For Square Measure the square of long measure is used. For measuring land—in the place of acre—the **centar** which is one square meter, equivalent to 1,550 square inches; the **ar** which is 100 square meters, equivalent to 119.6 square yards; the **hectar** which is 10,000 square meters, equivalent to 2.47114 acres, are used.

For Cubic Measure the cube of long measure is used; **ster** is used as a measure of wood in place of cord.

The mill, cent, dime, dollar, and eagle of U. S. money exactly illustrate the decimal system of the metric measures, —the mill, cent, dime, corresponding with the milli, centi, deci of the metric system.

Abbreviations.—For meter, liter, and gram, the small initial letter is used, viz: m. l. g.; each division deci, centi, milli, also is abbreviated by using the small initial letters d. c. m.; but each multiple, deka, hekto, kilo, myria, is abbreviated by using the capital initial letter D. H. K. M.

Equivalents.—1 inch equals .0254 meter, or about 2 1-2 centimeters; 1 foot equals .3048 meter, or about 30 centimeters; 1 yard equals .9144 meter, or ab. 10-11 of a meter; 1 mile 1609 meters, or ab. 1.6 kilometers.

1 U. S. liquid quart equals .946 liter, or a little less than 1 liter; 1 U. S. dry quart equals 1.101 liters; 1 U. S. gallon equals 3.785 liters, or about 3.8 liters; 1 U. S. bushel equals 35.24 liters, or about 4-11 of a hektoliter.

1 avoirdupois ounce equals .02835 kilogram, or a little less than 30 grams; 1 Troy and apothecaries ounce equals .03110 kilogram, or a little more than 30 grams; 1 avoirdupois pound equals .45359 kilogram, or about 5-11 of a kilogram; 1 long ton—2240 pounds—equals 1016.05 kilograms, or about 1 metric ton.

Basis of the system.—1. The unit of length, the meter, is the ten millionth part of a quadrant of the meridian of Paris, being 39.37 inches, nearly. 2. The unit of surface, the ar, is the square of ten meters, or a hundred square meters. 3. The unit of capacity, the liter, is a cube whose edge is a tenth of a meter. 4. The unit of weight, the gram, is the weight of a cube of rain-water, whose edge is an hundredth of a meter. From these four primary units all others are derived according to the decimal scale.

Where used.—The system is adopted by the following countries: in exclusive use in France, Germany, Austria, Belgium, Holland, Italy, Spain, Portugal, Norway, Switzerland, Roumania, Brazil; in partial use in Denmark, Greece, Argentine Confederation, Venezuela; legalized, but not in general use, in the United States, Great Britian, Russia, Norway, Sweden, Turkey, Mexico, Chili, Costa Rica, Equador, Peru, U. S. of Columbia, Uruguay. In Sweden compulsory law will take effect in 1889.

STREET DIRECTORY.

The Street Directory gives the location of each street, and shows what other streets or places run from it or across it, with the number at which they intersect.

From this list the location of any number on a street can be easily ascertained. As, for instance, wishing to know at what part of State street No. 265 comes, look at State street and you find that Brown street runs from 255 left side, and Jay street from 293, showing that No. 265 comes on the left side of State street between Brown and Jay. As many of the streets are not numbered, dashes, have been used in the place of the missing numbers, to indicate whether the street runs from the right, left, or crosses.

OFFICE AND WORKS,

COR. MUMFORD ST. AND GENESEE RIVER,

DIRECTORS.

LEVI A. WARD, Pres't, *PATRICK BARRY,* *ISAAC HILLS,*
DON A. WATSON, *GILMAN H. PERKINS,* *LOUIS CHAPIN,*
THOS. C. MONTGOMERY, *GEO. ELLWANGER.*

EXECUTIVE COMMITTEE.

LOUIS CHAPIN, Chairman, DON A. WATSON,
LEVI A. WARD. PATRICK BARRY.

ALBERT D. PERRY, Secretary and Treasurer.

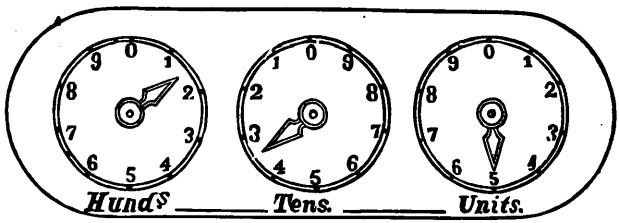

The Rochester Gas Light Co. supplies all the Gas used on the WEST side of the Genesee River.

PRICE, $2.75 per thousand feet, or if paid before the 10th of the month, $2.50.

TO CONSUMERS.

The following explanations will enable any person to understand the process of ascertaining the Registry of the Gas Meter, and by making observations every day, or at short intervals, to satisfy himself that the meter registers with uniform accuracy the amount of gas that passes through it. The following diagrams show the "Indexes" seen on the front of every meter.

EXPLANATION OF INDEX.

The figure or division on the different faces of the index indicates as follows, viz: On the Right Hand Face, *Hundreds*, as 100, 200, 300 cubic feet, &c.; on the Middle Face, *Thousands*, as 1,000, 2,000, 3,000 cubic feet, &c.; on the Left Hand Face, *Tens of Thousands*, as 10,000, 20,000, &c., and in this way multiplying by 10 for every additional face.

TO TELL THE STATE OF THE METER.—Look at the *left hand* face of the Index and set down the figure of *least* value next the hand, which on the diagram is **1** Next look at the *middle* face, and as before set down the figure of the *least* value next the hand, which on the diagram is **3**. Next upon the *right hand* face, take the same relative figure, which is **5**, and you have the figures 1, 3, 5, to which last figure add two ciphers to represent hundreds, and the sum 13,500 is shown to be the present state of the meter. If a previous observation has been taken, subtract the state of the meter at *that* time from the *present* state, and you have the amount consumed in the interval.

☞ *In case of the failure of the gas from any cause, immediate notice of the fact should be left at the Company's office.*

THE CELEBRATED

KNABE PIANOS,

Which have received the Highest Award at the Centennial, and over eighty Gold and Silver Medals.

THE FAVORITE BEHNING & DIEHL AND DUNHAM PIANOS,

With Patent Double Bearing Agraffe, that secures absolute firmness, power and purity of tone, and keeps the piano in tune, warranted longer than any other piano. Also, concave form of name-board, which gives the front an elegant appearance and preserves it from being scratched with the finger nails.

See them! Hear them! The GEO. WOODS & CO.'S ORGANS, which for purity of tone, brilliant musical effects and elegant designs are unequalled. We invite the musical public to call and examine these three remarkable instruments, acknowledged by the most eminent musicians (including such artists as Thalberg, Gottschalk, Vieuxtemps, Maretzek, Strakosch, Rubenstein, Pease, Madame Lucca and Kellogg), to be the most perfect, the most reliable and the most durable made. The difference between our low and high-priced instruments is in the workmanship of the case alone, the quality of the interior mechanism being the same in all. We buy only for cash, and at special low rates, and are thus enabled to sell at prices exceedingly low, when the quality is considered, and on very accommodating terms.

RUNNING TRAP.

We are manufacturing a pipe that is indestructible from the action of all the elements, impervious to the action of acids, gases and steam, all of which are found in corporation sewers. These pipes are made from a combination of superior clays, which by powerful machinery are rendered uniform throughout—pressed from a steam press, under a pressure of *sixty-three tons* upon each pipe, it is made very compact; and burned in close kilns at a very intense heat, it becomes a thoroughly vitrified and iron-like body. All prominent architects, builders, and all those who have investigated the subject of sewerage, have become convinced that properly burned clay pipe is the only material suitable for underground drainage, and that the sewer and drain pipe manufactured from cement, carbonated stone, and other similar materials, are liable to and do *decay*, *disintegrate* and become *worthless*, as has been many times proved by the officials in many cities.

These vitrified pipe are suitable for well tubing; are *better* than *stone* or *brick*, because cheaper, more durable, and can be made perfectly tight.

☞ We deliver our Pipe within the city limits free of charge, and in good condition.

WATER METERS.

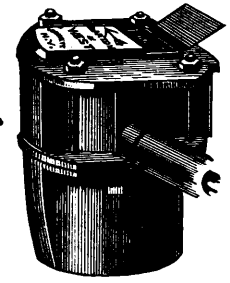

J. B. WEST,

MANUFACTURER OF THE

BARTON & WEST

WATER METER,

Guaranteed to be one of the Best and Most Reliable Water Meters known, fulfilling all the conditions Required.

Accuracy under Varying Circumstances.

Simplicity of Construction.

Convenience of Form and Size.

Cheapness.

Durability and Freedom from Derangement.

Are in use in the City of Rochester, and many other Cities of the United States and Europe.

DESCRIPTION.

It is an upright single piston Meter, brass cylinder, double balance valve, tipping or swinging on knife edges, and so constructed as to fly to its seats in either direction from the centre and holding firmly shut till again shifted.

The shifting lever is also hung on knife edges and shifts the valves instantaneously, whether the Meter is working fast or very slowly.

The case is cast-iron, cylinder and working parts of best brass and *Phosphor Bronze*, a new metal made expressly for its non-corrosive qualities and elasticity.

The induction and eduction pipes are on a direct line, so that pipes already laid can be cut, and the Meter put on without derangement.

The register is new and novel, invented for this meter, and is of the class that presents the plain figures on the face of the wheels at the opening, so that they are as easily read as though on paper in regular order.

THE KEDZIE WATER FILTER,

MANUFACTURED BY

WM. L. INGRAHAM,

117 West Main Street, - - Rochester, N. Y.

These Filters have been tested by hundreds of families throughout the United States since 1857; they have received the commendations of physicians and men of science, and their merit is established as possessing every practical adaptation for family use, rendering the most impure water free from all taste, color or smell. They are designed for purifying Rain, River, or Hydrant Water for drinking and cooking. They are made with a view to durability, having a circular oak cask, into which is packed pure prepared charcoal. Vegetable charcoal [carbon], is the best known deodorizer and purifier of water; and, when packed and prepared as it is by our process, nothing can excel it as a filtering material. We guarantee the perfect working of every Filter.

These Filters last from two to four years, and can be restored at any time by being re-packed.

C. D. DEWEY, *President.* F. S. STEBBINS, *Treasurer.* WM. M. MCMECHEN, *Secretary.*

The Johnston Harvester Company,

OF BROCKPORT, N. Y.

THIS COMPANY have for many years built and put upon the markets of the world their peculiar MACHINES FOR CUTTING GRASS and HARVESTING GRAIN, which have from the beginning taken the FIRST place among all those manufactured for that purpose. They have been tested by scientific Machinists, by casual observers, and by practical Farmers, and always with one and the same result, namely:

The First Award for Excellence of Workmanship and Quality of Work Done in the Field. At the Centennial Exhibition at Philadelphia in 1876, they were awarded the Highest Honors.

They stand AT THE HEAD of the whole family of Harvesting Machines, and although attempts have been made to copy them by many other manufacturers, still the *Original* stands superior to all and cannot be displaced.

In 1874, they took ***TWENTY GOLD MEDALS,*** and nearly as many MELALS OF HONOR, from fields in foreign countries alone, and the FIRST AWARD, being a Gold Medal, at the Cincinnati Exposition.

In 1875 they were equally successful in bringing home Gold Medals, besides the far better encomiums of the ROYAL AGRICULTURAL SOCIETY OF FRANCE, which ordered one of them tested through the ***whole season,*** instead of for a short trial of a few days, and then examined by expert machinists, who pronounced it the BEST MADE, MOST DURABLE and MOST EFFICIENT MACHINE IN THE FIELD.

In 1876 they won TWENTY-FOUR Gold Medals as First Prizes at actual trials in the field. In 1877 they swept the field on prizes, and obtained the most flattering testimonials wherever tried.

In 1878 they were awarded TWO GRAND GOLD MEDALS for the excellence of their exhibit at the Paris Exposition, and also the ONLY PRIZE given for excellence of work in the field, against 35 competitors, representing six different nations, at the Great Paris Trial. This prize was a BEAUTIFUL AND COSTLY VASE. This great trial was held under the auspices of the Paris Exposition of 1878.

FARMERS AND DEALERS

Who wish to obtain the BEST will certainly examine the Machines of ***The Johnston Harvester Company*** before purchasing elsewhere.

Their Machines consist as follows:

The Wrought Iron Harvester, for Reaping.

The No. 1 Combined Machine, a most superb and complete Machine, for either Mowing or Reaping, built in the most substantial manner, and having two cutter bars, one for reaping and one for mowing.

The No. 2 Combined Machine, a smaller Machine, having only one bar, which is used for both reaping and mowing, and is of very light draft.

The Wrought Iron Mower, which is pronounced by those who have used it the best Mower in the market.

The Continental, which weighs only about 550 pounds and is yet sufficient for any work, being very light, but of great strength—a very valuable Machine for small farmers.

Every pains taken to please our customers, and all our Machines WARRANTED. Send for Circulars, and address
