### RULES AND REGULATIONS FOR THE ROCHESTER WATER WORKS

**Extracts:**

1. No person shall make any attachment or connection with the pipes of the Water Works, nor make any repairs, additions to, or alterations of any tap, pipe, cock, or other fixture, connected with the service water-pipe, unless licensed as a Plumber by the Executive Board, under a penalty of twenty-five dollars for each offense.

2. All persons desiring a water supply from the Water Works, must first make application at the Water Office, stating fully the several and various uses for which water is wanted, and the name of a plumber selected by said owner. Such application must be signed by the owner of the premises, or his duly authorized attorney, whereupon a permit will be issued to such named plumber, specifying the particular uses applied for; and when thereafter any other use of water, or additional service pipe or plumbing fixture, or a discontinuance of any particular use is desired, a further application must be made as aforesaid, and all expenses attending the introduction of water to any premises, except for tapping, must be paid by the applicant; but in case the trench is not ready when the tapper is called for, each additional trip required to be made by him will be charged for at the rate of fifty cents. The plumber so designated by the owner, and to whom a permit is issued by the Executive Board, will not be recognized as in any sense the agent of the city, nor will the city hold itself responsible for the acts of said plumber.

3. The tapping of water mains will only be permitted under the immediate direction of the Executive Board, who will also determine the size of tap to be inserted, and furnish the same at the expense of the applicant, to be paid for on delivery. In all cases where boilers are supplied, a suitable safety or vacuum valve must be applied, to prevent damage from collapsing or otherwise, when the water is shut off from the street mains. It is understood that the city will not be liable for any damage which may result to consumers from the shutting off of a water main or service for any purpose whatever, even in cases where no notice is given, and no deduction from water bills will be made in consequence thereof.

4. All water closets and urinals must be provided with self-closing valves before being supplied with water, and no hopper closet will be allowed to be used, and in no case will a bibb or faucet be allowed to be placed over such closet or urinal.

5. Service pipes when running into areas must have the curb-cock secured against the improper use of water by such protection as may be required at the Water Works office, and in all cases where the service pipe passes through exposed places where there is liability of freezing, the same shall be protected in the manner directed by, and to the satisfaction of the Water Service Inspector, and at the expense of the owner of the property, before the water is turned on.

6. Water will be turned on only after the receipt of the plumber’s return, and after the applicant shall have signed such request in a book kept in the Water Registrar’s office for that purpose.
18. Persons taking water must keep their own water pipes and all fixtures connected therewith, in good repair, and protected from frost, at their own expense. They must provide a stop and waste-cock, to be properly located inside the building, and have the pipes so arranged that the water can be drawn from them wherever and whenever there is danger of freezing.

14. When water shall be supplied to more than one party through a single tap, the bill for the whole supply furnished through such tap will be made to the owner of the estate, c. In case of non-payment the water may be shut off, notwithstanding one or more parties may have paid their proportion to such owner, or to any other party.

15. No hydrant, goose-neck, hose-bib, or hose attachment, shall be placed in any yard or area of any premises so situated as to be accessible to persons living in or occupying neighboring premises. No water taker will be allowed to supply water to others except by special permit from the Executive Board, and if found doing so without a permit, the supply will be stopped and the water rent already paid forfeited.

16. The officers of the Water Works, their agents and assistants, may enter the premises of any water taker, at any reasonable time, to examine the pipes and fixtures, the quantity of water used and the manner of its use; and in case of fraudulent representation on the part of any water taker, or unnecessary waste of water, the payment will be forfeited and the supply of water stopped.

17. In case of fire, or an alarm of fire, or in making repairs or constructing new work, the Executive Board reserves the right to shut off the water at once, and keep it shut off as long as may be necessary.

18. Stand pipes are only intended and permitted for fire protection, for which no charge will be made for the water thus used, but all such pipes must be provided with a suitable valve at the bottom of the pipe where the water is let on, the same to be sealed by an agent of the Water Office. In case such seal shall be broken for the extinguishment of any fire, the party shall immediately give notice at the Water Office; and in case such seal shall be broken for any other purpose or use, or any tap introduced into, or connection made with, said stand pipe, the party so offending shall be subject to a fine of not exceeding two hundred dollars. No stand pipe will be allowed in premises where the water is not taken for other than fire purposes, and in any case the Executive Board reserves the right to refuse any or all applications for this purpose in its discretion.

19. Hydrants, goose-necks, taps, hose, water closets, urinals, baths, or other fixtures, will not be permitted to be kept running when not in actual use, under a penalty of ten dollars for each offense.

20. Permission will not be granted to supply two or more buildings or dwellings from a single tap, except the services shall be divided at the curb, and separate services run from separate curb-stops therefor.

21. No person shall hitch any horse, team or animal to any fire hydrant; neither shall open or interfere with the hydrants or valves, or other Water Works fixtures of this city, for any purpose other than extinguishing fires, flushing sewers or pipes, or for regular city improvements made under ordinances of the Common Council, or repairs ordered by the Executive Board, and then only after having obtained specific authority from said Board for such use. Violations of this rule shall subject the offender to a penalty of twenty-five dollars for each offense.

The Chief Engineer of the Water Works is hereby authorized and directed to prosecute, in behalf of the Executive Board, any parties who may violate this rule.

22. Mastic curb-boxes, of patterns approved by the Executive Board, must hereafter be used, and the use of wooden curb-boxes will not be allowed.

23. Sprinkling will be allowed only from May 1st to November 1st, and for one hour between 6 and 9 o'clock, A.M., and for one hour between 6 and 8 o'clock, P.M., and with hose 4 inch in diameter, having a nozzle with a 4 inch orifice. If either is larger an extra charge will be made, and will require a special permit therefor. The use of leaky or defective hose is prohibited. And no person will be allowed to sprinkle adjoining or opposite premises, nor use the water in any other way or for any purpose not authorized by the terms agreed upon with the Executive Board, or their successors in office.

24. Two hose attachments for sprinkling on each lot outside of the building, without charge for the second, will be allowed, and no additional charge will be made for the hose bibbs inside the building, where they are charged for outside of same; but for each additional hose bibb over two, outside of building, an extra charge will be made; but such attachments must not be used for any other purpose than sprinkling.

period not to exceed six hours per day, for six months in each year, and any person using water for such purpose more than six hours per day, will be charged an increased rate. All fountains must have such discharge for waste water as shall be satisfactory to the Executive Board. The right is reserved to discontinue fountains if at any time the public exigency may require it.

26. Any person or persons wishing to discontinue the use of water supplied from the Water Works, must give notice thereof at the Water Office, and they will be charged for the use of water until such notice is given.

27. Wherever water has been turned off for non-payment of rent, or for purposes of repair or construction, or for any other necessary or proper reason, no person is permitted to turn it on again who is not duly authorized so to do by the Water Registrar. And when turned off for non-payment of rent it shall not be turned on again until the party in default shall pay all water rents due.

28. Water bills, for annual rates, exceeding in amount three dollars, will be payable semi-annually in advance, on the first day of May and November in each year, at the office of the Water Registrar; but where the amount of the bill is three dollars or less per annum, said bill shall be payable on May 1st in each year, in advance, and all bills for water for sprinkling and for aquaria and fountains, and fountain jets, must be paid in the May bill. Bills for measured and estimated water will be payable monthly. If bills remain unpaid for fifteen days after they become due, the water may be shut off without notice.

29. The Executive Board reserves the right to attach meters to any receiving pipe, at any time whenever they shall deem it expedient, and thereafter charge for the quantity of water measured or used, instead of the special rates before charged.

30. On all premises into which water is or shall be introduced, full schedule rates will be charged for all uses, and no rebate will be allowed for partial use of water from wells, cisterns, etc. The parties desiring to use the water in this way may procure and set an approved meter at their own expense, and thereafter pay for the water used at meter rates.

31. In case dwellings are supplied with water for baths, urinals, water closets, or other special uses, domestic rates will in all cases be charged in addition.

32. Service pipes attached to the Water Works shall in all cases have a depth of earth covering over them in the street, gutters, and all other places, of not less than four and one-half feet, measured from the established or contemplated grade line of the street or natural surface of the ground, except in locations where the officers of the Water Works shall direct special construction for protection to be made.

33. No private drinking trough or basin for animals will be allowed to be set in connection with the Water Works pipes, unless by special permit from the Executive Board; and in case such permit is granted, the basin shall be of such kind or pattern as the said Board shall designate, and shall be arranged with such fixtures that the flow of water can be regulated by the employees of the Board, and by no other person; and they shall also be provided with a large waste pipe, to discharge surplus water into the sewer and not into the street gutters. In no case will a permit be granted for the erection of such trough or basin in front of premises where water from the Water Works is not taken for inside use in such premises. All such troughs or basins already set must be remodelled in accordance with this rule.

34. All persons having hose attachments are expressly prohibited from using such attachments during the progress of a fire, under a penalty of ten dollars. Parties will be enabled to determine when such is the fact by the increased pressure.

35. Any and all penalties for violation of these regulations, or arrearages for unpaid water rents or charges, may be sued for and collected by the Executive Board.

36. To the amount of all bills which are paid during the first and second months after they become due, no interest will be added.

To the amount of all bills which are paid during the third month after they become due, an addition of one per cent. will be made.

To the amount of all bills which are paid during the fourth and fifth months after they become due, an addition of two per cent. will be made.

To the amount of all bills which are paid during the sixth and seventh months after they become due, an addition of three per cent. will be made.

To the amount of all bills which are paid during the eighth and ninth months after they become due, an addition of four per cent. will be made.

To the amount of all bills which are paid during the tenth and eleventh months after they become due, an addition of five per cent. will be made.

The Rochester Gas Light Co. supplies all the Coal Gas used on the WEST side of the Genessee River.

PRICE, $2.10 per thousand feet; or if paid before the 10th of the month, $2.00.

TO CONSUMERS.
The following explanations will enable any person to understand the process of ascertaining the Registry of the Gas Meter, and by making observations every day or at short intervals, to satisfy himself that the meter registers with uniform accuracy the amount of gas that passes through it. The following diagrams show the "Indexes" seen on the front of every meter.

EXPLANATION OF INDEX.

The figure or division on the different faces of the index indicates as follows, viz.: On the Right Hand Face, Hundreds, as 100, 200, 300 cubic feet, &c.; on the Middle face, Thousands, as 1,000, 2,000, 3,000 cubic feet, &c.; on the Left Hand Face, Tens of Thousands, as 10,000, 20,000, &c., and in this way multiplying by 10 for every additional face.

TO TELL THE STATE OF THE METER.—Look at the left hand face of the Index and set down the figure of least value next the hand, which on the diagram is 1. Next look at the middle face, and as before set down the figure of least value next the hand, which on the diagram is 3. Next upon the right hand face, take the same relative figure, which is 5, and you have the figures 1, 3, 5, to which last figure add two ciphers to represent hundreds, and the sum 13,500 is shown to be the present state of the meter. If a previous observation has been taken, subtract the state of the meter at that time from the present state, and you have the amount consumed in the interval.

In case of the failure of the gas from any cause, immediate notice of the fact should be left at the Company's office.
