release, and in addition to the usual time and "bulb" actions, has eight variable speeds from one second to  $\frac{1}{300}$  of a second.

The fast lenses give the *Specials* a great advantage over the ordinary camera in dull lights, and the high-speed shutters make them second only to cameras having focal plane shutters for photographing rapidly moving objects.

The camera has rising front; brilliant, collapsible, reversible finder with adjustable mask; rack and pinion for focusing, and the usual focusing scale, in addition to the Kodak Range Finder.

*Details* For rectangular pictures,  $2\frac{1}{2} \times 4\frac{1}{4}$  inches. Capacity, 12 exposures without reloading. Size of Kodak,  $1\frac{1}{8} \times 3\frac{3}{4} \times 8$  inches. Weight, 32 ounces. Lens, Kodak Anastigmat, *f.* 6.3,  $5\frac{1}{8}$ -inch focus. Shutter, Optimo. Two tripod sockets. Brilliant, reversible, collapsible finder with adjustable mask. Rack and pinion for focusing.

NOS. 3 AND 3A  
*Autographic KODAKS,*  
*Special*

EVERY improvement that can possibly contribute to greater efficiency is incorporated in the *Specials*. In finish, in optical and mechanical attainments, they have maintained a leadership through their own perfections.

In 1915, the final touch seemed to have been added when they became autographic, but with the addition of the Kodak Range Finder, the 3A *Special* is without a peer in hand cameras. The long-focus and high-speed (large stop opening) lenses used with a camera of this size and type require accurate focusing. The Kodak Range Finder provides for such focusing, simply and efficiently, and means better results and fuller value to the camerist from his high-speed lenses. Above all,

the 3A *Special* is optically efficient. The lenses are large (fast) and the focal length long in proportion to the size of the picture.

It offers a choice of the Kodak Anastigmat, *f.* 6.3 lens, and two other high-grade lenses. The shutter is the Optimo, operated either by cable or finger release, and has variable speeds from one second to  $\frac{1}{300}$  of a second. The camera is made of aluminum, has rising front, and the usual focusing scale in addition to the Kodak Range Finder. It is richly finished in genuine Persian Morocco, has bellows of selected black leather, and metal parts are highly nickeled.

The No. 3 *Special* has the same lenses, shutter equipment and finish, but is not equipped with the Kodak Range Finder.

*Details* For rectangular pictures, No. 3,  $3\frac{1}{4} \times 4\frac{1}{4}$  inches; No. 3A,  $3\frac{1}{4} \times 5\frac{1}{2}$  inches. Capacity, No. 3, 12 exposures; No. 3A, 10 exposures without reloading. Size of Kodaks, No. 3,  $1\frac{1}{8} \times 4\frac{1}{2} \times 8$  inches; No. 3A,  $2 \times 4\frac{1}{4} \times 9\frac{1}{2}$  inches. Weight, No. 3, 32 ounces; No. 3A, 42 ounces. Lenses, Kodak Anastigmat, *f.* 6.3, focal length for No. 3, 5 inches; No. 3A,  $6\frac{1}{4}$  inches. Shutters, Optimo with cable release. Two tripod sockets. Brilliant, collapsible, reversible view finders with adjustable window, also Kodak Range Finder for No. 3A. Brilliant, reversible finder with hood and spirit level for No. 3. Rack and pinion for focusing.

## STEREO KODAK

THE correct visual effect in a picture can only be obtained by the use of twin lenses, followed by viewing the twin pictures through a stereoscope. Such pictures give the full effect of depth, roundness, distance and perspective that we see with the eyes. There is no better camera for making such pictures than the Stereo Kodak.

The Stereo is supplied with carefully matched Kodak Anastigmat, *f.* 7.7 lenses of the best quality; the shutter is of the double valve automatic type, for retarded speeds from 1 to  $\frac{1}{100}$  of a second, also "bulb" and time exposures. The camera is equipped with rising front; rack and pinion for focusing, view finder and tripod socket. It is covered with fine seal grain leather and metal parts are in nickel and black enamel.

*Details* For standard Stereo size pictures. Capacity, 6 exposures without reloading. Size of Kodak,  $2\frac{3}{8} \times 4\frac{3}{4} \times 10\frac{1}{2}$  inches. Weight, 47 ounces. Lenses, Kodak Anastigmat, *f.* 7.7,  $5\frac{1}{8}$ -inch focus. Shutter, double valve, Stereo Automatic, with "bulb" release. Brilliant finder, tripod socket, rising front, rack and pinion for focusing and black leather bellows.

## THE PANORAM KODAKS

THE Panoram Kodak does a special kind of work—a very desirable kind of work which cannot be done with a camera of any other type.

As its name implies, it is constructed so as to take panoramic pictures of outdoor groups, landscapes, mountain views, and the like.

Panoram Kodaks use the regular daylight loading N. C. Kodak film; they are carefully made, have genuine leather coverings and nickeled fittings.

The No. 1 has a scope of 112 degrees, while the No. 4 embraces an angle of 142 degrees. Panoram Kodaks cannot be used successfully indoors.

*Details* For rectangular pictures, No. 1,  $2\frac{1}{4} \times 7$  inches; No. 4,  $3\frac{1}{2} \times 12$  inches. Capacity, No. 1, 6 exposures; No. 4, 4 exposures without reloading. Size of Kodak, No. 1,  $3\frac{3}{8} \times 4\frac{1}{2} \times 7\frac{3}{8}$  inches; No. 4,  $4\frac{1}{4} \times 5\frac{5}{8} \times 10\frac{1}{8}$  inches. Weight, No. 1, 24 ounces; No. 4, 46 ounces. Lenses, specially selected as to quality and focal length. Shutter, Panoram. Two tripod sockets. Brilliant finder with hood. No. 1 uses No. 1 F. P. Kodak; No. 4, B. E. Film Cartridges, No. 4.

## THE BOX BROWNIES

THERE are thousands of Brownie enthusiasts all over the world, who are making splendid pictures with these little box cameras. The idea of simplicity and reliability combined in an inexpensive camera, has stood the test of years, and they have proved a delight to those who have used them.

While the Brownies are especially popular among children on account of their simplicity, the fact they are so practical has caused them to be taken up by adults who wish to make pictures easily and at the minimum of expense.

NO. 2  
BROWNIE

## Nos. 0 AND 2 BROWNIES

The No. 0 Brownie makes the popular Vest Pocket size pictures,  $1\frac{5}{8} \times 2\frac{1}{2}$  inches, and the No. 2,  $2\frac{1}{4} \times 3\frac{1}{4}$  pictures. Both cameras are accurate, reliable, efficient and economical to operate and anybody can make good pictures with them from the start. They have the automatic shutter for snap-shots and time exposures; the No. 0 with one stop and No. 2 with three

stops. Each has carefully tested meniscus lens and view finders, for vertical and horizontal exposures.

*Details* Nos. 0 and 2 Brownies. For rectangular pictures, No. 0,  $1\frac{1}{8} \times 2\frac{1}{2}$  inches; No. 2,  $2\frac{1}{4} \times 3\frac{1}{4}$  inches. Capacity, No. 0, 8 exposures; No. 2, 6 exposures without reloading. Size of camera, No. 0,  $2\frac{5}{8} \times 3\frac{3}{8} \times 4\frac{1}{8}$  inches; No. 2,  $3\frac{1}{4} \times 4 \times 5\frac{5}{8}$  inches. Weight, No. 0, 8 ounces; No. 2, 13 ounces. Lenses, meniscus. Shutters, Eastman Rotary. Two finders.

## NOS. 2A AND 3 BROWNIES

All the box Brownies are fixed focus and consequently anyone can, with reasonable care, make excellent pictures with them. The No. 2A makes pictures  $2\frac{1}{2} \times 4\frac{1}{4}$  inches, while the No. 3 makes  $3\frac{1}{4} \times 4\frac{1}{4}$  pictures. Each has carefully tested meniscus achromatic lens, Eastman Rotary shutter with three stops, two view finders, and the No. 3 is supplied with two tripod sockets. Both cameras are covered with durable imitation leather covering, with metal parts nicked, and have the daylight-all-the-way feature of the Kodaks.

By the addition of a Kodak Portrait Attachment these cameras can be used with excellent success in home portraiture.

*Details* Nos. 2A and 3 Brownies. For rectangular pictures, No. 2A,  $2\frac{1}{2} \times 4\frac{1}{4}$  inches; No. 3,  $3\frac{1}{4} \times 4\frac{1}{4}$  inches. Capacity, 12 exposures without reloading. Size of camera, No. 2A,  $3\frac{1}{16} \times 5\frac{1}{8} \times 6\frac{1}{8}$  inches; No. 3,  $4\frac{3}{8} \times 5\frac{1}{8} \times 6\frac{1}{8}$  inches. Weight, No. 2A, 21 ounces; No. 3, 24 ounces. Lenses, meniscus achromatic. Shutters, Eastman Rotary with three stops. Two finders.

## No. 2C BROWNIE

BEHIND the Brownie name stands years of practical experience in the best, most usable and most serviceable camera construction. And so, when it became evident that the  $2\frac{3}{8} \times 4\frac{7}{8}$  picture was to be one of the most popular amateur sizes, the No. 2C size was added to the box Brownie line.

The 2C has slightly more picture area than the No. 3 size, it fits the view, and its shape is adaptable to almost any composition. But, like the other Brownies, this new camera combines simplicity and reliability with low cost.

*Details* For rectangular pictures,  $2\frac{3}{8} \times 4\frac{7}{8}$  inches. Capacity, 10 exposures without reloading. Size of camera,  $1\frac{7}{8} \times 6\frac{1}{4} \times 7\frac{1}{4}$  inches. Weight, 27 ounces. Lens, meniscus achromatic. Shutter, Eastman Rotary, with 3 stops. Two view finders. Two tripod sockets. Covered with durable imitation leather.

## No. 2 FOLDING *Autographic* BROWNIE

WITH its autographic feature; its round ends and compact form, this little Brownie is as efficient as it is simple to operate.

The No.2 loads in daylight with Autographic Film Cartridges of six exposures. Fitted with meniscus achromatic or Rapid Rectilinear lens as desired. Has Kodak Ball Bearing shutter with variable snap-shot speeds of  $\frac{1}{25}$  and  $\frac{1}{50}$  of a second; also time and "bulb" actions, and is equipped with Kodak Autotime Scale.

Has reversible finder, automatic focusing lock, two tripod sockets; is made of metal, covered with a fine imitation leather; is well made and carefully finished in every detail.

*Details* For rectangular pictures,  $2\frac{1}{4} \times 3\frac{1}{4}$  inches. Capacity, 6 exposures without reloading. Size of camera,  $1\frac{1}{4} \times 3\frac{1}{2} \times 6\frac{1}{2}$  inches. Weight, 19 ounces. Lens, meniscus achromatic. Also supplied with Rapid Rectilinear lens, if desired. Shutter, Kodak Ball Bearing, equipped with Kodak Autotime Scale. Reversible finder, two tripod sockets, automatic focusing lock, black leather bellows.

Ditto, 2 exposures . . . . .	.10
Kodak Portrait Attachment. (See page 39) . . . . .	.50

NOS. 2A AND 2C  
FOLDING *Autographic* BROWNIES

THESE two Folding Brownies are similar in every respect, except in the sizes of the pictures they make. Both are of the same relative compactness; the same simplicity and dependability that have characterized the Brownie line in the past.

They have the shapely and convenient round ends, and the Autographic feature, which permits the dating and titling of the film when the exposure is made, and their operation is so simple as to make the taking of good pictures, a matter of course.

The 2A makes pictures  $2\frac{1}{2} \times 4\frac{1}{4}$  inches, loading with twelve, six or two exposure Autographic Film Cartridges

(No. A 116), while the No. 2C picture is  $2\frac{7}{8} \times 4\frac{7}{8}$  inches, in cartridges of ten, six and two exposures (No. A 130).

The regular equipment includes, for either camera, a fine quality meniscus achromatic lens, or, if desired, the Rapid Rectilinear lens. The shutter is the Kodak Ball Bearing, automatic in action; the No. 2A supplied with finger release only, while the No. 2C has both finger and cable release. The snap-shot speeds, however, are the same for both cameras,  $\frac{1}{25}$ ,  $\frac{1}{50}$  and  $\frac{1}{100}$  of a second in addition to the regular time and "bulb" actions.

Both cameras are made of metal covered with durable imitation leather; have black leather bellows; nickel and black enamel fittings; are small in size, neat in appearance, and thoroughly efficient.

*Details* For rectangular pictures,  $2\frac{1}{2} \times 4\frac{1}{4}$  inches for the No. 2A, and  $2\frac{7}{8} \times 4\frac{7}{8}$  inches for the No. 2C. Capacity, No. 2A, twelve exposures without reloading, and for the No. 2C, ten exposures. Size of cameras, No. 2A,  $1\frac{7}{8} \times 3\frac{3}{4} \times 7\frac{7}{8}$  inches; No. 2C,  $1\frac{1}{4} \times 3\frac{3}{4} \times 8\frac{1}{8}$  inches. Weight, No. 2A, 24 ounces; No. 2C, 25 ounces. Lenses, meniscus achromatic, or, if desired, the Rapid Rectilinear. Shutters, Kodak Ball Bearing, equipped with Autotime Scale. Reversible finders, two tripod sockets, automatic focusing locks, and black leather bellows.

No. 3A FOLDING  
*Autographic* BROWNIE

THE No. 3A Folding Brownie is cleverly constructed and well made throughout; may be loaded almost instantly; is quick to operate, and like the other Folding Brownies, possesses the autographic feature for the recording of the dates and titles on the film at the time of exposure.

The 3A is a thoroughly efficient camera and is sure to delight anyone who desires to make pictures the post-card size ( $3\frac{1}{4} \times 5\frac{1}{2}$  inches). There is a characteristic Brownie simplicity about it, and with the round ends and its present compactness, may be carried on any occasion, without inconvenience.

It has a fine quality meniscus achromatic lens, or if desired, will be equipped with Rapid Rectilinear lens. The shutter is the Brownie Ball Bearing with cable release; has time and "bulb" actions and snap-shot speeds of  $\frac{1}{25}$ ,  $\frac{1}{30}$  and  $\frac{1}{60}$  of a second, and is supplied with Kodak Autotime Scale as an aid to correct exposure.

The camera loads in daylight with ten, six or two-exposure Autographic Film Cartridges (No. A 122); has an automatic focusing lock which permits the quick focusing of objects at any distance. Has reversible finder, two tripod sockets, carrying handle; is constructed of metal, covered with a fine quality imitation leather, bellows of black leather, nickel and black enamel fittings and is carefully made and finished throughout.

The No. 3A Folding Autographic Brownie is so simple to operate that anyone, without experience, can secure good results with it from the very start.

*Details* For rectangular pictures,  $3\frac{1}{4} \times 5\frac{1}{2}$  inches. Capacity, 10 exposures without reloading. Size of camera,  $1\frac{1}{8} \times 4\frac{5}{8} \times 9\frac{5}{8}$  inches. Weight, 38 ounces. Lens, meniscus achromatic. Also supplied with Rapid Rectilinear lens if desired. Shutter, Brownie Ball Bearing with cable release, also equipped with Kodak Autotime Scale. Reversible finder, two tripod sockets, automatic focusing lock, black leather bellows.

## KODAK BALL BEARING SHUTTER

**THIS** shutter is automatic in its action and does not require setting. Its leaves work on ball bearings, giving it a smooth and reliable action, and as they open and close in a star-shape aperture, the maximum of light is admitted. It is operated by cable release or finger release and has the iris diaphragm.

The No. 0 Ball Bearing shutter as supplied with the Vest Pocket Kodak and No. 2 Folding Brownie, operates with finger release only, has speeds of  $\frac{1}{25}$  and  $\frac{1}{50}$  of a second and Autotime Scale. Fitted to the No. 1 Kodak Junior with meniscus achromatic and Rapid Rectilinear lenses, the No. 0 has cable release and not Autotime Scale.

The No. 1 shutter has variable indicated speeds of  $\frac{1}{25}$ ,  $\frac{1}{50}$  and  $\frac{1}{100}$  of a second, and is regularly fitted to the No. 1A Kodak Junior, No. 2A Folding Brownie and Nos. 1A and 3 Kodaks, and with No. 1 Kodak Junior, when equipped with *f. 7.7* lens.

The No. 2 shutter is fitted to Nos. 2C and 3A Kodak Juniors, No. 2C Folding Brownie and No. 3A Kodak. This has the same speeds as the No. 1 shutter but is larger. All have "bulb" and time actions.

## OPTIMO SHUTTER

**THE** Optimo is one of the best and most accurate shutters for use with fast Anastigmat lenses. It has remarkable precision, smoothness, ease in action and sufficient speed to photograph rapidly moving objects. The Optimo is now supplied with all the *Specials*. In making an exposure, its five leaves revolve—opening and closing as well—in a star-shaped aperture. In addition to the usual "bulb" and time actions, the Optimo has eight indicated speeds varying from one second to  $\frac{1}{300}$  of a second. This thoroughly reliable shutter is of the setting type; has cable and finger release, and is beautifully finished in nickel and black enamel, with the engraving in gold.

## KODAK LENSES

THE meniscus achromatic and Rapid Rectilinear lenses supplied with the regular models of the Kodaks and Brownie Cameras, are perfectly adapted to the everyday requirements of the average amateur, producing exceedingly good results under all normal conditions of light. They are the best lenses of their respective types that can be secured.

Since the introduction of the Kodak Anastigmat, *f.* 7.7 lenses, the use of Anastigmats has become very general. These *f.* 7.7 lenses are inexpensive, but they produce Anastigmat results. They are speedier than the fastest rectilinear lenses; in quality, depth, definition (sharpness) and flatness of field, they equal the best Anastigmats made. Their popularity is responsible for the Kodak Anastigmat, *f.* 6.3 lenses, which have the same high quality, and still greater speed.

For Kodak use, you cannot obtain better lenses than the Kodak Anastigmats, at any price.

## AUTOGRAPHIC BACKS

THE Autographic feature may be added to the Kodak not originally equipped with this improvement. There is no extra charge for the Autographic Film and with the Autographic feature incorporated in the old Kodak, one may keep an authentic record of each exposure on the negative, to determine at any time, when and where each picture was made.

Autographic backs will be supplied for the Kodaks listed, at the following prices:

No. 1 Kodak Junior . . . . .	\$2.50
No. 1A Kodak Junior . . . . .	3.00
No. 1A Folding Pocket Kodak, Rapid Rectilinear Type . . . . .	3.50
No. 3 Folding Pocket Kodak . . . . .	3.50
No. 3A Folding Pocket Kodak . . . . .	3.75
No. 4 Folding Pocket Kodak . . . . .	4.00
No. 4A Folding Kodak . . . . .	4.50
No. 1A Special Kodak . . . . .	4.00
No. 3 Special Kodak . . . . .	4.00
No. 3A Special Kodak . . . . .	4.25

## KODAK PORTRAIT ATTACHMENT

THERE are so many ways in which one can use a Kodak Portrait Attachment with a Kodak or Brownie Camera, that it is almost an indispensable accessory. If an object appears too small with the regular lens equipment, it may be shown much larger by using the Kodak Portrait Attachment in accord-

ance with the directions. They are not only serviceable for making portraits, but also for photographing any small objects, such as flowers or fruits; in fact, almost anything at close range.

One can work up close to the subject and thereby secure bust portraits as large as the size of the negative will permit. The attachment is simply an extra lens, which fits over the barrel of the regular lens. This does not alter the exposure nor affect the operation of the instrument in any way, except to make the lens cut sharply when close to the subject, thereby giving a larger image.

Please order by number, or if required for older models or cameras with special equipments, specify shutter and size of camera.

MADE WITH KODAK AND KODAK  
PORTRAIT ATTACHMENT

No. 9. For No. 3 Autographic Kodak with Kodak Automatic shutter . . . . .	.50
No. 13. For No. 1A Autographic Kodak Junior, with Kodak Anastigmat lens, <i>f</i> . 7.7 (with engraving on front of lens barrel) . . . . .	.50

## KODAK SKY FILTERS AND COLOR FILTERS

The Sky Filter is intended to equalize the great difference of light between the sky and foreground in landscape photography. Only the upper half of the filter is stained a yellow color to relieve the brightness from the sky, while the lower half of the filter being colorless, permits a normal exposure for the foreground.

The Kodak Color Filters are of great value in outdoor photography, and for all subjects embracing colors which act weakly on the sensitive film, as they hold back the strong blue and violet rays, affording the weaker colors time to record.

The Kodak Sky Filters and Color Filters are mounted in the same manner as the Kodak Portrait Attachments.

## Prices—KODAK SKY FILTERS AND COLOR FILTERS

## KODAK FILM TANK

THE Kodak Film Tank automatically develops every roll of film just as well as that roll of film could be developed by the most experienced photographer. If directions are followed, if the chemicals are mixed and the temperature regulated according to instructions, a boy or girl can get just as good results from the Kodak Film Tank as can an expert by any method.

In other words, every roll of film put into the film tank, where the simple directions are implicitly followed, will come out developed as well, or better, than that roll of film could be developed in the dark room by the most experienced photographer. And it is very simple, it eliminates the dark room entirely, developing the film in broad daylight, and is so compact as to be easily carried and used anywhere.

The Kodak Film Tank consists of a winding box, a light-proof apron, and a heavily nicked brass solution cup with cover. In the Brownie Film Tank, however, no cover is necessary as the film roll itself is turned. All articles can be packed in the box, making the entire outfit self-contained.

The film to be developed is placed upon a reel in the winding box, the cover is placed on the box and the film is wound around an axis in combination with the apron, in such fashion that, when completely wound, the apron protects the film effectually from light, and may be removed from the winding box safely at any time. It is then lowered into the cup of developer, the cover attached and the film left to develop for about twenty minutes. After development the film is removed for fixing.

Every step is performed in daylight and the exact time necessary for development, in combination with the chemical formula, has been scientifically worked out, so that all differences of exposure within reasonable bounds are taken care of. Especial attention is called to the  $3\frac{1}{2}$ -inch size, for the development of the new 2C size films.

Those who wish to develop more than one roll at a time can do so without purchasing extra tanks complete, by securing duplicating outfits as listed below.

## Prices

Brownie Kodak Film Tank, for use with No. 1, No. 2 and No. 2	
Folding Pocket Brownie cartridges, complete . . . . .	\$2.75

## No. 2 BROWNIE DEVELOPING BOX

THE Brownie Developing Box is a simplified and modified form of the Kodak Film Tank, offering the same assurance of perfectly developed film, and at the same time is so simple that any boy or girl can readily understand and operate it.

It consists of a metal box with cover, just long enough to accommodate a roll of No. 1 or No. 2 Brownie Film in one loop.

To develop, the roll of film is inserted in the spool carrier, and by means of a cord and winding shaft the film is unrolled and carried around a roller bearing, thus exposing the film to the action of the developer.

Before unrolling the film, the developer is poured in the box and the cover put in place; all these operations being performed in daylight. The film is then unrolled by turning the crank, when the box is rocked on its standard for six minutes. The developer is then poured off and box filled with water to wash out developer, after which film is removed and fixed in daylight.

It provides an excellent means for those who have No. 1 or No. 2 Brownie Cameras, of developing their films simply and accurately.

### *Price*

No. 2 Brownie Developing Box . . . . .	\$1.50
Brownie Developing Box Powders, per package of 6 . . . . .	.15
Kodak Acid Fixing Powders, $\frac{1}{2}$ -pound package . . . . .	.15
Ditto, $\frac{1}{4}$ -pound package . . . . .	.10

## EASTMAN PLATE TANK

WHAT the film tank has done for films, the plate tank does for plates. The idea of the two tanks is based upon the same time and temperature system of development, with, of course, such differences in actual construction of the tanks as are required by the physical differences between films and plates. And as plates must be unloaded in a dark room, the plate tank cannot offer the advantage of daylight quite all the way, but it takes only a few moments in the dark room to load this tank, after which it may be brought out into any light for development.

The device consists of a metal solution cup with cover, a cage for holding 12 or less plates, and a loading fixture for loading the plates in the cage.

The exposed plates are loaded into the cage and placed in the tank, which has been filled with developer, in the dark room and the tank cover fastened in place. On the front of the tank is a dial for registering time. Development is allowed to continue for fifteen minutes, the tank being reversed several times. After development, the developer is washed out of the plates, and the fixing and washing are done in the usual manner.

### Price

Eastman Plate Tank, for 4 x 5, 3 1/4 x 5 1/2, and smaller plates, includes solution cup, plate cage, loading fixture and adjustable kit . . .	\$4.00
Ditto, 5 x 7, without kit . . . . .	5.00
Adjustable Kit, for 4 x 5 or 3 1/4 x 5 1/2 tank, to take smaller plates . . . . .	.60
Separate Kits, for 5 x 7 tank, to take 3 1/4 x 5 1/2, 4 1/4 x 6 1/2 or 4 3/4 x 6 1/2 plates, each . . . . .	1.00
Metal Insert, for 5 x 7 tank, to take 4 x 5 plates. . . . .	.15
*Eastman Plate Tank Developer Powders, for 4 x 5 tank, per package, 1/2 dozen . . . . .	.20
Ditto, for 5 x 7 tank, per package, 1/2 dozen . . . . .	.40

## DEVELOPING AND PRINTING OUTFITS

FOR those who wish to develop by the dark room method we offer complete developing and printing outfits containing everything necessary for the work. By combining a variety of different articles and making up the outfits in large quantities, we furnish them at a much lower price than if the articles were purchased separately. The Eastman 3A Outfit contains every requisite for finishing twenty-four  $3\frac{1}{4} \times 5\frac{1}{2}$  or smaller pictures, and includes the following:

One Kodak Candle Lamp . . . . .	\$0.25
One Printing Frame . . . . .	.30
One Glass for Frame . . . . .	.05
One 4-ounce Graduate . . . . .	.20
One Stirring Rod . . . . .	.05
Four Developing Trays . . . . .	.40
Five tubes Eastman Special Developer . . . . .	.25
One-half pound Kodak Acid Fixing Powder . . . . .	.15
One package Potassium Bromide . . . . .	.10
Two dozen $3\frac{1}{4} \times 5\frac{1}{2}$ Velox Paper . . . . .	.30
Two ounces Nepera Solution for developing Velox . . . . .	.10
Instruction Book (free)	

Eastman 3A Outfit, complete, neatly packed, **\$1.65** \$2.15

EASTMAN'S A B C OUTFIT, similar to above but providing for  
4 x 5 or smaller pictures . . . . . \$1.65

No. 0 BROWNIE Developing and Printing Outfit, complete, for  
developing and printing 24 pictures  $1\frac{5}{8} \times 2\frac{1}{2}$ . Price, complete 1.00

## THE KODAK BOX No. 2

THE Kodak Box No. 2 contains everything for picture making by the daylight method. No dark room is necessary, and even the beginner can get good results by following the simple, explicit directions contained in the instruction book. This outfit is simple enough for boys and girls, while at the same time it will make pictures which will please the grown-up people.

### Price

One Instruction Book (free)	
	<hr/> \$5.75

Price, complete, neatly packed, **\$5.00**

## THE KODAK AMATEUR PRINTER

**THE** Printer consists of a box with a removable top, and in it a glass window through which the printing is done. Prints may be made with white margins, any size from  $1\frac{5}{8} \times 2\frac{1}{2}$  to  $4 \times 5\frac{1}{2}$

inches, by a simple automatic masking device, which holds the negatives firmly until released. Within the box is a small red electric bulb to permit the adjustment of negative and paper, and provision is made for a 60 Watt Mazda lamp, which is automatically turned on when the hinged frame is closed to make the exposure.

In the side of the box is a removable window, covered with red and orange paper, serving as a dark-room lamp for developing-out and bromide papers.

It is supplied complete, without lamp, but including  $5\frac{1}{2}$  feet of electric light cord and socket.

The Kodak Amateur Printer . . . . . \$6.00

## KODAK SERIAL PRINTING FRAME No. 2

The Serial Printing Frame will be found a great convenience for printing from Vest Pocket Kodak negatives. After development, the film is left in a continuous strip (without cutting), and the frame is so designed as to permit the film to slide easily through the frame from exposure to exposure. The film and paper are firmly held during printing, by a tension spring.

Kodak Serial Printing Frame No. 2 for V. P. negatives only . . . \$0.50

## KODAK AUTO-MASK PRINTING FRAME

The new Auto-Mask is the most convenient and useful thing in printing frames that has yet been produced. It is adaptable to the printing of negatives of any amateur size, from  $4 \times 5$ ,  $3\frac{1}{4} \times 5\frac{1}{2}$  and smaller, using the same simple masking device employed on the Kodak Amateur Printer. The negative is held firmly in place by the mask and is as readily released, when desired, by a slight pressure on the thumb lever.

Any number of uniformly masked prints may be made without changing the position of the negative, and if desired, prints may be so made that white space is left at the side or bottom for writing as, for example, with post-cards. The graduated scales attached to the stationary guides, aid in sizing and holding exact dimensions of mask openings.

Kodak Auto-Mask Printing Frame . . . . \$1.25

## "MASKIT" PRINTING FRAME

The new Kodak "Maskit" Printing Frame is designed to overcome the difficulty of the negative and mask slipping on the glass, and to secure prints with a uniform white margin. Both negative and mask are held firmly, thus obviating the necessity of gumming.

Kodak "Maskit,"  $3\frac{1}{4} \times 4\frac{1}{4}$ , opens two-thirds . . \$0.40  
 Kodak "Maskit,"  $3\frac{1}{4} \times 5\frac{1}{2}$ , opens two-thirds . . .45  
 Kodak "Maskit,"  $5 \times 7$ , opens two-thirds . . .50

## KODALOID PRINTING MASKS

These transparent, orange color masks are intended for use with "Maskit" Printing Frames. Supplied in sets of three, each with different size opening.

Per set of  $3, 3\frac{1}{4} \times 4\frac{1}{4}$  \$0.20 Per set of  $3, 3\frac{1}{4} \times 5\frac{1}{2}$  \$0.25 Per set of  $3, 5 \times 7$  . . \$0.30  
 Black paper masks, same sizes as above. Price, per set of  $3, \$0.10$

## EASTMAN PRINTING MASKS

Made of transparent Kodaloid, to fit the regular 3A and  $4 \times 5$  Printing Frames, in 7 masking sizes. Price, each, \$0.06

## PRINTING FRAMES

Eastman $3\frac{1}{2} \times 12$ , for No. 4 Panoram		Ditto, for $2\frac{1}{2} \times 4\frac{1}{4}$ , film negatives or smaller . . . . .	\$0.30
Kodak, opens in three sections . .	\$0.75	Ditto, $3\frac{1}{2} \times 3\frac{1}{2}$ , $3\frac{1}{4} \times 4\frac{1}{4}$ , opens two-thirds, each . . . . .	.30
Eastman $2\frac{1}{4} \times 7$ , for No. 1 Panoram		Ditto, $3\frac{1}{4} \times 5\frac{1}{2}$ , for films, opens two-thirds . . . . .	.30
Kodak, opens in two sections . .	.30	Ditto, for plates . . . . .	.35
Brownie Printing Frame, No. 1, for $2\frac{1}{4} \times 2\frac{1}{4}$ Developing paper only . .	.20	Eastman $4 \times 5$ , opens two-thirds . .	.30
Brownie Printing Frame, No. 2, for $2\frac{1}{4} \times 3\frac{1}{4}$ Developing paper only . .	.20	Eastman $5 \times 7$ , opens two-thirds . .	.40
Eastman, for $2\frac{1}{4} \times 3\frac{1}{4}$ plates and V. P. or smaller film negatives . .	.25		

## KODAK ENLARGING OUTFIT

THE Kodak Enlarging Outfit is just what the amateur needs, who is doing his own enlarging. Although it is small in size and so compact as to be easily stored, it is a thoroughly practical instrument and capable of almost unlimited results.

Films and plates of any size up to 4 x 6 inches, may be enlarged up to the size of the easel (14 x 17 inches), or even larger if desired.

The outfit includes Enlarging Camera, lens and diaphragm, (largest stop U. S. 4) easel, lamphousing, light cord and socket, but does not include the 60 Watt Mazda electric light bulb.

Kodak Enlarging Outfit . . . . . \$15.00

## BROWNIE ENLARGING CAMERA

THE Brownie Enlarging Camera consists of a light-tight cone, made in two sections, with an attachment at the small end to hold the negative, and another at the large end for the paper. The lens is supported between negative and paper at just the proper focal distance.

The cameras, with the exception of the No. 2 Brownie Post-card, are collapsible, so that they fold flat and may be conveniently carried in a suitcase.

No. 2 Brownie Post-card Enlarging Camera, for  $3\frac{1}{4} \times 5\frac{1}{2}$  enlargements from  $2\frac{1}{4} \times 3\frac{1}{4}$  negatives . . . . . \$2.50

No. 2 Brownie Enlarging Camera, for 5 x 7 enlargements from  $2\frac{1}{4} \times 3\frac{1}{4}$  negatives . . . . . 3.00

No. 3 Ditto, for  $6\frac{1}{2} \times 8\frac{1}{2}$  enlargements from  $3\frac{1}{4} \times 4\frac{1}{4}$  negatives . . . . . 4.00

No. 4 Ditto, for 8 x 10,  $6\frac{1}{2} \times 10$  and  $5\frac{1}{2} \times 9\frac{1}{2}$  enlargements from 4 x 5,  $3\frac{1}{4} \times 5\frac{1}{2}$  and  $2\frac{1}{4} \times 4\frac{1}{4}$  negatives, respectively . . . . . 4.50

## V. P. KODAK ENLARGING CAMERA

This is made upon the same principle as the Brownie Enlarging Camera, excepting that being small in itself, it is not made collapsible and is in one section only.

It offers the simplest means for making  $3\frac{1}{4} \times 5\frac{1}{2}$  enlargements from  $1\frac{1}{2} \times 2\frac{1}{2}$  negatives.

Vest Pocket Kodak Enlarging Camera . . . . . \$2.50

## VELOX PAPER

Velox is a developing-out paper that prints in any light, requires no dark room and permits the amateur to utilize his evening hours in print making. Its simplicity of manipulation, and variety of grades and surfaces, make it especially suitable for all amateur requirements.

Velox is divided broadly into three kinds of paper, called "Contrast," "Regular," and "Special," each division containing a variety of surfaces. "Contrast" and "Regular" papers develop quickly and are best suited for negatives lacking contrast. "Special" papers develop slowly, and give soft effects from hard negatives.

Velox "Contrast" is made in Carbon (matte) single weight and Velvet (semi-gloss) both single and double weight. Contrast Velox will secure the best possible results from extremely thin or from dense flat negatives.

Velox "Regular" has the following surfaces: Carbon (matte), Glossy, Glossy double weight, Velvet, Velvet double weight. Velvet is recommended for very flat negatives and gives semi-gloss prints of exceptional quality.

In the "Special" class, the surfaces are Carbon (matte), Portrait (smooth matte), Portrait double weight, Rough, Glossy, Glossy double weight, Velvet, and Velvet double weight. Special Velvet Velox has a greater range than any of the other "Special" papers.

Royal Velox is coated on an India tint stock in "Regular" and "Special," in one surface, and just rough enough to produce soft, mellow-tinted prints.

Ditto, $\frac{1}{4}$ pound . . . . .	.10

\*Package also includes bleaching agent.

Prices subject to change without notice.

## KODAK VELVET GREEN

Effects heretofore to be had only by the laborious carbon process can be secured by any amateur photographer with this paper.

For landscapes, for marines, and in fact, for the majority of outdoor amateur negatives, the rich green of prints on Kodak Velvet Green produces most beautiful and harmonious effects, with an indescribable "atmosphere" of nature itself.

And to use this paper the amateur has to learn no new processes nor possess extraordinary skill. Anyone who can print on Velox paper can print just as successfully on Kodak Velvet Green, as the two processes after exposure are identical, and the developing solution is only slightly changed.

The surface—a smooth semi-matte—brings out detail fully, and the paper is supplied in both single and double weights.

Kodak Velvet Green Post-cards are very appropriate for use at vacation time.

Prices same as for Velox. (See page 49.)

## EASTMAN BROMIDE PAPERS

## KODAK DRY MOUNTING TISSUE

Mounts prints even on thin mounts without curl. The simplest method of mounting, no apparatus being required—just fix the tissue on print, lay on mount and press with a warm flat iron; no sticky fingers, no muss of any kind.

Size of Mount, 3½ x 7; color, Queen's Grey; per 100, \$0.90; per 50 . . . . . \$0.45

## EASTMAN FILM NEGATIVE ALBUMS

These albums afford a safe, convenient and efficient way of keeping film negatives. Each leaf is, itself, an envelope, and the negatives do not come in contact with each other. The index furnishes a ready reference.

*Price*

For 100 negatives, 1¼ x 2½ \$0.75  
 For 100 negatives, 2½ x 4¼,  
 or smaller . . . . . .75

For 100 negatives, 3¼ x 4¼, or 4 x 5 . . . . . 1.00  
 For 100 negatives, 3¼ x 5½, or smaller . . . . . 1.00  
 For 100 negatives, 5 x 7, or smaller . . . . . 1.50

## SERVICE PHOTO CASE

This case is just the thing for the soldier or sailor boy to carry around the pictures he receives from home. It is made of brown imitation leather, and very durable. There is a transparent pocket for the favorite picture and an extra pocket for loose prints. Two extra masks give the transparent pocket the advantage of three sizes.

*Price*

Size A, for 2½ x 4¼ prints, with extra masks for vest pocket and 2¼ x 3¼ prints . . . . \$0.75

Size B, for 3¼ x 5½ prints, with extra masks for 2½ x 4¼ and 3¼ x 4¼ prints . . . . .90

## TRIPODS

### KODAK METAL

The Kodak Metal Tripods have telescoping legs of brass tubing—the three lower ones nickel—the upper, black enamel. They are light in weight, compact and exceptionally rigid.

The Nos. 1 and 2 have revolving heads permitting the camera to swing so as to take in the desired view without moving the tripod. They also have straps for holding the legs in place when closed. The Nos. 1C and 2C have solid heads and are without straps for holding legs. The No. 6 has an improved folding head, permitting the legs to fold flat.

	Sections	Length		Weight	Price
		Closed	Extended		
Kodak Metal Tripod No. 0	3	15½ inches	39½ inches	15 ounces	\$2.75
Kodak Metal Tripod No. 1C	4	15¼ inches	48¾ inches	25½ ounces	3.75
Kodak Metal Tripod No. 1	4	15 inches	48½ inches	24½ ounces	4.00
Kodak Metal Tripod No. 2C	5	13¼ inches	49¾ inches	26 ounces	4.25
Kodak Metal Tripod No. 2	5	13½ inches	49½ inches	25 ounces	4.50
Kodak Metal Tripod No. 6	6	11¾ inches	40 inches	24 ounces	6.50
Leatherette Case, for No. 0 and No. 1					.75
Leather Carrying Case, for any style					2.25
Rubber Tips for Metal Tripod Spurs (per set of 3)					.10

### THE BULL'S-EYE

Two sections. Aluminum revolving head. Made of maple, with brass fittings. For 4 x 5 cameras, or smaller. Length, extended, 42½ inches; folded, 24 inches. The only two-section tripod that will go into a suitcase.

Price, \$1.75

## THE STANDARD

The feature of this tripod is the automatic locking of the sections when they are extended. Light, compact and rigid. Fixed, non-detachable head. Length, folded 21 inches, extended 53½ inches. Weight, 18 ounces. Cherry finish, brass trimmings.

Price, \$2.50

## THE FLEXO

Two sections. Fixed, non-detachable head. Only clear, straight-grained wood is used in its construction.

Price, \$1.00

## VEST POCKET KODAK TRIPOD ADAPTER

The adapter simply slips over the front standard of the Vest Pocket Kodak and by attaching to a tripod, may be used in either the vertical or horizontal positions. It may be instantly detached when not in use.

Price, \$0.50

## UNIVERSAL TRIPOD HEAD

This new Tripod Head is a simple and effective device which will fit any regular tripod socket. Has ball and socket, permitting camera to be tilted to any desired angle, and is especially valuable when photographing objects at close quarters.

Universal Tripod Head . . . \$0.75

## THE UNIVERSAL CLAMP

The Universal Clamp is a small, convenient substitute for a tripod and may be attached to a chair, fence, automobile, or a motor cycle handle bar. It is so light and small as to be carried readily in the pocket, and fits any tripod socket.

Universal Clamp . . . \$0.75

## THE KODAPOD

The little Kodapod—which is carried easily in the pocket—takes the place of a tripod, when a tree, fence, or similar object is near at hand. Its jaws have a bulldog grip that holds the wood like a vise, and likewise the Kodak, firmly in position. By means of a clamping screw, the camera may be adjusted to the correct vertical or horizontal position. It fits any standard tripod socket.

The Kodapod . . . . . \$1.25

## KODAK SELF TIMER

The Kodak Self Timer “presses the button” and permits the one who takes the picture to be one of the group. It has no influence on the shutter speeds, it being simply a means of automatically releasing the shutter in intervals of one-half second to three minutes (according to adjustment), after the Timer is released.

The Timer is made in but one size, and may be used on any camera fitted with cable release, but cannot be used with “bulb” release.

Kodak Self Timer . . . . . \$1.25

## STEREO KODAK SELF-TRANSPOSING PRINTING FRAME

In making Stereo prints it is necessary to transpose either the negatives before the printing or the prints before mounting.

The Stereo Kodak Self-Transposing Printing Frame automatically transposes the pictures in printing so they appear correctly as one picture when viewed through the stereoscope, and permits one to make Stereo prints as simply as any others. The frame is for film negatives only and is not adapted for glass plates, the paper best suited is Velox  $3\frac{1}{8} \times 6$ , or Stereo Dye-cut Azo. For description of Stereo Kodak, see page 26.

Stereo Kodak Self-Transposing Printing Frame . . . . . \$2.50

### EASTMAN VISIBLE GRADUATE

This new moulded graduate, as its name implies, may be easily read in the dark room under the rays of the ruby light.

The graduations are opaque, not translucent as is the case with most graduates.

2-ounce . . . . .	\$0.25	8-ounce . . . . .	\$0.50
4-ounce . . . . .	.35	16-ounce . . . . .	.75

### EASTMAN THERMOMETER

Especially valuable in tank or tray development. Has hook from which it can be suspended and has curved back to fit inside of tank.

Eastman Thermometer . . . . . \$0.75

### THERMOMETER STIRRING ROD

A combined stirring rod and thermometer. Carefully tested and accurate. Has flat end for pulverizing. The rod is  $\frac{1}{4}$  inch in diameter and  $9\frac{1}{4}$  inches long.

Thermometer Stirring Rod . . . . . \$1.00

### EASTMAN PHOTO PASTE

A solid, first quality white paste that will not discolor print or mount.

4-ounce jar . . .	\$0.15	3-ounce tube . .	\$0.15
8-ounce jar . . .	.25	5-ounce tube . .	.25
2-ounce tube . . .			\$0.10

### FLEXO PRINT ROLLER

A thoroughly practical roller for mounting. Has 4-inch rubber roller and black enamel frame.

Flexo Print Roller . . . . . \$0.25

### KODAK PRINT ROLLER

The best roller constructed for amateur use. Has two 6-inch rubber rollers and finely nick-eled frame.

Kodak Print Roller . . . . . \$0.75

### KODAK CANDLE LAMP

This clever little lamp is collapsible and can be packed into very small space when not in use. It is made of special, tested ruby fabric, bound in metal frames and gives a strong, safe light for the dark room.

Kodak Candle Lamp . . . . . \$0.25  
Extra Candles for same, per dozen . . . . . .40

### KODAK DARK ROOM LAMP

The Kodak Dark Room Lamp is oil burning and is fitted with both orange and ruby glass. It has an unusually broad wick regulated from the outside and gives a soft, steady light for the dark room.

No. 2 Kodak Dark Room Lamp . . . . . \$1.00

### BROWNIE SAFELIGHT LAMP

But little larger than the electric bulb it holds, the Brownie Safelight Lamp screws into an electric socket which may be conveniently situated close to the place where the work is to be done.

The lamp is made of metal, neatly japanned; has circular safelight in the end and side safelight as well. Both safelights are the regular Series 1, and removable so that other series may be used, if desired. A 15 Watt Mazda lamp is used, but is not supplied.

The Brownie offers a most satisfactory means for dark room lighting where electricity is available.

Brownie Safelight Lamp . . . . . \$1.00  
Extra Circular End Safelight (any series), each .20  
Extra Side Safelight (any series), each .30

### KODAK SAFELIGHT LAMP

The Kodak Safelight Lamp is ideal for all dark room uses, whether that be the work of the beginner, the advanced amateur, or the professional.

The lamp is supplied with a 5 x 7, Series 1, safelight for use with films or plates, not color sensitive. Safelights of other series may be obtained, if desired, for more advanced work. It is made of metal; neatly finished in a warm tone of brown and the inside is enameled white to intensify the force of the reflected light from the electric bulb in the top.

The lamp is supplied complete, excepting electric bulb, including besides the safelight, four feet of electric light cord with socket.

Kodak Safelight Lamp . . . . . \$3.00

## SAFELIGHTS FOR KODAK SAFELIGHT LAMP

Series 00—Yellow light, for use with gaslight papers.

Series 0—Bright orange light, for use with bromide paper and lantern plates.

Series 1—Orange safelight, for use with films or plates not color sensitive.

Series 2—Safelight, for extra rapid orthochromatic plates sensitive to green but not red.

Series 3—Green safelight, for use with red-sensitive panchromatic plates.

Series 4—Bright green safelight, for use with ordinary plates, for those who cannot use a red light. Not safe for orthochromatic plates.

5 x 7 (any series), each . . . . . \$0.50

## FLASH LIGHT MATERIAL

The simplest and safest method of making flash light pictures is by means of the Eastman Flash Sheets and Kodak Flash Sheet Holder. The sheets burn slowly, giving a broad, soft light, and not so startling to the subject as to give a staring effect to the eyes.

The holder is provided with a saw tooth for holding the sheet in proper position, and is lighted from the back, through an aperture provided in the center for the purpose. In this manner the holder is always between the operator and the flash sheet, and it may be held in the hand or supported on a tripod, a socket being provided for the purpose.

*No. 1 Flash Sheets, per package of ½ dozen sheets 3 x 4 . . . . .	\$0.35

\*Prices subject to change without notice.

## VELOX TRANSPARENT WATER COLOR STAMPS

The making of beautifully colored prints or lantern slides, by the use of Velox Transparent Water Color Stamps, will be found an interesting and highly enjoyable diversion.

Each book of stamps includes twelve sheets of colors and each sheet is divided by perforations into twenty-two stamps. To use any color, merely tear off a stamp, place in a small saucer or palette supplied with the outfit, and cover with about a teaspoonful of water.

The Velox Transparent Water Color Stamp Outfit offers the greatest convenience in coloring prints, as it includes the book of stamps, three brushes and a white enameled mixing palette, put up in a neat cardboard case.

Velox Transparent Water Color Stamps, complete booklet, 12 colors	\$0.25
Separate Color Leaves, two sheets . . . . .	.05
Set of 3 Special Brushes, per set . . . . .	.50
Mixing Palette . . . . .	.25
Velox Transparent Water Color Stamp Outfit, including book, three brushes and palette . . . . .	.75

## KODAK TRIMMING BOARDS

Made of hard wood, with natural finish, have fine quality steel blades and are fitted with rule.

No. 1, capacity, 5 x 5 inches . . . . .	\$0.50
No. 2, capacity, 7 x 7 inches . . . . .	.70
Transparent Trimming Gauge (extra). For No. 1 . . . . .	.25
Ditto, for No. 2 . . . . .	.35

## KODAK JUNIOR FILM CLIP No. 1

The No. 1 clip is the most practical for tray development or drying of films. Has two jaws to prevent film from slipping. One size only.

Kodak Junior Film Clip No. 1, each \$0.12

## KODAK JUNIOR FILM CLIP No. 2

This new film clip is similar to the No. 1 but on account of being wider, may be used with wider film and will hold the film flat.

It is particularly adapted for use with 3A film, but may be used as well with larger or smaller film. Has jaws to prevent the wet film from slipping. Furnished in one size only, 3 inches wide.

Kodak Junior Film Clip No. 2, each . . . . . \$0.25

## EASTMAN FILM CLIP

A thoroughly dependable clip. Made in two sizes and nickel-plated.

3½-inch, per pair . . . . . \$0.25  
5-inch, per pair . . . . . .40

## TERMS

The prices in this catalogue are strictly net, except to regular dealers who carry our goods in stock. THESE PRICES, OWING TO UNSETTLED CONDITIONS, ARE, HOWEVER, SUBJECT TO CHANGE WITHOUT NOTICE. For the convenience of our customers we recommend that they make their purchases from a dealer in photographic goods, as by so doing they can save both time and transportation charges.

EASTMAN KODAK CO.

ROCHESTER, N. Y.

# “KODAK”

IS the registered and common-law Trade Mark of the Eastman Kodak Company and cannot be rightfully applied except to goods of their manufacture. When a dealer tries to sell you under the Kodak name, a camera or films or other goods not of their manufacture, you can be sure that he has an inferior article that he is trying to market on the Kodak reputation.

*If it isn't an Eastman  
it isn't a Kodak*
