In his MANUFACTORY and MUSIC Rooms he has constantly

25 to 50 Finished Piano Fortes. 50 to 100 in Process of Construction From 64 to 7% Octaves. From 230 to 700 Dollars.

Each Piano has the Four Indispensable requisites to a perfect Instrument.

1-An elegant and complete Iron Harp Frame.

2-The Iso-Chordia Scale.

3-The Iso-Baron Damper.

-Starr's Patent Hollow Cilindrical Retinaculum.

This last is a recent invention patented by myself in 1855, and is believed to be of more value to an instrument, and service to the purchaser, than any improvement for many years. They speak for themselves. Their Touch, Tone, Volume and Sweetness, are unrivalled. The State Fairs of '51 & '56, endorsed their merits by the Five Highest Premiums, when in competition with several claiming to be the best makers in this country. And years of experience have proceed them worthy of all the encominums, then and since bestowed upc. hem.

We rest them on their intrinsic merits—ask the most careful scrutiny and comparison. Visitors, as well as purchasers, and those having curiosity, are invited to Come, See, Hear, Examine in any way they please, and judge for themselves, if they are not better and chraper than any others in the market. MELODEONS **FORTES**

Please post this in a conspicuous place or hand it to your acquaintance.

My Piano Fortes have now become so celebrated and generally known—have given such entire satisfaction to all who have bought or used them, that I need only say, that among the hundreds sold, not one has proved bad, and what is better, they will keep longer in tune, and improve more by use, than any others you can find. All persons who have not, I invite to come and see them at My Music Rooms and Manufactory; or, if inconvenient to do this, if you will address me by mail, (enclosing one postage stamp to pay use postage.) I will send you one of my recently published circulars, which will fully explain to you their peculiarity of construction, with my various Improvements and Patents.

This will give you more information and knowledge of Piano Fortes, other Musical Instruments, and things desirable to know, than can be obtained from any other source in many

hours of time, or for twenty times the money.

This institution was established in 1842. The new system of Mercantile Instruction, combining

THEORY AND PRACTICE,

was introduced in September last, and its practicability is now thoroughly demonstrated. To appreciate fully this

NOVEL, ORIGINAL AND PRE-EMINENT

mode of Mercantile Education, the operations of pupils during business hours must be witnessed. The success it has already attained, warrants the belief that a visit to our rooms will be sufficient to satisfy any one of the

SUPERIORITY OF THIS SYSTEM

over all others ever devised or introduced. It places the pupil at once in

actual business,

and makes him practically acquainted with every variety of accounts, and the whole routine of Commercial transactions, from the simple details of a country store, to the more complicated operations of the highest Banking Institution.

are invited to call at their convenience. Pupils received at any time. No vacation during the summer. For particulars, send for Circulars.

CRACKER AND BISCUIT MACHINES,

Rochester, N.Y.

The subscribers having secured by LETERS PATERT, some valuable improvements in Franker er and Biscult Machines, are prepared to furnish a BETTER ARTICLE THAN EXER BEFORE OFFERED IN MARKET, and at prices that cannot fail to be satisfactory. Among other improvements introduced are the following:

ADJUSTABLE INDIA RUBBER SPRINGS

Are applied to the rods which connect the Cutter-liead with the Rock-Shaft, by means of which the pressure of the Cutter is equalized, and can be made to bear with any degree of force required, thus avoiding almost entirely the danger of breaking. By means of the e Springs, the Cutters are kept longer in contact with the Dough, which greatly facilitates the Picking up of Scraps, so that these Machines may be run at any desirable speech.

An entirely new mode of Gearing has also been introduced, by which a much more correct feed of the Roller is attained, obviating much of the troub e in changing the Cutters.

The gearing, and many other parts of the Machine, are made s'ronger than heretofore, and the Rollers are placed in a different position, supported in such a way that they can be easily removed when required. This last mentioned Improvement has also been applied to the Brake. The Machine and Brake are both built on strong and substantial

DITER OF THE PROPERTY AND THE SECOND

And no pains have been spared to make them THOROCCH, EFFICIENT and DURABLE. A NEW KIND OF JOINT, has been substituted for the Ball and Socket heretofore used, which will be found more convenient in adjusting, and much less liable to get out of order. They have Patterns for

Over Thirty different kinds and sizes of Cutters,

All of the most approved styles. SILVER MEDALS were awarded to these Machines at the State Fairs of New York and Michigan. They also continue to make the GAGS MA-CHINES, much improved, and at greatly reduced prices.

Each Machine will be tried with Dough before it leaves the shop, and warranted.

All orders or communications by mail will receive prompt attention.

Dr. HENEBURGER'S

to Females, Midwifery, &c., together with VENE-REAL or PRIVATE DISEASES, in all their varied forms. Dr. H. has made the above his special

PRACTICE FOR NEARLY FORTY YEARS.

And by his long experience he has been enabled to perform the most wonderful cures on record. He does not promise to cure long standing cases of Venereal diseases in three or four days, as advertised by many practitioners, but guarantees to effect PERMANENT cures even in the most severe cases, in as short a period as the nature of the case will admit, with safety to the patient. As Dr. H. confines himself strictly to Vegetable Remedies, patients need have no fear of the distressing effects sometimes produced when mineral poisons have been administered.

ONANISM, or SELF-ABUSE, and all the ills arising therefrom, are treated on an entirely new and more successful principle than that adopted by any other physician in this country, the truth of which can be attested by reference to patients in almost every State in the Union and the Canadas. A perfect cure warranted in every case. Patients at a distance can be treated at home by sending a history of their case, and receive the necessary remedies, with full directions for use, by express or as otherwise directed, securely packed

from observation.

THE GOLDEN FEMALE PILLS, as prepared by Dr. Heneburger, have been before the public nearly 20 years, and their great demand from all parts of the world, is a sufficient guarantee of their utility. Various imitations of this Pill have been put forth within the last few years, and sold at a low price. To guard against this evil, Dr. H. has withdrawn all his agencies; they can now only be obtained at his office. Price \$2; sent by mail to any part of the world. They should not be used during pregnancy, as miscarriage would be the result.

OFFICE HOURS—From 8 A. M. till 9 P. M. Private Rooms always in readiness, thus avoiding the inconvenience of meeting with any one but the Doctor. In Dr. H.'s absence, his associate, Dr. T. H. CLIFF, who is in every way qualified, will be found in attendance. All letters must be addressed to Drs. Heneburger & Cliff, or to box 2158, Rochester, N. Y., and to contain a stamp when an answer is desired.

A NEW PATENT. Dr. BLY'S Ball and Socket-Jointed ARTIFICIAL LEG.

This Leg is adapted to any amputation, either above or below the knee, and supplies the loss of the Natural one so completely, as to hide from ordinary observation the fact that the wearer walks on a limb not of Nature's own handiwork.

The ankle joint is formed by a

Ball of Polished Ivory,

and a socket of *Vulcanized India Rubber*, which is a joint WITHOUT IRON, consequently very light, and one which requires no oil—facts of no little importance. Besides these, it has this important advantage over all others, viz: that it admits of every motion which the natural ankle does, without an exception.

ject, can address
