The mill, cent, dime, dollar, and eagle of U. S. money exactly illustrate the decimal system of the metric measures,—the mill, cent, dime, corresponding with the milli, centi, deci of the metric system.

Abbreviations.—For meter, liter, and gram, the small initial letter is used, viz: m. l. g.; each division deci, centi, milli, also is abbreviated by using the small initial letters d. c. m.; but each multiple, deka, hekto, kilo, myria, is abbreviated by using the capital initial letter D. H. K. M.

Equivalents.—1 inch equals .0254 meter, or about 2 1-2 centimeters; 1 foot equals .3048 meter, or about 30 centimeters; 1 yard equals .9144 meter, or ab. 10-11 of a meter; 1 mile 1609 meters, or ab. 1.6 kilometers.

1 U. S. liquid quart equals .946 liter, or a little less than 1 liter; 1 U. S. dry quart equals 1.101 liters; 1 U. S. gallon equals 3.785 liters, or about 3.8 liters; 1 U. S. bushel equals 35.24 liters, or about 4-11 of a hektoliter.

1 avoirdupois ounce equals .02835 kilogram, or a little less than 30 grams; 1 Troy and apothecaries ounce equals .03110 kilogram, or a little more than 30 grams; 1 avoirdupois pound equals .45359 kilogram, or about 5-11 of a kilogram; 1 long ton—2240 pounds—equals 1016.05 kilograms, or about 1 metric ton.

Basis of the system.—1. The unit of length, the meter, is the ten millionth part of a quadrant of the meridian of Paris, being 39.37 inches, nearly. 2. The unit of surface, the ar, is the square of ten meters, or a hundred square meters. 3. The unit of capacity, the liter, is a cube whose edge is a tenth of a meter. 4. The unit of weight, the gram, is the weight of a cube of rain-water, whose edge is an hundredth of a meter. From these four primary units all others are derived according to the decimal scale.

Where used.—The system is adopted by the following countries: in exclusive use in France, Germany, Austria, Belgium, Holland, Italy, Spain, Portugal, Norway, Switzerland, Roumania, Brazil; in partial use in Denmark, Greece, Argentine Confederation, Venezuela; legalized, but not in general use, in the United States, Great Britian, Russia, Norway, Sweden, Turkey, Mexico, Chili, Costa Rica, Equador, Peru, U. S. of Columbia, Uruguay. In Sweden compulsory law will take effect in 1889.

STREET DIRECTORY.

The Street Directory gives the location of each street, and shows what other streets or places run from it or across it, with the number at which they intersect.

From this list the location of any number on a street can be easily ascertained. As, for instance, wishing to know at what part of State street No. 265 comes, look at State street and you find that Brown street runs from 255 left side, and Jay street from 293, showing that No. 265 comes on the left side of State street between Brown and Jay. As many of the streets are not numbered, dashes have been used in the place of the missing numbers, to indicate whether the street runs from the right, left, or crosses.

SOME REASONS WHY NAMES ARE NOT FOUND IN THE DIRECTORY.

Many persons miss of finding names on account of not knowing how to look for them. A slight variation in spelling will place names almost exactly alike, far apart. For instance,—such names as Brown, Browne, Braun, though pronounced the same, and really the same name, are found in different places in the directory. So, also, with Connor, Conner, Connors, O'Connor, and many others, each has its own place.

The pronunciation of Foreign names usually varies from the pronunciation of such names in English. For instance,—if an Irishman gives his name as Agan, it is probably spelled Egan or Eagan. So, Mar, spelled Meagher or Maher; Fay, spelled Fahy, &c. In names of nearly all European languages the sounds of the vowels are usually as follows:—a is ah, e is ā, i is ē, o is o, u is ōō. In German names ei and ai are pronounced like ī, ie like ē, au like ow, eu like oi; j is pronounced like y, w nearly like v, dt and th like t, &c. Thus, a name which is pronounced Yack, is spelled Jack; Young, Jonge; Roiter, Reuter; Keefer, Kiefer; Line, Lein. Owing to the difficulty which foreigners find in getting their names properly pronounced by the Americans with whom they come in contact, they frequently make very decided changes in them; taking sometimes an English name which sounds similar to theirs, as Gilbert for Gebhardt, Rice for Reis, Cole for Kohl, &c.; sometimes translating their names, as Blanc changed to White, Stein to Stone, &c. Frequently, members of the same family, both Foreign and American, will spell their names in two or three different ways, as Ballantyne, Ballantine, Ballintine; sometimes men bear two or three names, being known by one in their family, another in the shop, and perhaps still another among their associates.

REYNOLDS' ARCADE.

1828.

THE site on which the Arcade stands was selected in the Summer of 1812 by the late ABELARD REYNOLDS, upon which he built the first framed house on the one-hundred-acre tract, then called "ROCHESTERVILLE," completing and occupying it in 1813. In 1828 Mr. Reynolds erected "THE ARCADE," the largest and most expensive building in the *United States*, west of Albany at that day. Upon this site the first Post Office was established, and has remained for nearly 70 years.

1880.

THE old-fashioned style of architecture, with high, narrow windows, that formed the original store fronts, has been changed to broad sheets of plate glass, and the old wooden arch, with small lights of window glass, replaced by massive iron rafters and large plates of rough glass, weighing fully seventy tons, supplying to the citizens a commodious Merchants' Exchange, with Post Office and Telegraph Offices at hand.

REYNOLDS' ARCADE---EXCHANGE PLACE.

THE present Post Office, under the intelligent administration and personal management of our deservedly popular Postmaster, D. T. Hunt, and his worthy Assistant, W. Seward Whittlesey, has a frontage in the Arcade Hall and Gallery of 75 feet, extending on Exchange Place 100 feet, containing an area of floor surface, including the unique and beautiful new Money Order Office, of over 8,000 square feet, having one of the best and largest fire and burglar proof vaults in the city, has been pronounced by government agents having business here, the *Model Post Office*, as well in its convenient internal arrangements as in the ample and comfortable accomodation afforded the public by the spacious Arcade Hall, 22 feet wide, 100 feet long and five stories in height, covered by an artistic iron truss roof and 120 plates of American rough glass, 2 feet by 13 feet each, and ¼ of an inch in thickness.

The foregoing Engravings of elevations and plans of Reynolds' Arcade were engraved expressly for a Special Directory of the Arcade, published by

GEORGE FRAUENBERGER,

Designer and Engraver on Wood, 76 and 77 Arcade, Rochester, N. Y.

GAS LIGHT COMPANY,

OFFICE AND WORKS,

COR. MUMFORD ST. AND GENESEE RIVER,

DIRECTORS.

LEVI A. WARD, Pres't,	*PATRICK BARRY,*	*ISAAC HILLS,*
DON A. WATSON,	*GILMAN H. PERKINS,*	*LOUIS CHAPIN,*
THOS. C. MONTGOMERY,	*GEO. ELLWANGER,*	*ISAAC W. BUTTS.*

EXECUTIVE COMMITTEE.

LOUIS CHAPIN, Chairman. LEVI A. WARD. DON A. WATSON, PATRICK BARRY.

MATT. CARTWRIGHT, Superintendent, Sec'y and Treas.

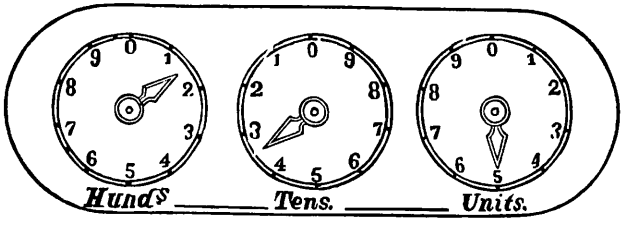

The Rochester Gas Light Co. supplies all the Gas used on the WEST side of the Genesee River

PRICE, $2.15 per thousand feet, or if paid before the 10th of the month, $2.00.

TO CONSUMERS.

The following explanations will enable any person to understand the process of ascertaining the Registry of the Gas Meter, and by making observations every day, or at short intervals, to satisfy himself that the meter registers with uniform accuracy the amount of gas that passes through it. The following diagrams show the "Indexes" seen on the front of every meter.

EXPLANATION OF INDEX.

The figure or division on the different faces of the index indicates as follows, viz: On the Right Hand Face, *Hundreds*, as 100, 200, 300 cubic feet, &c.; on the Middle face, *Thousands*, as 1,000, 2,000, 3,000 cubic feet, &c.; on the Left Hand Face, *Tens of Thousands*, as 10,000, 20,000, &c., and in this way multiplying by 10 for every additional face.

TO TELL THE STATE OF THE METER.—Look at the *left hand* face of the Index and set down the figure of *least* value next the hand, which on the diagram is **1**. Next look at the *middle* face, and as before set down the figure of the *least* value next the hand, which on the diagram is **3**. Next upon the *right hand* face, take the same relative figure, which is **5**, and you have the figures 1, 3, 5, to which last figure add two ciphers to represent hundreds, and the sum 13,500 is shown to be the present state of the meter. If a previous observation has been taken, subtract the state of the meter at *that* time from the *present* state, and you have the amount consumed in the interval.

☞ *In case of the failure of the gas from any cause, immediate notice of the fact should be left at the Company's office.*

ROCHESTER, N. Y.

We desire to call especial attention to all who use Kerosene Oil for illumination to our NEW, NOVEL and elegant

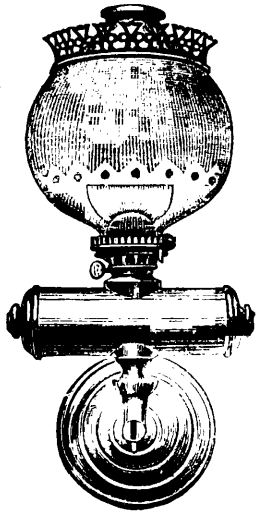

LAMP

for lighting PARLOR, LIBRARY, STUDY, OFFICE, STORE SHOW WINDOW, RESTAURANTS, CHURCHES and HALLS.

The STAND LAMP is easily adjusted to be a Bracket Lamp and is fastened to the wall with a small Screw Hook which accompanies each Lamp. The Lamps are made of brass, nickel plated, and finely polished. They are so convenient to use in every place where light is wanted, that they readily supply the place of all other Kerosene Fixtures, whether Stand Lamps, Brackets, Pendants, or Chandeliers. The Screw Hook is so small it does not deface the wall, and a dozen can be put up in different places in a room and not be noticeable, and the light can be shifted from one place to another wherever needed.

In fact it is the ONLY Lamp ever invented that supplies the place of all contrivances for burning oil. With our No. 2 SUN HINGE BURNER, GLOBE and CROWN, it makes the very best light in use.

BRACKET LAMP.

We are manufacturing a pipe that is indestructible from the action of all the elements, impervious to the action of acids, gases and steam, all of which are found in corporation sewers. These pipes are made from a combination of superior clays, which, by powerful machinery, are rendered uniform throughout—pressed from a steam press, under a pressure of *sixty-three tons* upon each pipe, it is made very compact; and burned in close kilns at a very intense heat, it becomes a thoroughly vitrified and iron-like body. All prominent architects, builders, and all those who have investigated the subject of sewerage, have become convinced that properly burned clay pipe is the only material suitable for underground drainage, and that the sewer and drain pipe manufactured from cement, carbonated stone, and other similar materials, are liable to and do *decay*, *disintegrate* and become *worthless*, as has been many times proved by the officials in many cities.

These vitrified pipe are suitable for well tubing; are *better* than *stone* or *brick*, because cheaper, more durable, and can be made perfectly tight.

☞ We deliver our pipe within the city limits Free of Charge and in good condition.

GEORGE H. MONROE,

Portrait and Landscape Photographer,

DRY PLATE PHOTOGRAPHY is now an accomplished fact. By the use of GELATINE DRY PLATES I am enabled to do work that I could not attempt with the old method of Bath or Wet Plates. These Dry Plates I now have always on hand, stored in boxes, so that I am ready on the shortest notice to photograph anything out doors or in. Winter's cold nor summer's heat does not affect these plates. I CARRY NO CHEMICALS WITH ME. I simply expose the plate to the object and the chemical work is left until my return to the gallery. I use two grades of plate—one called "ORDINARY RAPIDITY," for photographing Buildings, Residences, Machinery and Views of Scenery; and a grade called "INSTANTANEOUS," for photographing Animals, Streets, Moving Objects out doors, Children in the gallery, Interior Views, and all work requiring quick exposures. Lack of space forbids further description. Call and see for yourself.

The Johnston Harvester Company,

OF BROCKPORT, N. Y.

THIS COMPANY have for many years built and put upon the markets of the world their peculiar MACHINES FOR CUTTING GRASS and HARVESTING GRAIN, which have from the beginning taken the FIRST place among all those manufactured for that purpose. They have been tested by scientific Machinists, by casual observers, and by practical Farmers, and always with one and the same result, namely:

The First Award for Excellence of Workmanship and Quality of Work Done in the Field. At the Centennial Exhibition at Philadelphia in 1876, they were awarded the Highest Honors.

They stand AT THE HEAD of the whole family of Harvesting Machines, and although attempts have been made to copy them by many other manufacturers, still the *Original* stands superior to all and cannot be displaced.

In 1874, they took ***TWENTY GOLD MEDALS,*** and nearly as many MEDALS OF HONOR, from fields in foreign countries alone, and the FIRST AWARD, being a Gold Medal, at the Cincinnati Exposition.

In 1875 they were equally successful in bringing home Gold Medals, besides the far better encomiums of the ROYAL AGRICULTURAL SOCIETY OF FRANCE, which ordered one of them tested through the ***whole season,*** instead of for a short trial of a few days, and then examined by expert machinists, who pronounced it the BEST MADE, MOST DURABLE and MOST EFFICIENT MACHINE IN THE FIELD.

In 1876 they won TWENTY-FOUR Gold Medals as First Prizes at actual trials in the field. In 1877 they swept the field on prizes, and obtained the most flattering testimonials wherever tried.

In 1878 they were awarded TWO GRAND GOLD MEDALS for the excellence of their exhibit at the Paris Exposition, and also the ONLY PRIZE given for excellence of work in the field, against 35 competitors, representing six different nations, at the Great Paris Trial. This prize was a BEAUTIFUL AND COSTLY VASE. This great trial was held under the auspices of the Paris Exposition of 1878.

In 1879 they won FORTY-THREE FIRST PRIZES against all their competitors, making from the harvest of 1877 to 1879, ***126 prizes*** (including Gold and Silver Medals, Cups, and Diplomas of Honor), and over $800 in prize money.

FARMERS AND DEALERS

Who wish to obtain the BEST will certainly examine the Machines of ***The Johnston Harvester Company*** before purchasing elsewhere.

Their Machines consist as follows:

The Wrought Iron Harvester, for Reaping.

The No. 1 Combined Machine, a most superb and complete Machine, for either Mowing or Reaping, built in the most substantial manner, and having two cutter bars, one for reaping and one for mowing.

The No. 2 Combined Machine, a smaller Machine, having only one bar, which is used for both reaping and mowing, and is of very light draft.

The Wrought Iron Mower, which is pronounced by those who have used it the best Mower in the market.

The Continental, which weighs only about 550 pounds and is yet sufficient for any work, being very light, but of great strength—a very valuable Machine for small farmers.

Every pains taken to please our customers, and all our Machines WARRANTED.

Johnston's Graphite Axle Lubricator

—AND—

CARRIAGE OIL.

IRONDEQUOIT, Monroe Co., New York, May 1st, 1880.

JOHNSTON GRAPHITE LUBRICATING OIL CO.—*Gents:* During the summer of 1879 I used your Graphite Mowing Machine Oil for all use on my mower and reaper By its use the heating of the *pitman* or cutting of the *key* is entirely prevented. I consider it the best Mowing Machine and Axle Oil I have ever used.

HOSEA ROGERS.

Office of EAST AVENUE OMNIBUS CO., ROCHESTER, N. Y., March 21st, 1879.

JOHNSTON GRAPHITE OIL CO.—*Gents:* My superintendent reports that he has used your Graphite Axle Lubricator for the past year with the very best of results; nine boxes of the Lubricator lasting for the entire use of three omnibuses from March 4th, 1878, to March 21st, 1879, at a total cost of $1.80. Total number of miles run, 33,600. When I used castor oil or other lubricators, before adopting the Graphite Axle Lubricator, the average cost per month was about $1.00. Very truly yours,

FRANKLIN RITTER, *President.*

Office of CHASE & OTIS, Lumber Dealers, Court Street, near Exchange St.,
ROCHESTER, N. Y., April 26, 1879.

CLARK JOHNSTON, Esq., President—*Dear Sir:* We have been using your Graphite Axle Lubricator upon our wagons for heavy work for the last six months, and we think it the best and cheapest article of the kind that we have ever tried.

CHASE & OTIS.

Office of FULTON LIVERY STABLE, SAN FRANCISCO, March 18th, 1879.

D. A. CARPENTER & CO., Agents, JOHNSTON'S GRAPHITE OIL AND AXLE LUBRICATOR—*Gents:* Send us five gallons more of Johnston's Graphite Axle Oil with the same quantity of the Lubricator as before. Having now given them both a thorough test, I take pleasure in recommending them with the fullest confidence, and can further say, that the Lubricator and Oil are by far superior to any that I have yet tried.

Respectfully, E. H. DOYLE, 246 3d St.

Office of MOUNT HOPE NURSERIES, ROCHESTER, N. Y., June 11th, 1878.

CLARK JOHNSTON, Esq.—*Dear Sir:* We have been using your Graphite Axle Lubricator upon our wagons for several months, and we are well pleased with it. We consider it the best article of the kind that we have yet tried. Yours truly,

ELLWANGER & BARRY.

Office of ROCHESTER BRICK AND TILE MANUFACTURING CO.,
ROCHESTER, N. Y., June 14th, 1880.

CLARK JOHNSTON, Esq.—*Dear Sir.* We have thoroughly tested the Johnston Graphite Wagon Lubricator on some of our wagons used for brick drawing for the past few months, and find it superior to any grease ever used by us. A few of the wagons were greased with your Lubricator on one side, using "Frazer's" on the other, and we found your Lubricator to do more than double the service of Frazer's. The surface of the axles greased with the "Graphite" seemed to continually hold a good lubricating coat—they never became dry. Very truly yours, IRA L. OTIS, Treas. Rochester Brick and Tile Mfg. Co.

Office of SUPT. OF STABLES, ADAMS EXPRESS CO., New York, August 15th, 1879.

C. W. MAY, FERNHABER & CO., General Agents of The Johnston Graphite Lubricating Oil Co., 63 Pearl Street, New York—*Gentlemen:* I have given the preparation known as "Johnston's Graphite Axle Oil" a thorough test on our wagons, during the past two months, and find it superior in every respect to any Lubricator we have ever used. H. MARSH, Sup't Stables.

Railway Men Astonished.—P. T. Barnum's Great Show heard from on the Western Prairies.—Railway Trains to be Run from Ocean to Ocean Without Oiling or Hot Boxes.

Barnum's whole train ran all through New England, and the Wagner Palace Cars "City of Boston" and "City of New York" ran from Boston to Chicago and return during the late Convention, without oiling in any case.

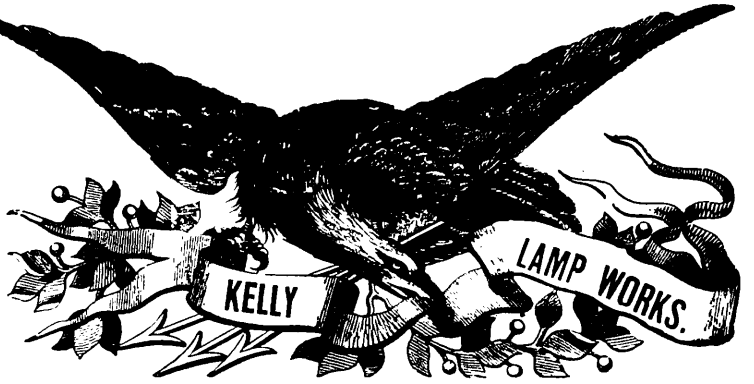

☞ For Mowing Machines, Reapers, Threshing Machines and Lawn Mowers it has no equal. Try it. Send for Sample. Address,
