SURPLUS,	*5,158,199.77*

Losses paid immediately on completion and approval of proofs, without waiting the usual sixty or ninety days.

All policies issued by this Company are absolutely non-forfeitable. In case of lapse after two years' premiums have been paid, whether from inability to pay, or from carelessness, accident, mistake, misfortune, forgetfulness, absence, insanity, or sickness, or from any cause, the *full* reserve or value of the policy, by the highest standard, will, without any action on the part of the insured, be applied by the Company to the extension of the *full* amount of the policy for such time as the value will pay for.

Illustration of the Mutual Benefit's Non-forfeiting Rule:

Mr. Theodore Schmidt, of New York, N. Y., insured in the Company in February, 1857, for $7,000.00; the annual premium peing $217.70. He paid twenty-three annual premiums, amounting to $5,007.10, which, less dividends of $2,267.88, made a net payment or cost of $2,739.22. In 1880 he failed to pay his premium. For Cubic Measure the cube of long measure is used; **ster** is used as a measure of wood in place of cord.

The mill, cent, dime, dollar, and eagle of U. S. money exactly illustrate the decimal system of the metric measures,—the mill, cent, dime, corresponding with the milli, centi, deci of the metric system.

Abbreviations.—For meter, liter, and gram, the small initial letter is used, viz: m. l. g.; each division deci, centi, milli, also is abbreviated by using the small initial letters d. c. m.; but each multiple, deka, hekto, kilo, myria, is abbreviated by using the capital initial letter D. H. K. M.

Equivalents.—1 inch equals .0254 meter, or about 2 1-2 centimeters; 1 foot equals .3048 meter, or about 30 centimeters; 1 yard equals .9144 meter, or ab. 10-11 of a meter; 1 mile 1609 meters, or ab. 1.6 kilometers.

1 U. S. liquid quart equals .946 liter, or a little less than 1 liter; 1 U. S. dry quart equals 1.101 liters; 1 U. S. gallon equals 3.785 liters, or about 3.8 liters; 1 U. S. bushel equals 35.24 liters, or about 4-11 of a hektoliter.

1 avoirdupois ounce equals .02835 kilogram, or a little less than 30 grams; 1 Troy and apothecaries ounce equals .03110 kilogram, or a little more than 30 grams; 1 avoirdupois pound equals .45359 kilogram, or about 5-11 of a kilogram; 1 long ton—2240 pounds—equals 1016.05 kilograms, or about 1 metric ton.

Basis of the system.—1. The unit of length, the meter, is the ten millionth part of a quadrant of the meridian of Paris, being 39.37 inches, nearly. 2. The unit of surface, the ar, is the square of ten meters, or a hundred square meters. 3. The unit of capacity, the liter, is a cube whose edge is a tenth of a meter. 4. The unit of weight, the gram, is the weight of a cube of rain-water, whose edge is an hundredth of a meter. From these four primary units all others are derived according to the decimal scale.

Where used.—The system is adopted by the following countries: in exclusive use in France, Germany, Austria, Belgium, Holland, Italy, Spain, Portugal, Norway, Switzerland, Roumania, Brazil; in partial use in Denmark, Greece, Argentine Confederation, Venezuela; legalized, but not in general use, in the United States, Great Britian, Russia, Norway, Sweden, Turkey, Mexico, Chili, Costa Rica, Equador, Peru, U. S. of Columbia, Uruguay. In Sweden compulsory law will take effect in 1889.

STREET DIRECTORY.

The Street Directory gives the location of each street, and shows what other streets or places run from it or across it, with the number at which they intersect.

From this list the location of any number on a street can be easily ascertained. As, for instance, wishing to know at what part of State street No. 265 comes: look at State street and you find that Brown street runs from 255 left side, and Jay street from 293, showing that No. 265 comes on the left side of State street between Brown and Jay. As many of the streets are not numbered, dashes have been used in the place of the missing numbers, to indicate whether the street runs from the right, left, or crosses.

All persons desiring a water supply from the Water Works, must first make application at the Water Office, stating fully the several and various uses for which water is wanted, and the name of a plumber selected by said owner. Such application must be signed by the owner of the premises, or his duly authorized attorney, whereupon a permit will be issued to such named plumber, specifying the particular uses applied for; and when thereafter any other use of water, or additional service pipe or plumbing fixture, or a discontinuance of any particular use is desired, a further application must be made as aforesaid, and all expenses attending the introduction of water to any premises, except for tapping, must be paid by the applicant; but in case the trench is not ready when the tapper is called for, each additional trip required to be made by him will be charged for at the rate of fifty cents. The plumber so designated by the owner, and to whom a permit is issued by the Executive Board, will not be recognized as in any sense the agent of the city, nor will the city hold itself responsible for the acts of said plumber.

4. The tapping of water mains will only be permitted under the immediate direction of the Executive Board, who will also determine the size of tap to be inserted, and furnish the same at the expense of the applicant, to be paid for on delivery. *In all cases where boilers are supplied, a suitable safety or vacuum valve must be applied*, to prevent damage from collapsing or otherwise, when the water is shut off from the street mains. It is understood that the city will not be liable for any damage which may result to consumers from the shutting off of a water main or service for any purpose whatever, even in cases where no notice is given, and no deduction from water bills will be made in consequence thereof.

9. All water closets and urinals must be provided with self-closing valves before being supplied with water, and no hopper closet will be allowed to be used, and in no case will a bibb or faucet be allowed to be placed over such closet or urinal.

10. Service pipes when running into areas must have the curb-cock secured against the improper use of water by such protection as may be required at the Water Works office, and in all cases where the service pipe passes through exposed places where there is liability of freezing, the same shall be protected in the manner directed by, and to the satisfaction of the Water Service Inspector, and at the expense of the owner of the property, before the water is turned on.

12. Water will be turned on only after the receipt of the plumber's return, and after the applicant shall have signed such request in a book kept in the Water Registrar's office for that purpose.

13. Persons taking water must keep their own water pipes and all fixtures connected therewith, in good repair, and protected from frost, at their own expense. They must provide a stop and waste-cock, to be properly located inside the building, and have the pipes so arranged that the water can be drawn from them wherever and whenever there is danger of freezing.

14. When water shall be supplied to more than one party through a single tap the bill for the whole supply furnished through such tap will be made to the owner of the estate. In case of non-payment the water may be shut off, notwithstanding one or more parties may have paid their proportion to such owner, or to any other party.

15. No hydrant, goose-neck, hose-bibb, or hose attachment, shall be placed in any yard or area of any premises so situated as to be accessible to persons living in or occupying neighboring premises, and no water taker will be allowed to supply water to others except by special permit from the Executive Board, and if found doing so without a permit, the supply will be stopped and the water rent already paid forfeited.

16. The officers of the Water Works, their agents and assistants, may enter the premises of any water taker, at any reasonable time, to examine the pipes and fixtures, the quantity of water used and the manner of its use; and in case of fraudulent representation on the part of any water taker, or unnecessary waste of water, the payment will be forfeited and the supply of water stopped.

17. In case of fire, or an alarm of fire, or in making repairs or constructing new work, the Executive Board reserves the right to shut off the water at once, and keep it shut off as long as may be necessary.

18. Stand pipes are only intended and permitted for fire protection, for which no charge will be made for the water thus used, but all such pipes must be provided with a suitable valve at the bottom of the pipe where the water is let on, the same to be sealed by an agent of the Water Office. In case such seal shall be broken for the extinguishment of any fire, the party shall immediately give notice at the Water Office; and in case such seal shall be broken for any other purpose or use, or any tap introduced into, or connection made with, said stand pipe, the party so offending shall be subject to a fine of not exceeding two hundred dollars. No stand pipe will be allowed in premises where the water is not taken for other than fire purposes, and in any case the Executive Board reserves the right to refuse any or all applications for this purpose in its discretion.

19. Hydrants, goose-necks, taps, hose, water closets, urinals, baths, or other fixtures, will not be permitted to be kept running when not in actual use, under a penalty of ten dollars for each offense.

20. Permission will not be granted to supply two or more buildings or dwellings from a single tap, except the services shall be divided at the curb, and separate services run from separate curb-cocks therefor.

21. No person shall hitch any horse, team or animal to any fire hydrant; neither shall open or interfere with the hydrants or valves, or other Water Works fixtures of this city, for any purpose other than extinguishing fires, flushing sewers or pipes, or for regular city improvements made under ordinances of the Common Council, or repairs ordered by the Executive Board, and then only after having obtained specific authority from said Board for such use. Violations of this rule shall subject the offender to a penalty of twenty-five dollars for each offense. The Chief Engineer of the Water Works is hereby authorized and directed to prosecute, in behalf of the Executive Board, any parties who may violate this rule.

22. Metallic curb-boxes, of patterns approved by the Executive Board, must hereafter be used, and the use of wooden curb-boxes will not be allowed.

23. Sprinkling will be allowed only from May 1st to November 1st, and for one hour between 6 and 9 o'clock, A. M., and for one hour between 6 and 8 o'clock, P. M., and with hose ¾ inch in diameter, having a nozzle with a ¼ inch orifice. If either is larger an extra charge will he made, and will require a special permit therefor. The use of *leaky or defective* hose is prohibited. *And no person* will be allowed to sprinkle adjoining or opposite premises, nor use the water in any other way or for any purpose not authorized by the terms agreed upon with the Executive Board, or their successors in office.

24. Two hose attachments for sprinkling on each lot outside of the building, without charge for the second, will be allowed, and no additional charge will be made for the hose bibbs inside the building, where they are charged for outside of same; but for each additional hose bibb over two, outside of building, an extra charge will be made; but such attachments must not be used for any other purpose than sprinkling.

25. The rates for fountains or jets will be based upon such use for a pe-

riod not to exceed six hours per day, for six months in each year, and any person using water for such purpose more than six hours per day, will be charged an increased rate. All fountains must have such discharge for waste water as shall be satisfactory to the Executive Board. The right is reserved to discontinue fountains if at any time the public exigency may require it.

26. Any person or persons wishing to discontinue the use of water supplied from the Water Works, must give notice thereof at the Water Office, and they will be charged for the use of water until such notice is given.

27. Wherever water has been turned off for non-payment of rent, or for purposes of repair or construction, or for any other necessary or proper reason, no person is permitted to turn it on again who is not duly authorized so to do by the Water Registrar. And when turned off for non-payment of rent it shall not be turned on again until the party in default shall pay all water rents due.

28. Water bills, for annual rates, exceeding in amount three dollars, will be payable semi-annually in advance, on the first day of May and November in each year, at the office of the Water Registrar; but where the amount of the bill is three dollars or less per annum, said bill shall be payable on May 1st in each year, in advance, and all bills for water for sprinkling and for aquaria and fountains, and fountain jets, must be paid in the May bill. Bills for measured and estimated water will be payable monthly. If bills remain unpaid for fifteen days after they become due, the water may be shut off without notice.

29. The Executive Board reserves the right to attach meters to any service pipe, at any time whenever they shall deem it expedient, and thereafter charge for the quantity of water measured or used, instead of the special rates before charged.

30. On all premises into which water is or shall be introduced, full schedule rates will be charged for all uses, and no rebate will be allowed for partial use of water from wells, cisterns, etc. The parties desiring to use the water in this way may procure and set an approved meter at their own expense, and thereafter pay for the water used at meter rates.

31. In case dwellings are supplied with water for baths, urinals, water closets, or other special uses, domestic rates will in all cases be charged in addition.

32. Service pipes attached to the Water Works shall in all cases have a depth of earth covering over them in the street, gutters, and all other places, of not less than four and one-half feet, measured from the established or contemplated grade line of the street or natural surface of the ground, except in locations where the officers of the Water Works shall direct special construction for protection to be made.

33. No private drinking trough or basin for animals will be allowed to be set in connection with the Water Works pipes, unless by special permit from the Executive Board; and in case such permit is granted, the basin shall be of such kind or pattern as the said Board shall designate, and shall be arranged with such fixtures that the flow of water can be regulated by the employees of the Board, and by no other person; and they shall also be provided with a large waste pipe, to discharge surplus water into the sewer and not into the street gutters. In no case will a permit be granted for the erection of such trough or basin in front of premises where water from the Water Works is not taken for inside use in such premises. All such troughs or basins already set must be remodeled in accordance with this rule.

34. All persons having hose attachments are expressly prohibited from using such attachments during the progress of a fire, under a penalty of ten dollars. Parties will be enabled to determine when such is the fact by the increased pressure.

35. Any and all penalties for violation of these regulations, or arrearages for unpaid water rents or charges, may be sued for and collected by the Executive Board.

36. To the amount of all bills which are paid during the first and second months after they become due, no interest will be added.

To the amount of all bills which are paid during the third month after they become due, an addition of one per cent. will be made.

To the amount of all bills which are paid during the fourth and fifth months after they beeome due, an addition of two per cent. will be made.

To the amount of all bills which are paid during the sixth and seventh months after they become due, an addition of three per cent. will be made.

To the amount of all bills which are paid during the eighth and ninth months after they become due, an addition of four per cent. will be made.

To the amount of all bills which are paid during the tenth and eleventh months after they become due, an addition of five per cent. will be made.

To the amount of all bills which are paid during the twelfth month after they become due, an addition of six per cent. will be made.

All bills not paid previous to the first day of May in each year, must then be returned to the City Assessors, and placed in the General Tax Levy, with addition of ten per cent.

All meter bills will be made up to the first day of each month and must be paid promptly. Interest at the rate of one per cent. a month will be charged after the first month.

37. No rebate shall be made from established rates on any bill, except with a concurrence of a majority of the Executive Board, and the clerk shall keep a record of the action of the Board in all such cases.

The ease with which one can obtain a balance from this style of ledger is quite evident. **The Jas. Cunningham, Son Co., Wm. S. Kimball & Co., Michaels, Koch & Stern, Hollister & Co.,** and other leading business houses have it use in their offices.

The Rochester Gas Light Co. supplies all the Coal Gas used on the WEST side of the Genesee River.

PRICE, $2.10 per thousand feet; or if paid before the 10th of the month, $2.00.

TO CONSUMERS.

The following explanations will enable any person to understand the process of ascertaining the Registry of the Gas Meter, and by making observations every day or at short intervals, to satisfy himself that the meter registers with uniform accuracy the amount of gas that passes through it. The following diagrams show the "Indexes" seen on the front of every meter.

EXPLANATION OF INDEX.

The figure or division on the different faces of the index indicates as follows, viz: On the Right Hand Face, *Hundreds*, as 100, 200, 300 cubic feet, &c.; on the Middle face, *Thousands*, as 1,000, 2,000, 3,000 cubic feet, &c.; on the Left Hand Face, *Tens of Thousands*, as 10,000, 20,000, &c., and in this way multiplying by 10 for every additional face.

TO TELL THE STATE OF THE METER.—Look at the *left hand* face of the Index and set down the figure of *least* value next the hand, which on the diagram is *1*. Next look at the *middle* face, and as before set down the figure of the *least* value next the hand, which on the diagram is *3*. Next upon the *right hand* face, take the same relative figure, which is *5*, and you have the figures 1, 3, 5, to which last figure add two ciphers to represent hundreds, and the sum 13,500 is shown to be the present state of the meter. If a previous observation has been taken, subtract the state of the meter at *that* time from the *present* state, and you have the amount consumed in the interval.

☞ In case of the failure of the gas from any cause, immediate notice of the fact should be left at the Company's office.

—THE—

MUTUAL LIFE INSURANCE CO.,

OF NEW YORK.

The LARGEST, the BEST and the CHEAPEST Life Insurance Company in the World.

The MUTUAL LIFE has paid the largest average dividend of any Life Insurance Company.

FACTS BETTER THAN PROMISES.

On a policy on the life of NEHEMIAH OSBURN of this city, issued by the MUTUAL LIFE, 1844, for $5,000, for an Annual Premium of $105.30, the *Cash* dividend that is used in payment of Premium for 1883, was $130.20, or $24.90 more than the amount of Premium. While the policy has been increased to $7,960 by dividends.

On a policy on the life of NATHANIEL T. ROCHESTER of this city, issued by the MUTUAL LIFE, 1845, for $1,000, for an Annual Premium of $35.10 the *Cash* dividend that is used in payment of Premium for 1883, $49.37, or $14 27 more than the amount of Premium, while the policy has been increased to $2,540 by dividends.

Another example showing what a good investment was made by taking a policy in THE MUTUAL LIFE INSURANCE CO. of New York: Policy No. 12,274 was issued October 31st, 1853, for $1,000, to WILLIAM BURKE, late of No. 12 West Main Street, Rochester, N. Y., for an Annual Premium of $38.04.

On the 25th of June, 1881, the Company paid the policy on a death claim	$1,000.00
Also paid addition to the Policy by Dividends	1,469.00
Total paid claim	$2,469.00
Total Premiums paid with 5 per cent, compound interest added,	$2,182.59

Showing a net profit over 5 per cent. compound interest after 27 years of insurance, when needed most, $285.41. The Annual Premium was $38.04, and Annual Dividend was $47.19, nearly 125 *per cent. of the Annual Premium.* Who would not wish such a policy? No Company in the world ever made such results, and no better evidence can be given of its economical and prudent management.

Statement of 13 Year Endowment in the MUTUAL LIFE OF NEW YORK, No. 55,981.

Issued January 2d, 1867. - - Matured January 2d, 1880.

Amount of Policy	$5,000.00
Dividends added	1 922.61
Amount paid by Company, January 2d, 1880,	$6,922.61

Bearing in mind the fact that this person was insured for $5,000, for thirteen years, it also proved as an investment, equal to 5 *per cent.*, compound interest, on the money paid the Company by him. No taxes! Insurance for nothing! Have you any investment as good? The MUTUAL LIFE has a large number of policies in this vicinity of equally good showing. No company stands as high to-day in the minds of shrewd business men.

The Mutual Life Insurance Company of New York, with over $95,000,000.00 cash assets, and over 101,000 policies in force, and *greatly reduced rates* and large dividends, offer advantages superior to any other.

CHEAPEST AND BEST SECURED LIFE INSURANCE.

NORTHWESTERN

Mutual Life Insurance Co.

M D. L. HAYES, - General Agent,

8 State Street, - - Rochester, N. Y.

ITS CHIEF ADVANTAGES ARE SECURITY AND CHEAPNESS.

Its location has given it an immense advantage over companies located in the great moneyed centers, where vast accumulations of wealth and capital lessen the rates of interest. Add to this that many of these companies are compelled by charter requirement to make their investments within their own State, and the cause of the great difference in the cost of policies is partially explained.

The assets of the Northwestern Mutual are now over Twenty Millions of Dollars. Excluding Tontine surplus, it is the *strongest of the five largest American mutual life insurance companies*, as shown by the ratio of surplus to liabilities.

For the past nine years its expenses, taxes and death claims have been paid from its interest income alone. *No other company can show a similar record for a single year.*

Its dividends have exceeded all other companies for the past ten years on similar policies, while its percentage of surplus to liabilities has been increased from 16.6 in 1871 to 28.3 in 1882, as per New York Reports.

The business of the Northwestern Mutual is confined to the healthier portions of the northern United States. Its percentage of mortality to mean amount at risk has been reduced from 1.29 in 1878 to 1.08 in 1882. The average of the ten largest companies for five years, 1877 to 1881, inclusive, is 1.42.

Old Filthy's Method Breeds Disease.

Enterprise and Decency Bought Tobacco Moisteners.

The Object of the above is to show the Methods employed by Retailers to keep their Fine Cut Tobacco in the moist condition so necessary for its Preservation.

The Cut on the Left

Shows "**Old Filthy**" in the act of Spraying the water he has taken into his mouth on the Tobacco spread before him.

Others with more decency spray it through a tube, both of which methods are calculated in the judgment of the most eminent physicians to communicate the germs of the "nameless" and other diseases which make the throat their seat, to the Tobacco undergoing the sprinkling process. The contaminated tobacco in turn, can and does communicate such vile diseases to those who are unfortunate enough to use it.

Another method is to place a wet cloth over the tub at night, this method is a good one, were it not for the reason that the cloth draws the strength from the Tobacco, as shown by the discolored condition of the cloth used.

The Cut on the Right.

Shows the **Only Way** to keep it in the condition the manufacturers intend it, this is accomplished by using a stone cup in the cover of the pail, which does not let the Tobacco get dry and chaffy, and, so prevents the evaporation of the ingredients used by the manufacturers.

STOVE - PIPE FORMERS,

NIAGARA STAMPING & TOOL CO.

147 and 149 ELM STREET,

BUFFALO, N. Y.

Body, and Stove-Pipe Formers.

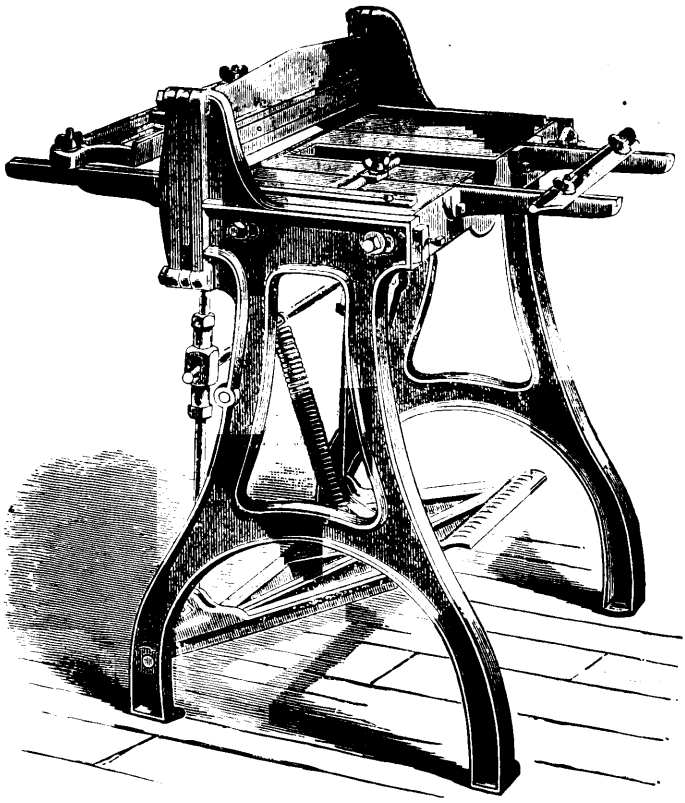

For forming can bodies, stove pipes, &c., into cylindrical shape. These Machines are believed to be the best fitted machines in the market. The rolls are of cold rolled shafting, which is 25 per cent stronger than ordinary round iron. The gearing is machine-cut and matematically correct. By means of this machine 10 or more bodies can be rolled at a time without straining the gear. We make the following sizes :

No. 1,	Rolls	1½	inches	diameter,	16	inches long,	$ 9.00
No. 2,	"	1¾	"	"	30	"	18.00
No. 3,	"	2	"	"	30	"	19.00

Squaring Shears.

The above Cut illustrates our improved Squaring Shears.

We constantly keep a stock of them on hand and can ship immediately on receipt of orders.

"	50,	"	52	"	.....	"	200.00	30.00

These Shears are provided with a complete set of front, bevel and back gages and are a more perfect, finer and *stronger* machine than has ever before been made.

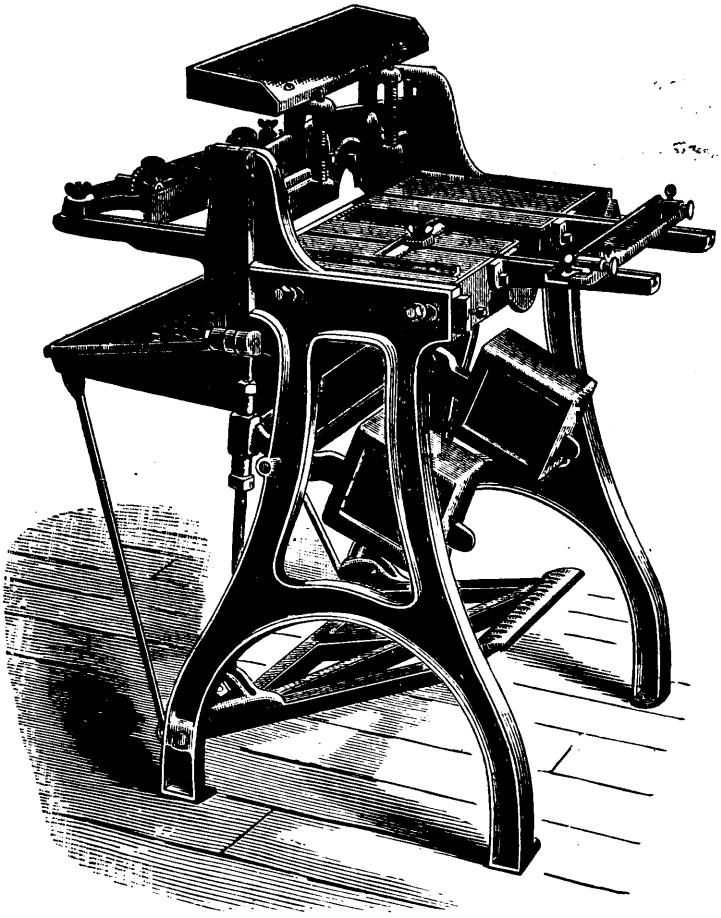

We guaranty these shears to be superior to any.

The knives are machine-ground *and can be set without lining*, which cannot be done on any other shear.

They are now for sale at all the leading hardware dealers, but if you do not find them in stock write to us for prices.

Central Library of Rochester and Monroe County · City Directory Collection · 1883

We also make POWER SQUARING SHEARS. Write for them to us.

If you buy a plain Shear you can at any time order any one or more of the attachments except the hold-down. To fit this to the Shear you will have to send the Shear to our Factory.

Foot Squaring Shears.

This engraving represents what we know to be the completest squaring-shear ever before offered to the public. It is provided either with a weight-device or a spring for lifting the top knife. It furthermore has an iron pan for holding the cut pieces, and adjustable back and front gages having a screw-device for making adjustment. It also has a top shelf for placing tools, patterns etc., while making adjustment and a holding down-piece in front of the upper knife, which prevents the drawing of the sheet. We are perfectly satisfied that this shear is the most serviceable tool ever produced and its unprecedented large sales and the numbers of testimonials received, warrant us in saying *It has no equal.*

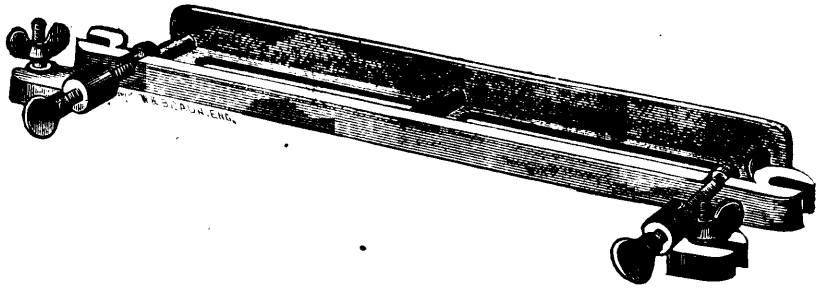

Please bear in mind that you need not buy this Shear with all the improved attachments or any of them. We will sell this Shear either plain with spring and a full complement of plain front, back and bevel Gages, as shown on page 2, or with any one or more of the said improved attachments and patent gages, for instance, we will sell the No. 30 Shear plain, or with hold-down, or plain with pan only &c., thus giving you an opportunity to get just what you want.

Back Gages for Squaring Shears—Style A.

Back Gages for Squaring Shears—Style B.

Front Gages for Squaring Shears.

PATENT PENDING.

These Gages will fit any Square Shear.—Beware of Infringements!

These gages are the simplest, cheapest and best adjustable gages for squaring shears ever before offered to the Trade. They can be used on any squaring shear — no matter whose make — and are applied to the back brackets and the shear-table in the manner of ordinary gages. (For an example see page previous to this.) To make adjustment the two fastening-screws are unscrewed and the gage slided upon the brackets or the shear-table within a short distance of the size to which it is to be finally set. Then the thumb-screws shown on the above gages are unscrewed and final adjustment made by the hand-wheels in Style B and the screws shown in Style A.

These gages can be set in much less time than any other and will pay their cost many times in a year.

Bear in mind that they will fit any other shear, no matter by whom made. All we require, is to *give us the distance from center to center of slot-hole in brackets, or in the table*, on which your old gage now rests and we guarantee a fit and perfect satisfaction. *We have sold hundreds of them so far* and propose to supply every shear in the Country with one of them. Send for one and be convinced. Every Tinner and every Square Shear in the Country should have one.

Beware of infringements.

We are manufacturing a pipe that is indestructible from the action of all the elements, impervious to the action of acids, gases and steam, all of which are found in corporation sewers. These pipes are made from a combination of superior clays, which, by powerful machinery, are rendered uniform throughout—pressed from a steam press, under a pressure of *sixty-three tons* upon each pipe, it is made very compact; and burned in close kilns at a very intense heat, it becomes a thoroughly vitrified and iron-like body. All prominent architects, builders, and all those who have investigated the subject of sewerage, have become convinced that properly burned clay pipe is the only material suitable for underground drainage, and that the sewer and drain pipe manufactured from cement, carbonated stone, and other similar materials, are liable to and do *decay*, *disintegrate* and become *worthless*, as has been many times proved by the officials in many cities.

These vitrified pipe are suitable for well-tubing; are *better than stone or brick*, because cheaper, more durable, and can be made perfectly tight.

☞ We deliver our pipe within the city limits Free of Charge and in good condition.

THE JOHNSTON HARVESTER CO.,

OF BATAVIA, N. Y.

THIS COMPANY have for many years built and put upon the markets of the world their peculiar MACHINES FOR CUTTING GRASS and HARVESTING GRAIN, which have from the beginning taken the FIRST place among all those manufactured for that purpose. They have been tested by Scientific Machinists, by casual observers, and by Practical Farmers, and always with one and the same result, namely:

The First Award for Excellence of Workmanship and Quality of Work Done in the Field.

This Company can show probably the greatest display of ***Gold Medals*** and ***First Prizes*** of any establishment in the trade: on account of the Excellent Workmanship of their Machines and their Universal Success in the field against all their competitors, and before the most experienced Committees and Societies under Royal auspices in foreign countries, and the most Competent Judges in America.

In addition to their regular line of Harvesting Machinery, the JOHNSTON HARVESTER COMPANY now offer the most Complete and Successful ***Self-Binder*** in the Market. It took the ***Grand Prize*** at the Great Trial before the Royal Agricultural Society of England at Derby, in August, 1881. A cut of this Machine is herewith shown, and so great is the demand for it, that with all the immense capacities of the Company, they are unable to supply half their orders.

Farmers desiring this Excellent Machine need to send their orders early for 1883, to insure their supply.

Our Binders use ***Twine*** only, the advantages of which over wire, are obvious to all.

Every pains taken to please our customers.

Some of the points necessary to call attention to, are: First, a movable back and front, which throws off the spring in the leg. Second, it has an advantage in the use of the foot hanging or unhanging, i. e., it can be used with a hanging foot, and it can be used the old way by putting the foot into the boot and then into the toe. Third, it is simple, durable, solid and easy to work.

KONDOLF BROS.,

Wholesale and Retail Dealers in

Hemlock Lake Water Ice,

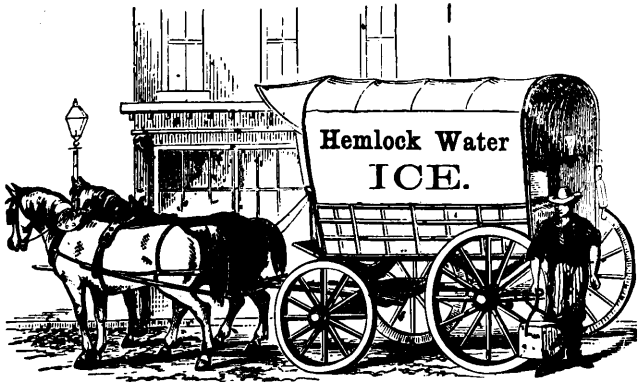

FROM KONDOLF LAKE, MONROE AVENUE.

TO THE PUBLIC.

The Kondolf Lake and Ice Houses were erected at a very large expense, for the purpose of procuring Pure Ice.

Everybody is aware that nearly all the ice sold in Rochester, is from the Canal, Widewaters, Quarries, Stagnant Ponds and River Waters.

This Lake is supplied with Hemlock Lake Water, by a pipe which is continually running, and there is in consequence a constant overflow at the outlet, on the opposite side of the Lake, which keeps it as pure as the water in the Reservoir at Mt. Hope Therefore we ask your patronage as the ice is sold and delivered as cheap as other ice.

Orders Received at 114 Oak St., and at E. McSweeney's, 54 East Main St., by Mail and Telephone.

NEW IMPROVED

HOT AIR FURNACE.

The subscriber would respectfully inform his friends and the public, that no necessary pains nor expense was spared by the inventor in perfecting a HOT AIR FURNACE, adapted to heating buildings of every description; and the large number sold and in use in Buffalo, and the continued increase to his business, shows that they are a success—and he has discovered and reduced to practice the true and correct principle involved in the proper, safe and most economical construction of Furnace for heating. The Furnace insures a healthful and safe heat. The main object of this Furnace has been to secure and concentrate all the heat generated; and to secure this, the Furnace is of a low, horizontal form, and exposes as much of the radiating surface as possible, to the direct and natural action of the cold air as it enters the bottom of the air chamber, and to allow no part of the radiating surface to be subject to the radiation of any other part; by this arrangement, the draft takes its intended course, impinging against the inner side of the great radiating and evaporating surface, and is thus deprived of its heat before entering the chimney. The third object is to secure a pleasant heat, free from all impurities, gas or smoke, and to so arrange the flues as to be easily freed from soot, etc., and easy to kindle a fire, and keep in operation.

Eight different sizes for public and private buildings. Illustrated Circular sent free on application.
