AN ESTIMATE OF POPULATION.

THE large increase of names in the directory for the past two years, together with the unusual activity in building in every part of the city, lead to considerable inquiry as to the amount of present population. The canvass for the directory is conducted on the same system and is made largely by the same canvassers each year, and undoubtedly presents one of the best means of estimating the population of the city from year to year. The proprietors of the directory from a careful and conservative computation, think it is safe to say that the present population of the city approximates very closely to 101,600 souls.

Abbreviations.—For meter, liter, and gram, the small initial letter is used, viz: m. l. g.; each division deci, centi, milli, also is abbreviated by using the small initial letters d. c. m.; but each multiple, deka, hekto, kilo, myria, is abbreviated by using the capital initial letter D. H. K. M.

Equivalents.—1 inch equals .0254 meter, or about 2 1-2 centimeters; 1 foot equals .3048 meter, or about 30 centimeters; 1 yard equals .9144 meter, or ab. 10-11 of a meter; 1 mile 1609 meters, or ab. 1.6 kilometers.

1 U. S. liquid quart equals .946 liter, or a little less than 1 liter; 1 U. S. dry quart equals 1.101 liters; 1 U. S. gallon equals 3.785 liters, or about 3.8 liters; 1 U. S. bushel equals 35.24 liters, or about 4-11 of a hektoliter.

1 avoirdupois ounce equals .02835 kilogram, or a little less than 30 grams; 1 Troy and apothecaries ounce equals .03110 kilogram, or a little more than 30 grams; 1 avoirdupois pound equals .45359 kilogram, or about 5-11 of a kilogram; 1 long ton—2240 pounds—equals 1016.05 kilograms, or about 1 metric ton.

Basis of the system.—1. The unit of length, the meter, is the ten millionth part of a quadrant of the meridian of Paris, being 39.37 inches, nearly. 2. The unit of surface, the ar, is the square of ten meters, or a hundred square meters. 3. The unit of capacity, the liter, is a cube whose edge is a tenth of a meter. 4. The unit of weight, the gram, is the weight of a cube of rain-water, whose edge is an hundredth of a meter. From these four primary units all others are derived according to the decimal scale.

Where used.—The system is adopted by the following countries: in exclusive use in France, Germany, Austria, Belgium, Holland, Italy, Spain, Portugal, Norway, Switzerland, Roumania, Brazil; in partial use in Denmark, Greece, Argentine Confederation, Venezuela; legalized, but not in general use, in the United States, Great Britian, Russia, Norway, Sweden, Turkey, Mexico, Chili, Costa Rica, Equador, Peru, U. S. of Columbia, Uruguay. In Sweden compulsory law will take effect in 1889.

STREET DIRECTORY.

The Street Directory gives the location of each street, and shows what other streets or places run from it or across it, with the number at which they intersect.

From this list the location of any number on a street can be easily ascertained. As, for instance, wishing to know at what part of State street No. 265 comes, look at State street and you find that Brown street runs from 255 left side, and Jay street from 293, showing that No. 265 comes on the left side of State street between Brown and Jay. As many of the streets are not numbered, dashes have been used in the place of the missing numbers, to indicate whether the street runs from the right, left, or crosses.

SOME REASONS WHY NAMES ARE NOT FOUND IN THE DIRECTORY.

Many persons fail to find names on account of not knowing where to look for them. A slight variation in spelling will place names almost exactly alike, far apart. For instance, such names as Brown, Browne, Braun, though pronounced the same, and really the same name, are found in different places in the Directory. So, also, with Connor, Conner, Connors, O'Connor, and many others, each has its own place.

The pronunciation of foreign names usually varies from the pronunciation of such names in English. For instance,—if an Irishman gives his name as Agan, it is probably spelled Eganor Eagan. So, Mar, spelled Meagher or Mahr; Fay, spelled Fahy, etc. In names of nearly all European languages the sounds of the vowels are usually as follows:—a is ah, e is ā, i is ē, o is o, u is o͞o. In German names ei and ai are pronounced like ī, ie like ē, au like ow, eu like oi; j is pronounced like y, w nearly like v, dt and th like t, etc. Thus, a name which is pronounced Yack, is spelled Jack; Young, Jonge; Roiter, Reuter; Keefer, Kiefer; Line, Lein.

Owing to the difficulty which foreigners find in getting their names properly pronounced by the Americans with whom they come in contact, they frequently make very decided changes in them, taking sometimes an English name which sounds similar to theirs; as Gilbert for Gebhardt, Rice for Reis, Cole for Kohl, etc.; sometimes translating their names, as Blanc changed to White, Stein to Stone, etc.

Frequently, members of the same family, both foreign and American, will spell their names in two or three different ways; as Ballantyne, Ballantine, Ballintine; sometimes men bear two or three names, being known by one in their family, another in the shop, and perhaps still another among their associates.

POSTAL RATES AND REGULATIONS.

Mail matter is divided into four classes: *First*, Written matter; *Second*, Periodical publications; *Third*, Miscellaneous printed matter; *Fourth*, Merchandise.

FIRST-CLASS MATTER embraces letters, postal cards, and all matter wholly or partly in writing and all matter sealed or closed against inspection.

FORWARDING LETTERS FREE.

Prepaid and free letters are forwarded from one Post Office to another, at the request of the persons addressed, without additional postage. A letter which has been once delivered at its address can be remailed from the same office to which it was originally addressed to a new address without the prepayment of additional postage if it has not been opened. Drop-letters, when forwarded by mail to another Post Office, must be prepaid at three cents per half ounce. No mail matter, except letters or postal cards, can be forwarded to a new address except on prepayment of postage by stamps at regular rates.

SECOND-CLASS MATTER.

Regular publications—This class includes all newspapers, periodicals, or matter exclusively in print, and regularly issued at stated periods from a known office of publication or news-agency, except regular publications designed primarily for advertising purposes, or for free circulation, or for circulation at nominal rates. Second-class matter can only be mailed by publishers or newsdealers. Postage two cents a pound or fraction thereof. Weight of packages not limited.

REGISTRATION.

Mail matter of all kinds can be registered to any part of the United States and Territories and to foreign countries, on payment of a registration fee of 10 cents. All registration fees must be paid by stamps, and the postage on all registered matter must also be prepaid by stamps. The public are desired by the Post Office never to send money or valuable articles in unregistered letters. Postmasters at *all* Post Offices are obliged to register letters and packages when requested to do so.

Central Library of Rochester and Monroe County · City Directory Collection · 1882

THIRD-CLASS MATTER.

Mail matter of the third class embraces books (printed and blank), transient newspapers and periodicals, circulars and other matter wholly in print, proof-sheets and corrected proof sheets and manuscript copy accompanying the same, hand-bills, posters, chromo-lithographs, engravings, envelopes with printing thereon, heliotypes, lithographic and stereoscopic views, with title written thereon, printed blanks, printed cards, and reproductions from circulars or other matter produced by the electric pen, papyrograph, metallograph, hectograph, chirograph, or copygraph processes; and postage shall be paid thereon at the rate of one cent for each two ounces or fractional part thereof.

Upon matter of the third class, or upon the wrapper inclosing the same, the sender may write his own name or address with the word "from" above and preceding the same, and in either case may make simple marks intended to designate a word or passage of the text to which it is desired to call attention. There may be placed upon the cover or blank leaves of any book or of any printed matter of the third class a simple manuscript dedication or inscription that does not partake of the nature of a personal correspondence.

The "nature of a personal correspondence" referred to in the preceding section cannot be ascribed to the following, viz.: 1st. To the signature of the sender or to the designation of his name, of his profession, of his rank, or the place of origin, and of the date of dispatch. 2d. To a dedication or mark of respect offered by the sender. 3d. To the figures or signs merely intended to mark the passage or a text in order to call attention to them. 4th. To instructions or requests to postmasters to notify the sender in case of the nondelivery of matter, so that he may send postage for its return. Lastly, to annotations or corrections made upon proofs of printing or musical compositions, and relating to the text or to the execution of the work.

All packages of matter of the third class must be so wrapped, with open sides or ends that their contents may be readily examined by postmasters.

The limit of weight of packages is four pounds, except in cases of single volumes of books in excess of said weight, and books and documents published or circulated by order of Congress, or official matter emanating from any of the departments of the government, or from the Smithsonian Institution.

FOURTH-CLASS MATTER.

Mailable matter of the fourth class embraces blank cards, card-board and other flexible material, flexible patterns, letter envelopes and letter-paper without printing thereon, merchandise, models, ornamented paper, sample cards, samples of ores, metals, minerals, seeds, cuttings, bulbs, roots, scions, drawings, plans, designs, original paintings in oil or water colors, and any other matter not included in the first, second, or third classes, and which is not in its form or nature liable to destroy, deface or otherwise damage the contents of the mail bag, or harm the person of any one engaged in the postal service. Postage thereon, one cent for each ounce or fractional part thereof.

Other articles of the fourth class which, unless properly secured, might destroy, deface, or otherwise damage the contents of the mail bag, or harm the person of any one engaged in the postal service, may be transmitted in the mails when they conform to the following conditions: 1st. They must be placed in a bag, box or removable envelope made of paper, cloth or parchment. 2d. Such bag, box or envelope must again be placed in a box or tube made of metal or some hard wood, with sliding clasp, or screw lid. 3d. In case of articles liable to break, the inside box, bag or envelope, must be surrounded by sawdust, cotton, or spongy substance. 4th. In case of sharp-pointed instruments, the points must be capped or encased, so that they may not by any means be liable to cut through their inclosure; and where they have blades, such blades must be bound with wire, so that they shall remain firmly attached to each other. 5. The whole must be capable of easy inspection. Seeds or other articles not prohibited, which are liable, from their form or nature, to loss or damage, unless specially protected, may be put up in sealed envelopes, provided such envelopes are made of material sufficiently transparent to show the contents clearly, without opening.

Upon any package of matter of the fourth class the sender may write or print his own name and address, preceded by the word "from," and there may also be written or printed the number and names of the articles inclosed; and the sender thereof may write or print upon, or attach to any such articles, by tag or label, a mark, number, name, or letter, for purpose of identification.

The limit of weight of packages is four pounds.

The Rochester Gas Light Co. supplies all the Coal Gas used on the WEST side of the Genesee River.

PRICE, $1.10 per thousand feet; or if paid before the 10th of the month, $1.00.

TO CONSUMERS.

The following explanations will enable any person to understand the process of ascertaining the Registry of the Gas Meter, and by making observations every day or at short intervals, to satisfy himself that the meter registers with uniform accuracy the amount of gas that passes through it. The following diagrams show the "Indexes" seen on the front of every meter.

EXPLANATION OF INDEX.

The figure or division on the different faces of the index indicates as follows, viz: On the Right Hand Face, *Hundreds*, as 100, 200, 300 cubic feet, &c.; on the Middle face, *Thousands*, as 1,000, 2,000, 3,000 cubic feet, &c.; on the Left Hand Face, *Tens of Thousands*, as 10,000, 20,000, &c., and in this way multiplying by 10 for every additional face.

TO TELL THE STATE OF THE METER.—Look at the *left hand* face of the Index and set down the figure of *least* value next the hand, which on the diagram is **1**. Next look at the *middle* face, and as before set down the figure of the *least* value next the hand, which on the diagram is **3**. Next upon the *right hand* face, take the same relative figure, which is **5**, and you have the figures 1, 3, 5, to which last figure add two ciphers to represent hundreds, and the sum 13,500 is shown to be the present state of the meter. If a previous observation has been taken subtract the state of the meter at *that* time from the *present* state, and you have the amount consumed in the interval.

☞ In case of the failure of the gas from any cause, immediate notice of the fact should be left at the Company's office.

—THE—

MUTUAL LIFE INSURANCE CO.,

OF NEW YORK.

The LARGEST, the BEST and the CHEAPEST Life Insurance Company in the World

The MUTUAL LIFE has paid the largest average dividend of any Life Insurance Company

FACTS BETTER THAN PROMISES.

On a policy on the life of NEHEMIAH OSBURN of this city, issued by the MUTUAL LIFE, 1844, for $5,000. for an Annual Premium of $105.30, the *Cash* dividend that is used in payment of Premium for 1882, was $127.44, or $22.14 more than the amount of Premium.

On a policy on the life of NATHANIEL T. ROCHESTER of this city, issued by the MUTUAL LIFE, 1845, for $1,000, for an Annual Premium of $35.10, the *Cash* dividend that is used in payment of Premium for 1882, $48.22, or $13.12 more than the amount of Premium, while the policy has more than doubled.

Another example showing what a good investment was made by taking a policy in THE MUTUAL LIFE INSURANCE CO. of New York: Policy No. 12,274 was issued October 31st, 1853, for $1,000, to WILLIAM BURKE, late of No. 12 West Main St., Rochester, N. Y., for an Annual Premium of $38.04.

On the 25th of June, 1881, the Company paid the Policy on a death claim	$1,000.00
Also paid addition to the Policy by Dividends	1,469 00
Total paid claim	$2,469.00
Total Premiums paid with 5 per cent., compound interest added	$2,182.59

Showing a net profit over 5 per cent. compound interest after 27 years of insurance, when needed most, $285.41. The Annual Premium was $38.04, and Annual Dividend was $47.19, nearly 125 *per cent. of the Annual Premium.* Who would not wish such a policy? No Company in the world ever made such results, and no better evidence can be given of its economical and prudent management.

Statement of 13 Year Endowment in the MUTUAL LIFE OF NEW YORK, No. 55,981.

Issued January 2d, 1867. - - Matured January 2d, 1880.

Amount of Policy	$5,000.00
Dividends added	1,922 61
Amount paid by Company, January 2d, 1880,	$6,922.61

Bearing in mind the fact that this person was insured for $5,000, for thirteen years, it also proved as an investment, equal to 5 *per cent.*, compound interest, on the money paid the Company by him. No taxes! Insurance for nothing! Have you any investment as good? The MUTUAL LIFE has a large number of policies in this vicinity of equally good showing. No Company stands as high to day in the minds of shrewd business men.

The Mutual Life Insurance Company of New York, with over $95,000,000.00 cash assets, and over 101,000 policies in force, and *greatly reduced rates* and large dividends, offer advantages superior to any other.

NORTH-WESTERN

MUTUAL LIFE INSURANCE CO.

Is giving the Most Protection for the least Money.

50 per cent More Insurance for the ordinary Life Premium.

WITH PARTICIPATION IN DIVIDENDS.

One of the reasons why the North-western can furnish INSURANCE CHEAPER than any other COMPANY, is because it HAS PAID for several years past EXPENSES and DEATH LOSSES from INTEREST RECEIPTS alone,

A Showing unparalleled in the History of Life Insurance.

	Jan. 1, 1872.	Jan. 1, 1882.
Assets	***$10,658,169 80***	***$18,859,458 96***
Liabilities	***9,568,442 75***	***15,836,847 35***
Surplus (Actuaries' 4 per cent)	***1,089,727 05***	***3,022,611 61***

POINTS FOR BUSINESS MEN:

1. The Safest and Strongest Company—Standing at the head of the ten largest Life Companies of the Country in strength and security, as shown by the ratio of Surplus to Liabilities.
2. The Cheapest Company.—Its dividends being larger than any other, and the only Company that prints its current dividends for the insuring public to compare with those of other companies.
3. While paying the Largest Dividends of any Company, it has steadily increased its surplus.
4. Its Location enables it to select the choicest securities, and to command the highest rates of interest.

The Life Class of this Association provides for a death benefit of $2000 by graded assessments, according to age.

Both sexes are admitted on equal terms.

The Accident Class provides a benefit of from $1000 to $3000, according to occupation, in case of death by accident, and from $6 to $20 weekly indemnity in case of totally disabling injuries.

The cost is less than one-half the rates charged by old line Companies, and the protection is equally reliable and effective.

Special Features. Carefully graduated assessments according to age. The immediate payment of one hundred dollars as a burial fund, on proper notice of the death of a member. It is not a secret Society. Its business is conducted on the same principle as *Fire insurance on the Mutual plan* No part of death assessments used for expenses of management. The accumulation of a reserve fund for the better protection of its members. Open and honorable dealing. No concealment of facts. Managed by well-known business men.

Assessment and Surplus Class. Certificates issued for $2,000. To more fully impress the reader with the working and methods of this plan, it will be observed that each and every member who attains one-half of his expectancy or thereafter, will receive one-half or the *whole amount* of his certificate in cash during his lifetime. DR. STEVENS'
EAST INDIA CONSUMPTION CURE.
THE CANNABIS SATIVA REMEDY.

Prepared originally by W. C. STEVENS, M. D.

A Reliable remedy and a Certain Cure. It braces and strengthens the general system, and restores the muscular fibres to their Natural and Healthy Tone. It secures REFRESHING SLEEP, and puts an IMMEDIATE STOP to the annoying and debilitating night sweats, makes the HEAD CLEAR, and the spirits free and hopeful, the mind active and undisturbed. In fact, it cures promptly and radically all cases of CONSUMPTION, BRONCHITIS, ASTHMA, CATARRH, NERVOUS DEBILITY, and all NERVOUS COMPLAINTS, which have not progressed beyond the reach of curative agents.

C. F. JEWETT, SUP'T.

The object of the work is to commemorate the 250th anniversary of the founding of Boston, in 1630. It has been assigned to writers, who, from study and associations, are identified with their subjects.

The plan of the work is to a large extent novel—the grouping of so many representative writers, to tell so interesting a story as that of Boston's origin, career, and significance, is a fit conjunction for the occasion, and hardly to be paralleled in the history of any city.

No more suitable or enduring *memorial* of Boston can be conceived than to embody in book form its wonderful and interesting history. It is complete in four volumes, quarto, about 7 1-2 by 11 inches, 650 or more pages to each volume, fully illustrated with historical maps, fac-similes, portraits, views, &c.

Some of the points necessary to call attenton to, are: First, a movable back and front, which throws off the spring in the leg. Second—It has an advantage in the use of the foot hanging or unhanging, i e.—it can be used with a hanging foot, and it can be used the old way by putting the foot in the boot and then into the toe. Third—It is simple. durable, solid and easy to work.

DR. STONE'S

COMPRESSED AIR

BATHS.

For the Cure of Diseases in which Medicines have failed.

CONDUCTED BY

J. L. STONE, M. D.,

Graduate of Medical Department of University of New York (Allopathic, and Chicago Homeopathic College.)

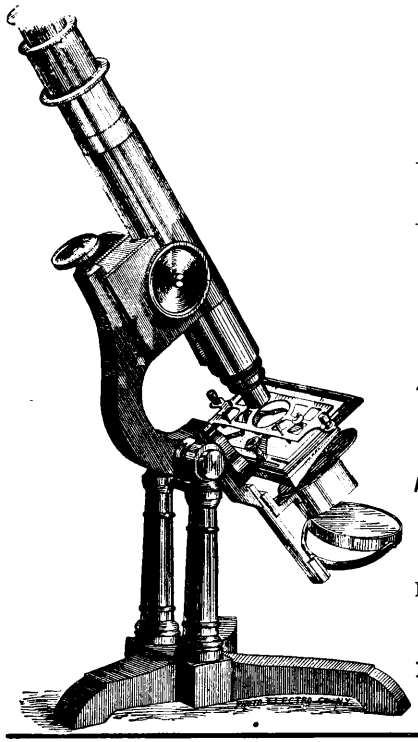

There are two factors, or agencies, entering into the treatment, namely: the extra supply of *oxygen*, which purifies the blood; and the *ingress* and *egress* of the pressure which opens up the ducts and passages of the glands, and stimulates every tissue and organ in the body to a healthy action.

Nearly a score of prominent physicians in Europe are treating patients with these baths, and are publishing astonishing results; no better, however, than we are having here in Rochester. Send for pamphlet, giving philosophy and application of treatment.

We are manufacturing a pipe that is indestructible from the action of all the elements, impervious to the action of acids, gases and steam, all of which are found in corporation sewers. These pipes are made from a combination of superior clays, which, by powerful machinery, are rendered uniform throughout—pressed from a steam press, under a pressure of *sixty-three tons* upon each pipe, it is made very compact; and burned in close kilns at a very intense heat, it becomes a thoroughly vitrified and iron-like body. All prominent architects, builders, and all those who have investigated the subject of sewerage, have become convinced that properly burned clay pipe is the only material suitable for underground drainage, and that the sewer and drain pipe manufactured from cement, carbonated stone, and other similar materials, are liable to and do *decay*, *disintegrate* and become *worthless*, as has been many times proved by the officials in many cities.

These vitrified pipe are suitable for well-tubing; are *better than stone or brick*, because cheaper, more durable, and can be made perfectly tight.

☞We deliver our pipe within the city limits Free of Charge and in good condition.

THE
JOHNSTON HARVESTER CO.,
OF BROCKPORT, N. Y.

THIS COMPANY have for many years built and put upon the markets of the world their peculiar MACHINES FOR CUTTING GRASS and HARVESTING GRAIN, which have from the beginning taken the FIRST place among all those manufactured for that purpose. They have been tested by Scientific Machinists, by casual observers, and by Practical Farmers, and always with one and the same result, namely:

The First Award for Excellence of Workmanship and Quality of Work Done in the Field.

This Company can show probably the greatest display of ***Gold Medals*** and ***First Prizes*** of any establishment in the trade; on account of the Excellent Workmanship of their Machines and their Universal Success in the field against all their competitors, and before the most experienced Committees and Societies under Royal auspices in foreign countries, and the most Competent Judges in America.

In addition to their regular line of Harvesting Machinery, the JOHNSTON HARVESTER COMPANY now offer the most Complete and Successful ***Self-Binder*** in the Market. It took the ***Grand Prize*** at the Great Trial before the Royal Agricultural Society of England at Derby, in August, 1881. A cut of this Machine is herewith shown, and so great is the demand for it, that with all the immense capacities of the Company, they are unable to supply half their orders.

Farmers desiring this Excellent Machine need to send their orders early for 1883, to insure their supply.

Our Binders use ***Twine*** only, the advantages of which over wire, are obvious to all.

Every pains taken to please our customers.

JENKINS' PATENT VALVES.

GATE, GLOBE, ANGLE and CHECK,

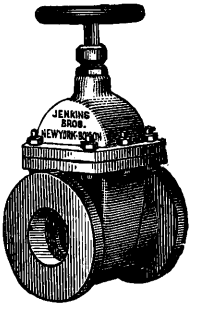

MANUFACTURED OF

BEST STEAM METAL.

A PERFECTLY TIGHT VALVE

At a Reasonable Price.

Twelve years of ACTUAL TEST, and the ENDORSEMENT OF FIRST-CLASS ENGINEERS AND MECHANICS THROUGHOUT THE COUNTRY, has fully demonstrated these Valves to possess the following advantages over all other Valve and Gauge Cocks now in use.

1. A perfectly tight Valve under any and all pressure of steam, oils or gasses.
2. Sand or grit of any kind will not injure the seat.
3. You do not have to take them off to repair them.
4. They can be repaired by any mechanic in a few minutes.
5. The elasticity of the Disc allows it to adapt itself to an imperfect surface.

In Valves having ground or metal seats, should sand or grit get upon the seat it is impossible to make them tight except by regrinding, which is expensive if done by hand, and if done by machine soon wears out the Valve, and in most cases they have to be disconnected from the pipes, often costing more than a new Valve.

JENKINS' PATENT PACKING,

"THE STANDARD."

The most Durable and Reliable. Does not Rot or Burn Out.

We Claim the following Advantages over all others:

1st. It packs a joint better than any packing made.
2d. It will stand more heat and pressure, and, by being careful in separating the joints. the packing may be used again.
3d. It readily accommodates itself to an imperfect surface.
4th. It does not rot out after being in a joint, but forms what might be termed a metal of itself.
5th. In case you want to make the packing thicker, and have only thin on hand, by putting two pieces together, placing them in the joint and following it up, they become solid.
6th. The scraps may be returned to us, and you will be allowed their value, less the price of re-rolling.

WARRANTED AS REPRESENTED.

N. B.—Jenkins' Valves sold by us are our Special Pattern, and Extra Heavy.

LAWSON ADAMS & SON,

ADAMS'

Combined Water and Electrical Conductor.

See the following Commendation from Rochester Free Academy:

ROCHESTER, June 11, 1881.

This certifies that we have examined the *Adams' Patent Electrical Conductor* with some care, and that we are satisfied of its great superiority over all other lightning rods of which we have knowledge. Its device for ground connection is a novel, and, as we think, a perfect protection against the disasters which have so many times been incurred by inadequate security in this direction. We believe that the whole process of carrying out the design of a complete and sure defence against the destructive effects of lightning is such as to render it an absolute protection in every instance.
