PREFACE.

Our city has obtained such a size and contains so large a population, that a Directory is one of the necessities of business life. Every man finds it indispensable frequently to consult such a Register of names and localities as is thus compiled, or is subjected to great delay and inconvenience. To professional and business men, the trouble, in one of the hundreds of instances where it is important to find some person whose location is unknown, may be more than the expense of a copy of the work we now present to the public. Therefore, a Directory is indispensable in every public office, counting room or shop.

In presenting to the citizens of Rochester, the second volume of "THE DAILY AMERICAN DIRECTORY," we do so in full confidence, that the favor so liberally bestowed upon our Directory published two years ago, will also attend the present issue. Accuracy being the first and great desideratum in a publication of this character, we have spared no pains to render the registry of names, &c., as perfect as possible. We have employed competent, trust worthy and pains-taking men, to canvass the city, and we think the result of their labors, will prove they have performed the task with great faithfulness.

The canvass has been conducted under the supervision of Mr. R. D. JONES, who has not spared any effort or expense to render it as perfect as possible. Were we to claim that no errors have been allowed to creep into the work, it would be saying what cannot be said of any publication of the kind. Among the large number of names registered, some of the persons giving them may not have been sufficiently careful to give their names and residence correctly; some individuals being absent from the city, the canvassers were compelled to obtain particulars from those who may not have been correctly informed. Still we think very few errors will be discovered, and that it will not be inferior to any work of the kind heretofore published in this city.

The plan adopted for the first time two years ago, in giving not merely the name, occupation, and place of residence or boarding of persons, but also *the place where occupied*, has been carried out, and the places

described, where at all practicable. By this arrangement a still further clue is given to the whereabouts of transient individuals, whose residence may have become entirely unknown in the neighborhood in which they had resided.

The names of *females* acting in the capacity of artizans in the various mechanical branches, and also those of domestics, &c., whose relations and friends are remote from the city, have been given.

The statistics &c. of the various Benevolent, Literary, Horticultural, Fire, and Military Associations, &c. &c. of the city and county, are believed to be full and accurate, affording much valuable information.

The table of Streets, Alleys, and Public Squares, alphabetically arranged, will be found of great convenience, not only to strangers, but to our own citizens.

A neatly-executed Map of the City is inserted, delineating the names of the Streets, Public Squares, the location of the Churches, District Schools, and the Wards, with their boundaries. The importance of such a Map is obvious to every one.

The publishers tender their acknowledgements to those ladies and gentlemen, who have kindly furnished statistics, in regard to the Societies with which they are connected.

The reader is particularly referred to the advertisements to be found at the close of the work. That portion of the business community who have taken this prominent means of giving extensive publicity to their respective kinds of business, are entitled to our unfeigned thanks for the liberal patronage they have bestowed.

The undersigned intend to issue a Directory regularly in future.

Benevolent Institutions of Rochester.

FEMALE CHARITABLE SOCIETY.

[For the following items relative to this truly benevolent Institution, we are indebted to a brief sketch of its rise and progress, prepared by Mrs. JAMES K. LIVINGSTON, in 1844, from which we extract.]

"The Society was first organized, prior to the year 1827, at the house of EVERARD PECK, and Mrs. P. was chosen Treasurer. Its formation was the result of a Charity School, which had been established previous to the year 1822, and taught alternately by Ladies in a room on State street, which was owned and gratuitously granted for the purpose, by the late JOSIAH BISSELL, near the premises now occupied by the City Bank. The educational wants of the poor, together with other destitutions consequent upon sickness in a new country, prompted the foundation of this Society, on the 26th day of February, 1822, for the purpose of more efficient action. Thus, we find even at this early day, that our citizens considered the poor, and according to their ability, afforded them advantages equal to their own, for schools of any kind were at this period, 'few and far between.'

"The first garments collected for distribution, were donations from the ladies, of some articles needed. Beds and bedding, and other conveniences for the sick, were at that time, and have been ever since, lent to the individuals, to be returned by the Visitor, upon their recovery. Infants' clothing has been given from time to time; and for many years the children of the school were clothed by the Society. A school lot was presented by the late Colonel FITZBUGH, situated, at that time, upon the outskirts of the *Village*, near the forest, but which, it was known, would soon be valuable. It is now an eligible lot on North Washington-street, with a plain building upon it. Since the establishment, however, of our Common School System in this city, this school has been discontinued, except for the purpose of teaching the children of the poor to sew. The number of districts for the visitation of the sick has increased from fifteen to forty-four. The duties of the Treasurer are already quite onerous.

"One happy feature of the Society, has been its freedom from all bigotry of sect or party—all classes of our citizens are cordially invited to lend a helping hand; while, also, all classes who need its aid, share with equal willingness in its benefits.

"A sermon has been preached annually in aid of its funds. Its first

sermon was preached by the Rev Mr. CUMMING, of St. Luke's Church."

The following are the officers for the year 1849 :

Mrs. JAMES H. GREGORY, President.

Mrs. JONATHAN CHILD, Vice President.

Mrs. E. DARWIN SMITH, Secretary and Treasurer.

The city is divided into forty-six districts, in each of which Ladies are appointed as Visitors, who are required to recollect that their districts extend to the centre of streets named as boundaries; also, that they should inquire, as often as once a month, into the condition of the poor in their districts, either personally or otherwise: let the poor know their names and residence, and make out a full report on the number of families visited, and the sums expended, and deliver it to the Treasurer one week before the annual meeting. In no instance can a Physician be paid from the funds of the Society. The City Physician is to be called in all cases where the individual has been a resident more than one year; in all other cases, the County Physician. All the officers are requested to attend the monthly meetings, at the house of the Secretary, on the first Tuesday of each month, at 2 o'clock, P. M.

ORPHAN ASYLUMS.

ROCHESTER ORPHAN ASYLUM.

This Institution was established in 1836, and incorporated in 1838. The Asylum, a spacious brick edifice, is situated between Greig and Exchange streets, in the south-west part of the city, on a beautiful and commanding site, the munificent donation of the Hon. JOHN GREIG, of Canandaigua.

The Asylum is at present under the maternal care of Miss LUCY HERRIOTT, who has in a highly satisfactory manner directed the domestic affairs of the Institution for the last year and a half. The School is taught by Miss SALLY K. FARNHAM, and the Sabbath School, by Mr. EVERARD PECK. At present sixty-five children occupy the Asylum. Average number of children during the past year, sixty. But one death has occurred in the institution during the last two years.

The following are the officers for the present year :

Mrs. C. DEWEY, President,
Mrs. W. W. MUMFORD, Secretary,

ROMAN CATHOLIC ORPHAN ASYLUM.

This Institution for the support and education of destitute orphan children, is situated on Frank-street, in rear of St. Patrick's Church, the ground on which it stands being the property of that congregation. It is a large and handsome brick building, and was opened for the reception of inmates, in July, 1842, since which time many destitute orphans of both sexes have been admitted. Of this number forty-one (all females) are at present in the house, the few remaining male children being supported out of the Institution. The means of support are derived from the subscriptions of the members of the Catholic Orphan

Asylum Society, lately incorporated by the Legislature ; from the donations of charitable individuals ; and from the proceeds of Annual Fairs, which have hitherto been liberally patronized by the citizens of Rochester generally.

This establishment is under the exclusive control of six SISTERS OF CHARITY, who also teach a Select School, "THE ST. PATRICK'S FEMALE SEMINARY," which is attended on an average by about one hundred pupils. There is also a *Free School* taught by the Sisters of Charity, which is attended on an average by about one hundred and fifty pupils. The Sabbath School taught by them, assisted by others, numbers nearly three hundred pupils.

To meet the increasing wants of the Asylum, the Trustees during the past two years have made additions equal in extent to the former building, and erected an additional story to the entire structure. It is now a large and commodious building well adapted to promote the comfort and health of its inmates.

ROCHESTER SUNDAY SCHOOL UNION.

This Society was organized in 1822, and embraced four Schools, numbering not far from 150 scholars. Monthly meetings of the Union are held, and on the second Sabbath in January in each year, an annual report from each school is presented, stating its condition and prospects, with appropriate reflections upon previous years' labors.

At present it embraces nineteen schools : 4 Presbyterian, 1 Congregational, 2 Baptist, 1 Free Baptist, 1 Methodist, 2 Episcopal, and 8 schools not directly connected with any congregation, but conducted by teachers mostly from the above named churches. Present number of scholars, 3,492—of teachers, 417. Books in the libraries, about 6,000 volumes. In other Sabbath Schools, not reported to the Sabbath School Union, 1,680 children have been taught during the past year. One hundred and thirty-nine conversions of children connected with the Schools were reported during the past year.

"The Rochester Sabbath Schools have sent forth among the Heathen, the following Missionaries and assistants:—Ebenezer Bliss, of the Choctaw Mission; Rev. Jonathan Green, Rev. T. D. Hunt, Edwin O. Hall, Mrs. Delia Bishop, and Mrs. Fideia Coan, of the Sandwich Island Stations; Mr. E. A. Webster, Rev. Alanson Hall, Rev. Ferdinand D. Ward, Rev. Henry Cherry, and Rev. Mr. Lockwood, to India; Rev. Grover S. Comstock to Burmah; Mrs. Julia Johnson to Siam; Dr. Henry De Forest and wife, and Mrs. M. W. Smith to Syria.

Common Schools.

BOARD OF EDUCATION,

The Free School System was established in this city, in May, 1841, and is under the control of a Board of Education, consisting of two Commissioners from each Ward, which officers, and a Superintendent, are elected by the people, on the 1st Tuesday in March, of each year. Through this system it is calculated that every child in the city is entitled to an education, gratuitously—the system receiving its support from a general tax. There are, at present, fifteen School Districts, in most of which have been erected commodious and comfortable School Houses—the majority of which are of brick, and are not at all inferior to many of the Academies of this State. In addition to the above, there is a school for colored children, embracing the entire city. 6,000 children have attended these schools since the commencement of the current school year, (Sept. 4, 1848.) Cost of School Houses over \$40,000. Amount raised by tax for the support of schools during the current year \$12,300.

The Board for the year 1849, consists of the following members :

1st Ward,	Messrs.	Edwin Pancost and John B. Dewey.
2d	"	George W. Parsons and Horace P. Smith.

Agricultural Societies, &c.

MONROE COUNTY AGRICULTURAL SOCIETY.

In the year 1833, an Agricultural Society was formed, of which **WILLIAM GARBUTT**, of Wheatland, was the presiding officer. After a *vacation* of several years, the Society was revived, in a somewhat different form, under the title of the "**Genesee Agricultural Society**." On the 28th of May, 1841, a Society was organized, embracing a large portion of the Western part of this State.

During the session of the Legislature for 1841, a law was passed giving a bonus of \$8,000 to the different counties, in proportion to their population, on condition of their raising, in each county, an equal amount—the share of the County of Monroe being \$194.

In consequence of the passage of this law, the Genesee Agricultural Society, by a vote of the members, changed the name to that of the Monroe County Agricultural Society, and restricted its limits to the county.

Annual meetings are held on the second Wednesday, and the Annual Fair, in Autumn, of each year.

Since its more recent organization, the Society have held several successful and profitable Exhibitions and Fairs—and have also been favored with the delivery before them of several eloquent and spirited addresses.

The following gentlemen were elected officers for 1849 :

\* Many doubloons and parts of doubloons are light, and consequently unsaleable. A doubloon should weigh the same as a good dollar, or two half dollars.

† Most of the Johannes and half Joos now in circulation are light. They should be taken at the rate of 80 cents for the weight of a five cent piece.

# WILDERS' PATENT SALAMANDER SAFE, IMPERISHABILITY SECURED.

THE Metal portion of these Safes consists of the stoutest and toughest wrought, bar and plate Iron, and the space between the outer and inner surfaces is filled with chemical preparation which is the most perfect non-conductor of heat yet discovered, and which cannot be affected or penetrated by fire. This fact has been established beyond question by the results of many experiments, attested by persons of the highest respectability. In every trial to which the genuine Salamander Safe has been subjected, whether accidental in burning buildings, or by agreement for the purpose of competition, its fire proof properties have proved immeasurably superior to those of any (so called)

## FIRE PROOF SAFES EVER MANUFACTURED.

By an improvement upon the original Salamander, recently introduced by the present owner of the patent right, the interior is now rendered wholly impervious to damp, and books, papers or jewelry, can be preserved in one of these safes for a century without contracting a blemish from mould or mildew.

To guard against counterfeits, every safe from the manufactory of the subscriber, and sold by him or his agents, has a brass plate in front, bearing his name; each is also furnished with one of Chubb's Thief Detector Locks, which is a good guarantee against robbery.

# RIDER'S PATENT IRON BRIDGE.

## THE RIDER IRON BRIDGE

Having now been fully tested on the Harlaem Railroad, by constant use for about eighteen months, and found to answer the full expectations of its most sanguine friends, is now offered to the public with the utmost confidence as to its great utility over any other Bridge now known.

The plan of this Bridge is to use the iron so as to obtain its greatest longitudinal strength, and at the same time is so arranged as to secure the combined principles of the Arch, suspension and triangle, all under such controlling power as causes each to act in the most perfect and secure manner, and at the same time impart its greatest strength to the whole work.

## THE RIDER IRON BRIDGE COMPANY,

Are prepared to furnish large quantities of

## IRON BRIDGING,

for Railroad or other purposes, made under the above Patent, at short notice, and at prices far more economical than the best wood structure, and on certain conditions, the first cost may be made the same as wood.

Models and pamphlets giving full descriptions of the Rider Bridge, with certificates based on actual trial from undoubted sources, will be found at the Office of the Company, 74 Broadway, up stairs, or of

# WHEELER'S PATENT

## IMPROVED

### Portable Rail Road Horse Power,

—AND—

### OVERSHOT THRASHER AND SEPARATOR.

The advantages of the above Horse Power are—1. They occupy but little more space than a single horse. 2. They can be moved by the weight of the horse only, by placing them at an angle of 19 or 15 degrees. 3. They are comparatively light and portable, and can be easily transported. 4. They are simply constructed, and not liable to get out of order, and move with little friction, the revolving plane gearing without any complex or intermediate wheels, directly into the pinion upon the shaft on which the pulley belt runs.

## THE THRASHERS

consist of a small spiked cylinder with a concave plane over it, and a level feeding table. There are several improvements in the Overshot Thrasher.

1. They admit of a level table for feeding, thus enabling the tenders to stand erect, and control the motions of the horse and machine, by means of a brake, by which accidents are avoided.

2. In consequence of the spikes lifting the straw and doing the work on the top, heavy substances, such as stones, blocks, &c., drop at the end of the table, and are not carried between the spikes, by which they and the machine are broken.

3. The overshot cylinder does not scatter the grain, but throws it within three feet of the machine.

4. This arrangement also admits of attaching a SEPARATOR high enough from the floor or ground to allow all the grain to fall through it, while the straw is deposited by itself in the best condition for binding.

5. Neither grain nor straw are broken by this machine.

6. The cylinder is longer, which admits of faster and more advantageous feeding; it is smaller and with fewer teeth than ordinary Thrashers, thus admitting of more rapid motion and faster work with less power; and the diminution of teeth in the cylinder is fully made up by those in the concave, which is stationary.

7. The Separator is a great advantage in diminishing the labor of raking out the straw, as it leaves the grain in the best condition for the Fanning Mill.

Three men, with a single Power, can thresh 75 to 100 bushels of Wheat or Rye; or four men, with a double Power, 175 to 225 bushels of Wheat or Rye, or double that quantity of Oats or Buckwheat per day.

All the above are compact, and can be carried where wanted complete, or they may be readily taken apart and packed for distant transportation by a wagon or otherwise.

# ARNOLD'S PATENT WINDOW SASH LOCK.

PA-TENTED MARCH 27, 1849.

This article, designed as a fastener for Windows, is the most desirable thing of the kind ever invented, and meets with universal favor wherever known. All who examine the Lock, admire its simplicity and adaptedness to the purpose intended. The object of this circular being to call the attention of the public to an examination of its merits, the Patentee will substitute for any description or endorsement of his own, the following certificate signed by the Mayor and Postmaster of Rochester, the First Judge of Monroe county, the editors of the several newspapers, the various Hardware Merchants, and other scientific and business men of Rochester.

## CERTIFICATE.

We, the undersigned, citizens of Rochester, being acquainted with the Window Sash Lock recently invented by Mr. WM. E. ARNOLD, of this city, take pleasure in recommending it to the public, it being in our opinion, decidedly preferable to any other we have seen. The principle on which it operates appears to be correct.—The bolt moves by its own weight, and yet lies horizontal, or nearly so,—is only enclosed by a box of Russia sheet iron, forming a perfect Window Fastener, holding the window up or down, without the aid of a spring or screw. It is adapted to any common sized sash, and when put in, which is very quickly and easily done, has no appearance of ever getting out of order, and works with the most perfect ease. The difficulties which necessarily arise from springs, and also those that have heretofore been made to move by their own weight, being entirely obviated in this. It only needs to be known to go into general use.

## Certificates from D. C. McCALLUM & HENRY SEARL, Distinguished Architects.

The undersigned would represent, that for the last fifteen years he has used, and has been familiar with the various kinds of Window Fastenings which have been from time to time invented, all of which have been imperfect in some particular. I have recently examined and tested a Window Fastener invented by Wm. E. Arnold, of this city, which for ease of attachment, durability, economy and adaptation to the purpose, exceeds any thing of the kind which has come under my notice.

Rochester, April 25th, 1849.

D. C. McCALLUM.

Having examined the Sash Lock recently patented by Wm. E. Arnold, of this city, I give it as my opinion, that it possesses qualities that render it far superior to any thing of the kind that I have yet seen, and that it will so recommend itself to the public, and that it will go into general use.

Rochester, May, 1849.

HENRY SEARL.

WM. E. ARNOLD, Patentee and sole Manufacturer, Main, corner of Alexander Street, Rochester, N. Y. Letters addressed to him, post paid, will receive prompt attention.
