STREET DIRECTORY.

The Street Directory gives the location of each street, and shows what other streets or places run from it or across it, with the number at which they intersect.

From this list the location of any number on a street can be easily ascertained. As, for instance, wishing to know at what part of State street No. 265 comes, look at State street and you find that Brown street runs from 255 left side, and Jay street from 293, showing that No. 265 comes on the left side of State street between Brown and Jay.

TO CONSUMERS.

The following explanations will enable any person to understand the process of ascertaining the Registry of the Gas Meter, and by making observations every day, or at short intervals, to satisfy himself that the meter registers with uniform accuracy the amount of gas that passes through it. The following diagrams show the "Indexes" seen on the front of every meter.

EXPLANATION OF INDEX.

The figure or division on the different faces of the index indicates as follows, viz: On the Right Hand Face, *Hundreds*, as 100, 200, 300 cubic feet, &c.; on the Middle Face, *Thousands*, as 1,000, 2,000, 3,000 cubic feet, &c.; on the Left Hand Face, *Tens of Thousands*, as 10,000, 20,000, &c., and in this way multiplying by 10 for every additional face.

TO TELL THE STATE OF THE METER.—Look at the *left hand* face of the Index and set down the figure of *least* value next the hand, which on the diagram is 1. Next look at the *middle* face, and as before set down the figure of the *least* value next the hand, which on the diagram is 3. Next upon the *right hand* face, take the same relative figure, which is 5, and you have the figures 1, 3, 5, to which last figure add two ciphers to represent hundreds, and the sum 13, 500, is shown to be the present state of the meter. If a previous observation has been taken, subtract the state of the meter at *that* time from the *present* state, and you have the amount consumed in the interval.

THE CELEBRATED

KNABE PIANOS,

Which have received the Highest Award at the Centennial, and over eighty Gold and Silver Medals.

THE FAVORITE BEHNING & DIEHL PIANOS,

With patent Double Bearing Agraffe, that secures absolute firmness, power and purity of tone, and keeps the piano in tune, warranted, longer than any other piano. Also, concave form of name-board, which gives the front an elegant appearance, and preserves it from being scratched with the finger-nails.

See them! Hear them! The GEO. WOODS & CO.'S ORGANS, which for purity of tone, brilliant musical effects and elegant designs are unequaled. We invite the musical public to call and examine these three remarkable instruments, acknowleged by the most eminent musicians (including such artists as Thalberg, Gottschalk, Vieuxtemps, Maretzek, Strakosch, Rubenstein, Pease, Madame Lucca and Kellogg), to be the most perfect, the most reliable and the most durable made. The difference between our low and high-priced instruments is in the workmanship of the case alone; the quality of the interior mechanism being the same in all. We buy only for cash, and at special low rates, and are thus enabled to sell at prices exceedingly low, when the quality is considered, and on very accommodating terms.

The Johnston Harvester Company,

OF BROCKPORT, N. Y.

THIS COMPANY have for many years built and put upon the markets of the world their peculiar MACHINES FOR CUTTING GRASS and HARVESTING GRAIN which have from the beginning taken the FIRST place among all those manufactured for that purpose.

They have been tested by scientific Machinists, by casual observers, and by practical Farmers, and always with one and the same result, namely,

The First Award for Excellence of Workmanship and Quality of Work Done in the Field. At the Centennial Exhibition at Philadelphia in 1876, they were awarded the Highest Honors.

They stand AT THE HEAD of the whole family of Harvesting Machines, and although attempts have been made to copy them by many other manufacturers, still the *Original* stands superior to all, and cannot be displaced.

In 1874, they took ***TWENTY GOLD MEDALS,*** and nearly as many MEDALS OF HONOR from fields in foreign countries alone, and the FIRST AWARD, being a Gold Medal, at the Cincinnati Exposition.

In 1875, they were equally successful in bringing home Gold Medals, besides the far better encomiums of the ROYAL AGRICULTURAL SOCIETY OF FRANCE, which ordered one of them tested through the ***whole season*** instead of for a short trial of a few days, and then examined by expert machinists, who pronounced it the BEST MADE, MOST DURABLE and MOST EFFICIENT MACHINE IN THE FIELD,

In 1876, they won TWENTY-FOUR Gold Medals as First Prizes at actual trials in the field.

FARMERS AND DEALERS

who wish to obtain the BEST will certainly examine the Machines of ***The Johnston Harvester Company,*** before purchasing elsewhere.

Their Machines consist as follows:

The Single Reaper, 6 feet cut, for Reaping only.

The Single Reaper, 5 feet cut, for Reaping only,

The Improved Wrought Iron Harvester, a most excellent machine, for Reaping only.

The No. 1 Combined Machine, a most superb and complete Machine, for either Mowing or Reaping, built in the most substantial manner and having two cutter-bars, one for reaping and one for mowing.

The No. 2 Combined Machine, a smaller Machine, having only one bar, which is used for both reaping and mowing, and is of very light draft.

The Wrought Iron Mower, which is pronounced by those who have used it, the best Mower in the market.

A New Machine, called the **International,** which weighs only about 500 pounds and is yet sufficient for any work, being very light, but of great strength.

Every pains taken to please our customers, and all our Machines WARRANTED.

We are manufacturing a pipe that is indestructible from the action of all the elements, impervious to the action of acids, gases and steam, all of which are found in corporation sewers. These pipes are made from a combination of superior clays, which by powerful machinery are rendered uniform throughout—pressed from a steam press, under a pressure of *sixty-three tons* upon each pipe, it is made very compact; and burned in close kilns at a very intense heat, it becomes a thoroughly vitrified and iron-like body. All prominent architects, builders, and all those who have investigated the subject of sewerage, have become convinced that properly burned clay pipe is the only material suitable for underground drainage, and that the sewer and drain pipe manufactured from cement, carbonated stone, and other similar materials, are liable to and do *decay*, *disintegrate*, and become *worthless*, as has been many times proved by the officials in many cities.

These vitrified pipe are suitable for well tubing; are *better* than *stone* or *brick*, because cheaper, more durable, and can be made perfectly tight.

☞ We deliver our Pipe within the city limits free of charge, and in good condition.

MACHINE WORK.

TO MILLERS.—This is the B. T. TRIMMER Improved Excelsior Adjustable

Grain Scouring, Rubbing and Separating Machine Combined.

This Machine is, without any doubt, the best and most perfect invention of the kind ever introduced for Scouring, Cleaning and Separating grain. It will do all it is recommended. It will do better scouring and rubbing, and will put a better polish on the grain than any other machine of the kind. *This we guarantee.* It leaves the berry polished smooth, as it should be to make good flour. *There is no mistake about this.* I challenge the world to produce a machine of the same size and square inches of Scouring Case, that will perform its work equal to this without using part of this invention. It requires but little power to drive, and only runs 350 to 400 revolutions per minute.

☞ This machine is protected by several patents, and all infringers will be prosecuted. Address,
