STREET DIRECTORY.

The Street Directory gives the location of each street, and shows what other streets or places run from it or across it, with the number at which they intersect. From this list the location of any number on a street can be easily ascertained. As, for instance, wishing to know at what part of State street No. 365 comes, look at State street and you find that Brown street runs from 255 left side, and Jay street from 295, showing that No. 365 comes on the left side of State street between Brown and Jay.

ROCHESTER REALSCHULE,

GERMAN-AMERICAN INSTITUTE,

7 and 9 Mortimer Street.

HERMANN PFAEFFLIN, Principal.

The principle on which the School is based requires a simultaneous study of the German and English languages. With this end in view, the Elementary classes in German and English will be combined, experience having proved, that thus a knowledge of both languages is most easily acquired. To facilitate the admission of older pupils, there will be a Special German Course, in which the English pupils will receive instruction apart, at the same time sharing with the rest the English lessons, presided over by competent American teachers.

Having acquired sufficient knowledge of German, these pupils will be incorporated with the German Classes.

For younger pupils there is established a "Kindergarten" Course. Children from four to seven are admitted.

Pupils not living in the city will be received as boarders on the most reasonable terms.

Applications will be received at the School, Nos. 7 and 9 Mortimer Street.

TO CONSUMERS.

The following explanations will enable any person to understand the process of ascertaining the Registry of the Gas Meter, and by making observations every day, or at short intervals, to satisfy himself that the meter registers with uniform accuracy the amount of gas that passes through it. The following diagrams show the “Indexes” seen on the front of every meter.

EXPLANATION OF INDEX.

The figure or division on the different faces of the index indicates as follows, viz: On the Right Hand face, Hundreds, as 100, 200, 300 cubic feet, &c.; on the Middle Face, Thousands, as 1,000, 2,000, 3,000 cubic feet, &c.; on the Left Hand Face, Tens of Thousands, as 10,000, 20,000, &c., and in this way multiplying by 10 for every additional face.

TO TELL THE STATE OF THE METER.—Look at the left hand face of the Index, and set down the figure of least value next the hand, which on the diagram is 4. Next look at the middle face, and as before set down the figure of the least value next the hand, which on the diagram is 3. Next upon the right hand face, take the same relative figure, which is 5, and you have the figures 1, 3, 5, to which last figure add two ciphers to represent hundreds, and the sum, 13,500, is shown to be the present state of the meter. If a previous observation has been taken, subtract the state of the meter at that time from the present state, and you have the amount consumed in the interval.

In case of the failure of the gas from any cause, immediate notice of the fact should be left at the Company’s Office.

A Comparison between New and Old Life Policies, in the

GENERAL JOHN WILLIAMS,

26, 1844, for .................................................. $3,000 00
Which has been increased by dividends, ........................................... 3,742 61

THE REV. FATHER BYRNES,
(Pastor of Immaculate Conception Church, Rochester.)
Took out a Policy through our office, August 21st, 1874, for $20,000. On this Policy he
had paid one premium only, amounting to $583. His untimely death brings the payment
by the Company necessary within ten months from its issue. Father Byrnes was, to all
human appearance, one of the best risks ever written in this or any other office; yet death
came and took him away in his very prime of life.

and ninety-eight others.

46 Washington St., Boston, Mass., Sept. 15, 1873.

Gentlemen:—The Committee on Humane Inventions, at the New England Fair, have, under our offer of prizes, awarded you a gratuity of twenty-five dollars ($25.00) for Lawton's Improved Harness, or Draught Attachment. Enclosed please find check for the above amount.

Yours truly,
FRANK B. FAY, Secretary.

P. S. We should be pleased to have your improvement in harness on exhibition at our office.

Yours truly,
CHAS. A. CURRIER, Special Agent.

Twenty-five dollars was the highest award paid by the Society.

This attachment does away with traces and breeching, and the above cut of the horse represents all the harness that is necessary. There is less than half the time spent in harnessing. As the horse is not encumbered with straps, he will travel easier. By observing the cuts, you will see this attachment has but few parts, which can be quickly attached and detached. It is cool, easy, and will not wear out in an ordinary lifetime. It is also self-adjusting, and the same collar will fit any horse, and allow him the greatest freedom of action. The metal parts are well polished and heavily plated, giving it a beautiful appearance.

Rights for sale, or Rights given in exchange for good land. Send for the price of your Town or County.

TO MILLERS!

THIS IS THE

Improved Excelsior Adjustable

Grain Scouring, Rubbing

And SEPARATING MACHINE Combined.

This machine is without any doubt, the best and most perfect invention of the kind ever introduced for Scouring, Cleaning and Separating grain. It will do all it is recommended. It will do better scouring and rubbing, and will put a better polish on the grain than any other machine of the kind. This we guarantee. It leaves the berry polished smooth, as it should be to make good flour. There is no mistake about this. I challenge the world to produce a machine of the same size and square inches of Scouring Case, that will perform its work equal to this without using part of this invention. It requires but little power to drive, and only runs 350 to 400 revolutions per minute.

This machine is protected by several Patents, and all infringers will be prosecuted. Address,

B. T. TRIMMER, Rochester, N. Y.

Patented July 27, 1858; Re-issued Sept. 29, 1865; Extended July 16, 1875; Patented April 12, 1870, and Oct. 17, 1871. Send for Pamphlet.

Celebrated Eagle Steamer
AND CALDRON,
For General Heating, Steaming and Cooking Purposes.

No. 187 WEST MAIN STREET.
The best and most desirable Steamer yet offered to the Public.

It is safe, simple in construction, easily managed, most thoroughly made, and of sufficient strength to stand a high pressure of steam. It has very large fire surface, consequently makes steam easily, rapidly, and with small amount of fuel. As now made, it has a perfect self-feed, which is of great importance (no other Steamer in market having a reliable one) a safety valve, vacuum valve; also, gauge glasses upon both steamer and barrel, showing at all times the exact state of water. The feed barrel is not made of iron. Experience has shown that the best wood barrels will not stand the pressure of steam any length of time.

Is now used for many kinds of business: Cooking in Hotels, Hospitals, Asylums or other public Institutions, Cooking for Stock, in Laundries, Dairies, Bath Houses, Tanneries &c., &c. SEND FOR CIRCULARS.
