GAS LIGHT COMPANY.

ROCHESTER GAS LIGHT COMPANY,

*Organized in 1848.***Capital Stock, - - \$700,000.00**

OFFICE AND WORKS,

The following explanations will enable any person to understand the process of ascertaining the Registry of the Gas Meter, and by making observations every day, or at short intervals, to satisfy himself that the meter registers with uniform accuracy the amount of gas that passes through it. The following diagrams show the "Indexes" seen on the front of every meter.

EXPLANATION OF INDEX.

The figure or division on the different faces of the index indicates as follows, viz: On the Right Hand Face, *Hundreds*, as 100, 200, 300 cubic feet, &c.; on the Middle Face, *Thousands*, as 1,000, 2,000, 3,000 cubic feet, &c.; on the Left Hand Face, *Tens of Thousands*, as 10,000, 20,000, &c., and in this way multiplying by 10 for every additional face.

TO TELL THE STATE OF THE METER—Look at the left hand face of the index, and set down the figure of least value next the hand, which on the diagram is 1. Next look at the middle face, and as before set down the figure of the least value next the hand, which on the diagram is 3. Next upon the right hand face, take the same relative figure, which is 5, and you have the figures 1, 3, 5, to which last figure add two ciphers to represent hundreds, and the sum, 13,500, is shown to be the present state of the meter. If a previous observation has been taken, subtract the state of the meter at that time from the present state, and you have the amount consumed in the interval.

NOTE—In case of the failure of the gas from any cause, immediate notice of the fact should be left at the Company's Office.
