MADE

ALL

SIZES.

FROM 2 TO

100 GALLONS.

[Patent Applied for.]

This article combines in one action all the requisites to supply

## PURE COLD WATER.

It is both Elegant in Appearance, and Perfect in Principle. By a simple process, the impurities, instead of accumulating in the filtering medium, are collected in a chamber below, and can be removed as often as necessary. The objection hitherto made to Filters of the ordinary construction, which by allowing the water to pass downwards, become choked with impure vegetable matter, and consequently unfit for lengthened service, is thus entirely done away. Another advantage it possesses is its connection with a cooler, whereby ICE, when necessary, is not only preserved, but **CLEANSED AND RENDERED WHOLESOME.** The fact that Pure Soft Water is an essential to Health, needs no further proof than is afforded by the statistics of different localities in this country and Europe, clearly showing that cholera and other diseases are directly traceable to its absence. It becomes, therefore, A DUTY incumbent on all to provide such a simple and Efficient Preventive; and the Inventors confidently appeal to **HEADS OF FAMILIES** to make a trial of the above, which they unhesitatingly recommend as the most efficient Water Purifier ever introduced. They are made in five sizes, capable of purifying from 10 to 100 gallons of rain or river water per day, and are suitable for Offices, Stores, small and large Families, Hotels, Steamboats, Rail Road Cars, &c.
